The new Esprit jewel collection introduces interplay of mystique, glamour, and natural elegance with the latest fashion.

With the new styles, Esprit jewel adds an additional dimension to the trend: the brand's typical cross design has a particularly mystical and attractive effect in black – cool aspects like "gothic" are "all inclusive" when you adorn yourself with the bestseller among fashionable brands.

Steel is rapidly becoming the "it" material for "fashionistas" around the world. Steel is literally cool – it is dark and deep, never shining too bright, never making a superficial impression. Pieces like the "sincerely" ring and bangle or the "intensely" ring and matching earrings are massive and

substantial, giving the signature Esprit design a new twist by heavily underlining its pure appeal. The highlight of the collection is poised to become a best-selling favourite and future classic: Truly adorable, the "faithfully" style with matching earrings manages to find a fresh perspective for the "crossmania" that has swept through the contemporary jewellery design.

Esprit stands for fashion that is an expression of how we see ourselves and the world around us and not fashion for just fashion's sake. Esprit stands for personality, personal style and for everything that has turned fashion from an obligation to follow the crowd into the freedom of self-expression.

Esprit jewel is proof that this holds equally true of jewellery – the proudest and most detail-conscious of all accessories. The balancing act between the requisite seriousness – without which jewellery cannot be jewellery

– and the carefree style so typical of Esprit demands sensitivity, innovative courage and a healthy respect for tradition, something that Esprit jewel collection whole heartedly delivers.
