

Notes to the Financial Statements

For the year ended 31st March, 2005

36

1. General

The Company is a public limited company incorporated in the Cayman Islands with its securities listed on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”).

The principal activities of the Group are property development and investment, hotel operations, securities investment and trading, and loan financing for hotel operations.

2. Adoption of New Hong Kong Financial Reporting Standards and Potential Impact Arising from the Recently Issued Accounting Standards

In 2004, the Hong Kong Institute of Certified Public Accountants issued a number of new or revised Hong Kong Accounting Standards (“HKASs”) and Hong Kong Financial Reporting Standards (“HKFRSs”) (herein collectively referred to as “new HKFRSs”) which are effective for accounting periods beginning on or after 1st January, 2005. The Group has early adopted the following HKFRSs in the preparation of the financial statements for the year ended 31st March, 2005:

HKAS 40	Investment Properties
Interpretation 21 (“HK-Int 21”)	Income Taxes – Recovery of Revalued Non-Depreciable Assets

The principal effect of the early adoption of HKAS 40 and HK-Int 21 is that all changes in fair value of investment properties are recognised in the income statement and deferred tax is provided on the basis that the carrying amounts of investment properties will be recovered through use. In previous years, the changes in fair value of investment properties were taken directly to investment properties revaluation reserve on a portfolio basis to the extent that the reserve remained in surplus.

The Group has applied HKAS 40 and HK-Int 21 retrospectively and comparative amounts have been restated accordingly. As a result of this change in accounting policies, the Group’s retained profits has been increased by HK\$17,248,000 and the Group’s investment properties revaluation reserve has been decreased by HK\$55,975,000 at 1st April, 2003. This change has resulted in an increase in the Group’s profit for the year of HK\$164,707,000 (2004: HK\$414,000), and decrease in the Group’s investment properties revaluation reserve of HK\$184,761,000 (2004: HK\$8,521,000).

In addition, HKFRS 3 “Business Combination” has been adopted by the Group for business combinations for which the agreement date is on or after 1st January, 2005. The first transaction to which HKFRS 3 has been applied by the Group is the acquisition of Grand Expert Limited in February 2005 (note 39). Such adoption has had no significant impact on the Group’s financial statements for the year ended 31st March, 2005. In accordance with the transitional rules of HKFRS 3, the Group will apply the revised accounting policy of goodwill prospectively from the beginning of its first annual period beginning on or after 1st January, 2005, i.e. 1st April, 2005, to goodwill acquired in business combinations for which the agreement date was before 1st January, 2005.

2. Adoption of New Hong Kong Financial Reporting Standards and Potential Impact Arising from the Recently Issued Accounting Standards *(continued)*

Other than as mentioned above, the Group has not early adopted other new HKFRSs in the financial statements for the year ended 31st March, 2005. The Group has commenced considering the potential impact of other new HKFRSs but is not yet in a position to determining whether other new HKFRSs would have a significant impact on how its results of operations and financial position are prepared and presented. These other new HKFRSs may result in changes in the future as to how the results and financial position are prepared and presented.

3. Significant Accounting Policies

The financial statements have been prepared under the historical cost convention, as modified for the revaluation of certain properties and investments in securities, and in accordance with accounting principles generally accepted in Hong Kong. The principal accounting policies adopted are as follows:

Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries made up to 31st March each year.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

All significant intercompany transactions and balances within the Group are eliminated on consolidation.

Goodwill

Goodwill arising on consolidation represents the excess of the cost of an acquisition over the Group's interest in the fair value of the identifiable assets and liabilities of the acquired subsidiary, associate or jointly controlled entity at the date of acquisition.

Goodwill arising on acquisition prior to 1st April, 2001 continues to be held in reserves, and will be charged to the income statement at the time of disposal of the relevant subsidiary, associate or jointly controlled entity, at such time as the goodwill is determined to be impaired.

Goodwill arising on acquisition on or after 1st April, 2001 with agreement dated before 31st December, 2004 is capitalised and amortised on a straight-line basis over its useful economic life. Goodwill arising on the acquisition of an associate or a jointly controlled entity is included within the carrying amount of the associate or jointly controlled entity.

Notes to the Financial Statements

For the year ended 31st March, 2005

3. Significant Accounting Policies *(continued)*

Goodwill *(continued)*

Goodwill arising on acquisition for which the agreement date is on or after 1st January, 2005 is initially recognised as an asset at cost and is subsequently measured at cost less impairment losses. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

On disposal of a subsidiary, associate or jointly controlled entity, the attributable amount of unamortised goodwill/goodwill previously eliminated against or credited to reserves is included in the determination of the profit or loss on disposal.

Negative goodwill

Negative goodwill represents the excess of the Group's interest in the fair value of the identifiable assets and liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition over the cost of acquisition.

Negative goodwill arising on acquisition prior to 1st April, 2001 continues to be held in reserves and will be credited to income at the time of disposal of the relevant subsidiary, associate or jointly controlled entity.

Negative goodwill arising on acquisition on or after 1st April, 2001 is presented as deduction from assets. To the extent that the negative goodwill is attributable to losses or expenses anticipated at the date of acquisition, it is released to income in the period in which those losses or expenses arise. The remaining negative goodwill is recognised as income on a straight-line basis over the remaining average useful life of the identifiable acquired depreciated assets. To the extent that such negative goodwill exceeds the aggregate fair value of the acquired identifiable non-monetary assets, it is recognised in income immediately.

Negative goodwill arising on the acquisition of an associate or a jointly controlled entity is deducted from the carrying value of that associate or jointly controlled entity.

Investments in subsidiaries

Investments in subsidiaries are included in the Company's balance sheet at cost less any identified impairment loss.

3. Significant Accounting Policies *(continued)*

Interests in associates

The consolidated income statement includes the Group's share of the post-acquisition results of its associates for the year. In the consolidated balance sheet, interests in associates are stated at the Group's share of the net assets of the associates in so far as it has not already been amortised, less any identified impairment loss.

When the Group transacts with its associates, unrealised profits and losses are eliminated to the extent of the Group's interest in the relevant associates, except where unrealised losses provide evidence of an impairment of the asset transferred.

Investments in jointly controlled entities

Joint venture arrangements which involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities.

The Group's interests in jointly controlled entities are included in the consolidated balance sheet at the Group's share of the net assets of the jointly controlled entities less any identified impairment loss. The Group's share of the post-acquisition results of jointly controlled entities is included in the consolidated income statement.

When the Group transacts with its jointly controlled entities, unrealised profits and losses are eliminated to the extent of the Group's interest in the joint venture, except where unrealised losses provide evidence of an impairment of the asset transferred.

Investments in jointly controlled assets

Where a group company undertakes its activities under joint venture arrangements directly, constituted as jointly controlled assets, the Group's share of jointly controlled assets and any liabilities incurred jointly with other venturers are recognised in the financial statements of the relevant company and classified according to their nature. Liabilities and expenses incurred directly in respect of interests in jointly controlled assets are accounted for on an accrual basis.

Income from the sale or use of the Group's share of the output of jointly controlled assets, together with its share of joint venture expenses, are recognised when it is probable that the economic benefits associated with the transaction will flow to/from the Group.

Investment properties

Investment properties are completed properties which are held for their investment potential, any rental income being negotiated at arm's length.

Investment properties are stated at their fair value based on independent professional valuations at the balance sheet date. Any changes in fair value of investment properties are recognised in the income statement.

Notes to the Financial Statements

For the year ended 31st March, 2005

3. Significant Accounting Policies (continued)

Properties under development held for long term purposes

Properties under development held for long term purposes are classified as non-current assets and are stated at cost less any impairment loss recognised. Cost comprises land costs and development costs including attributable interest and professional charges capitalised during the development period.

No depreciation is provided in respect of properties under development held for long term purposes.

Property, plant and equipment

Property, plant and equipment are stated at cost or valuation less depreciation and any identified impairment loss.

No depreciation is provided in respect of land held on freehold.

Depreciation is provided to write off the cost of the assets over their estimated useful lives from the date on which they become fully operational using the straight-line method, at the following rates per annum:

Land in Hong Kong	Over unexpired lease term
Buildings on land held under:	
Long lease	2%
Freehold	2%
Medium-term lease	Shorter of lease terms or 50 years
Motor vessels	20%
Motor vehicles	20%
Plant and machinery	10%-20%
Furniture, fixtures and equipment	10%-20%

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the terms of the leases.

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in the income statement.

Hotel property comprises interests in land and buildings and its integral fixed plant which are collectively used in the operation of a hotel and are stated at their open market values on the basis of ongoing periodic professional valuations. Any increase arising on revaluation of hotel property is credited to the revaluation reserve, except to the extent that it reverses a revaluation decrease of the same asset previously recognised as an expense, in which case, this surplus is credited to the income statement to the extent of the deficit previously charged. A decrease in net carrying amount arising on revaluation of hotel property is charged to the income statement to the extent that it exceeds the balance, if any, on the revaluation reserve relating to a previous revaluation of that hotel property. On subsequent sale or retirement of a revalued hotel property, the attributable revaluation surplus is transferred to retained profits. Depreciation is provided to write off the valuation of hotel properties over the lease term.

3. Significant Accounting Policies *(continued)*

Completed properties for sale

Completed properties for sale are stated at the lower of cost and net realisable value. Net realisable value is determined by reference to estimated sale proceeds less estimated selling expenses.

Properties under development for sale

Properties under development for sale are stated at the lower of cost and net realisable value. Net realisable value represents the estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale.

The cost of properties under development for sale includes land cost, construction cost, borrowing costs capitalised and other direct development expenditure.

Investments in securities

Investments in securities are recognised on a trade-date basis and are initially measured at cost.

All securities other than held-to-maturity debt securities are measured at subsequent reporting dates at fair value.

Where securities are held for trading purposes, unrealised gains and losses are included in net profit or loss for the year. For other securities, unrealised gains and losses are dealt with in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognised in equity is included in net profit or loss for the period.

Impairment

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. Impairment losses are recognised as an expense immediately, unless the relevant asset is carried at a revalued amount under another standard, in which case the impairment loss is treated as a revaluation decrease under that standard.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately, unless the relevant asset is carried at a revalued amount under another standard, in which case the reversal of the impairment loss is treated as a revaluation increase under that other standard.

Notes to the Financial Statements

For the year ended 31st March, 2005

3. Significant Accounting Policies *(continued)*

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average cost method.

Convertible bonds

Convertible bonds are separately disclosed and regarded as debt unless conversion actually occurs. The finance costs recognised in the income statement in respect of the convertible bonds are calculated so as to give a constant rate of return on the outstanding balance.

The costs incurred in connection with the issue of the convertible bonds are deferred and amortised on a straight-line basis over the life of the convertible bonds from the date of issue of the bonds to their final redemption date. If any of the bonds are redeemed or converted prior to the final redemption date, the relevant portion of any remaining unamortised costs will be charged immediately to equity.

Foreign currencies

Transactions in foreign currencies are initially recorded at the rates of exchange prevailing on the dates of the transactions. Monetary assets and liabilities denominated in currencies are re-translated at the rates prevailing on the balance sheet date. Profits and losses arising on exchange are included in net profit or loss for the year.

On consolidation, the assets and liabilities of the Group's overseas operations are translated at exchange rates prevailing on the balance sheet date. Income and expense items are translated at the average exchange rates for the year. Exchange differences arising, if any, are classified as equity and transferred to the Group's exchange reserve. Such translation differences are recognised as income or as expenses in the period in which the operation is disposed of.

Taxation

Taxation represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income and expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill (or negative goodwill) or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

3. Significant Accounting Policies *(continued)*

Taxation *(continued)*

Deferred tax liabilities are recognised for taxable temporary differences arising on interests in subsidiaries, associates and jointly controlled entities, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Leases

Leases are classified as finance leases when the terms of the leases transfer substantially all the risks and rewards of ownership of the assets concerned to the Group. Assets held under finance leases are capitalised at their fair values at the date of acquisition. The corresponding liability to the lessor, net of interest charges, is included in the balance sheet as a finance lease obligation. Finance costs, which represent the difference between the total leasing commitments and the fair value of the assets acquired, are charged to the income statement over the period of the relevant lease so as to produce a constant periodic rate of charge on the remaining balance of the obligations for each accounting period.

All other leases are classified as operating leases and the annual rentals are charged to the income statement on a straight-line basis over the periods of the respective tenancies.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, are capitalised as part of the cost of those assets. Capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

Notes to the Financial Statements

3. Significant Accounting Policies *(continued)*

Revenue recognition

For property under development contracted for sale prior to 1st January, 2005 in advance of completion, revenue is recognised and calculated on a percentage of completion basis when construction has progressed beyond the preliminary stages of development. The percentage used is based on the proportion of construction costs incurred at the balance sheet date to estimated total construction costs. Profit recognised on this basis is limited to the extent that the economic benefits associated with the transaction will flow to the Group. For property under development contracted for sale on or after 1st January, 2005 in advance of completion, revenue is recognised when the title has passed and relevant risks and rewards associated with the property under development have been transferred.

Sales of other goods are recognised when goods are delivered and title has passed.

Revenue from hotel operations is recognised when the relevant services are provided.

Rental income from properties under operating leases is recognised on a straight-line basis over the periods of the respective tenancies.

Building management fee income is recognised when the relevant services are provided.

Interest income is accrued on a time basis, by reference to the principal outstanding and at the interest rate applicable.

Retirement benefits schemes

The retirement benefit costs charged in the income statement represent the contributions payable in respect of the current year to the Mandatory Provident Fund Scheme and other retirement benefit schemes.

Notes to the Financial Statements

For the year ended 31st March, 2005

4. Turnover

Turnover represents the aggregate amount of gross rental and management fee income, proceeds from sale of properties and securities, loan interest income and income from hotel operations, less returns and discounts, during the year as follows:

	2005 HK\$'000	2004 HK\$'000
Sale of properties	318,501	653,388
Rental income and management fee income	68,609	59,782
Hotel operations	59,108	36,095
Sale of securities	13,590	10,805
Loan interest income	61,560	35,046
Other operations	25,719	24,743
	547,087	819,859

5. Business and Geographical Segments

Business segments

During the year, the directors have made certain changes to the classification of business segments in order to have better presentation of the Group's financial statements.

For management purposes, the Group is currently organised into four operating divisions – property development and investment, hotel operations and relevant loan financing, and treasury management. These divisions are the basis on which the Group reports its primary segment information. Other operations include sale of boiler products and other interest income.

Principal activities are as follows:

- Property development and investment – properties development, letting and sale
- Hotel operations – hotel operations and management
- Loan financing – loan financing for hotel operations
- Treasury management – investment and trading in securities

18. Interests in Jointly Controlled Entities

	THE GROUP	
	2005 HK\$'000	2004 HK\$'000
Share of net assets	73,238	72,530

Details of the Group's jointly controlled entities at 31st March, 2005 are as follows:

Name of entity	Country of registration and operations	Proportion of nominal value of registered/ordinary share capital held by the Group	Principal activities
Shangqiu Yongyuan Development Company Limited	PRC	68% (note)	Construction and operation of highway
Dorvic Hotel F & B Limited	Hong Kong	60%	Restaurant operations

Note: Under a joint venture agreement, the Group is required to make capital contribution of 68% in Shangqiu Yongyuan Development Company Limited, an equity joint venture company in the PRC established for the construction and operation of highway, for a term of 21 years commencing from 31st July, 1997. Upon the completion of the construction work, the Group is entitled to 85% of the profits earned until it has recovered dividends to an amount equivalent to all its contribution. Thereafter, the Group is entitled to 25% of the profits whereas the PRC joint venture partner is entitled to the remaining 75% until it has effectively recovered dividends equivalent to all its contribution for the agreed valuation of the relevant highway. The Group's entitlement to share of profits is then in proportion to its contribution. At the end of the 21 years, the joint venture will be dissolved and the Group's interest in the joint venture will be surrendered to the PRC party for no consideration. Therefore, the investment cost of interest in the jointly controlled entity of HK\$2,904,000 was amortised and the Group's share of profit of the joint venture project during the year is HK\$2,112,000 (2004: HK\$2,572,000).

34. Convertible Bonds *(continued)*

Notes:

- (a) In April 2004, the Company issued zero coupon convertible bonds with a principal amount of US\$66,989,000 (the "US\$ Bonds"). The holders of the US\$ Bonds are entitled to convert the convertible bonds into ordinary shares of the Company at an initial conversion price of HK\$2.25 (subsequently adjusted to HK\$2.18) per share during the period from 13th May, 2004 to 14th March, 2009, or to require the Company to redeem all or some of the US\$ Bonds on 13th April, 2006 at 102.01% of their principal amount. The Company may redeem all but not some only of the US\$ Bonds, on or after 13th April, 2006, subject to certain conditions. Unless previously redeemed, converted or purchased and cancelled, the US\$ Bonds will be redeemed at 105.10% of their principal amount on 13th April, 2009. The US\$ Bonds are listed on the Stock Exchange. Details of the issue of the Bonds were disclosed in the Company's circular dated 6th April, 2004.

During the year, an aggregate principal amount of US\$63,839,000 of the US\$ Bonds were converted into ordinary shares of the Company.

- (b) In December 2004, the Company issued zero coupon convertible bonds with a principal amount of HK\$754,400,000 (the "HK\$ Bonds"). The holders of the HK\$ Bonds are entitled to convert the convertible bonds into ordinary shares of the Company at an initial conversion price of HK\$4.10 per share, subject to adjustment, during the period from 11th January, 2005 to 10th November, 2009, or to require the Company to redeem all or some of the HK\$ Bonds on 10th December, 2006 at 104.58% of their principal amount. The Company may redeem all but not some only of the HK\$ Bonds on or after 10th June, 2005, subject to certain conditions. Unless previously redeemed, converted or purchased and cancelled, the HK\$ Bonds will be redeemed at 111.84% of their principal amount of 10th December, 2009. The HK\$ Bonds are listed on the Stock Exchange. Details of the issue of the Bonds were disclosed in the Company's circular dated 9th December, 2004.

During the year, no conversion rights were exercised by the holders of the HK\$ Bonds.

35. Share Option Scheme

The Company's share option scheme was adopted pursuant to a resolution passed on 28th August, 2002 (the "Share Option Scheme") for the purpose of providing incentives and rewards to employees or executive or officers of the Company or any of its subsidiaries (including executive and non-executive directors) and business consultants, agents and legal or financial advisers who will contribute or have contributed to the Company or any of its subsidiaries. Under the Share Option Scheme, the board of directors of the Company may grant options to eligible employees, including directors of the Company and its subsidiaries, to subscribe for shares in the Company.

At 31st March, 2005, the number of shares in respect of which options had been granted and remained outstanding under the Share Option Scheme was 30,000,000 (2004: Nil), representing 2.12% (2004: Nil) of the shares of the Company in issue at that date. The total number of shares in respect of which options may be granted under the Share Option Scheme is not permitted to exceed 10% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders. The number of shares issued and to be issued in respect of which options granted and may be granted to any individual in any one year is not permitted to exceed 1% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders.

Options granted will be taken up upon payment of HK\$1 per option. Options may be exercised at any time not exceeding a period of 10 years from the date on which the share options is accepted. The exercise price is determined by the directors of the Company, and will not be less than the higher of (i) the closing price of the Company's shares on the date of grant, (ii) the average closing price of the shares for the five business days immediately preceding the date of grant; and (iii) the nominal value of the Company's share.

Notes to the Financial Statements

For the year ended 31st March, 2005

Total consideration received by the Group during the year for taking up the options granted amounted to HK\$1,038,000 (2004: Nil).

The weighted average closing price of the Company's shares immediately before the date(s) on which the options were exercised is HK\$3.60.

The financial impact of share options granted is not recorded in the Company's or the Group's balance sheet until such time as the options are exercised, and no charge is recognised in the income statement in respect of the value of options granted in the year. Upon the exercise of the share options, the resulting shares issued are recorded by the Company as additional share capital at the nominal value of the shares, and the excess of the exercise price per share over the nominal value of the shares is recorded by the Company in the share premium account. No options lapsed or were cancelled during the financial year under review. Options which lapse or are cancelled prior to their exercise date are deleted from the register of outstanding options.

– within one year	18	348
	1,327	2,167

Leases are negotiated for an average term of two years and rentals are fixed over the period.

The Company did not have any significant commitments under non-cancellable operating leases.

45. Contingent Liabilities

	THE GROUP		THE COMPANY	
	2005 HK\$'000	2004 HK\$'000	2005 HK\$'000	2004 HK\$'000
Guarantees issued to secure banking and other facilities made available to				
– subsidiaries	–	–	1,779,332	1,591,360
– an investee company	102,536	64,185	102,536	64,185

In addition, the Group had the following contingent liabilities:

- (a) The Group has given guarantee in respect of mortgage loans provided to the home buyers of a property project in the PRC. At 31st March, 2005, the total amount of mortgages outstanding which are subject to these guarantees was HK\$115,539,000 (2004: HK\$35,537,000).

Notes to the Financial Statements

45. Contingent Liabilities (continued)

- (b) In previous year, a subsidiary of the Company (the "Subsidiary") was sued by two consultants providing management, consulting and advisory service concerning business strategy and corporate finance activities of the Subsidiary. The two consultants entered into a consulting contract with the Subsidiary in 1999 in lieu of cash for service rendered. The two consultants alleges that the Subsidiary fraudulently misrepresented and concealed material facts regarding the proposed investment from them and claim for compensation of damages amounting to approximately HK\$5,843,000. Moreover, the two consultants also alleges that the Subsidiary owes them salaries, payment in lieu of notice for early termination of the contract and the reimbursement for expenses regarding to the employment contract as the board of directors of the Subsidiary amounting to approximately HK\$5,865,000. Motion of dismiss was filed to the United States court and the claim is still in progress. While the outcome of these proceedings cannot be estimated with certainty at this stage, based on independent legal advice obtained, the directors are of the opinion that the outcome of this case would not have a material adverse impact on the financial position of the Group.
- (c) The State Administration of Taxation of the PRC issued a circular as Guo Shui Han [2004] No.938 on 2nd August, 2004 to strengthen levy of land appreciation tax on property developers. In the opinion of the directors, after consulting the tax consultants and the tax bureau of the relevant city, land appreciation tax will not be levied in respect of properties already completed and, full provision for land appreciation tax has not been made in the financial statements. The Group, has not, however, been able to secure written confirmation of those individual city policies, and the directors consider that there is a small possibility that land appreciation tax might be fully levied in accordance with the rule of State Administration of Taxation. Should such levies take place, additional land appreciation tax would be approximately HK\$80 million.

46. Related Party Transactions

During the year, the Group entered into the following significant transactions with related parties:

Related party	Nature of transaction	2005 HK\$'000	2004 HK\$'000
Directors and their associates	Interest expenses	371	–
Associates	Dividend income	6,577	3,750
	Building management fee expenses	2,699	1,596

Notes to the Financial Statements

46. Related Party Transactions *(continued)*

In addition, the Group recognised compensation income amounting to approximately HK\$28 million (2004: Nil) from a minority shareholder of a subsidiary for termination of the tenancy of factory building entered into between the Group and the minority shareholder.

These transactions have been entered into on terms agreed by parties concerned.

Details of the balances with related parties as at the balance sheet date are set out in the balance sheet and notes 20, 21, 25, 27, 28, 29 and 36 to the financial statements.

During the year ended 31st March, 2004, the Group disposed of its entire shareholdings of Far East Technology International Limited ("FEI") to certain directors of the Group at a consideration of HK\$20,700,000. On 22nd December, 2003, the Group entered into conditional sale and purchase agreements, pursuant to which, inter alia, a wholly owned subsidiary of the Company agreed to acquire the entire interests in Tang City Properties Pte. Limited ("TCP") from Far East Technology International Limited and Mr. Dennis Chiu at a consideration of S\$1, and the Company agreed to procure the refinancing of the bank loan facility of S\$25 million obtained by TCP and to assume liabilities of S\$1.1 million due to external trade and non-trade creditors of TCP. TCP and its subsidiaries were incorporated in Singapore and held certain investment properties in Singapore. The transaction had no material effect on the result of the Group.

47. Retirement Benefits Schemes

The Group operates a Mandatory Provident Fund Scheme ("the MPF Scheme") for all qualifying employees in Hong Kong under the rules and regulations of the Mandatory Provident Fund Authority. The assets of the MPF Scheme are held separately from those of the Group, in funds under the control of trustees. Contributions are made based on a percentage of the participating employees' relevant income from the Group and are charged to the income statement as they become payable in accordance with the rules of the MPF Scheme. When an employee leaves the MPF Scheme, the mandatory contributions are fully vested with the employee. The retirement benefits scheme contributions charged to income statement during the year amounted to HK\$2,102,000 (2004: HK\$1,073,000).

According to the relevant laws and regulations in the PRC, the PRC subsidiary is required to contribute a certain percentage of the salaries of their employees to the state-managed retirement benefit scheme. The only obligation of the Group with respect to the retirement benefit scheme is to make the required contributions under the scheme.
