

Financial Highlights.

TURNOVER (HK\$ Million)

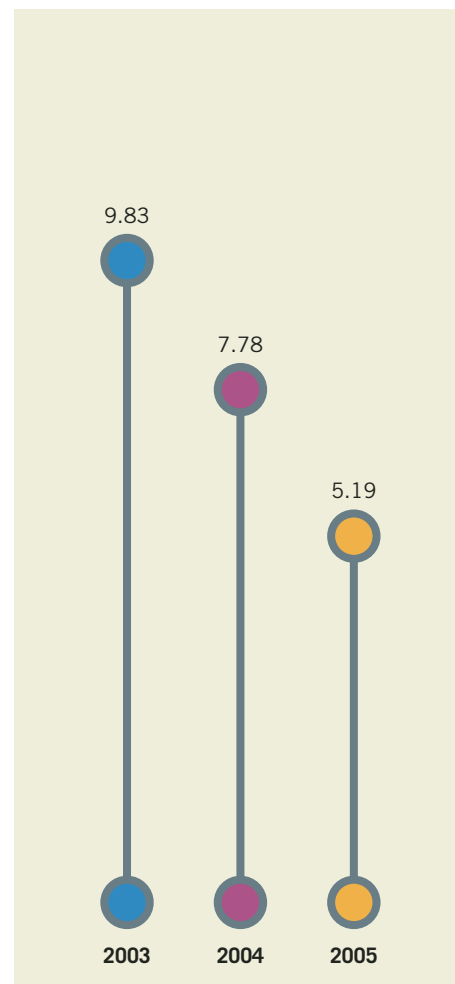

A 16% year-on-year growth in turnover was generated from increased shipments for applications in both architectural and industrial requirements in China and overseas markets.

EBITDA* (HK\$ Million)

The cost-plus pricing policy enable the Group to continue managing its exposure to aluminum price fluctuations. Largely in line with the increase in turnover, there was a 18% year-on-year increase in EBITDA.

BASIC EARNINGS PER SHARE (HK Cents)

As a result of a 182% increase in finance costs, mostly incurred in connection with the senior notes issue, Basic EPS decreased 33% year on year.

* EBITDA — Earnings before interest, tax and depreciation
