For the year ended 31st March, 2006

#### 1. General

The Company is a public limited company incorporated in the Cayman Islands with its shares listed on The Stock Exchange of Hong Kong Limited (the "Stock Exchange"). The address of the register office and principal place of business of the Company are disclosed in the corporate information to the annual report.

The principal activities of the Group are property development and investment, hotel operations, securities investment and trading, and loan financing for hotel operations.

The consolidated financial statements are presented in Hong Kong dollars, which is the same as the functional currency of the Company.

### 2. Adoption of New and Revised Hong Kong Financial Reporting Standards/ Changes in Accounting Policies

In the current year, the Group has adopted, for the first time, a number of new and revised Hong Kong Financial Reporting Standards ("HKFRS(s)"), Hong Kong Accounting Standards ("HKAS(s)") and Interpretations ("INTs") (hereinafter collectively referred to as "new HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") that are effective for accounting periods beginning on or after 1st January, 2005, except for HKAS 40 "Investment Properties" and HK-INT 21 "Income Tax – Recovery of Revalued Non-Depreciable Assets" which have been early adopted in 2005. The application of the new HKFRSs has resulted in a change in the presentation of the consolidated income statement, consolidated balance sheet and consolidated statement of changes in equity. In particular, the presentation of minority interests and share of tax of associates/jointly controlled entities have been changed. The changes in presentation have been applied retrospectively. The adoption of the new HKFRSs has resulted in changes to the Group's accounting policies in the following areas that have an effect on how the results for the current or prior accounting years are prepared and presented:

#### Business combinations

In the current year, the Group has applied HKFRS 3 "Business Combinations" which is effective for business combinations for which the agreement date is on or after 1st January, 2005. The principal effects of the application of HKFRS 3 to the Group are summarised below:

#### Goodwill

In previous years, goodwill arising on acquisitions prior to 1st January, 2005 was capitalised and amortised over its estimated useful life. The Group has applied the relevant transitional provisions in HKFRS 3, under which the Group has discontinued amortising goodwill from 1st April, 2005 onwards and goodwill will be tested for impairment at least annually in the financial period in which the acquisition takes place. Goodwill arising on acquisitions after 1st January, 2005 is measured at cost less accumulated impairment losses (if any) after initial recognition. Comparative figures have not been restated (See Note 2A for the financial impact).

For the year ended 31st March, 2006

### 2. Adoption of New and Revised Hong Kong Financial Reporting Standards/ Changes in Accounting Policies (continued)

Business combinations (continued)

Excess of the Group's interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over cost (previously known as "negative goodwill")

In accordance with HKFRS 3, any excess of the Group's interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over the cost of acquisition ("discount on acquisition") is recognised immediately in profit or loss in the period in which the acquisition takes place. In previous years, negative goodwill arising on acquisitions prior to 1st January, 2005 was presented as a deduction from assets and released to income based on an analysis of the circumstances from which the balance resulted. In accordance with the relevant transitional provisions in HKFRS 3, the Group has derecognised all negative goodwill at 1st April, 2005 amounting to HK\$23,081,000 which was previously presented as a deduction from assets, with a corresponding increase to retained profits.

#### Share-based payment

In the current year, the Group has applied HKFRS 2 "Share-based Payment" which requires an expense to be recognised where the Group buys goods or obtains services in exchange for shares or rights over shares, or in exchange for other assets equivalent in value to a given number of shares or rights over shares. The principal impact of HKFRS 2 on the Group is in relation to the expensing of the fair value of directors' and employees' share options of the Company determined at the date of grant of the share options over the vesting period. Prior to the application of HKFRS 2, the Group did not recognise the financial effect of these share options until they were exercised. In relation to share options granted before 1st April, 2005, the Group has not applied HKFRS 2 to share options granted on or before 7th November, 2002 and share options that were granted after 7th November, 2002 and had vested before 1st April, 2005 in accordance with the relevant transitional provisions. As all outstanding share options of the Group were granted and vested before 1st April, 2005, the application of HKFRS 2 has had no financial impact on the results of the Group for current or prior years.

#### Owner-occupied leasehold interest in land

In previous years, owner-occupied leasehold land and buildings were included in property, plant and equipment and measured using the cost model. In the current year, the Group has applied HKAS 17 "Leases". Under HKAS 17, the land and buildings elements of a lease of land and buildings are considered separately for the purposes of lease classification, unless the lease payments cannot be allocated reliably between the land and buildings elements, in which case, the entire lease is generally treated as a finance lease. To the extent that the allocation of the lease payments between the land and buildings elements can be made reliably, the leasehold interests in land are reclassified to prepaid lease payments under operating leases, which are carried at cost and amortised over the lease term on a straight-line basis. This change in accounting policy has been applied retrospectively (See Note 2A for the financial impact).

For the year ended 31st March, 2006

### 2. Adoption of New and Revised Hong Kong Financial Reporting Standards/ Changes in Accounting Policies (continued)

#### Hotel properties

Previously, the Group's self-operated hotel properties were accounted for using the revaluation model, being revalued amounts less accumulated depreciation and impairment losses, and were included in property, plant and equipment. HKAS 17 "Leases" requires payments made for acquisition of leasehold land interests to be accounted for as operating leases, and be measured at cost and amortised over the lease term on a straight-line basis. Certain payments for acquisition of leasehold land interests of the Group's hotel properties cannot be separated reliably from the building element. In order to carry the leasehold land interests at cost less amortisation, the directors change its accounting policy in respect of the Group's hotel properties from the revaluation model to the cost model. This change in accounting policy has been applied retrospectively and comparative figures have been adjusted accordingly (See note 2A for the financial impact)

#### Financial instruments

In the current year, the Group has applied HKAS 32 "Financial Instruments: Disclosure and Presentation" and HKAS 39 "Financial Instruments: Recognition and Measurement". HKAS 32 requires retrospective application. HKAS 39, which is effective for annual periods beginning on or after 1st January, 2005, generally does not permit the recognition, derecognition or measurement of financial assets and liabilities on a retrospective basis. The principal effects resulting from the implementation of HKAS 32 and HKAS 39 are summarised below:

#### Convertible bonds denominated in United States dollars and Hong Kong dollars

Previously, two convertible bonds denominated in United States dollars and Hong Kong dollars were classified as liabilities and recorded at the proceeds received, net of premium payable on redemption and direct issue costs, on the balance sheet. Such convertible bonds contain a liability component and an embedded conversion option, which are required to be accounted for separately in accordance with HKAS 39. On 1st April, 2005, the Group designated such convertible bonds as a whole as "financial liabilities at fair value through profit or loss" in accordance with the transitional provisions in HKAS 39 (see Note 2A for the financial impact).

#### Classification and measurement of financial assets and financial liabilities

The Group has applied the relevant transitional provisions in HKAS 39 with respect to classification and measurement of financial assets and financial liabilities that are within the scope of HKAS 39.

For the year ended 31st March, 2006

### 2. Adoption of New and Revised Hong Kong Financial Reporting Standards/ Changes in Accounting Policies (continued)

Financial instruments (continued

Classification and measurement of financial assets and financial liabilities (continued,

By 31st March, 2005, the Group classified and measured its debt and equity securities in accordance with the alternative treatment of Statement of Standard Accounting Practice ("SSAP") 24 "Investments in Securities". Under SSAP 24, investments in debt or equity securities are classified as "trading securities" and "non-trading securities" as appropriate. Both "trading securities" and "non-trading securities" are measured at fair value. Unrealised gains or losses of "trading securities" are reported in profit or loss for the period in which gains or losses arise. Unrealised gains or losses of "non-trading securities" are reported in equity until the securities are sold or determined to be impaired, at which time the cumulative gain or loss previously recognised in equity is included in profit and loss for that period. From 1st April, 2005 onwards, the Group classifies and measures its debt and equity securities in accordance with HKAS 39. Under HKAS 39, financial assets are classified as "financial assets at fair value through profit or loss", "available-for-sale financial assets," "loans and receivables," or "held-to-maturity financial assets." Financial assets at fair value through profit or loss and equity respectively. "Loans and receivables" are measured at amortised cost using the effective interest method after initial recognition.

On 1st April, 2005, the Group designated all equity-linked notes with carrying amount of HK\$340,836,000 which was previously classified as "non-trading securities" under SSAP 24 as "financial assets at fair value through profit or loss". As a result of this change in accounting policy, an increase in fair value of such equity-linked notes for the current year amounting to HK\$2,067,000 has been recognised in the income statement. The cumulative unrealised gains or losses of such equity-linked notes previously reported in equity at 1st April, 2005 continue to be held in equity. On subsequent decognition or impairment of the investment, the unrealised gain or loss remaining in equity will be transferred to profit or loss. All the other financial assets were reclassified and measured in accordance with HKAS 39 on 1st April, 2005. Comparative figures have not been restated.

#### Financial assets and financial liabilities other than debt and equity securities

From 1st April, 2005 onward, the Group has classified and measured its financial assets and liabilities other than debt and equity securities (which were previously outside the scope of SSAP 24) in accordance with the requirements of HKAS 39. As mentioned above, financial assets under HKAS 39 are classified as "financial assets of fair value through profit or loss", "available-for-sale financial assets", loans and receivables" or "held-to-maturity financial assets". Financial liabilities are generally classified as "financial liabilities at fair value through profit or loss" or "other financial liabilities". Financial liabilities at fair value through profit or loss are measured at fair value, with changes in fair value being recognised in profit or loss directly. Other financial liabilities are carried at amortised cost using the effective interest method after initial recognition.

For the year ended 31st March, 2006

### 2. Adoption of New and Revised Hong Kong Financial Reporting Standards/ Changes in Accounting Policies (continued)

#### Derivatives

From 1st January, 2005 onwards, all derivatives that are within the scope of HKAS 39 are required to be carried at fair value at each balance sheet date regardless of whether they are deemed as held for trading or designated as effective hedging instruments. Under HKAS 39, derivatives (including embedded derivatives separately accounted for from the non-derivative host contracts) are deemed as held-for-trading financial assets or financial liabilities, unless they qualify and are designated as effective hedging instruments. The corresponding adjustments on changes in fair values would depend on whether the derivatives are designated as effective hedging instruments, and if so, the nature of the item being hedged. For derivatives that are deemed as held for trading, changes in fair values of such derivatives are recognised in profit or loss for the period in which they arise.

# 2B. Potential Impact Arising on the New and Revised Accounting Standards not yet Effective

The Group has not early applied the following new and revised standards and interpretations that have been issued but are not yet effective. The directors of the Company anticipate that the application of these new HKFRSs will have no material impact on the financial statements of the Group except for HKAS 39 and HKFRS 4 (Amendments) Financial guarantee contracts for which the directors are still in the process of assessing the impact.

### 3. Significant Accounting Policies

The consolidated financial statements have been prepared on the historical cost basis except for certain properties and financial instruments, which are measured at fair values, as explained in the accounting policies set as below.

The consolidated financial statements have been prepared in accordance with HKFRSs issued by the HKICPA. In addition, the consolidated financial statements included applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited and by the Hong Kong Companies Ordinance.

The principal accounting policies adopted are as follows:

#### Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

#### Goodwill

#### Goodwill arising on acquisitions prior to 1st January, 2005

Goodwill arising on an acquisition of a subsidiary, an associate or a jointly controlled entity for which the agreement date is before 1st January, 2005 represents the excess of the cost of an acquisition over the Group's interest in the fair value of the identifiable assets and liabilities of the relevant subsidiary, associate or jointly controlled entity at the date of acquisition.

Goodwill arising on acquisition with agreement dated before 1st January, 2005 is capitalised and amortised on a straight-line basis over its useful economic life. Goodwill arising on the acquisition of an associate or a jointly controlled entity is included within the carrying amount of the associate or jointly controlled entity.

For previously capitalised goodwill arising on acquisitions, the Group has discontinued amortisation from 1st April, 2005 onwards, and such goodwill is tested for impairment annually, and whenever there is an indication that the cash generating unit to which the goodwill relates may be impaired (see the accounting policy below).

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

Goodwill (continued)

Goodwill arising on acquisitions on or after 1st January, 2005

Goodwill arising on an acquisition of a subsidiary, an associate or a jointly controlled entity for which the agreement date is on or after 1st January, 2005 represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of the relevant subsidiary, associate or jointly controlled entity at the date of acquisition. Such goodwill is carried at cost less any accumulated impairment losses.

Capitalised goodwill arising on an acquisition of a subsidiary is presented separately in the balance sheet. Capitalised goodwill arising on an acquisition of an associate or a jointly controlled entity is included in the cost of the investment of the relevant associate or jointly controlled entity.

Excess of an acquirer's interest in the net fair value of an acquiree's identifiable assets, liabilities and contingent liabilities over cost ("discount on acquisitions")

A discount on acquisition arising on an acquisition of a subsidiary, an associate or a jointly controlled entity for which an agreement date is on or after 1st January, 2005 represents the excess of the net fair value of an acquiree's identifiable assets, liabilities and contingent liabilities over the cost of the business combination. Discount on acquisition is recognised immediately in profit or loss. A discount on acquisition arising on an acquisition of an associate or a jointly controlled entity is included as income in the determination of the investor's share of results of the associate or jointly controlled entity in the period in which the investment is acquired.

As explained in note 2 above, all negative goodwill as at 1st April, 2005 has been derecognised with a corresponding adjustment to the Group's retained profits.

#### Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable.

Revenue from sale of properties in the ordinary course of business (including revenue from pre-completion contracts for the sale of development properties entered into on or after 1st January, 2005) is recognised when all of the following criteria are met:

- the significant risks and rewards of ownership of the properties are transferred to buyers;
- neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the properties are retained;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

#### Revenue recognition (continued)

Revenue from pre-completion contracts for the sale of development properties entered into before 1st January, 2005 was recognised over the period from the execution of a binding sale agreement to the completion of the development on the basis of development costs incurred for work performed to date as a proportion of estimated total development costs.

Sales of goods are recognised when goods are delivered and title has passed.

Revenue from hotel operations is recognised when the relevant services are provided.

Rental income from properties under operating leases is recognised on an straight-line basis over the periods of the respective tenancies.

Building management fee income is recognised when the relevant services are provided.

Interest income from a financial asset is accrued on a time basis, by reference to the principal outstanding and at the interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

#### Interests in associates

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting. Under the equity method, investments in associates are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the profit or loss and of changes in equity of the associate, less any identified impairment loss. When the Group's share of losses of an associate equals or exceeds its interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. An additional share of losses is provided for and a liability is recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that associate.

Where a group entity transacts with an associate of the Group, profits and losses are eliminated to the extent of the Group's interest in the relevant associate.

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

#### Interests in jointly controlled entities

Joint venture arrangements which involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities.

The results and assets and liabilities of jointly controlled entities are incorporated in the consolidated financial statements using the equity method of accounting. Under the equity method, investments in jointly controlled entities are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the profit or loss and of changes in equity of the jointly controlled entities, less any identified impairment loss. When the Group's share of losses of a jointly controlled entity equals or exceeds its interest in that jointly controlled entity (which includes any long-term interests that, in substance, form part of the Group's net investment in the jointly controlled entity), the Group discontinues recognising its share of further losses. An additional share of losses is provided for and a liability is recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that jointly controlled entity.

When the Group transacts with its jointly controlled entities, unrealised profits and losses are eliminated to the extent of the Group's interest in the joint venture, except where unrealised losses provide evidence of an impairment of the asset transferred.

#### Investments in jointly controlled assets

When a group company undertakes its activities under joint venture arrangements directly, constituted as jointly controlled assets, the Group's share of jointly controlled assets and any liabilities incurred jointly with other venturers are recognised in the financial statements of the relevant company and classified according to their nature. Liabilities and expenses incurred directly in respect of interests in jointly controlled assets are accounted for on an accrual basis.

Income from the sale or use of the Group's share of the output of jointly controlled assets, together with its share of joint venture expenses, are recognised when it is probable that the economic benefits associated with the transaction will flow to/from the Group.

#### Investment properties

On initial recognition, investment properties are measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured using the fair value model. Gains or losses arising from changes in the fair value of investment property are included in profit or loss for the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement in the year in which the item is derecognised.

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

#### Property, plant and equipment

Property, plant and equipment other than building under development are stated at cost less accumulated depreciation and accumulated impairment loss.

Depreciation is provided to write off the cost of items of property, plant and equipment other than building under development over their estimated useful lives and after taking into accounting of their estimated residual value, items of property, plant and equipment other than properties under development using the straight-line method.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the terms of the leases.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the income statement in the year in which the item is derecognised.

#### Building under development for own use

Buildings under development held for own use are classified as non-current assets and are sated at cost less any impairment loss recognised. Cost comprises development costs including attributable interest and professional charges capitalised during the development period.

No depreciation is provided in respect of buildings under development held for long term purposes.

#### Prepaid lease payments

The prepaid lease payments represent upfront payment for land use rights and leasehold land are initially recognised at cost and released to income statement over the lease term on a straight-line basis.

#### Completed properties for sale

Completed properties for sale are stated at the lower of cost and net realisable value. Net realisable value is determined by reference to estimated sale proceeds less estimated selling expenses.

60 For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

Properties under development for sale are stated at the lower of cost and net realisable value. Net realisable value represents the estimated selling price in the ordinary course of business less estimated costs of completion and the estimated costs necessary to make the sale.

The cost of properties under development for sale includes land cost, construction cost, borrowing costs capitalised and other direct development expenditure.

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. Impairment losses are recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in its functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in equity, in which cases, the exchange differences are also recognised directly in equity.

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

#### Foreign currencies (continued)

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Company (i.e. Hong Kong dollars) at the rate of exchange prevailing at the balance sheet date, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised as a separate component of equity (the exchange reserve). Such exchange differences are recognised in profit or loss in the period in which the foreign operation is disposed of.

#### Taxation

Taxation represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the income statement because it excludes items of income and expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's current tax liabilities are measured using the tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on interests in subsidiaries, associates and jointly controlled entities, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

#### 62 For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

#### Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight-line basis.

#### Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, are capitalised as part of the cost of those assets. Capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowing pending their expenditure on qualifying assets is deducted from the borrowing cost eligible for capitalisation.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

#### Retirement benefits schemes

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

#### Financial instruments

Financial assets and financial liabilities are recognised on the balance sheet when a group entity becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

#### Financial assets

The Group's financial assets are classified into three categories, including "loans and receivables", "financial assets at fair value through profit or loss" and "available-for-sale investments". All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. The accounting policies adopted in respect of each category of financial assets are set out below.

For the year ended 31st March, 2006

### 3. Significant Accounting Policies (continued)

Financial assets (continued)

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables (including amounts due from associates, jointly controlled entities, an investee company and a minority shareholder, loan receivable, debtors and deposits with banks or investment banks) are carried at amortised cost using the effective interest method, less any identified impairment losses. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to a restriction that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

#### Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss has two subcategories, including financial assets held for trading and those designated at fair value through profit or loss on initial recognition. At each balance sheet date subsequent to initial recognition, financial assets at fair value through profit or loss are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

#### Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as any of the other categories (set out above). At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are measured at fair value. Changes in fair value are recognised in equity, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in profit or loss. Any impairment losses on available-for-sale financial assets are recognised in profit or loss. Impairment losses on available-for-sale equity investments will not reverse in subsequent periods. For available-for-sale debt investments, impairment losses are subsequently reversed if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

For available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity instruments, they are measured at cost less any identified impairment losses at each balance sheet date subsequent to initial recognition. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired. The amount of the impairment loss is measured as the difference between the carrying amount of the asset and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses will not reverse in subsequent periods.

#### Financial liabilities and equity

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instruments is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The Group's financial liabilities are generally classified into financial liabilities at fair value through profit or loss, other financial liabilities and convertible loan notes. The accounting policies adopted for financial liabilities and equity instruments are set out below.

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss has two subcategories, including financial liabilities held for trading and those designated at fair value through profit or loss on initial recognition. At each balance sheet date subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

#### Other financial liabilities

Other financial liabilities include creditors, amounts due to directors, related companies, associates and a minority shareholder, a jointly controlled entity and bank and other borrowings are subsequently measured at amortised cost, using the effective interest rate method.

#### Convertible bonds

Convertible bonds are regarded as compound instruments, consisting of a liability component and an equity component, or in the case that the conversion options are not settled by the exchange of a fixed amount for fixed number of equity instrument, the accounting standard requires the issuer to recognise the compound financial instrument in the form of financial liability with embedded derivatives. Derivatives embedded in a financial instrument are treated as separated derivatives when their economic risks and characteristics are not closely related to those of the host contract (the liability component) and the host contract is not carried at fair value through profit or loss. The Group, however, has elected to designate its convertible bonds with embedded derivatives as a whole as financial liabilities at fair value through profit or loss on initial recognition. At each balance sheet date subsequent to initial recognition, the entire convertible bonds are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

Transaction costs that are directly attributable to the issue of the convertible bonds designated as financial liabilities at fair value through profit or loss are recognised immediately in profit or loss in the period in which they arise.

### 3. Significant Accounting Policies (continued)

Financial liabilities and equity (continued)

#### Equity instruments

Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

#### Derecognition

Financial assets are derecognised when the rights to receive cash flows from the assets expire or, the financial assets are transferred and the Group has transferred substantially all the risks and rewards of ownership of the financial assets. On derecognition of a financial assets, the difference between the carrying amount of the financial asset and the sum of the consideration received and cumulative gain or loss that had been recognised directly in equity is recognised in profit or loss.

For financial liabilities, they are removed from the Group's balance sheet (i.e. when the obligation specified in the relevant contract is discharged, cancelled or expired). The difference between the carrying amount of the financial liability derecognised and the consideration paid is recognised in profit or loss.

### 4. Key Sources of Estimation Uncertainty

The key assumptions concerning the future, and other key sources of estimating uncertainty at the balance sheet date, that have a significant risk of giving rise to a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

#### Investment properties

Investment properties are stated at fair value based on the valuation performed by independent professional valuers In determining the fair value, the valuers have based on a method of valuation which involves certain estimates. In relying on the valuation report, the directors of the Company have exercised their judgement and are satisfied that the method of valuation is reflective of the current market conditions and underlying assumptions adopted for capitalization of the income derived from the existing tenancies with due provision for the reversionary income potential of the property interests.

#### Estimated impairment of property, plant and equipment

The Group assesses annually whether property, plant and equipment have any indication of impairment, in accordance with the relevant accounting policies. Where an indication of impairment is noted, the recoverable amounts of property, plant and equipment will be estimated based on value-in-use calculations or scrap value. These calculations and valuations require the use of judgment and estimates on future operating cash flows and discount rates adopted and estimated market value of the scraps.

### 4. Key Sources of Estimation Uncertainty (continued)

The Group makes allowances for bad and doubtful debts when there is objective evidence that debtors balances are impaired. The balances of the debtors are based on the present value of estimated future cash flows discounted at the effective rate computed at initial recognition. The directors involved a considerable amount of judgement in assessing the ultimate realization of these receivables including the current creditworthiness and the past collection history of each customer. If the financial creditors of customers of the group were to deteriorate, resulting in an impairment of their activity to make payments, additional allowance may be required.

### 5. Financial Risk Management Objectives and Policies

The Group's major financial instruments include debtors, loans receivables, investments held for trading, available-for-sale investments, financial assets at fair value through profit or loss, amounts due from a jointly controlled entity and associates, creditors, amounts due to directors, related companies, associates and a minority shareholder, and bank and other borrowings. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

The Group is exposed to cash flow interest rate risk on variable-rate bank borrowings. Management monitors the related cash flow interest rate risk exposure closely and will consider hedging significant cash flow interest rate risk exposure should the need arise.

The Group's maximum exposure to credit risk in the event of the counterparties failure to perform their obligations as at 31st March, 2006 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated balance sheet. The Group's credit risks primarily attributable to its debtors, loans receivables, amounts due from associates, an investee company, a minority shareholder and jointly controlled entities. In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The Group has no significant concentration of credit risk, with exposure spread over a number of counterparties and customers.

The credit risk for bank deposits and deposits with investment banks is limited because the counterparties are banks or financial institutions with high credit ratings.

### 5. Financial Risk Management Objectives and Policies (continued)

#### Price risk

The Group's available-for-sale investments, held-for-trading investments and financial assets at fair value through profit and loss are measured at fair value at each balance sheet date. Therefore, the Group is exposed to equity and debt security price risk. The management manages this exposure by maintaining a portfolio of investments with different risk profiles.

#### 6. Revenue

Revenue represents the aggregate amount of proceeds from sale of properties and financial instruments, gross rental and management fee income, loan interest income and income from hotel operations, less returns and discounts, during the year as follows:

| Group's share of results of associates for the year | 6,818            | 12,154           |

The results of Gold Coin (Hong Kong) Limited ("GCL") and Guangdong XinShiDai Real Estate Limited ("XSDREL") incorporated into the Group's financial statements are derived from their financial statements made up to 31st December, 2005. This was the financial reporting date established when the associates were incorporated, and the directors of the associates do not consider any change to their current financial reporting date. For the purpose of applying equity method of accounting, the financial statements of GCL and XSDREL for the year ended 31st December, 2005 have been used as the directors of the Company consider there is no adjustment required to be made as there have not been any material transactions between that date to 31st March, 2006.

The Group has discontinued recognition of its share of losses of certain associates. The amounts of unrecognised share of those associates, extracted from the relevant management accounts of associates, both for the year and cumulatively, are as follows:

Note: Under the respective joint venture agreements, the above entities are jointly controlled by the Group with other shareholders. Accordingly, these two entities are classified as jointly controlled entities.

For the year ended 31st March, 2006

#### 19. Interests in Jointly Controlled Entities (continued)

The summarised financial information in respect of the Group's jointly controlled entities which are accounted for using the equity method is set out below:

|  | 2006<br>HK\$'000 | 2005<br>HK\$'000 |
|--|------------------|------------------|
| Total assets   | 134,604          | 131,094          |
| Total liabilities  | (6,151)          | (6,779)          |
| Group's share of net assets  | 128,453          | 124,315          |
| Revenue  | 8,206            | 11,705           |
| Expenses   | (3,168)          | (9,220)          |
| Profit for the year  | 5,038            | 2,485            |
| Group's share of results of jointly controlled entities for the year | 4,283            | 2,112            |

Note: Under a joint venture agreement, the Group is required to make 68% of total capital contribution in Shangqiu Yongyuan Development Company Limited, an equity joint venture company in the PRC established for the construction and operation of highway, for a term of 21 years commencing from 31st July, 1997. Upon the completion of the construction work, the Group is entitled to 85% of the profits earned until it has recovered dividends to an amount equivalent to all its contributions. Thereafter, the Group is entitled to 25% of the profits whereas the PRC joint venture partner is entitled to the remaining 75% until it has effectively recovered dividends equivalent to all its contributions for the agreed valuation of the relevant highway. The Group's entitlement to a share of profits is then in proportion to its contribution. At the end of the 21 years, the joint venture will be dissolved and the Group's interest in the joint venture will be surrendered to the PRC party for no consideration. Therefore, the investment cost of the interest in the jointly controlled entity of HK\$2,904,000 (2005: HK\$2,904,000) is amortised over 21 years under the joint venture agreement and the Group's share of profit of the joint venture project during the year is being HK\$4,282,530 (2005: HK\$2,112,000).

It is the Group's policy to lease certain of its motor vehicles, fixtures and equipment under finance leases. The average lease terms is range from 2 to 3 years. The average effective borrowing rates is range from 5% to 8% per annum during the year. Interest rates are fixed at the contract date. All leases are on a fixed repayment basis and no arrangements have been entered into for contingent rental payments.

The fair value of the Group's financial lease obligations, determined based on the present value of the estimated future cash flow discounted using the prevailing market rate at the balance sheet date approximates to their carrying amount.

### 41. Share Option Scheme

The Company's share option scheme was adopted pursuant to a resolution passed on 28th August, 2002 (the "Share Option Scheme") for the purpose of providing incentives and rewards to employees or executive or officers of the Company or any of its subsidiaries (including executive and non-executive directors) and business consultants, agents and legal or financial advisers who will contribute or have contributed to the Company or any of its subsidiaries. Under the Share Option Scheme, the board of directors of the Company may grant options to eligible employees, including directors of the Company and its subsidiaries, to subscribe for shares in the Company.

At 31st March, 2006, the number of shares in respect of which remained outstanding under the Share Option Scheme was 28,030,000 (2005: 30,000,000), representing 1.95% (2005: 2.12%) of the shares of the Company in issue at that date. The total number of shares in respect of which options may be granted under the Share Option Scheme is not permitted to exceed 10% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders. The number of shares issued and to be issued in respect of which options granted and may be granted to any individual in any one year is not permitted to exceed 1% of the shares of the Company in issue at any point in time, without prior approval from the Company's shareholders.

Options granted will be taken up upon payment of HK\$1 per option. Options may be exercised at any time not exceeding a period of 10 years from the date on which the share options is accepted. The exercise price is determined by the directors of the Company, and will not be less than the higher of (i) the closing price of the Company's shares on the date of grant, (ii) the average closing price of the shares for the five business days immediately preceding the date of grant; and (iii) the nominal value of the Company's share.

Note: Pursuant to the application of HKAS 39, two convertible bonds denominated in United States dollars and Hong Kong dollars respectively were designated as financial liabilities at fair value through profit or loss as referred to in note 37 since 1st April, 2005.

### 43. Amounts due to a Minority Shareholder and a Jointly Controlled Entity

The amounts are unsecured and interest free, except for an amount of HK\$35,240,000 (2005: HK\$35,964,000) due to a minority shareholder which bears interest at 7.05% (2005: 6.55%) and matures in November 2013. The minority shareholder and jointly controlled entity have confirmed that the amounts will not be demanded for repayment within next twelve months from the balance sheet date and, accordingly, the amounts are shown as non-current. In the opinion of the directors, the carrying amounts due to minority shareholder and jointly controlled entity approximate their fair value.

#### 44. Deferred Taxation

The major deferred tax (assets) liabilities recognised by the Group and movements thereon during the current and prior years are as follows:

#### 44. Deferred Taxation (continued)

At 31st March, 2006, the Group has unused tax losses of HK\$336,677,000 (2005: HK\$306,501,000) available for offset against future profits. A deferred tax asset has been recognised in respect of HK\$235,462,000 (2005: HK\$224,351,000) of such tax losses. No deferred tax asset has been recognised in respect of the remaining tax losses due to the unpredictability of future profit streams. The unrecognised tax losses may be carried forward indefinitely.

At the balance sheet date, the aggregate amount of temporary differences associated with undistributed earnings of subsidiaries for which deferred tax liabilities have not been recognised was HK\$67,345,000 (2005: HK\$65,596,000). No liability has been recognised in respect of these differences because the Group is in a position to control the timing of the reversal of the temporary differences and it is probable that such differences will not reverse in the foreseeable future.

The Company did not have any significant unprovided deferred taxation arising in the year or at the balance sheet date.

### 45. Jointly Controlled Assets

The Group has entered into a joint venture agreement in the form of a jointly controlled asset to develop a multistorey building. The Group has a 50% interest in the joint venture.

At the balance sheet date, the aggregate amounts of assets and liabilities recognised in the financial statements in relation to interests in jointly controlled assets are as follows:

|                                       | 2006<br>HK\$'000 | 2005<br>HK\$'000 |

### 47. Major Non-cash Transactions

During the year, the Group entered into finance lease arrangements in respect of asset with a total capital value at the inception of the leases of HK\$610,000 (2005: HK\$1,088,000).

As referred to in note 40, the Company issued shares for 2005 final dividends and 2006 interim dividends pursuant to scrip dividend scheme totalling HK\$54,996,000 (2005: HK\$39,858,000).

As referred to in note 37, an aggregate principal amount of HK\$14,805,000 (2005: HK\$497,453,000) of the US\$ Bonds were converted into ordinary shares of the Company.

104 For the year ended 31st March, 2006

#### 48. Pledge of Assets

At the balance sheet date, the Group had pledged the following assets:

- The Group's properties, bank deposits and investments held for trading with an aggregate carrying amount of approximately HK\$3,399,431,000 (2005: HK\$2,074,641,000), HK\$55,102,000 (2005: HK\$3,901,000) and HK\$1,576,000 (2005: HK\$1,556,000) respectively, together with assignments of sales proceeds, insurance proceeds, rental income, revenues and all other income generated from the relevant properties and properties of associates and third parties were pledged to the Group's bankers and loan creditors to secure banking and loan facilities granted to the Group and an associate to the extent of approximately HK\$2,822,947,000 (2005: HK\$2,572,480,000) and HK\$5,000,000 (2005: HK\$5,000,000), respectively.
  - The Group's bank deposits of approximately HK\$2,765,000 (2005: HK\$3,000,000) were pledged to a Group's banker to secure a guarantee given by the banker in favour of subsidiary of the Company.
- (b) The Group's investments held for trading, available-for-sale investments and derivative financial instruments, other financial assets and deposits with an aggregate carrying amount of approximately HK\$414,182,000 (2005: HK\$237,746,000) were pledged to the Group's financial institutions to secure margin trading facilities granted to the Group in respect of securities transactions to the extent of approximately HK\$645,095,000 (2005: HK\$37,613,000), of which HK\$54,427,000 (2005: HK\$32,449,000) were utilised.
- Interests in certain subsidiaries of the Company have been pledged as part of the security to secure certain bank borrowings granted to the Group.
- (d) The Group has subordinated its amount due from an investee company of approximately HK\$119,995,000 (2005: HK\$119,995,000) to a financial institution to secure general credit facility granted to the investee company.

### 50. Operating Lease Arrangements

#### The Group as lessor:

At the balance sheet date, investment properties and completed properties for sale with carrying amount of HK\$1,111,016,000 (2005: HK\$800,955,000) and HK\$95,503,000 (2005: HK\$11,765,000) respectively were let out under operating leases.

Gross rental income earned during the year is HK\$46,361,000 (2005: HK\$60,173,000), of which HK\$38,176,000 (2005: HK\$53,196,000) was derived from letting of investment properties. The property held has committed tenants for the next one to three years.

At the balance sheet date, the Group had contracted with tenants for the following future minimum lease payments:

|  | 2006<br>HK\$'000 | 2005<br>HK\$'000          |

|  | 15,466           | 1,327            |

Leases are negotiated for an average term of two years and rentals are fixed over the period.

### 51. Contingent Liabilities

The Group had the following contingent liabilities at the balance sheet date:

- (a) The Group has given guarantee to bankers to secure banking and other facilities made available to an investee company of HK\$154,322,000 (2005: HK\$102,536,000).
- (b) The Group has given a guarantee in respect of mortgage loans provided to the home buyers of a property project in the PRC. At 31st March, 2006, the total amount of mortgages outstanding which are subject to these guarantees was HK\$2,769,000 (2005: HK\$115,539,000).

For the year ended 31st March, 2006

#### 51. Contingent Liabilities (continued)

- (c) In previous year, a subsidiary of the Company (the "Subsidiary") was sued by two consultants providing management, consulting and advisory service concerning business strategy and corporate finance activities of the Subsidiary. The two consultants entered into a consulting contract with the Subsidiary in 1999 in lieu of cash for service rendered. The two consultants alleges that the Subsidiary fraudulently misrepresented and concealed material facts regarding the proposed investment from them and claim compensation for damages amounting to approximately HK\$5,843,000. Moreover, the two consultants also allege that the Subsidiary owes them salaries, payment in lieu of notice for early termination of the contract and the reimbursement for expenses regarding the employment contract as the board of directors of the Subsidiary amounting to approximately HK\$5,865,000. A motion of dismiss the claim was filed in the United States court and the claim is still in progress. While the outcome of these proceedings cannot be estimated with certainty at this stage, based on independent legal advice obtained, the directors are of the opinion that the outcome of this case would not have a material adverse impact on the financial position of the Group.
- (d) The State Administration of Taxation of the PRC issued a circular as Guo Shui Han [2004] No.938 on 2nd August, 2004 to strengthen the levy of land appreciation tax on property developers. In the opinion of the directors, after consulting its legal adviser and the tax bureau of the relevant city, land appreciation tax will not be levied in respect of properties already completed and full provision for land appreciation tax has not been made in the financial statements. The Group has not, however, been able to secure written confirmation of those individual city policies, and the directors consider that the chance that full land appreciation tax might be levied is less than probable in accordance with the rule of State Administration of Taxation. Should such levies take place, land appreciation tax would be approximately HK\$49 million.

### 52. Related Party Transactions

During the year, the Group entered into the following significant transactions with related parties:

| Related party                  | Nature of transaction            | 2006<br>HK\$'000 | 2005<br>HK\$'000 |

During the year ended 31st March, 2005, the Group recognised compensation income amounting to approximately HK\$28 million from a minority shareholder of a subsidiary for termination of the tenancy of factory building entered into between the Group and the minority shareholder.

These transactions have been entered into on terms agreed by parties concerned.

Details of the balances with related parties as at the balance sheet date are set out in the balance sheet and relevant notes to the financial statements.

#### Compensation of key management personnel

The remuneration of directors and other members of key management during the year was as follows:

|  | 2006<br>HK\$'000 | 2005<br>HK\$'000 |
|--|------------------|------------------|
| Short-term benefits Post-employment benefits | 8,941<br>48      | 8,305<br>52      |
|  | 8,989            | 8,357            |

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

#### 53. Retirement Benefits Schemes

The Group operates a Mandatory Provident Fund Scheme ("the MPF Scheme") for all qualifying employees in Hong Kong under the rules and regulations of the Mandatory Provident Fund Authority. The assets of the MPF Scheme are held separately from those of the Group, in funds under the control of trustees. Contributions are made based on a percentage of the participating employees' relevant income from the Group and are charged to the income statement as they become payable in accordance with the rules of the MPF Scheme. When an employee leaves the MPF Scheme, the mandatory contributions are fully vested with the employee. The retirement benefits scheme contributions charged to income statement during the year amounted to HK2,353,000 (2005: HK\$\$2,102,000).

According to the relevant laws and regulations in the PRC, the PRC subsidiary is required to contribute a certain percentage of the salaries of their employees to the state-managed retirement benefit scheme. The only obligation of the Group with respect to the retirement benefit scheme is to make the required contributions under the scheme.
