STANDARD CHARTERED PLC RESULTS FOR THE SIX MONTHS ENDED 30 JUNE 2007

HIGHLIGHTS

STANDARD CHARTERED PLC RESULTS FOR THE SIX MONTHS ENDED 30 JUNE 2007

Reported Results

- Operating income up 28 per cent to \$5,263 million from \$4,112 million in H1 2006 (H2 2006: \$4,508 million)
- Profit before taxation up 30 per cent to \$1,980 million, compared with \$1,527 million in H1 2006 (H2 2006: \$1,651 million)
- Profit attributable to ordinary shareholders* up 26 per cent to \$1,370 million, compared to \$1,088 million in H1 2006 (H2 2006: \$1,165 million)
- Total assets up 25 per cent to \$297 billion from \$238 billion at H1 2006 (H2 2006: \$266 billion)

Performance Metrics**

- Normalised earnings per share up 19.7 per cent at 100.7 cents from 84.1 cents in H1 2006 (H2 2006: 87.3 cents)
- Normalised return on ordinary shareholders' equity of 16.7 per cent (H1 2006: 17.9 per cent, H2 2006: 16.2 per cent)
- Interim dividend per share increased 11 per cent to 23.12 cents
- Normalised cost income ratio of 54.7 per cent (H1 2006: 53.6 per cent, H2 2006: 56.6 per cent)
- Total capital ratio at 15.6 per cent (H1 2006: 14.2 per cent, H2 2006: 14.3 per cent)

Significant achievements

- Record Profit before taxation of \$1,980 million, an increase of 30 per cent on H1 2006
- Two powerful engines of growth: Consumer Banking and Wholesale Banking each contributed over \$570 million incremental income in the first half
- Undertaken substantial investments for future growth while delivering excellent earnings per share growth of 19.7 per cent
- Incorporated our business in China
- Launched The Standard Chartered Private Bank in six new markets
- Integrated our new acquisitions in Taiwan and Pakistan ahead of schedule, providing substantial new engines of growth

Commenting on these results, the Chairman of Standard Chartered PLC, Mervyn Davies, said:

"Over the last few years we have consistently produced record results while building a strong foundation for growth. Today we are seeing the rewards of a balanced and diverse business, leading the way in the dynamic markets of Asia, Africa and the Middle East. We have had an excellent first half performance and are keeping up the pace."

* Profit attributable to ordinary shareholders is after the deduction of dividends payable to the holders of the non-cumulative redeemable preference shares (see note 3 on page 40).

** Results on a normalised basis reflect the results of Standard Chartered PLC and its subsidiaries (the "Group") excluding items presented in note 4 on page 40.

STANDARD CHARTERED PLC – CHAIRMAN'S STATEMENT

I am pleased to report that Standard Chartered has had an excellent first six months in 2007 driven by strong organic growth in both Consumer Banking and Wholesale Banking.

- Profit before taxation is up 30 per cent to \$1.98 billion
- Income has increased 28 per cent to \$5.26 billion
- Normalised earnings per share ("EPS") growth is 19.7 per cent

The Board has declared an interim dividend of 23.12 cents per share, up 11 per cent.

Over the last few years we have consistently produced record results while building a strong foundation for growth. Today we are seeing the rewards of our balanced and diverse business, leading the way in the dynamic markets of Asia, Africa and the Middle East.

CAPTURING THE OPPORTUNITIES

These results come from the quality of our people and our disciplined approach to managing our resources over the last few years. In turn they allow us to invest in opportunities that will produce continued strong growth in the years to come.

I see this potential first hand on my travels and no visitor can be left in any doubt about the huge wealth that is being generated in China, India and the Middle East. In other words, in our markets.

This is an historic time for the Group and our management must be bold enough to invest in the growth opportunities. In China, as it opens its market. In India, as its companies explore overseas. In the Middle East, as its economies diversify and in Africa, as it benefits from a rich resource base. And we must also invest in the Group's core infrastructure as we expand at pace.

Balancing the investment for the future with today's shareholder returns is a challenge we, as a public company, must face. I believe these results show that we are getting this balance right.

GOVERNANCE AND RISK

As I travel around and talk to experienced bankers and investment managers, it is quite clear they share our concerns over the level of asset prices, the amount of debt in leveraged deals, loose covenants and the degree to which some people believe this market will last forever.

We know that risks can emerge quickly: the sub-prime lending issue in the US is a classic example of this. We are not exposed to that and, indeed, we are seeing no significant credit deterioration in our markets. However we need to be vigilant and we remain extremely disciplined on our loan and credit standards.

Standard Chartered has high standards of risk management and governance. As we announced a few months ago our Board is being bolstered by the appointments from 1 August of John Peace as Deputy Chairman and Senior Independent Director and Sunil Mittal as a Non-Executive Director. I am also delighted to announce that Gareth Bullock has been appointed Group Executive Director with effect from 6 August. Gareth is a highly experienced banker who has been with the Group for 11 years and is a great addition to the Board. All of these individuals have outstanding business experience and add further depth and diversity to our Board. I am looking forward to working with them.

SUMMARY

We have had an excellent first half performance and are keeping up the pace.

Mervyn Davies, CBE
Chairman
7 August 2007

Over the last five years the Group has changed significantly. Then we had just over 500 branches, now we have 1,450. Then we had 28,000 staff, now we have 64,000. Our income growth figure was six per cent to \$2.2 billion and our EPS was down 10 per cent to 36.1c. Today’s figures are rather different with our income up 28 per cent to over \$5 billion and EPS up 19.7 per cent to 100.7c.

My predecessor as Group Chief Executive, Mervyn Davies, gave the Group leadership, direction and a new performance edge. I am proud to have taken on the baton to lead the Group on the next phase of the journey.

My first eight months as Chief Executive have been very busy. I wanted to visit as many of our markets as possible to spend time with our customers, staff and regulators. So far this year I have made twelve country visits in Asia, including four trips to China. I have also been twice to both the Middle East and the US.

It is clear that we are extraordinarily well positioned in some of the most exciting markets in the world. We have wonderful relationships with our customers, who both support and challenge us every day. And we have superbly talented and committed staff. Their professionalism, energy, teamwork and values are inspiring.

At Standard Chartered, the step change in pace is really exciting. We are investing more and growing faster than ever before. We are launching new products, expanding distribution, building new businesses at a new pace.

This acceleration, or change in the “metabolic rate” of the Group, means we can make the most of the many opportunities across our markets.

Of course there are challenges. But many of them are great challenges to have. How to prioritise investment across our many growth opportunities? How to build the infrastructure fast enough to support rapidly growing businesses? How to attract and develop the talent to make it all happen?

We have to be alert to the changes in global financial markets and the broader global economy, anticipating and adapting our approach. But the turbulence in the credit markets is not all bad news.

A bit more rationality and more differentiation in credit spreads is a good thing.

We do not believe such events should deter us from investing for growth. In our markets, economic growth is strong, liquidity remains abundant, demand for financial services is growing extremely rapidly. The window of opportunity is now and we are determined to seize it.

This does not mean we will ignore what’s going on, or fail to watch out for new problems. But we are convinced that investing for growth in the world’s most exciting markets will create huge value for our shareholders.

PERFORMANCE HIGHLIGHTS

In the first half of 2007 we have made rapid progress against our strategic agenda. We incorporated our business in China and launched Renminbi Consumer Banking; and we integrated our two new acquisitions – in Pakistan and Taiwan – creating new engines of growth; we launched The Standard Chartered Private Bank in six new markets; and we launched our new Islamic Banking brand, Saadiq.

In short, we have done what we said we would do and we have made good progress on every part of the agenda for 2007 that I presented in February.

Let me give a bit more detail on three of these agenda items: accelerating organic growth, delivering on acquisitions and building leadership.

ORGANIC GROWTH

Nothing demonstrates the change in pace of the Group as powerfully as the pace of underlying income growth. Stripping out the impact of acquisitions, underlying income grew by 13 per cent in 2004, 14 per cent in 2005, and 18 per cent in 2006. The pace has increased to 21 per cent in the first half of 2007 compared to 15 per cent in the first half of 2006.

We accelerated investment in order to boost organic growth, and that is happening. The acceleration is not from just one business, or one geography; we have built multiple engines of growth and we are driving them harder.

CONSUMER BANKING – SME

Five years ago our presence in Small and Medium Enterprise (“SME”) banking was very limited – we only offered two SME specific products in three countries. Since then we have rapidly built the business into a new engine of growth for Consumer Banking, expanding our geographic coverage and offering a complete suite of SME specific products and services.

We are constantly innovating and introducing new products and we have built specialist risk capabilities and infrastructure.

Our business is now well positioned to benefit from the growing SME segment and we offer SME banking at over 1,000 of our branches to over half a million customers in 24 markets. In the first half of this year, income grew by 45 per cent.

WHOLESALE BANKING – CLIENT RELATIONSHIPS

In Wholesale Banking it is the increasing depth of our client relationships that drives our income growth.

We have enhanced our client relationship model and invested in broadening our product capabilities. We are deepening our client relationships, cross-selling more, focusing more on strategic and value-added solutions. All of our client segments and products are performing extremely well.

It is always tempting, when talking about Wholesale Banking, to talk about the big, well-known clients and the biggest deals and we have some great stories to tell here. But we are also having great success in the Local Corporates segment. By this we mean local and regional companies, typically with turnover between \$25 million and \$500 million.

In the first half of 2007, we grew income in this segment by 42 per cent, with an increase of more than 20 per cent in the number of clients. Our performance was particularly strong in India, up 85 per cent, China, up 92 per cent and Korea, up 36 per cent.

We have developed a relationship management model, product set and risk management approach specifically for this segment. It is not lending driven: lending income accounts for only 15 per cent of total income for the segment.

A good example of how we are innovating to build non-lending income streams is Straight2Bank, our integrated electronic delivery channel system. Launched in May, Straight2Bank has already won numerous industry awards and attracted thousands of clients.

Another benefit from our success with Local Corporates is that these clients are also potential customers for our new Private Bank. We are already seeing a good flow of referrals. It is a great example of how well our businesses can work together.

THE PRIVATE BANK

The launch of The Private Bank was a key milestone in the first half of 2007.

We are now operating in 10 locations across seven markets: Singapore, Hong Kong, Shanghai, Beijing, Seoul, Mumbai, New Delhi, Dubai, London and Jersey. It is very early days yet – most of our offices have been open only a matter of weeks – but we already have 150 relationship managers and we are attracting new customers and up-tiering existing relationships. To start from scratch and launch a sophisticated Private Bank in this many markets simultaneously is an achievement we are proud of.

Whilst we do not underestimate the strength of competition in this space, we have some powerful advantages. Our history and scale in these markets provides a strong foundation. We can offer a distinctive combination of onshore and offshore wealth management services. And we can provide an extremely broad range of products through a truly open architecture approach.

In the second half of 2007 and into 2008 we will continue to expand our geographic coverage, relationship manager team and product capabilities. But the real focus will be on attracting customers and their assets. The Private Bank has the potential to be yet another powerful engine of organic growth.

ISLAMIC BANKING

Another source of organic growth is Islamic Banking which we launched in April under the sub-brand “Saadiq”, which means “truthful”.

We are already very active in Islamic Banking across many of our markets. But with the launch of Saadiq we are making clear the depth of our commitment to Islamic Banking and our determination to be a real leader in this space.

Our dedicated Islamic Banking teams have stepped up the pace in building the business and in product innovation. In the first half of 2007, for example: we launched Islamic credit cards in the UAE, Pakistan and Bangladesh; we opened dedicated Islamic Banking centres in a number of markets; and by the end of June 2007 we were lead arranger for four out of the five local currency sukuk bond issues in Pakistan.

This business is growing extremely rapidly – in both Wholesale and Consumer Banking – and has huge potential for further growth. For example, we do not yet offer such products in India and Africa.

CHINA

In April, we were one of the first foreign banks to incorporate our business in China and later that month we launched Renminbi services for Chinese citizens.

Responding to the demand for a broader array of savings and investment solutions, we have launched 38 new Wealth Management products.

We are on track with our branch expansion, with 30 locations in 15 cities, and still plan to have about 40 locations by year end, subject to the regulatory approvals.

Income and profits are growing rapidly. In the first half of 2007 our China business more than doubled income.

To support such growth we are investing in people and infrastructure. We began the year with about 2,100 staff in China, and expect to end the year with more than 3,500. Two weeks ago I attended the opening of our operations hub in Tianjin. We want to ensure that right from the start we build a scaleable, efficient systems and operations infrastructure to support our business as it grows.

We are also making the most of our international network. Helping China’s leading corporates as they seek to expand internationally – for example, in Africa – and working with companies from other parts of Asia – such as Korea and Taiwan – as they build their businesses in China.

Standard Chartered is now distinctively placed across Greater China, being strongly positioned in Hong Kong and Taiwan as well as China itself. We are superbly positioned to take advantage of the trade and investment dynamics across the region such as the accelerating convergence of Hong

Kong with the rest of the Pearl River Delta and the massive investment flows between Taiwan and the mainland.

TAIWAN

We are still at the early stages of realising the opportunity from Hsinchu International Bank in Taiwan. We are making great progress on the integration; we are roughly three months ahead of schedule. On 30 June, with the amalgamation of Hsinchu and our branch, Standard Chartered became the first international bank to gain an island-wide presence, with a network of 86 branches and 377 ATMs.

I was there for the occasion; and the scale of the opportunity and the excitement of our staff, was inspiring.

There is still much to do. We have already renovated four flagship branches and will renovate over 50 more by the end of the year, injecting some \$50 million in branch renovation and new ATMs to bring a world class consumer banking experience to Taiwan. We will also add some 250 frontline sales staff to drive new customer acquisition and income growth.

There is a huge opportunity in Taiwan to win market share and grow; and there is a massive opportunity to support Taiwan’s trade and investment flows across the rest of our network.

KOREA

Korea’s performance in the first half of 2007 is disappointing. However, if you look beyond the noise of central cost allocations and fair value adjustment write-backs, the businesses are making good progress. In Wholesale Banking we have built out the product range and are now getting good traction in developing the client franchise. In Consumer Banking, the regulatory and competitive pressures on the mortgage market – by far the largest part of SC First Bank’s business – continue to represent a significant challenge, but the Wealth Management and SME businesses continue to grow rapidly.

This is a very good business. A large platform in a big, growing market. We still have work to do to realise the full potential of SC First Bank and I am confident it will be a powerful engine of sustainable profit growth for the Group.

BUILDING LEADERSHIP

To sustain our accelerated organic growth and to ensure we can continue to deliver on our acquisitions, we need to continue to build more and more leadership capacity across the Group. This means making more and better leaders faster and turning managers into true leaders.

To achieve this objective we are doing a lot of different things: increasing international graduate recruitment this year by 27 per cent; more than doubling MBA recruitment; revamping our leadership development programmes; hiring exceptional talent from outside; and ensuring we have a diverse pipeline of leaders that reflect the markets we operate in and the customers we serve.

Standard Chartered is a great place to work. It is incredibly diverse and full of opportunity. It is friendly and supportive but with a real performance edge. It is confident not arrogant and committed to a shared set of values.

Our culture represents a real competitive advantage. It attracts staff, it attracts customers and it enables us to work together across business and geographic boundaries. One of my big challenges as CEO is to make sure that as we grow and develop we do not lose what makes us special.

CONTINUED INVESTMENT FOR GROWTH

In the second half of 2007 we will continue to deliver against the priorities laid out at the beginning of the year.

To sustain our rapid growth, we will continue to invest in new products, new markets and expanded distribution. Amongst other things we will: extend our Global Markets product range by launching equity derivatives; expand our Principal Finance business; expand our network to about 40 locations in China and add at least 70 branches and over 300 ATMs across other markets; and incorporate our business in Vietnam to enable us to expand and grow there rapidly. We see Vietnam as a market of enormous potential for both businesses.

As we have demonstrated before, we can and will flex the pace of investment to ensure we strike the right balance between delivering performance today and investment for future growth.

We will also continue to ensure we deliver on our acquisitions, realizing the potential of Taiwan and Korea, sustaining the growth momentum in

Pakistan and Permata. We will continue to look for new acquisition opportunities, new platforms for growth, new capabilities. But, as always, we will remain very disciplined. We have to be convinced that any potential acquisition is both strategically and financially compelling.

OUTLOOK

Let me give you a sense of the outlook for the Group for 2007. We enter the second six months of 2007 in good shape with great momentum. The businesses are performing strongly and we are clear about our strategy and priorities.

Income

Whilst we remain mindful of the changes in the external environment in the past few weeks, we have a high degree of confidence in our ability to continue to deliver high levels of income growth.

- Consumer Banking has a good level of income momentum as the business continues to broaden its income streams.

In Wholesale Banking, we have strong income momentum across virtually all client segments and product groups, albeit that as in previous years, we expect some impact of seasonality in the second half.

Expenses

- We will continue to accelerate our investment as we seek to capture the opportunities seen in our franchise and to support our growth. For the full year, and for the Group as a whole, we expect the growth in expenses to be broadly in line with the growth in income.

Risk Management

- In Wholesale Banking, we are not as yet seeing any deterioration in our portfolio, but do anticipate a further reduction in recoveries as the stock of impaired assets falls.
- In Consumer Banking, we expect the impairment charge for the full year to reflect the improved environment in Taiwan although this will be balanced by the inclusion of our most recent acquisitions and the effects of the change in the mix and maturity of the portfolio.

In summary, we are doing what we said we would do.

SUMMARY

We have had an excellent first half in 2007 and we have great momentum as we begin the second half. Our investments are delivering and there are many exciting opportunities across our markets.

The world is an uncertain place. There is a lot of volatility in the markets. That makes it all the more important for us to be very clear on our strategy and priorities, to always be looking ahead to what might happen and to know exactly what levers we can pull if we have to respond to changing circumstances.

This combination of strategic clarity and management flexibility is critical to being able to continue to grow at pace, whilst navigating the risks.

The Group is in great shape and we are excited and confident about the future.

Peter Sands
Group Chief Executive
7 August 2007

STANDARD CHARTERED PLC – FINANCIAL REVIEW

GROUP SUMMARY

The Group has delivered a very strong performance for the six months ended 30 June 2007. Profit before taxation of \$1,980 million was up 30 per cent over the equivalent period in 2006, with operating income up 28 per cent. The normalised cost income ratio was 54.7 per cent compared to 53.6 per cent in 2006 reflecting continued investment in the franchise. Normalised earnings per share increased by 19.7 per cent to 100.7 cents. Refer to note 4 on page 40 for details of basic and diluted earnings per share.

Operating income and profit

	6 months ended 30.06.07	6 months ended 30.06.06	6 months ended 31.12.06
	\$million	\$million	\$million
Net interest income	2,952	2,510	2,818
Fees and commissions income, net	1,228	894	987
Net trading income	649	531	389
Other operating income	434	177	314
	2,311	1,602	1,690
Operating income	5,263	4,112	4,508
Operating expenses	(2,918)	(2,225)	(2,571)
Operating profit before impairment losses and taxation	2,345	1,887	1,937
Impairment losses on loans and advances and other credit risk provisions	(361)	(349)	(280)
Other impairment	(3)	(8)	(7)
(Loss)/profit from associates	(1)	(3)	1
Profit before taxation	1,980	1,527	1,651

Operating income growth was well balanced across client segments, products and geographies. Operating income grew \$1,151 million, or 28 per cent, to \$5,263 million. Underlying operating income grew 21 per cent.

Net interest income grew \$442 million, or 18 per cent, to \$2,952 million. On an underlying basis, net interest income grew nine per cent. Net interest margin was 2.5 per cent, in line with the first half of last year.

Non interest income grew \$709 million, or 44 per cent, to \$2,311 million. On an underlying basis, non interest income grew 38 per cent. Fees and commissions increased by \$334 million, or 37 per cent, to \$1,228 million. This increase can be attributed to higher transaction volumes in investment services and insurance products, in cash management, securities services and trade, as well as from significantly higher fees earned from increased activities in loan syndications, debt capital markets and from corporate advisory transactions. Net trading income increased by \$118 million, or 22 per cent, to \$649 million. Client income from interest rates and foreign exchange derivatives sales grew as a result of improved product cross-selling efforts, offset, in part, by lower own account trading income. Other operating income increased \$257 million, or 145 per cent, to \$434 million, arising from income on structured finance transactions, and gains realised from the sale of private equity investments and other investment securities. Other operating income also included \$55 million of recoveries in respect of assets in Korea that had been fair valued at acquisition,

The underlying results of the Group exclude the results of the following: Standard Chartered Bank (Pakistan) Limited, comprising the Standard Chartered Bank branches in Pakistan and Union Bank Limited ("Union"), Hsinchu International Bank ("HIB") and the incremental stake in PT Bank Permata Tbk ("Permata").

compared to \$42 million in the first half of 2006 and \$64 million in the second half of 2006.

Operating expenses increased \$693 million, or 31 per cent, to \$2,918 million. Underlying expenses grew 23 per cent. Expenses rose as additional investments were made to improve and extend distribution channels, launch The Private Bank in six new markets, add product capabilities such as commodity derivatives, improve transaction banking infrastructure and enhance regulatory compliance and control systems. Expenses also increased because of higher incentive compensation and personnel costs.

Operating profit before impairment increased \$458 million, or 24 per cent, to \$2,345 million.

The credit environment remained generally favourable during the period. Impairment losses on loans and advances increased \$12 million to \$361 million. The underlying impairment losses decreased by \$94 million, or 27 per cent, to \$253 million. This reflected the improved consumer credit environment in Taiwan where the loan impairment in the branch fell by \$179 million. Overall delinquency indicators for the Consumer Banking loan portfolio were in line with expectations. The fall in the loan impairment in Taiwan was partly offset by the recent acquisitions and there was a small increase in Thailand and the UAE as a result of the change in the mix and maturity of the portfolio. In Wholesale Banking, new impairments remained low and recoveries and releases continued to be achieved, albeit at lower levels than last year.

STANDARD CHARTERED PLC – FINANCIAL REVIEW continued

Operating income and profit continued

The Group made a number of acquisitions in the second half of 2006. It has owned Union since 5 September 2006 and HIB since 19 October 2006. On 30 December 2006, the assets and business of Union and the Standard Chartered Bank branches as in Pakistan were amalgamated into Standard Chartered Bank (Pakistan) Limited. On 30 June 2007, the assets and business of the Standard Chartered Bank branch in Taiwan were

amalgamated into HIB, and the combined entity was renamed Standard Chartered Bank (Taiwan) Limited. On 5 September 2006, the Group acquired an additional stake of 12.96 per cent in Permata.

To facilitate effective review of the Group's results, the table below shows the underlying results of the Group.

	6 months ended 30.06.07	H1 2007 v H1 2006 Increase/(decrease) %	6 months ended 30.06.06	H1 2007 v H2 2006 Increase/(decrease) %	6 months ended 31.12.06

An analysis of Consumer Banking income by product is set out below:

	6 months ended 30.06.07	6 months ended 30.06.06	6 months ended 31.12.06
Operating income by product	Total \$million	Total \$million	Total \$million
Cards, Personal Loans and Unsecured Lending	967	824	975
Wealth Management and Deposits	1,222	926	1,012
Mortgages and Auto Finance	473	388	392
Other	110	57	110
Total operating income	2,772	2,195	2,489

Operating income increased \$577 million, or 26 per cent, to \$2,772 million. Income growth is well diversified with eight markets now contributing \$100 million or more in income. Underlying income grew \$293 million, or 14 per cent, with strong performances in Singapore, Malaysia, and MESA. In Hong Kong, the income growth has gained momentum with an eight per cent growth compared with four per cent in the first half of last year.

Wealth Management and the SME segment achieved excellent income growth with particularly strong performances in MESA, India, Hong Kong, Singapore and Malaysia. Mortgages and Auto Finance income grew despite strong competition in a number of key markets and rising interest rates.

Operating expenses grew \$402 million or 33 per cent to \$1,612 million. Underlying expenses were up \$240 million, or 20 per cent, as further investments were made to expand sales and distribution platforms geographically, to develop new business segments, to develop and launch new products and to strengthen the systems and control infrastructure. The Private Bank was launched in Singapore, Hong Kong, Shanghai, Beijing, Mumbai, New Delhi, Dubai, London and Jersey during the period. The Group's business in China was incorporated and additional licences to conduct various Renminbi businesses were awarded.

Loan impairment fell \$33 million, or eight per cent, to \$372 million. Underlying loan impairment losses improved significantly by \$132 million to \$270 million. The consumer credit environment in Taiwan has improved and impairment trends are now near normal levels. The loan impairment charge in the Taiwan branch decreased by \$179 million in the first half. Underlying impairment losses outside Taiwan increased by \$47 million, reflecting changes in the mix and maturity of the portfolio as well as a slight deterioration in loan impairment in Thailand and the UAE. In Pakistan, loan impairment was \$26 million higher due to the acquisition of Union, while, in Taiwan, the acquisition of HIB added \$70 million to the loan impairment charge.

Operating profit improved \$208 million, or 36 per cent, to \$788 million. Underlying operating profits grew \$185 million or 33 per cent, to \$743 million.

In Hong Kong, income growth was \$40 million, or eight per cent, whilst expenses rose by \$29 million, or 14 per cent. Buoyant sales of investment and insurance products, coupled with strong growth in current and savings accounts balances, drove income growth. Income from Wealth Management grew 11 per cent, predominantly in fee income. In the SME segment, the increased sales and marketing activities drove customer acquisition and improved product penetration. The number of new customers grew significantly and volumes in trade and commercial financing grew income in the SME segment by 37 per cent. Mortgage income was marginally lower against a backdrop of intense competition and rising interest rates although market share in mortgages was maintained. Additional investments were made in private banking, adding new branches, marketing campaigns and increasing the sales force during the period. The loan impairment charge increased \$8 million as recoveries were lower in this period. Operating profit was up one per cent to \$283 million.

In Singapore, income was up 21 per cent to \$206 million. Mortgage margin benefited from active re-pricing and the lower interest rate environment in the first half of this year. Deposit balances grew significantly, particularly in current and savings accounts. Higher investment services fees and treasury products contributed to income growth. Expenses grew \$22 million, or 33 per cent, to \$88 million. Investments were made to expand the sales force, particularly in the SME segment and in private banking. Two new priority banking centres were opened and a customer service centre upgraded. Loan impairment fell 50 per cent to \$8 million, as provisions were reduced in line with improved credit experience. Operating profit increased 25 per cent to \$110 million.

CONSUMER BANKING continued

In Malaysia, income increased 15 per cent to \$129 million. Higher average deposit balances drove income growth with strong volume growth achieved in current and savings accounts, time deposits and structured deposits. Operating expenses increased \$5 million or 10 per cent to \$54 million. Loan impairment increased by \$7 million reflecting a higher portfolio impairment charge. Operating profit increased 11 per cent to \$52 million.

In Korea, income grew \$77 million, or 15 per cent, to \$607 million. Wealth Management and the SME segment achieved over 10 per cent and 40 per cent income growth respectively. Investment and insurance fees were higher. During the period, unprofitable bulk deposit accounts were reduced resulting in lower liability balances. Mortgage income was marginally lower as a result of lending constraints, intense competition and rising interest rates affecting both volumes and margins. Mortgage margins have halved in the last couple of years. The successful exiting of certain accounts in the SME segment and the realisation of collateral resulted in a further \$42 million (30 June 2006: \$11 million) of recoveries in respect of assets that had been fair valued at acquisition. Expenses grew \$66 million, or 17 per cent, to \$444 million. Investments have been increased with four additional new branches opened, two branches relocated, 24 branches upgraded, and over 400 ATMs upgraded. During the period, a charge for a voluntary retirement programme was also incurred as part of the productivity improvement plan and there was an increased allocation of corporate overheads. Loan impairment was \$13 million higher. Operating profit fell \$2 million, or two per cent, to \$117 million.

In Other Asia Pacific, income grew \$247 million, or 78 per cent, to \$564 million. Expenses grew \$174 million, or 94 per cent, to \$360 million. Underlying income grew \$39 million, or 12 per cent with particularly strong income growth in China and Indonesia. Underlying expenses grew \$52 million, or 28 per cent. In China, income more than doubled, with the SME segment growing the number of customers, driving asset growth in commercial loans and average deposit balances. Income in the SME segment grew in total by over 80 per cent. Mortgage income grew over 50 per cent, benefiting from wider spreads as well as higher volumes, with growth in mortgage assets of over 30 per cent. Investments were accelerated, in customising retail banking products and services for the local market, in extending branch and ATM distribution infrastructure, in hiring additional sales, and in marketing and support staff. In Taiwan, higher expenses were incurred to integrate HIB and for the amalgamation of the branches. Loan impairment for the period was \$103 million lower. Underlying loan impairment fell by \$176 million due primarily to the improving credit environment in Taiwan, and lower impairment in the Philippines and Indonesia. Loan impairment in Thailand, however, increased as a result of political uncertainty and increasing consumer debt. Operating profit improved to \$32 million.

India's income increased \$26 million, or 16 per cent, to \$184 million, driven by growth in Wealth Management products and the SME segment. Investment in new products, premises,

private banking and hiring of additional sales staff increased expenses by \$25 million or 28 per cent. Loan impairment increased \$9 million, in part due to volume growth. Operating profit fell \$8 million, to \$40 million.

Operating income in the MESA region increased by \$114 million, or 48 per cent to \$352 million. Underlying income grew \$38 million or 20 per cent, driven by strong sales performance in the SME segment, with significant growth in trade finance, business instalment loans and cash management balances. Investment services and deposit accounts continued to drive income growth in Wealth Management. Expenses grew by \$73 million, or 63 per cent to \$189 million. Underlying expenses grew \$32 million, or 34 per cent. Investments were targeted at improving infrastructure, expanding distribution channels and increasing the sales force. Higher expenses were also incurred for the integration of the Union acquisition and the amalgamation of the businesses in Pakistan. Loan impairment increased \$40 million to \$56 million, reflecting higher charge offs in Pakistan following the acquisition, and in the UAE in relation to the credit cards and unsecured lending portfolios. Operating profit increased slightly to \$107 million.

In Africa, operating profit grew \$4 million, or 16 per cent to \$29 million, predominantly due to lower loan impairment. Income growth of nine per cent was negatively impacted by foreign exchange movements in Zambia and Botswana. Double digit income growth was achieved in Kenya, Ghana and Nigeria. Wealth Management income grew driven by increased product launches and more effective sales penetration, whilst expenses grew 10 per cent with further investments made in increasing staff strength.

The Americas, UK and Group Head Office saw an increase in operating profit of \$7 million to \$18 million. Income grew \$8 million, or 22 per cent, to \$45 million, driven primarily by higher deposits balances at better margin.

Product Performance

Credit Cards, Personal Loans and Unsecured Lending grew operating income by \$143 million, or 17 per cent, to \$967 million. Underlying income grew eight per cent. Asset growth was controlled with stricter credit underwriting and approval policies to ensure the balance between good growth and credit quality was maintained.

Wealth Management grew operating income by \$296 million, or 32 per cent, to \$1,222 million. Underlying income grew 18 per cent. An improved product range generated higher fee income and the product portfolio mix during the period improved profitability. Current and savings accounts now represent almost half of the deposit base. Consequently, net interest margins improved slightly in the period.

Mortgages and Auto income grew by \$85 million, or 22 per cent, to \$473 million. Underlying income grew nine per cent. Mortgage outstanding balances were marginally lower as lending constraints in Korea hindered growth. Competitive pricing pressure resulting in high attrition levels posed challenges to growth in other key markets.

WHOLESALE BANKING continued

Wholesale Banking had a very strong first half with significantly higher business volumes and income momentum. The investments made in a number of businesses and products have driven growth across key geographies. The external environment remained favourable, with new trade flows emerging, a good operating environment and benign credit conditions. Income grew \$570 million, or 30 per cent, to \$2,487 million. Underlying income grew 29 per cent.

Client revenues grew 30 per cent. Client income represents around four fifths of total income and remains the key driver of growth. The focus in nurturing key client relationships, attracting new clients, improving product cross-sell and investing in higher-value and strategic products have resulted in a very broad based income momentum across all client segments.

Operating expenses grew \$283 million, or 28 per cent, to \$1,298 million. Underlying expenses grew 26 per cent. Investment was targeted at expanding product capability, upgrading systems infrastructure in transaction banking, expanding client coverage, improving sales incentives, and reinforcing compliance and control.

Operating profit before impairment grew 32 per cent to \$1,189 million. Loan impairment net of recoveries were \$45 million lower at \$11 million, reflecting a declining stock of distressed assets. Operating profit grew \$247 million, or 26 per cent, to \$1,197 million. Underlying profit grew \$249 or 27 per cent, to \$1,180 million.

In Hong Kong, income grew \$94 million, or 33 per cent, to \$383 million. Client revenues grew strongly in the Local Corporates and Financial Institutions segments. Global Markets revenue contributed significantly to income growth, with higher foreign exchange and derivatives sales and corporate finance fees, while improved ALM performance drove own account income growth. Income from Cash Management benefited from higher volumes in securities services and the higher average cash balances, marginally offset by a decline in margins. Trade and Lending income was marginally higher. Expenses grew \$25 million or 18 per cent, to \$166 million with this increase primarily directed towards building the sales force, improving sales incentives and enhancing product capabilities. Loan impairment recoveries were 53 per cent lower at \$14 million. Operating profit grew 30 per cent to \$231 million.

Income in Singapore grew \$74 million, or 62 per cent to \$194 million. Operating profit grew \$49 million, or 107 per cent, to \$95 million. Commodity Corporates and Financial Institution segments led the growth in client revenues. Global Markets revenues were driven by derivatives and foreign exchange products together with strong contributions from debt capital markets and corporate finance. Expenses grew \$28 million, or 39 per cent, to \$99 million reflecting increased recruitment, higher salary and performance related incentives and continued investments in product capabilities.

In Malaysia, income increased \$4 million, or five per cent, to \$80 million with good growth in Cash Management, corporate finance and foreign exchange sales. Expenses increased \$5 million, to \$35 million reflecting higher performance related incentives.

Income in Korea fell \$14 million, or seven per cent, to \$190 million. Expenses grew \$34 million, or 41 per cent, to \$116

million. During the period, there were \$13 million (30 June 2006: \$31 million) of recoveries on assets that had been fair valued at acquisition. Expenses have been affected by the increased allocation of corporate centre overheads as well as a voluntary retirement charge.

Other Asia Pacific delivered strong income growth of \$199 million, or 75 per cent, to \$464 million, with expenses rising 33 per cent, to \$199 million. Underlying income grew \$184 million, or 69 per cent, to \$449 million. Strong income growth was achieved in China across all client segments and most product categories. In Indonesia, income grew over 70 per cent. Underlying expenses grew \$32 million, or 21 per cent, primarily in China, reflecting the continued investments in more staff, higher performance related incentives, product development and systems infrastructure. Loan impairment was \$5 million higher, mainly due to the absence of the loan impairment releases and recoveries seen in the first half of last year. Operating profit grew \$145 million, or 128 per cent, to \$258 million.

In India, income grew \$157 million, or 71 per cent to \$379 million. Operating income was driven by strong foreign exchange income and transaction banking revenues which benefited from increased volumes and better margins in cash management, and higher trade volumes. Increased fee income was also generated from corporate finance and debt capital markets transactions, and private equity gains realised, partly offset by weaker own account trading income. Expenses increased by \$26 million, or 37 per cent, with investment in new product specialists and sales staff, improving premises and systems infrastructure. Operating profit increased 70 per cent to \$280 million.

Operating income in the MESA region rose \$79 million, or 32 per cent, to \$323 million. Income grew over 30 per cent in the UAE, Bahrain, Qatar and Jordan. Client revenues increased across most products, notably in interest rate and foreign exchange derivatives sales, debt capital markets and transaction banking. In Bangladesh, income grew over 15 per cent while income in Pakistan grew 55 per cent, reflecting good underlying growth as well as the impact of the Union acquisition. Expenses grew \$30 million, or 28 per cent, to \$139 million due to higher recruitment levels, premises and infrastructure costs as well as integration costs in Pakistan. Loan impairment was marginally higher. Operating profit grew \$45 million, or 33 per cent, to \$182 million.

In Africa, income grew \$14 million, or seven per cent, to \$201 million. Operating income improvements were driven by growth in transaction banking revenues, with average wholesale deposit balances increasing significantly, more than offsetting a small decline in margins. Higher fees were earned on corporate advisory and debt financing transactions. Expenses increased seven per cent to \$115 million. Operating profit increased \$16 million, or 24 per cent, to \$82 million.

Operating income in the Americas, UK and Group Head Office decreased by \$37 million, or 12 per cent, to \$273 million, primarily due to lower own account trading income. There were no private equity gains realised in the region for this period compared to the first half of last year. Expenses grew by \$78 million, or 31 per cent, reflecting continued investment in products and sales staff.

WHOLESALE BANKING continued

Product Performance

Trade and Lending income increased four per cent to \$532 million, with underlying income growing one per cent. Trade income grew as volumes increased, driven in part by supply-chain financing and receivables services, partially offsetting the impact of tightening margins. While higher loan origination activities grew lending assets, this asset growth was offset by active loan sales and structured credit transactions to optimise capital deployment. Lending revenues were down three per cent.

Global Markets' income grew 46 per cent to \$1,346 million. Underlying income grew 45 per cent. Derivatives and foreign exchange sales and trading grew income by 43 per cent. Client revenues grew 40 per cent on the back of improved product cross-selling efforts and higher client penetration. Own account trading was lower due to subdued market volatility and trading losses in certain markets. Debt capital markets income doubled, on the back of strong loan syndication volumes and higher bond

issuance activities. Corporate finance income grew over 60 per cent with several landmark cross-border corporate advisory and project finance transactions completed in the first half. Private equity investments have delivered high return on investments, with a number of realisations during the first half of the year. ALM and fund management income improved 17 per cent over the equivalent period with better trading opportunities present in the local currency markets.

Cash Management and Custody income was up 27 per cent at \$609 million. Underlying income grew 25 per cent, as higher transaction volumes drove fee income growth, and higher cash balances in a positive margin environment, increased net interest income. Securities assets under administration grew significantly as higher transaction volumes drove increased income in securities services.

RISK

Risk Management Review

The Group has not experienced evidence of deterioration in the credit environment within its key economies.

The structure and management of the Group's portfolio has been such that the previous low level of provisions has been maintained. Ongoing risk management disciplines are aimed at maintaining the Group's desired portfolio whilst targeting specific customers and markets.

Wholesale Banking continues to operate in a stable credit environment, with high levels of recoveries and low provisions due to proactive management. The portfolio remains well diversified with no material concentrations in key business segments. A strong risk distribution capability has been developed which provides capacity for greater origination and continued growth.

Consumer Banking is achieving the desired asset mix and the debt charge is in line with that planned for the portfolio. Asset growth has been controlled with stricter credit underwriting and approval policies to ensure the balance between good growth and credit quality is maintained.

Work to fully integrate risk controls and processes into recent acquisitions is ongoing and progressing well.

Under Basel II the Group has received approval to adopt the advanced approaches to credit risk management from 1 January 2008. This approach builds on the Bank's sophisticated risk management practices and is the result of a significant Group-wide regulatory exercise.

Risk Governance

Through its risk management structure the Group seeks to manage efficiently the core risks: credit, market, country and liquidity risk. These arise directly through the Group's commercial activities whilst compliance and regulatory risk, operational risk and reputational risks are normal consequences of any business undertaking.

The basic principles of risk management followed by the Group include:

- **Balancing risk and reward:** risk is taken in support of the requirements of the Group's stakeholders. Risk should be taken in support of the Group strategy and within its risk appetite.
- **Responsibility:** given the Group is in the business of taking risk, it is everyone's responsibility to ensure that risk taking is both disciplined and focused. The Group takes account of its social, environmental and ethical responsibilities in taking risk to produce a return.
- **Accountability:** risk is taken only within agreed authorities and where there is appropriate infrastructure and resource. All risk taking must be transparent, controlled and reported.
- **Anticipation:** the Group looks to anticipate future risks and to maximise awareness of all risk.

- **Risk management:** the Group aims to have a world class specialist risk function, with strength in depth, experience across risk types and economic scenarios.

Ultimate responsibility for the effective management of risk rests with the Company's Board. Acting within an authority delegated by the Board, the Audit and Risk Committee ("ARC"), whose members are all Non-Executive Directors of the Company, reviews specific risk areas and monitors the activities of the Group Risk Committee ("GRC") and the Group Asset and Liability Committee ("GALCO").

GRC, through authority delegated by the Board, is responsible for credit risk, market risk, operational risk, compliance and regulatory risk, legal risk and reputational risk. GALCO, through authority delegated by the Board, is responsible for liquidity risk, for structural interest rate and foreign exchange exposures, and for capital ratios.

All the Group Executive Directors ("GEDs") of Standard Chartered PLC, members of the Standard Chartered Bank Court and the Group Chief Risk Officer are members of the GRC. This Committee is chaired by the Group Chief Risk Officer. The GRC is responsible for agreeing Group standards for risk measurement and management, and also delegating authorities and responsibilities to risk committees and to the Group and Regional Credit Committees and Risk Officers.

GALCO membership consists of all the GEDs of Standard Chartered PLC and members of the Standard Chartered Bank Court. The committee is chaired by the Group Finance Director. GALCO is responsible for the establishment of, and compliance with, policies relating to balance sheet management including management of the Group's liquidity, capital adequacy and structural foreign exchange risk.

The committee process ensures that standards and policy are cascaded down through the organisation from the Board through the GRC and the GALCO to the functional, regional and country level committees. Key information is communicated through the country, regional and functional committees to Group so as to provide assurance that standards and policies are being followed.

The Group Executive Director with responsibility for Risk ("GED Risk") and the Group Chief Risk Officer manage a risk function which is independent of the businesses, which:

- recommends Group standards and policies for risk measurement and management;
- monitors and reports Group risk exposures for country, credit, market and operational risk;
- approves market risk limits and monitors exposure;
- sets country risk limits and monitors exposure;
- chairs the credit committee and delegates credit authorities;
- validates risk models; and
- recommends risk appetite and strategy.

Risk Governance continued

Individual GEDs and members of the Standard Chartered Bank Court are accountable for risk management in their businesses and support functions, and for countries where they have governance responsibilities. This includes:

- implementing the policies and standards as agreed by the GRC across all business activity;
- managing risk in line with appetite levels agreed by the GRC; and
- developing and maintaining appropriate risk management infrastructure and systems to facilitate compliance with risk policy.

The Group's Risk Management Framework ("RMF") identifies 18 risk types, which are managed by designated Risk Type Owners ("RTOs"), who are all approved persons under the FSA regulatory framework, and who have responsibility for setting minimum standards and governance and implementing governance and assurance processes. The RTOs report up through specialist risk committees to the GRC, or in the case of liquidity risk, to the GALCO.

In support of the RMF the Group uses a set of risk principles, which are sanctioned by the GRC. These comprise a set of statements of intent that describe the risk culture that the Group wishes to sustain. All risk decisions and risk management activity should be in line with, and in the spirit of, the overall risk principles of the Group. The governance process is designed to ensure:

- business activities are controlled on the basis of risk adjusted return;
- risk is managed within agreed parameters with risk quantified wherever possible;
- risk is assessed at the outset and throughout the time that the Group continues to be exposed to it;
- applicable laws, regulations and governance standards in every country in which the Group does business are abided by;
- high and consistent ethical standards are applied to the Group's relationships with its customers, employees and other stakeholders; and
- activities are undertaken in accordance with fundamental control standards. These controls include the disciplines of planning, monitoring, segregation, authorisation and approval, recording, safeguarding, reconciliation and valuation.

The GED Risk and the Group Chief Risk Officer, together with Group Internal Audit, provide assurance, independent from the businesses, that risk is being measured and managed in accordance with the Group's standards and policies.

Stress Testing

Objectives and purpose of stress testing

Stress testing and scenario analysis are important components of the Group's risk assessment processes, and are used to assess the financial and management capability of the Group to continue operating effectively under extreme but plausible trading conditions. Such conditions may arise from economic,

legal, political, environmental, and social factors which define the context within which the Group operates. It is intended that stress testing and scenario analysis will help to inform senior and middle management with respect to:

- the nature and dynamics of the risk profile;
- the identification of potential future risks;
- the setting of the Group's risk appetite;
- the robustness of risk management systems and controls;
- the adequacy of contingency planning; and
- the effectiveness of risk mitigants.

Stress testing framework

The framework has been designed to satisfy the following requirements:

- identify key risks to the Group's strategy, financial position, and reputation;
- ensure effective governance, processes and systems are in place to coordinate stress testing;
- integrate current stress testing and scenario analysis procedures;
- engage and inform senior management;
- assess the impact on the Group's profitability and business plans;
- enable the Group to set and monitor its risk appetite; and
- satisfy regulatory requirements.

Key to the framework is the formation of a Stress Testing Forum that is a formally constituted body deriving its powers from the GRC. The primary objective of this forum is to identify and assess the extreme but plausible risks to which the Group may be subjected, and to make recommendations to senior management for suitable scenarios.

Group-wide scenario analysis represents a wide ranging assessment of potential impact. Therefore it is coordinated through a Group risk function, which is responsible for consolidating the analysis and highlighting existing mitigants, controls, plans, and procedures to manage the identified risk, as well as any additional management action required.

Risk appetite

Risk appetite is the amount of risk the Group wants to take pursuant to its strategic objectives.

The RMF summarises the Group's risk appetite for each of the identified risk types, as well as the related management standards.

Risk appetite setting is the Group's chosen method of balancing risk and return, recognising a range of possible outcomes, as business plans are implemented. The Group adopts quantitative risk appetite statements where applicable, and aggregates risk appetite across businesses where appropriate.

For example, a formal quantitative statement from the Board communicates the Group's overall credit risk appetite and ensures this is in line with the strategy and the desired risk-reward trade off for the Group.

Risk appetite continued

Where risk appetite statements are qualitative, these are supported with measures that allow business units to judge whether existing and new business and processes fall within the risk appetite.

The annual business planning and performance management process and associated activities ensure the expression of risk appetite remains appropriate, and the GRC supports this work.

Credit Risk

Credit Risk Management

Credit risk is the risk that a counterparty will not settle its obligations in accordance with agreed terms.

Credit exposures include both individual borrowers and groups of connected counterparties, and portfolios in the banking and trading books.

The GRC has clear responsibility for credit risk. Standards are approved by the GRC, which oversees the delegation of credit authorities.

Procedures for managing credit risk are determined at the business levels, with specific policies and procedures being adapted to different risk environment and business goals. Risk officers are located in the businesses to maximise the efficiency of decision making, but have a reporting line which is separate from the business lines into the Group Chief Risk Officer.

The businesses working with the Risk Officer take responsibility for managing pricing for risk, portfolio diversification and overall asset quality within the requirements of Group standards, policies and business strategy.

Where appropriate, derivatives are used to reduce credit risks in the portfolio. Due to the income statement volatility which can result, derivatives are only used in a controlled manner and within a pre-defined volatility expectation.

Wholesale Banking

Within the Wholesale Banking business, a numerical grading system is used for quantifying the risk associated with a counterparty. The grading is based on a probability of default measure, with customers analysed against a range of quantitative and qualitative measures. Expected Loss is used for the further assessment of individual exposures and portfolio analysis. There is a clear segregation of duties with loan applications being prepared separately from the approval chain. Significant exposures are reviewed and approved centrally through a Group or regional level credit committee. These committees are responsible to the GRC.

Consumer Banking

For Consumer Banking, standard credit application forms are generally used, which are processed in central units using largely automated approval processes. Where appropriate to the customer, the product or the market, a manual approval process is in place. As with Wholesale Banking, origination and approval roles are segregated.

Loan Portfolio

Loans and advances to customers have grown by \$32.6 billion since 30 June 2006 to \$152.8 billion.

Excluding the effect of the HIB and Union acquisitions, growth in the Consumer Banking portfolio has been constrained over the period as growth in secured products has been muted by regulatory and competitive challenges in the mortgage market.

Growth in the Wholesale Banking portfolio was \$22.3 billion, or 43 per cent since 30 June 2006. Growth was seen across all industry sectors and geographies, with particularly strong increases in the portfolios in Singapore, Other Asia Pacific, India, and Americas, UK and Head Office. Financing, insurance and business services saw an increase of \$7.0 billion, driven by large increases in Hong Kong and Americas, UK and Head Office.

The use of derivatives has partially offset the risks arising from the growth in the balance sheet during the period.

The Wholesale Banking portfolio remains well diversified across both geography and industry, with no significant concentration within the industry classifications of Manufacturing, Financing, insurance and business services, or Commerce.

Maturity analysis

Approximately 50 per cent of the Group's loans and advances are short term having a contractual maturity of one year or less. The Wholesale Banking portfolio is predominantly short term, with 77 per cent of loans and advances having a contractual maturity of one year or less. In Consumer Banking, 63 per cent

of the portfolio is in the mortgage book, traditionally longer term in nature. Whilst the Other and SME loans in Consumer Banking have short contractual maturities, in the normal course of business they may be renewed and repaid over longer terms.

Problem Credit Management and Provisioning**Consumer Banking**

An account is considered to be in default when payment is not received on the due date. Accounts that are overdue by more than 30 days are considered delinquent. These accounts are closely monitored and subject to a collections process. An account is considered non-performing if it is 90 days past due or an individual impairment provision ("IIP") is held against it.

The process used for raising provisions is dependent on the product. For mortgages, IIPs are generally raised at 150 days past due based on the difference between the outstanding amount of the loan and the present value of the estimated future cash flows. Loan impairment for other secured loans utilises the forced sale value of the collateral without discounting if the collateral can be realised within 12 months. For unsecured products, IIP are raised for the entire outstanding amount at 150 days past due. For all products there are certain accounts, such as cases involving bankruptcy, fraud and death, where the loss recognition process is accelerated.

A portfolio impairment provision ("PIP") is held to cover the inherent risk of losses, which, although not identified, are known through experience to be present in the loan portfolio.

PIP covers both performing loans and loans overdue for less than 150 days. The provision is set with reference to past experience using flow rate methodology, as well as taking account of judgemental factors such as the economic and business environment in core markets, and the trends in a range of portfolio indicators.

The cover ratio reflects the extent to which the gross non-performing loans are covered by the individual and portfolio impairment provisions. The balance of non-performing loans uncovered by the individual impairment provisions reflects the level of collateral held and/or the estimated net value of any recoveries.

The table below sets out the total non-performing portfolios in Consumer Banking. The decrease in non-performing loans in Korea is primarily as a result of the successful exiting of SME accounts and the realisation of collateral.

The following tables set out the total non-performing portfolio in Consumer Banking:

Wholesale Banking

In Wholesale Banking, accounts or portfolios are placed on Early Alert when they display signs of weakness. Such accounts and portfolios are subject to a dedicated process with oversight involving senior Risk Officers and Group Special Asset Management ("GSAM"). Account plans are re-evaluated and remedial actions are agreed and monitored until complete. Remedial actions include, but are not limited to, exposure reduction, security enhancement, exit of the account or immediate movement of the account into the control of GSAM, the specialist recovery unit.

Loans are designated as impaired and considered non-performing where recognised weakness indicates that full payment of either interest or principal becomes questionable or as soon as payment of interest or principal is 90 days or more overdue. Impaired accounts are managed by GSAM, which is managed separately from the main businesses of the Group. Where any amount is considered uncollectable, an individual impairment provision is raised, being the difference between the loan carrying amount and the present value of estimated future cash flows. In any decision relating to the raising of provisions, the Group attempts to balance economic conditions, local

knowledge and experience, and the results of independent asset reviews.

Where it is considered that there is no realistic prospect of recovering an element of an account against which an impairment provision has been raised, then that amount will be written off.

A portfolio impairment provision is held to cover the inherent risk of losses, which, although not identified, are known through experience to be present in any loan portfolio. In Wholesale Banking, the portfolio impairment provision is set with reference to past experience using loss rates, and judgemental factors such as the economic environment and the trends in key portfolio indicators.

The cover ratio reflects the extent to which gross non-performing loans are covered by individual and portfolio impairment provisions. At 88 per cent, the Wholesale Banking non-performing portfolio is well covered. The balance uncovered by individual impairment provision represents the value of collateral held and/or the Group's estimate of the net value of any work-out strategy.

STANDARD CHARTERED PLC – RISK REVIEW continued

Country Risk

Country Risk is the risk that a counterparty is unable to meet its contractual obligations as a result of adverse economic conditions or actions taken by governments in the relevant country.

The GRC approves country risk and delegates the setting and management of country limits to the Deputy Group Chief Risk Officer.

The business and Country Chief Executive Officers manage exposures within these limits and policies. Countries designated as higher risk are subject to increased central monitoring.

Cross border assets comprise loans and advances, interest bearing deposits with other banks, trade and other bills, acceptances, amounts receivable under finance leases, certificates of deposit, and other negotiable paper and

investment securities, where the counterparty is resident in a country other than that where the cross border assets are recorded. Cross border assets also include exposures to local residents denominated in currencies other than the local currency.

Cross border exposure to countries in which the Group does not have a significant presence is predominantly in relation to money market and global corporate activity. The business is originated in the Group's key markets, but is conducted with counterparties domiciled in the country against which the exposure is reported.

The following table, based on the Bank of England Cross Border Reporting ("CE") guidelines, shows the Group's cross border assets including acceptances where they exceed one per cent of the Group's total assets.

Market Risk

The Group recognises market risk as the exposure created by potential changes in market prices and rates. The Group is exposed to market risk arising principally from customer driven transactions.

Market risk is governed by the GRC, which agrees policies and levels of risk appetite in terms of Value at Risk ("VaR"). The Group Market Risk Committee ("GMRC") provides market risk oversight and guidance on policy setting. Policies cover both trading and non-trading books of the Group. The trading book is defined as per the FSA Handbook BIPRU. Limits by location and portfolio are proposed by the businesses within the terms of agreed policy.

Group Market Risk ("GMR") approves the limits within delegated authorities and monitors exposures against these limits. Additional limits are placed on specific instruments and currency concentrations where appropriate. Sensitivity measures are used in addition to VaR as risk management tools. Option risks are controlled through revaluation limits on currency and volatility shifts, limits on volatility risk by currency pair and other variables that determine the options' value.

VaR models are back tested against actual results to ensure pre-determined levels of accuracy are maintained. GMR complements the VaR measurement by regularly stress testing market risk exposures to highlight potential risk that may arise from extreme market events that are rare but plausible.

Stress testing is an integral part of the market risk management framework and considers both historical market events and forward looking scenarios. Ad hoc scenarios are also prepared reflecting specific market conditions. A consistent stress testing methodology is applied to trading and non-trading books.

Stress scenarios are regularly updated to reflect changes in risk profile and economic events. GMRC has responsibility for reviewing stress exposures and, where necessary, enforcing reductions in overall market risk exposure. GRC considers stress testing results as part of its supervision of risk appetite.

The stress test methodology assumes that management action would be limited during a stress event, reflecting the decrease in liquidity that often occurs.

Value at Risk

The Group uses historic simulation to measure VaR on all market risk related activities.

The total VaR for trading and non-trading books combined at 30 June 2007 was \$10.0 million (30 June 2006: \$9.7 million, 31 December 2006: \$10.3 million), with a maximum exposure of \$14.0 million.

Interest rate related VaR was \$9.5 million (30 June 2006: \$9.2 million, 31 December 2006: \$9.3 million) and foreign exchange related VaR was \$2.2 million (30 June 2006: \$2.9 million, 31 December 2006: \$1.5 million).

The average total VaR for trading and non-trading books during the first half of 2007 was \$10.3 million (30 June 2006: \$10.7 million, 31 December 2006: \$10.6 million).

VaR for interest rate risk in the non-trading books of the Group totalled \$7.9 million at 30 June 2007 (30 June 2006: \$8.4 million, 31 December 2006: \$8.0 million).

The Group has no significant trading exposure to equity or commodity price risk.

The average daily income earned from market risk related activities during the six months to 30 June 2007 was \$7.0 million, compared with \$5.5 million during the six months to 30 June 2006.

Foreign Exchange Exposure

The Group's foreign exchange exposures comprise trading and non-trading foreign currency translation exposures and structural currency exposures in net investments in non-US dollar units.

Foreign exchange trading exposures are principally derived from customer driven transactions. The average daily income from foreign exchange trading businesses during the six months ended 30 June 2007 was \$3.0 million (30 June 2006: \$2.6 million).

Interest Rate Exposure

The Group's interest rate exposures arise from trading and non-trading activities.

Structural interest rate risk arises from the differing re-pricing characteristics of commercial banking assets and liabilities.

The average daily income from interest rate trading businesses during the six months to 30 June 2007 was \$4.0 million (30 June 2006: \$2.9 million).

Derivatives

Derivatives are contracts whose characteristics and value derive from underlying financial instruments, interest and exchange rates or indices. They include futures, forwards, swaps and options transactions in the foreign exchange, credit and interest rate markets. Derivatives are an important risk management tool for banks and their customers because they can be used to manage the risk of price, interest rate and exchange rate movements.

The Group's derivative transactions are principally in instruments where the mark-to-market values are readily determinable by reference to independent prices and valuation quotes or by using standard industry pricing models.

The Group enters into derivative contracts in the normal course of business to meet customer requirements and to manage its own exposure to fluctuations in interest, credit and exchange rates.

Derivatives are carried at fair value and shown in the balance sheet as separate totals of assets and liabilities. Recognition of fair value gains and losses depends on whether the derivatives are classified as trading or for hedging purposes.

The Group applies a future exposure methodology to manage counterparty credit exposure associated with derivative transactions.

Hedging

In accounting terms, hedges are classified into three types: fair value hedges, where fixed rates of interest or foreign exchange are exchanged for floating rates; cash flow hedges, where variable rates of interest or foreign exchange are exchanged for fixed rates, and hedges of net investments in overseas operations translated to the parent company's functional currency, US dollars.

The Group uses futures, forwards, swaps and options transactions in the foreign exchange and interest rate markets to hedge risk.

The Group occasionally hedges the value of its foreign currency denominated investments in subsidiaries and branches. Hedges may be taken where there is a risk of a significant exchange rate movement but, in general, management believes that the Group's reserves are sufficient to absorb any foreseeable adverse currency depreciation.

The effect of exchange rate movements on the capital risk asset ratio is mitigated by the fact that both the net asset value of these investments and the risk weighted value of assets and contingent liabilities follow substantially the same exchange rate movements.

Liquidity Risk

The Group defines liquidity risk as the risk that the bank either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access them only at excessive cost.

It is the policy of the Group to maintain adequate liquidity at all times, in all geographical locations and for all currencies. Hence the Group aims to be in a position to meet all obligations, to repay depositors, to fulfil commitments to lend and to meet any other commitments.

Liquidity risk management is governed by GALCO, which is chaired by the Group Finance Director. GALCO is responsible for both statutory and prudential liquidity. These responsibilities are managed through the provision of authorities, policies and procedures that are co-ordinated by the Liquidity Management Committee ("LMC") with country Asset and Liability Committees ("ALCO").

Due to the diversified nature of the Group's business, the Group's policy is that liquidity is more effectively managed locally, in-country. Each ALCO is responsible for ensuring that the country is self-sufficient and is able to meet all its obligations to make payments as they fall due. The ALCO has primary responsibility for compliance with regulations and Group policy and maintaining a country liquidity crisis contingency plan.

A substantial portion of the Group's assets are funded by customer deposits made up of current and savings accounts and other deposits. These customer deposits, which are widely diversified by type and maturity, represent a stable source of funds. Lending is normally funded by liabilities in the same currency.

The Group also maintains significant levels of marketable securities either for compliance with local statutory requirements or as prudential investments of surplus funds.

The GALCO also oversees the structural foreign exchange and interest rate exposures that arise within the Group. These responsibilities are managed through the provision of authorities, policies and procedures that are co-ordinated by the Capital Management Committee. Policies and guidelines for the maintenance of capital ratio levels are approved by GALCO. Compliance with Group ratios is monitored centrally by Group Corporate Treasury, while local requirements are monitored by the local ALCO.

Operational Risk

Operational risk is the risk of direct or indirect loss due to an event or action resulting from the failure of internal processes, people, and systems, or from external events. The Group seeks to ensure that key operational risks are managed in a timely and effective manner through a framework of policies, procedures and tools to identify, assess, monitor, control, and report such risks.

The Group Operational Risk Committee ("GORC") has been established to supervise and direct the management of operational risks across the Group. GORC is also responsible for ensuring adequate and appropriate policies and procedures are in place for the identification, assessment, monitoring, control and reporting of operational risks.

A Group operational risk function, independent from the businesses is responsible for establishing and maintaining the overall operational risk framework, and for monitoring the Group's key operational risk exposures. This unit is supported by Wholesale Banking and Consumer Banking Operational Risk units. These units are responsible for ensuring compliance with policies and procedures in the business, monitoring key operational risk exposures, and the provision of guidance to the respective business areas on operational risk.

Compliance with operational risk policies and procedures is the responsibility of all managers. Every country operates a Country Operational Risk Group ("CORG"). The CORG has in-country governance responsibility for ensuring that an appropriate and robust risk management framework is in place to monitor and manage operational risk.

Compliance and Regulatory Risk

Compliance and Regulatory risk includes the risk of non-compliance with regulatory requirements in a country in which the Group operates. The Group Compliance and Regulatory Risk function is responsible for establishing and maintaining an appropriate framework of Group compliance policies and procedures. Compliance with such policies and procedures is the responsibility of all managers.

Legal Risk

Legal risk is the risk of unexpected loss, including reputational loss, arising from defective transactions or contracts, claims being made or some other event resulting in a liability or other loss for the Group, failure to protect the title to and ability to control the rights to assets of the Group (including intellectual property rights), changes in the law, or jurisdictional risk. The Group manages legal risk through the Group Legal Risk Committee, Legal Risk policies and procedures and effective use of its internal and external lawyers.

Reputational Risk

Reputational risk is any material adverse effect on the relations between the Group and any one of its significant stakeholders. It is Group policy that the protection of the Bank's reputation should take priority over all activities including revenue generation at all times.

Reputational risk is not a primary risk, but will arise from the failure to effectively mitigate one or more of country, credit, liquidity, market, legal and regulatory and operational risk.

It may also arise from the failure to comply with Social, Environmental and Ethical standards. All staff are responsible for day to day identification and management of reputational risk.

From an organisational perspective the Group manages reputational risk through the Group Reputational Risk and Responsibility Committee ("GRRRC") and Country Management Committees. Wholesale Banking has a specialised Responsibility and Reputational Risk Committee which reviews individual transactions. In Consumer Banking, potential reputational risks resulting from transactions or products are reviewed by the Product and Reputational Risk Committee. Issues are then escalated to the GRRRC.

A critical element of the role of the GRRRC is to act as a radar for the Group in relation to the identification of emerging or thematic risks. The GRRRC also ensures that effective risk

monitoring is in place for Reputational Risk and reviews mitigation plans for significant risks.

At a country level, the Country CEO is responsible for the Group's reputation in their market. The Country CEO and their Management Committee must actively:

- promote awareness and application of the Group's policy and procedures regarding reputational risk;
- encourage business and functions to take account of the Group's reputation in all decision making, including dealings with customers and suppliers;
- implement effective functioning of the in country reporting system to ensure their management committee is alerted of all potential issues; and
- promote effective, proactive stakeholder management.

Monitoring

Group Internal Audit is a separate function that reports to the Group Chief Executive and the Audit and Risk Committee. Group Internal Audit provides independent confirmation that Group and business standards, policies and procedures are being complied with. Where necessary, corrective action is recommended.

STANDARD CHARTERED PLC – CAPITAL

CAPITAL

The GALCO targets Tier 1 and Total capital ratios within a range of 7-9 per cent and 12-14 per cent respectively. The ratios at 30 June 2007 are higher than this range. This reflects the strong pace of organic growth and the deployment of capital across the Group.

Cash and cash equivalents at end of period (note 5)	40,307	31,387	38,161

STANDARD CHARTERED PLC – NOTES

1. Basis of preparation

The Group condensed interim financial statements consolidate those of the Company and its subsidiaries (together referred to as the "Group"), equity account the Group's interest in associates and proportionately consolidate interests in jointly controlled entities.

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34 "Interim Financial Reporting" as adopted by the EU. They do not include all of the information required for full annual financial statements, and should be read in conjunction with the consolidated financial statements of the Group as at and for the year ended 31 December 2006.

These condensed consolidated interim financial statements were approved by the Board of Directors on 7 August 2007.

Except as noted below, the accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2006.

On 1 January 2007 the Group retrospectively adopted:

- IFRIC 7 "Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies";
- IFRIC 8 "Scope of IFRS2";
- IFRIC 9 "Reassessment of Embedded Derivatives"; and
- IFRIC 10 "Interim Financial Reporting and Impairment" none of which had a material impact on the Group's consolidated financial statements.

The Group has also adopted IFRS 7 "Financial Instruments: Disclosure" and Amendment to IAS 1 "Presentation of Financial Statements – Capital Disclosures" from 1 January 2007 and will present the disclosures required therein in the consolidated financial statements of the Group as at and for the year ended 31 December 2007.

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by management in applying the Group's accounting policies and key sources of uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2006.

The balance sheet as at 31 December 2006 has been restated as explained in note 6 on page 41, to reflect the revised fair values of assets and liabilities acquired on the acquisitions of Union and HIB.

2. Taxation

Analysis of taxation charge in the period:

	6 months ended 30.06.07 \$million	6 months ended 30.06.06 \$million	6 months ended 31.12.06 \$million
The charge for taxation based upon the profits for the period comprises:			
United Kingdom corporation tax at 30 per cent (30 June 2006, 31 December 2006: 30 per cent):			
Current tax on income for the period	161	93	136
Adjustments in respect of prior periods	35	(114)	(130)
Double taxation relief	(161)	(88)	(120)
Foreign tax:			
Current tax on income for the period	549	505	363
Adjustments in respect of prior periods	28	41	(8)
Total current tax	612	437	241
Deferred tax:			
Origination/reversal of temporary differences	(79)	(42)	188
Tax on profits on ordinary activities	533	395	429
Effective tax rate	26.9%	25.9%	25.9%

Overseas taxation includes taxation on Hong Kong profits of \$93 million (30 June 2006: \$115 million, 31 December 2006: \$51 million) provided at a rate of 17.5 per cent (30 June 2006: 17.5 per cent, 31 December 2006: 17.5 per cent) on the profits assessable in Hong Kong.

STANDARD CHARTERED PLC – NOTES continued

3. Dividends

Ordinary equity shares

Dividends are recorded in the period in which they are declared and, in respect of the final dividend, have been approved by the shareholders. The 2006 interim dividend of 20.83 cents per ordinary share was paid to eligible shareholders on 11 October 2006 and the final dividend of 50.21 cents per ordinary share was paid to eligible shareholders on 11 May 2007.

The 2007 interim dividend of 23.12 cents per ordinary share will be paid in either sterling, Hong Kong dollars or US dollars on 10 October 2007 to shareholders on the UK register of members at the close of business on 17 August 2007 and to shareholders on the Hong Kong branch register of members at the opening of business in Hong Kong (9:00am Hong Kong time) on 17 August 2007.

It is intended that shareholders will be able to elect to receive ordinary shares credited as fully paid instead of all or part of the interim cash dividend. Details of the dividend arrangements will be sent to shareholders on or around 3 September 2007.

Preference Shares	6 months ended 30.06.07 \$million	6 months ended 30.06.06 \$million	6 months ended 31.12.06 \$million
Non-cumulative irredeemable preference shares:			
7 ³ / ₈ per cent preference shares of £1 each*	7	7	7
8 ¹ / ₄ per cent preference shares of £1 each*	8	7	8
Non-cumulative redeemable preference shares:			
8.9 per cent preference shares of \$5 each	–	15	7
6.409 per cent preference shares of \$5 each	24	–	3
7.014 per cent preference shares of \$5 each	5	–	–

* Instruments classified as liabilities with dividends recorded as interest expense

4. Earnings per Ordinary Share

	30.06.07			30.06.06			31.12.06		
	Profit* \$million	Weighted average number of shares ('000)	Per share amount cents	Profit* \$million	Weighted average number of shares ('000)	Per share amount cents	Profit* \$million	Weighted average number of shares ('000)	Per share amount cents
Basic earnings per ordinary share	1,370	1,391,128	98.5	1,088	1,314,467	82.8	1,165	1,340,556	86.9
Effect of dilutive potential ordinary shares:									
Options	–	19,136		–	9,666		–	14,338	
Diluted earnings per share	1,370	1,410,264	97.1	1,088	1,324,133	82.2	1,165	1,354,894	86.0

Normalised earnings per ordinary share

The Group measures earnings per share on a normalised basis. This differs from earnings defined in IAS 33 "Earnings per share". The table below provides a reconciliation.

	30.06.07 \$million	30.06.06 \$million	31.12.06 \$million
Profit attributable to ordinary shareholders*	1,370	1,088	1,165
Amortisation of intangible assets arising on business combinations	35	20	32
Profit on sale of property, plant and equipment	–	–	(16)
Premium and costs paid on repurchase of subordinated debt	–	4	–
Gain on effective part disposal of Pakistan branches	–	–	(17)
Profit on sale of subsidiary	(4)	–	–
Incorporation costs in China	8	–	4
Tax on normalised items	(8)	(7)	2
Normalised earnings	1,401	1,105	1,170
Normalised earnings per ordinary share (cents)	100.7	84.1	87.3

* The profit amounts represent the profit attributable to ordinary shareholders, i.e. after the deduction of dividends payable to the holders of the non-cumulative redeemable preference shares (see note 3).

There were no ordinary shares issued after the balance sheet date that would have significantly affected the number of ordinary shares used in the above calculations had they been issued prior to the end of the balance sheet period.

5. Cash and Cash Equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprises of the following balances with less than three months maturity from the date of acquisition. Restricted balances comprise minimum balances to be held at central banks.

	30.06.07 \$million	30.06.06 \$million	31.12.06 \$million
Cash and balances with central banks	8,991	11,813	7,698
Less restricted balances	(4,694)	(7,194)	(3,958)
Treasury bills and other eligible bills	7,028	6,222	6,233
Loans and advances to banks	18,291	12,627	16,084
Debt securities	10,691	7,919	12,104
Total	40,307	31,387	38,161

6. Restatement of prior periods

In the consolidated financial statements as at 31 December 2006, the fair value amounts in relation to the acquisitions of Union and HIB contained some provisional balances. During the period to 30 June 2007, certain of these balances have been revised. In accordance with IFRS 3 "Business Combinations", the adjustments to the provisional balances have been made as at the date of acquisition and the 2006 balance sheet amounts restated, with a corresponding adjustment to goodwill,

increasing goodwill on acquisition relating to Union and HIB respectively by \$6 million to \$412 million and by \$27 million to \$975 million. The adjustments primarily relate to a reassessment of the value of certain loan assets and investment debt securities, together with a reduction in deferred tax assets following a reassessment of their recoverability. The income statement for 2006 has not been restated, because any effect is not material.

	As reported at 31.12.06 \$million	Adjustment to Union \$million	Adjustment to HIB \$million	Restated at 31.12.06 \$million
Loans and advances to customers	139,330	(9)	(14)	139,307
Investment securities	49,487	–	10	49,497
Goodwill and intangible assets	6,146	6	27	6,179
Property, plant and equipment	2,168	–	1	2,169
Deferred tax assets	538	3	(22)	519
Other liabilities	11,355	–	2	11,357

Union forms part of the Middle East and Other South Asia geographic segment and HIB forms part of the Other Asia Pacific geographic segment.

7. Interim Report and Statutory Accounts

The information in this interim statement is unaudited and does not constitute statutory accounts within the meaning of section 240 of the Companies Act 1985. This document was approved by the Board on 7 August 2007. The comparative figures for the financial year ended 31 December 2006 are not the company's statutory accounts for that financial year. Those accounts have been reported on by the company's auditors and delivered to the registrar of companies. The report of the auditors was (i) unqualified, (ii) did not include a reference to any matters to which the auditors drew attention by way of emphasis without qualifying their report, and (iii) did not contain a statement under section 237(2) or (3) of the Companies Act 1985.

This announcement does not constitute the unaudited Interim financial information which is contained in the interim report. The unaudited Interim financial information has been reviewed by the Company's auditor, KPMG Audit Plc, in accordance with the guidance contained in Bulletin 1999/4: Review of interim financial information issued by the Auditing Practices Board. On the basis of its review, KPMG Audit Plc is not aware of any material modifications that should be made to the unaudited interim financial information as presented for the six months ended 30 June 2007 in the interim report. The full independent review report is included in the interim report.

8. Corporate Governance

The directors confirm that, throughout the period, the Company has complied with the code provisions set out in Appendix 14 of the Listing Rules of the Hong Kong Stock Exchange. The directors also confirm that the announcement of these results has been reviewed by the Company's Audit and Risk Committee.

The Company confirms that it has adopted a code of conduct regarding securities transactions by directors on terms no less exacting than required by Appendix 10 of the Listing Rules of the Hong Kong Stock Exchange, and that the directors of the Company have complied with this code of conduct throughout the period.

9. Purchase of Listed Securities

Bedell Cristin Trustees Limited is trustee of both the 1995 Employees' Share Ownership Plan Trust ("the 1995 trust"), which is an employee benefit trust used in conjunction with some of the Group's employee share schemes, and the Standard Chartered 2004 Employee Benefit Trust ("the 2004 trust") which is an employee benefit trust used in conjunction with the Group's deferred bonus plan. The trustee has agreed to satisfy a number of awards made under the employee share schemes and the deferred bonus plan through the relevant employee benefit trust. As part of these arrangements Group companies fund, from time to time, the trusts to enable the trustee to acquire shares to satisfy these awards. All shares have been acquired through the London Stock Exchange.

The 1995 trust has not acquired any shares in the period ended 30 June 2007 (30 June 2006: nil, 31 December 2006: nil). At 30 June 2007, the 1995 trust held 162,071 (30 June 2006: 5,104,262, 31 December 2006: 2,148,874) Standard Chartered PLC shares, of which 162,071 (30 June 2006: 5,104,262, 31 December 2006: 2,148,874) have vested unconditionally. The shares are held in a pool for the benefit of participants under the Group's Restricted Share Scheme, Performance Share Plan and Executive Shares Option Schemes. These shares were fully funded by the Group.

For the period ended 30 June 2007, the 2004 trust has acquired, at market value, 351,340 (30 June 2006: 321,242, 31 December 2006: nil) Standard Chartered PLC shares for an aggregate price of \$10 million (30 June 2006: \$9 million, 31 December 2006: \$nil million). These shares are held in a pool for the benefit of participants under the Group's deferred bonus plan. The purchase of these shares has been fully funded by the Group. At 30 June 2007, the 2004 trust held 377,270 (30 June 2006: 311,575, 31 December 2006: 311,157) Standard Chartered PLC shares, of which none (30 June 2006: none, 31 December 2006: none) have vested unconditionally.

Except as disclosed above, neither the Company nor any of its subsidiaries has bought, sold or redeemed any security of the company listed on The Stock Exchange of Hong Kong Limited during the period ended 30 June 2007.

Forward looking statements

It is possible that this document could or may contain forward-looking statements that are based on current expectations or beliefs, as well as assumptions about future events. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements often use words such as anticipate, target, expect, estimate, intend, plan, goal, believe, will, may, should, would, could or other words of similar meaning. Undue reliance should not be placed on any such statements because, by their very nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors that could cause actual results, and the Group's plans and objectives, to differ materially from those expressed or implied in the forward-looking statements.

There are several factors which could cause actual results to differ materially from those expressed or implied in forward looking statements. Among the factors that could cause actual results to differ materially from those described in the forward looking statements are changes in the global, political, economic, business, competitive, market and regulatory forces, future exchange and interest rates, changes in tax rates and future business combinations or dispositions.

The Group undertakes no obligation to revise or update any forward looking statement contained within this document, regardless of whether those statements are affected as a result of new information, future events or otherwise.
