FIRST GOLD POUR AT WHITE MOUNTAIN MINE

Sino Gold Mining Limited (ASX:SGX, SEHK:1862) is pleased to announce that the first gold has been poured at the Company's White Mountain Gold mine in Jilin Province, China.

Commenting on this milestone, Sino Gold Chief Executive Officer Jake Klein said:

"The first gold pour has taken place two months ahead of schedule and only fourteen months after construction commenced.

"With great support from the Jilin Provincial Government, the White Mountain City Government and the local community around the mine site, White Mountain has been put into production only four years after the orebody was discovered by Sino Gold.

"I would like to thank our White Mountain team for their hard work in making this rapid progress possible as well as thanking the various Chinese government authorities for their timely assistance and strong support.

"Sino Gold will now enter 2009 with two long-life, low-cost operations and a strong balance sheet"

About White Mountain

White Mountain is located 230km south-southeast of Changchun, the capital city of Jilin Province in northeast China. Sino Gold owns 95% of the project and the surrounding 128km² exploration licences.

The White Mountain project is located 7km from the prefecture level city of Baishan, a coal and iron ore mining centre.

A major northeast trending regional fault zone hosts the gold mineralisation at White Mountain, with mineralisation known to extend 1.5km along strike.

Mineral Resources total 12.4 million tonnes at 3.0g/t gold, containing 1.2 million ounces gold and Ore Reserves total 6.5 million tonnes at 3.8g/t gold, containing 784,000 ounces.

In August 2007, the Company's Board of Directors approved the development of White Mountain, primarily comprising an underground mine and a CIL processing plant.

Gold production averaging 65,000 ounces per annum is planned to result from design mill throughput of approximately 650,000 tonnes per annum and overall gold recoveries averaging 80%. Production is expected to ramp up to these levels over the course of 2009.

Cautionary Statement on Forward Looking Information

Certain statements contained in this news release constitute forward-looking information within the meaning of securities laws. The words "expect", "will", "intend", "estimate" and similar expressions identify forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management of Sino Gold are inherently subject to significant business, economic and competitive uncertainties and contingencies. Sino Gold cautions the reader that such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual financial results, performance or achievements of Sino Gold to be materially different from their respective estimated future results, performance or achievements expressed or implied by those forward-looking statements and the forward-looking statements are not guarantees of future performance. These risks, uncertainties and other factors include, but are not limited to: changes in the worldwide price of gold or certain other commodities (such as fuel and electricity) and other currencies; changes in U.S. dollar interest rates or gold lease rates; risks arising from holding derivative instruments; legislative, political or economic developments in the jurisdictions in which Sino Gold carries on business; operating or technical difficulties in connection with mining or development activities; employee relations; availability and increasing costs associated with mining inputs and labour; the speculative nature of exploration and development, including the risks of diminishing quantities or grades of reserves, adverse changes in our credit rating, contests over title to properties, particularly title to undeveloped properties; and the risks involved in the exploration, development and mining business. These factors are discussed in greater detail in statutory releases filed with the applicable securities regulatory authorities.
