BUSINESS REVIEW

The Group is principally engaged in the manufacturing and trading of quality power cord, power cord sets, cables and wires, wire harnesses and plastic resins.

During the year, our sales in power cord and power cord sets, cables and wires, wire harnesses and plastic resins accounted for 54%, 10%, 34% and 2% of the Group's total revenue, respectively.

Despite the drop in revenue, our profitability has sustained during the year under review. This is primarily attributed to the successful implementation of the "Lean Production" strategy which aims to rationalize the internal operating process within each department and between departments.

In addition, the Group has continued to adopt prudent strategy, conduct regular audit on cost control, enhance production efficiency and take defensive measures to pre-empt potential accidents and risks.

In respect of raw material costs, the Group has adopted the proven strategy of hedging with delivery to reduce costs which results in solid growth in profit.

While the implementation of the People's Republic of China's new labour law in early 2008 increased our costs, the Group has reduced the surging pressure on labour costs by capitalizing on semi-automation to realign manpower.

業務回顧

本集團之主要業務包括專門製造及營銷品質 穩定的電源線、電源線組合、導線、組合線 束及塑膠皮料。

年內,電源線及電源線組合、導線、組合線 束及塑膠皮料的銷售額,分別佔本集團營業 額之54%、10%、34%及2%。

回顧年內,雖然本集團營業額有減少,但是 盈利亦能保持一定的增長。主要是由於我們 成功推行「精益生產」策略,該策略旨在精簡 各部門本身及互相之間的程序。

另外本集團一向嚴謹執行謹慎策略,經常審 核成本,提高生產效益,也時常防範任何可 能發生的意外及風險,做好防禦措施。

關於原材料價格方面,本集團採取以實貨交付的對冲模式,有效控制成本並帶來穩定盈 利增長。

中華人民共和國於二零零八年初推出的新勞動法,增加了本公司的成本。本集團會透過加強半自動化生產,節省人手,減輕成本壓力。

FUTURE PROSPECTS

The outburst of the Global Financial Tsunami has taken place for over one year. Despite there are signals indicating that the global economy has revived gradually, it will take some time for the full recovery from the economic downturn. The Group will continue to implement prudent strategy and take cautious steps to weather challenges arising from the weak global economy in many mature countries.

Our core strategy for 2010 is to create value for our customers. We will continue to provide high quality products at competitive price.

In addition to producing more environmentally-sound products, we will continue to invest our resources in research and development of environmentally-proof and green products in order to meet the new environmental protection regulation adopted by the European Union.

This year, in order to tap into the high potential market, the Group plans to apply for the ISO 13485 certification which is dedicated to Medical Devices – Quality Management Systems.

Currently, the United States of America is the Group's most major overseas market. We will expedite our expansion into other overseas markets in the future, with an aim to develop new revenue driver for the Group.

On the human resources front, we will continue to attract and retain talents through the provision of competitive remuneration package and employee recognition.

2010 will be another challenging year. But we believe if we remain positive in enhancing efficiency, adding value to our products and building closer partnership relationship with our customers, the Group's business will continue to achieve steady growth in profit.

未來展望

席捲全球的金融海嘯已經爆發超過一年。儘管環球經濟已穩定下來,但仍需一段時間才能走向全面復甦的步伐。本集團以謹慎態度,來面對全球很多國家步入經濟衰退所造成的困擾。

我們於二零一零年的核心策略是,為客户創 造價值,我們會繼續提供高品質及有競爭力 的產品。

除增加生產符合環保要求的產品,我們會繼續投放資源,研究及開發環保產品,推廣綠色產品,配合歐盟對環保要求的新規例。

在今年度,為增加有潛力的市場,本集團計 劃申請ISO 13485的醫療設備一優質管理系 統認證。

目前,美國是本集團的最主要海外市場,而 我們在未來將會加快開拓其他海外市場,期 望為本集團帶來新的收益來源。

在人才資源方面,本集團將透過提供具競爭力的薪酬福利,以及對優秀人才予以表揚, 致力吸納及挽留出色員工。

二零一零年仍然是充滿挑戰的一年,但我們相信只要抱著積極的態度,提升營運效率, 為產品增值,加強與客户的緊密合作夥伴關 係,必定可以繼續推動本集團的業務增長, 取得平穩成績。

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

There consolidated financial statements are presented in thousands of Hong Kong dollars ("HK\$'000") unless otherwise stated.

1.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRS"). They have been prepared under the historical cost convention, as modified by the revaluation of buildings, investment property and derivative financial instruments which are carried at fair value.

The preparation of the consolidated financial statements in conformity with HKFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 3.

1.1 Basis of preparation (Continued)

revised HKFRSs and interpretations that are effective for annual periods beginning on or after 1st January 2009. There have been no significant changes to the accounting policies applied in the consolidated financial statements for the year ended 31st December 2009, except for the following adoption:

HKAS 1 (Revised), "Presentation of Financial Statements" (effective from 1st January 2009)

The revised standard prohibits the presentation of items of income and expenses (that is, 'nonowner changes in equity') in the statement of changes in equity, requiring 'non-owner changes in equity' to be presented separately from owner changes in equity in a statement of comprehensive income. As a result the Group presents in the consolidated statement of changes in equity all owner changes in equity, whereas all non-owner changes in equity are presented in the consolidated statement of comprehensive income. Comparative information has been re-presented to conform with the revised standard. Since the change in accounting policy only impacts presentation aspects, there is no impact on earnings per share.

1.2 Consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries made up to 31st December.

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated.

In the Company's statement of financial position the investments in subsidiaries are stated at cost less provision for impairment of losses. The results of subsidiaries are accounted for by the Company on the basis of dividends received and receivable.

Accounting policies of subsidiaries have been changed where necessary in the consolidated financial statements to ensure consistency with the policies adopted by the Group.

1.4 Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group's companies, is classified as investment property. Investment property comprises land held under operating leases. Land held under operating lease is classified and accounted for as investment property when the rest of the definition of investment property is met.

Investment property is measured initially at its cost, including related transaction costs.

After initial recognition, investment property is carried at fair value. The valuation is reviewed annually by an external independent valuer on an open market basis. Separate value is not attributed to land and buildings. The valuation is incorporated in the financial statements. Changes in fair values are recognised in the income statement.

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the income statement during the financial period in which they are incurred.

其後之支出只有在與該項目有關的未來經濟利益有可能流入集團時,而該項目的成本能可靠衡量時,才計入資產的賬面值中。在此財務期間,所有其他維修及保養成本於損益表列為開支。

1.5 Property, plant and equipment

(i) Buildings

Buildings comprise factories and offices. Buildings are shown at fair value, based on regular valuations by an external independent valuer, less subsequent depreciation and impairment. Any accumulated depreciation and impairment at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

Increases in the carrying amount arising on revaluation of buildings are credited to building revaluation reserve in equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in the income statement, in which case the increase is credited to the income statement to the extent of the decrease previously charged. Decreases that offset previous increases of the same asset are charged against building revaluation reserve directly in equity; all other decreases are expensed in the income statement.

(ii) Finance lease

Leases of assets where the Group has substantially all the risks and rewards of ownership are classified as finance lease assets. Finance lease assets are capitalised at the commencement of the lease and at the lower of the fair value of the assets and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the outstanding finance balance. The corresponding rental obligations, net of finance charges, are included in current and non-current borrowings. The interest element of the finance cost is recognised in the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

1.7 Leasehold land and land use rights

Leasehold land and land use rights are stated at cost less accumulated amortisation and accumulated impairment losses (if any). Cost mainly represents consideration paid for the rights to use the land on which various plants and buildings are situated for a period of 46-50 years from the date the respective right was granted. Amortisation of leasehold land and land use rights is charged in the income statement on a straight-line basis over the period of the leasehold land and land use rights.

1.8 Impairment of investments in subsidiaries and non-financial assets

Assets that have an indefinite useful life are tested for impairment annually. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Such impairment loss is recognised in the income statement.

1.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs are assigned to individual items on the first-in, first-out basis and are arrived at as follows:

- Raw materials purchased for use in the manufacturing process – invoiced price and shipping cost.
- (ii) Work in progress and finished manufactured goods – costs of direct materials, direct labour and an appropriate proportion of production overheads.
- (iii) Finished goods purchased for resale invoiced price and shipping cost.

Net realisable value is determined on the basis of anticipated sales proceeds less estimated selling expenses.

1.15 Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

2. FINANCIAL RISK MANAGEMENT

(a) Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, price risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

Management regularly manages the financial risks of the Group.

(i) Foreign exchange risk

The Group is exposed to foreign currency risk arising from various currency exposures, primarily with respect to Renminbi ("RMB"). Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. In addition, the conversion of RMB is subject to the rules and regulations of foreign exchange control promulgated by the Mainland China monetary authority.

Should HK\$ strengthened/weakened by 5% (2008: 6%) during the years ended 31st December 2009 against the RMB, with all other variables held constant, the impact of the profit after taxation and the equity for the year would have been approximately HK\$654,000 (2008: HK\$263,000), higher or lower.

2. 財務風險管理

(a) 財務風險因素

集團因經營業務而承受不同財務風險,市場風險(包括外匯風險,價格風險及利率風險)、信貸風險和流動資金風險。本集團的整體風險管理計劃針對金融市場的不可預知性,務求盡量減低對集團財務表現所帶來的影響。

Foreign exchange risk (Continued)

Certain of the assets of the Group are denominated in United States Dollar ("USD"), but the foreign exchange risk is considered not significant as HK\$

exchange rate is pegged to USD.

The foreign exchange risk on financial assets and liabilities denominated in currencies other than RMB and USD are insignificant to the Group.

(ii) Price risk

The Group exposes to fluctuations in the market price of major raw materials such as copper rods and chemicals to make plastic resins.

The Group is able to pass certain realised price gains and losses on raw materials to certain customers through price adjustments, which can mitigate the price risk. The Group has not used any derivative instruments to hedge such economic exposures.

(iii) Interest rate risk

The Group's interest rate risk arises from bank borrowings. Borrowings at variable rates expose the Group to cash flow interest rate risk. Borrowings at fixed rates expose the Group to fair value interest rate risk. Details of the Group's borrowings have been disclosed in Note 23 to the consolidated financial statements.

The Group has not used any hedging arrangement to hedge its exposure to interest rate risk.

(a) Financial risk factors (Continued)

(iii) Interest rate risk (Continued)

The sensitivity analysis presents the effects on the Group's profit after taxation for the year as a result of changes in interest expense on floating rate borrowings. The sensitivity to interest rate used is based on market forecasts available at the balance sheet date and under the economic environments in which the Group operates, with other variables held constant.

Based on the analysis performed, the impact on the profit after taxation of a 100 basis-point change in interest rate would be an increase/ decrease of HK\$327,000 and HK\$740,000 for the years ended 31st December 2009 and 2008, respectively.

(iv) Credit risk

The Group's bank balances are deposited with financial institutions with reliable and acceptable rating quality. Management regularly assesses the credit risk of these financial institutions by reviewing their published financial information and credit rating.

The Group's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of each financial asset, including cash at bank, trade and other receivables, as disclosed on the consolidated statement of financial position.

(c) Fair value estimation

The carrying amounts of the Group's financial assets and liabilities including cash and cash equivalents, trade and other receivables, trade and other payables, and short-term borrowings approximate to their fair values due to their short-term maturities. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

The Group did not have any derivative financial instruments as at 31st December 2009. The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Group is the current bid price.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Taxation

The Group is subject to taxation in several jurisdictions. Significant judgement is required in determining the provision for taxation. Sufficient provisions are set aside to meet all tax liabilities. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

3. 關鍵會計估算及假設

估算和假設會被持續評估,並根據過往經驗和其他因素進行評價,包括在 有關情況下相信為合理的對未來事件 的預測。

本集團對未來作出估算和假設。所得的會計估算(如其定義),很少會與其實際結果相同。很大機會導致下個財政年度的資產和負債的賬面值作出重大調整的估算和假設討論如下。

(a) 税項

本集團需要在多個司法權轄區繳納税項。在釐定税項撥備時,需要作出重大判斷。充足的撥備時 產定以應付所有稅務。在正常業務過程中,許多交易及計算的稅 終釐定是不確定的。當最終的稅款結果與最初記賬金額不同時, 有關差額將影響釐定期間的所得 稅和遞延稅款撥備。

For the year ended 31st December 2009 截至二零零九年十二月三十一日止年度

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

(b) Estimated fair value of properties

The fair values of investment property and office and factory buildings are determined at the end of each reporting period by an independent professional valuer. The fair value of investment property is determined on an open market value basis by reference to comparable market transactions and where appropriate on the basis of capitalisation of the net rental income/net income after allowing for outgoings and in appropriate cases provisions for reversionary income potential. The fair values of office and factory buildings are determined on depreciated replacement cost basis. These methodologies are based upon estimates of future results and a set of assumptions as to income and expenses of the property and future economic conditions.

HKFRS 8 "Operating Segments" replaces HKAS 14 "Segment Reporting" with effect from 1st January 2009. HKFRS 8 is a disclosure standard that requires the disclosure of information about the Group's operating segments. It replaces the requirement under HKAS 14 to determine primary (business) and secondary (geographical) reporting segments of the Group. The Chief Executive Officer (the chief operating decision maker) reviews the Group's internal reporting and determines that there are five reportable segments, based on location of customers under cable and wire products business, including Hong Kong, Mainland China, Other Asian Countries, America and Europe. These segments are managed separately as each segment is subject to risks and returns that are different from the others.

The segment information for the reportable segments for the years ended 31st December 2009 and 2008 are as follows:

This proposed dividend is not reflected as a dividend payable in these consolidated financial statements, but will be reflected as an appropriation of retained earnings for the year ending 31st December 2010.
