Purpose:	The Loan shall be applied solely for the purpose of financing the 3D seismic data collection, drilling and exploration work of the Project.
Interest:	Interest shall accrue at one-month Hong Kong Interbank Offered Rate on (i) the outstanding principal amount of the Loan for the period from the Drawdown Date to the Repayment Date; and (ii) the total outstanding amount (principal amount together with interest accrued thereon) due and not yet repaid upon the Repayment Date, and be calculated with reference to actual number of days lapsed on the basis of 365 days a year.

#### **Reason for and the benefit of the entering into of the Loan Agreement**

The Group is principally engaged in the exploration, drilling, production and sale of crude oil, manufacture and sale of paints, blended solvents and plastic colorants, trading of chemical materials, provision of painting services, and property investment.

As set out in the Announcement, the Company and the Vendor have entered into the LOI in relation to the Possible Acquisition. It is expected that if the Possible Acquisition is materialized, it will strengthen the Group's technical capability in oil exploration and exploitation and provide additional income to the Group as well as strengthen its revenue base. As more time is required for furnishing the technical review/valuation of the Project as part of the due diligence review conducted by the Group, and at the same time funds are required for the 3D seismic data collection, drilling and exploration work of the Project, the grant of the Loan by the Company to the Borrower will avoid unnecessary delay to the development progress of the Project and represents a better bargaining position and utilization of funds of the Company.

The Directors have also considered the potential risks involved in the entering into of the Loan Agreement. Pursuant to the Share Charge, the Borrower has pledged his entire shareholding (i.e. 30% equity interest) in the Vendor to the Chargee to secure the due and full performance of the Borrower's obligations under the Loan Agreement. The Vendor has been fully entrusted to execute the Project under the Joint-Operating Agreement. On that basis, the Share Charge will provide the Company with security and alternate means of repayment of the Loan and interests accrued thereon in case the Borrower fails to repay them when becoming due and the Board considers that the benefits of the Loan Agreement override the potential risks.

Having considered the (i) the terms of the Loan, including but not limited to the interest rate; (ii) the reason for and benefit of the entering into of the Loan Agreement; and (iii) the Share Charge executed in favor of the Chargee, the Board considers that the Loan Agreement is entered into upon normal commercial terms and the terms and conditions of the Loan Agreement are fair and reasonable and are in the interests of the Group and the Shareholders as a whole.
