New government measures, which aimed to cool down the properties market in June 2011, in addition to the measures implemented since November 2010, have had a visible effect on the transaction volume in the first half of 2011. Benefited from the continued good market sentiment and solid economic fundamentals in earlier quarter, overall residential price rose 2% as compared to the last quarter. Nevertheless, there is a tendency of cooling down in the price for the third quarter.

中國物業

在二零一一年第二季,中國政府再次加強 對房地產的調控及收緊銀根,因此,導致 多間銀行都減少了對房地產行業的貸款, 房地產投資的總量及成交持續下滑,房價 輕微下調。

在二零一一年上半年,深圳經濟保持平穩增長,住宅物業一手市場的新供應量維持低水平。龍崗區已佔新增總供應量的60%而寶安區也佔27%。加上在二零一一年六月通車的深圳地鐵4號線,將福田至龍華的往來時間大大縮短,對我們在龍華的物業投資有正面的影響。

在杭州,豪華住宅公寓市場的平均價格有溫和上升,反而豪華別墅的平均價格卻有下調之趨勢。這預示著購買者結構的轉變, 更多一手自用的買家進入市場而投機者退出。在租賃市場上,亦有類似的情況。

卓能雅苑深圳龍華

該項目位於寶安區龍華布龍公路北側,宗地號A819-0128,土地面積為51,323平方米(約552,449平方呎),已批准建築面積為152,230平方米(約1,638,604平方呎)。計劃興建九座多層大廈提供1,089個住宅單位、1,054個停車位、一個三層高幼稚園、會所、花園及商舖。住宅單位面積由70平方米(約753平方呎)至147平方米(約1,582平方呎)。

China Property

In the second quarter of 2011, the Chinese government further tightened monetary controls for the real estate. As a result, most banks reduced loans on properties and the real estate investment volume and transactions continued to drop and price slightly cool down.

In the first half year of 2011, the Shenzhen economy kept growing steadily. New supply of residential properties in the primary market remained low. Longgang district took up 60% of the total new supply while Bao'an district contributed 27%. Moreover, the operation of Shenzhen Metro Line 4 in June 2011 has shortened the traveling time between Futian and Longhwa which has positive impact on our property investment in Longhua.

In Hangzhou, the average asking price for deluxe apartments gently increased but the price for deluxe villas has a tendency to drop. This may be an indication for a changing consumer structure, with fewer speculators and more first-hand users coming to the market. In the leasing market, a similar situation is observable.

Cheuk Nang Garden Longhwa, Shenzhen

馬來西亞物業

馬來西亞經濟在二零一一年第二季錄得平穩的增長,馬來西亞政府在二零一一年三月推出「My First Home Scheme」以協助年齡在35歲以下月入不多於3,000林吉特的馬來西亞人購買價格在100,000林吉特至220,000林吉特之間的樓房以作居住之用。在二零一一年七月,政府推出名為「PR1MA」的新房屋計劃協助中低收入的馬來西亞人購置物業,目標為首次購買樓房而月入少於6,000林吉特的買家。

由於我們的項目是一豪華住宅項目,此等計劃對我們的投資並無影響。

Malaysia Property

The Malaysian economy registered a steady growth in the second quarter of 2011. The Malaysian Government has introduced a My First Home Scheme in March 2011 for those Malaysian aged under 35 years old at monthly income not more than RM3,000 to purchase their own homes with price between RM100,000 to RM220,000. In July, 2011, the Government further introduced a new affordable housing scheme called Program Perumahan 1Malaysia (PR1MA). Its objective is to give lower middle income Malaysians an option to own a house and is targeted at first-time house buyers with household income less than RM6,000 per month.

Since our project is a deluxe residential development, the schemes have no impact on our investment.

展望

亞洲區的經濟增長放緩,主要受到美國及歐洲的經濟衰退影響,加上區內日本的大自然災難及國際債券市場持續性混亂觸發環球經濟復甦的信心減弱所引致。

雖然如此,亞洲區的表現比其他地區出色,尤其中國,將繼續處於全球經濟領先地位。

受惠於中國經濟增長的影響下,香港的勞動市場已呈明顯改善,失業率在五月份維持在低位3.5%,雖然香港正面對高通漲的問題,預期來年經濟將仍會有平穩增長。

本集團現有六百多萬呎建築面積之土地儲 備,可供未來數年建築樓宇,如無不可預 見之情況,本集團將會表現穩定,未來三 至四年可獲較良好的業績。

ACCOUNTING POLICIES (Continued)

2.1 Basis of preparation (Continued)

It should be noted that accounting estimates and assumptions are used in preparation of the financial statements. Although these estimates are based on management's best knowledge and judgement of current events and actions, actual results may ultimately differ from those estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 4.

2.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries (see 2.3 below) made up to 30 June each year.

Subsidiaries are consolidated from the date on which control is transferred to the Group. They are excluded from consolidation from the date that control ceases.

Intra-group transactions, balances and unrealised gains and losses on transactions between group companies are eliminated in preparing the consolidated financial statements. Where unrealised losses on intra-group asset sales are reversed on consolidation, the underlying asset is also tested for impairment from the Group's perspective. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Group.

ACCOUNTING POLICIES (Continued)

2.2 Basis of consolidation (Continued)

When the Group loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any noncontrolling interest. Amounts previously recognized in the same manner as would be required if the relevant assets or liabilities were disposed of.

2.3 Subsidiaries

Subsidiaries are entities (including special purpose entities) over which the Group has the power to control the financial and operating policies so as to obtain benefits from their activities. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

In the Company's statement of financial position, subsidiaries are carried at cost less any impairment loss unless the subsidiary is held for sale or included in a disposal group. The results of the subsidiaries are accounted for by the Company on the basis of dividends received and receivable at the reporting date. All dividends whether received out of the investee's pre or post-acquisition profits are recognised in the Company's profit or loss.

2.3 Subsidiaries (Continued)

Non-controlling interests

Non-controlling interests represent the portion of the profit or loss and net assets of a subsidiary attributable to equity interests that are not owned by the Group and are not the Group's financial liabilities.

Non-controlling interests are represented in the consolidated statement of financial position within equity, separately from the equity attributable to the owners of the Company. Profit or loss attributable to the non-controlling interests is presented separately in the consolidated income statement as an allocation of the Group's results. Total comprehensive income is attributed to noncontrolling interests even if this results in the noncontrolling interest having a deficit balance.

2.4 Joint ventures

2.4 Joint ventures (Continued)

Jointly controlled assets

The Group's share of the jointly controlled assets and share of any liabilities incurred jointly with other ventures are recognised in the consolidated financial statements and classified according to their nature. Liabilities and expenses incurred directly in respect of interests in jointly controlled assets are accounted for on an accrual basis.

ACCOUNTING POLICIES (Continued)

2.5 Foreign currency translation (Continued)

Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined and are reported as part of the fair value gain or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

In the consolidated financial statements, all individual financial statements of foreign operations, originally presented in a currency different from the Group's presentation currency, have been converted into Hong Kong dollars. Assets and liabilities have been translated into Hong Kong dollars at the closing rates at the reporting date. Income and expenses have been converted into the Hong Kong dollars at the exchange rates ruling at the transaction dates, or at the average rates over the reporting period provided that the exchange rates do not fluctuate significantly. Any differences arising from this procedure have been recognised in other comprehensive income and accumulated separately in the exchange reserve in equity. Goodwill and fair value adjustments arising on the acquisition of a foreign operation on or after 1 January 2005 have been treated as assets and liabilities of the foreign operation and translated into Hong Kong dollars at the closing rates.

When a foreign operation is sold, such exchange differences are reclassified from equity to profit or loss as part of the gain or loss on sale.

2.6 物業、機器及設備

持有經營租約之土地及在土地上之 樓宇(在最初獲得土地及樓宇時未 能清楚界定為持有經營租約,因此 土地及樓宇之租約權益之公允值不 能分開量度)以其重估價值入賬, 即以在重估當日之公允值扣減累計 折舊及累計減值虧損列賬。公允價 值乃由對物業有足夠經驗之外聘專 業估值師來確定於結算日之賬面值 與以公允價值釐定沒有重大差異。 任何於重估當日之累計折舊將扣減 資產之賬面總值而淨額重列為資產 之重估價值。其他物業、機器及設 備以其成本價扣減累計折舊及累計 減值虧損列賬。

2.6 Property, plant and equipment

Land held under operating leases and buildings thereon (where the fair value of the leasehold interest in the land and buildings cannot be measured separately at the inception of the lease and the building is not clearly held under an operating lease) are stated at revalued amounts, being fair value at the date of revaluation less subsequent accumulated depreciation and any subsequent impairment losses. Fair value is determined in appraisals by external professional valuers with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the reporting date. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. All other items of property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Any surplus arising on revaluation of land and buildings is recognised in other comprehensive income and is accumulated in the property revaluation reserve in equity, unless the carrying amount of that asset has previously suffered a revaluation decrease. To the extent that any decrease has previously been recognised in profit or loss, a revaluation increase is credited to profit or loss with the remaining part of the increase dealt with in other comprehensive income. A decrease in net carrying amount of land and buildings arising on revaluations is recognised in other comprehensive income to the extent of the revaluation surplus in the property revaluation reserve relating to the same asset and the remaining decrease is recognised in profit or loss.

資產之剩餘價值、折舊方法及可使 用年期會於每個結算日進行檢討及 調整(如適用)。

隨後成本已包括在資產之賬面值或 確認為作個別資產,惟前提為與項 目有關之日後經濟效益將有可能流 入本集團中而該項目之成本能可靠 地計量。所有其他維修及保養費用 在使用當年之收益表中支銷。

ACCOUNTING POLICIES (Continued)

2.6 Property, plant and equipment (Continued)

Depreciation on property, plant and equipment is provided to write off the cost or revalued amounts less their residual values over their estimated useful lives, using the straight-line method, at the following rates per annum:

Land and building 2% Furniture, fittings and office equipment 10% Motor vehicles and accessories 20%

The asset's residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

The gain or loss arising on retirement or disposal is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. Any revaluation surplus remaining in equity is transferred to retained earnings on the disposal of land and building.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other costs, such as repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

2.7 Investment properties

Investment properties are land and/or buildings which are owned or held under a leasehold interest to earn rental income and/or for capital appreciation. These include land held for a currently undetermined future use and property that is being constructed or developed for future use as investment property.

When the Group holds a property interest under an operating lease to earn rental income and/or for capital appreciation, the interest is classified and accounted for as an investment property on a property-by-property basis. Any such property interest which has been classified as an investment property is accounted for as if it were held under a finance lease.

Investment properties include completed properties and investment properties under development for continued future use as investment properties. Investment properties are stated in the statement of financial position at fair value. Fair value is determined by external professional valuers, with sufficient experience with respect to both the location and nature of the investment property. The carrying amounts recognised at the reporting date reflect the prevailing market conditions at the reporting date.

Gains or losses arising from either changes in the fair value or the sale of an investment property are included in profit or loss in the period in which they arise.

2.8 Financial assets

The Group's accounting policies for financial assets other than interest in subsidiaries are set out below. Financial assets of the Group are classified into financial assets at fair value through profit or loss, loans and receivables and available-for-sale financial assets.

Management determines the classification of its financial assets at initial recognition depending on the purpose for which the financial assets were acquired and where allowed and appropriate, reevaluates this designation at every reporting date.

All financial assets are recognised when, and only when, the Group becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade date. When financial assets are recognised initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

Derecognition of financial assets occurs when the rights to receive cash flows from the investments expire or are transferred and substantially all of the risks and rewards of ownership have been transferred.

At each reporting date, financial assets are reviewed to assess whether there is objective evidence of impairment. If any such evidence exists, impairment loss is determined and recognised based on the classification of the financial asset.

Where a contract contains one or more embedded derivatives, the entire hybrid contract may be designated as a financial asset at fair value through profit or loss, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Financial assets may be designated at initial recognition as at fair value through profit or loss if the following criteria are met:

- the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis: or
- the assets are part of a group of financial assets which are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management strategy and information about the group of financial assets is provided internally on that basis to the key management personnel; or
- the financial asset contains an embedded derivative that would need to be separately recorded.

(iv) Available-for-sale financial assets

Non-derivative financial assets that do not qualify for inclusion in any of the other categories of financial assets are classified as available-for-sale financial assets.

All financial assets within this category are subsequently measured at fair value. Gain or loss arising from a change in the fair value excluding any dividend and interest income is recognised in other comprehensive income and accumulated separately in the availablefor-sale financial assets revaluation reserve in equity, except for impairment losses (see the policy below) and foreign exchange gains and losses on monetary assets, until the financial asset is derecognised, at which time the cumulative gain or loss is reclassified from equity to profit or loss. Interest calculated using the effective interest method is recognised in profit or loss.

For available-for-sale investments in equity securities that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity instruments, they are measured at cost less any identified impairment losses at each reporting date subsequent to initial recognition.

Impairment of financial assets (Continued)

Loss events in respect of a group of financial assets include observable data indicating that there is a measurable decrease in the estimated future cash flows from the group of financial assets. Such observable data includes but not limited to adverse changes in the payment status of debtors in the group and, national or local economic conditions that correlate with defaults on the assets in the group.

If any such evidence exists, the impairment loss is measured and recognised as follows:

(i) Financial assets carried at amortised cost

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of the loss is recognised in profit or loss of the period in which the impairment occurs.

If, in subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed to the extent that it does not result in a carrying amount of the financial asset exceeding what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in profit or loss of the period in which the reversal occurs.

(ii) Available-for-sale financial assets

When a decline in the fair value of an available-for-sale financial asset has been recognised in other comprehensive income and accumulated in equity and there is objective evidence that the asset is impaired, an amount is removed from equity and recognised in profit or loss as an impairment loss. That amount is measured as the difference between the asset's acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss.

Impairment of financial assets (Continued)

Impairment losses of financial assets other than financial assets at fair value through profit or loss and trade receivables that are stated at amortised cost, are written off against the corresponding assets directly. Where the recovery of trade receivables is considered doubtful but not remote, the impairment losses for doubtful receivables are recorded using an allowance account. When the Group is satisfied that recovery of trade receivables is remote, the amount considered irrecoverable is written off against trade receivables directly and any amounts held in the allowance account in respect of that receivable are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

Impairment losses recognised in an interim period in respect of available-for-sale equity securities and unquoted equity securities carried at cost are not reversed in a subsequent period. Consequently, if the fair value of an available-for-sale equity security increases in the remainder of an annual period, or in a subsequent period, the increase is recognised in other comprehensive income.

2.9 Properties held for sale

Properties for sale include completed properties for sale and properties under development for sale and are stated at the lower of cost and net realisable value.

(i) Properties under development for sale

The cost of properties under development for sale comprises specifically identified cost, including the acquisition cost of land, aggregate cost of development, materials and supplies, wages and other direct expenses, an appropriate proportion of overheads and borrowing costs capitalised (see Note 2.20). Net realisable value represents the estimated selling price less estimated costs of completion and costs to be incurred in selling the property.

(ii) Completed properties for sale

In the case of completed properties developed by the Group, cost is determined by apportionment of the total development costs for that development project, attributable to the unsold properties. Net realisable value represents the estimated selling price less costs to be incurred in selling the property.

The cost of completed properties for sale comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

For a transfer of investment properties previously carried at fair value to properties for sale, the property cost is the fair value at the date of change in use.

2.12 Financial liabilities (Continued)

Financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. All interest related charges are recognised in accordance with the Group's accounting policy for borrowing costs (see Note 2.20).

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amount is recognised in profit or loss.

Derivatives

Derivatives including separated embedded derivatives are measured at fair value (see Note 2.10).

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. 2.18 Impairment of non-financial assets

Property, plant and equipment, other non-current asset and interest in subsidiaries are subject to impairment testing. All other assets are tested for impairment whenever there are indications that the asset's carrying amount may not be recoverable.

An impairment loss is recognised as an expense immediately for the amount by which the asset's carrying amount exceeds its recoverable amount. Recoverable amount is the higher of fair value, reflecting market conditions less costs to sell, and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of time value of money and the risk specific to the asset.

For the purposes of assessing impairment, where an asset does not generate cash inflows largely independent from those from other assets, the recoverable amount is determined for the smallest group of assets that generate cash inflows independently (i.e. a cash-generating unit). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level.

Impairment losses is charged pro rata to the other assets in the cash generating unit, except that the carrying value of an asset will not be reduced below its individual fair value less cost to sell, or value in use, if determinable.

2.21 Accounting for income taxes

Income tax comprises current tax and deferred tax.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting period, that are unpaid at the reporting date. They are calculated according to the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognised as a component of tax expense in profit or loss.

Deferred tax is calculated using the liability method on temporary differences at the reporting date between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, tax losses available to be carried forward as well as other unused tax credits, to the extent that it is probable that taxable profit, including existing taxable temporary differences, will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised.

Deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither taxable nor accounting profit or loss.

香港會計準則第17號(修訂本)-租賃

作為二零零九年香港財務報告準則 改進之一部分,香港會計準則第17 號就租賃土地分類作出修訂。於修 訂香港會計準則第17號之前,本集 團須將租賃土地分類為經營租賃, 並於財務狀況表內呈列為預付租賃 款項。香港會計準則第17號的修訂 已廢除有關規定,並規定租賃土地 的分類須以香港會計準則第17號所 載一般原則為基礎,即租賃資產擁 有權附帶的絕大部分風險及回報是 否已轉移至承租人。本集團得出結 論:把有關中國租約分類為經營租 賃仍屬適當。有關土地租賃的會計 政策變動對財務報表並無影響。

HKAS17 (Amendments) - Lease

As part of Improvements to HKFRSs issued in 2009, HKAS 17 has been amended in relation to the classification of leasehold land. Before the amendment to HKAS 17, the Group was required to classify leasehold land as operating leases and to present leasehold land as prepaid lease payments in the statement of financial position. The amendment to HKAS 17 has removed such a requirement and requires that the classification of leasehold land should be based on the general principles set out in HKAS 17, that is, whether or not substantially all the risks and rewards incidental to ownership of a leased asset have been transferred to the lessee. The Group concluded that the classification of such leases in the PRC as operating leases continues to be appropriate, and the change in accounting policy on land leases has no impact on the financial statements.

HK Interpretation 5 - Presentation of Financial Statements - Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause

The Interpretation is a clarification of an existing standard, HKAS 1 Presentation of Financial Statements. It sets out the conclusion reached by the HKICPA that a term loan which contains a clause which gives the lender the unconditional right to demand repayment at any time shall be classified as a current liability in accordance with paragraph 69(d) of HKAS 1 irrespective of the probability that the lender will invoke the clause without cause.

為符合香港詮釋第5號所載之規 定,本集團已變更分類包含可隨時 要求償還條款之定期貸款之會計政 策。根據新政策,具有賦予放款人 無條件權利可隨時催還貸款之定期 貸款於財務狀況表內乃分類為流動 負債。過往有關定期貸款乃根據議 定還款時間表分類,除非本集團於 報告日期已違反協議所載之任何貸 款契諾或於其他情況下有理由相信 放款人於可見將來會援用其於即時 還款條款項下之權利。

HK Interpretation 5 - Presentation of Financial Statements - Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause (Continued)

In order to comply with the requirements of HK Interpretation 5, the Group has changed its accounting policy on the classification of term loans that contain a repayment on demand clause. Under the new policy, term loans with clauses which give the lender the unconditional right to call the loan at any time are classified as current liabilities in the statement of financial position. Previously such term loans were classified in accordance with the agreed repayment schedule unless the Group had breached any of the loan covenants set out in the agreement as of the reporting date or otherwise had reason to believe that the lender would invoke its rights under the immediate repayment clause within the foreseeable future.

The new accounting policy has been applied retrospectively by re-presenting the opening balances at 1 January 2009, with consequential reclassification adjustments to comparatives for the year ended 31 December 2009. The reclassification has had no effect on reported profit or loss, total comprehensive income or equity for any period presented.

Amendments to HKAS12 Deferred Tax: Recovery of Underlying Assets was issued in December 2010 and will be effective from 1 January 2012, with earlier application permitted. Before the amendments to HKAS12, deferred tax liability has been recognised for investment properties carried at fair value on the basis that the carrying amounts of investment properties would be recovered through use. The amendments include a rebuttable presumption that investment properties carried at fair value will be recovered through sale. The directors anticipated that the application of amendments to HKAS12, if adopted, might have material impact on the current or prior period as certain investment properties of the Group will be recovered through sale. The Group is in the process of assessing the impact from the application of the amendments.

(b) New/revised HKFRSs that have been issued but are not vet effective (Continued)

Under HKFRS 9, financial assets are classified into financial assets measured at fair value or at amortised cost depending on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Fair value gain or loss will be recognise in profit or loss except for those nontrade equity investment, which the entity will have a choice to recognise the gain and loss in other comprehensive income. HKFRS 9 carries forward the recognition and measurement requirements for financial liabilities from HKAS 39, except for financial liabilities that are designed at fair value through profit or loss, where the amount of change in fair value attributable to change in credit risk of that liabilities is recognised in other comprehensive income unless that would create or enlarge an accounting mismatch. In addition, HKFRS 9 retains the requirements in HKAS 39 for derecognition of financial assets and financial liabilities.

The directors of the Company anticipate that all of the pronouncements will be adopted in the Group's accounting policy for the first period beginning after the effective date of the pronouncement.

The Group is in the process of making an assessment of the potential impact of these new/ revised HKERSs and the directors so far concluded that the application of these new/revised HKFRSs will have no material impact on the Group's financial statements.

4. 重大會計估計及判斷

本集團根據過往經驗及其他因素不斷 評估及判斷,包括在相信屬合理之情況 下對未來事件的期望。

本集團對未來作出估計及假設。估計結果按定義很少與實際結果相符。該估計及假設對資產及負債於下一財政年度之賬面值引致重大調整的風險如下:

投資物業及物業、機器及設備公允價值 評估

投資物業與土地及樓宇的估值分類為物業、機器及設備,以公允價值模式加上須要管理層投入若干假設及與估值有關連之因素來釐定,本集團於每年均由獨立估值師依據以上假設進行估值而該等假設亦於估值前獲得估值師同意。

遞延税項

於二零一一年六月三十日,一項有關稅 務虧損的遞延稅項資產27,572,000港元 (二零一零年:25,396,000港元)已在本 集團的綜合財務狀況報表中確認。遞延 稅項資產的實現主要依靠是否有足夠 未來利潤或未來存在的臨時稅務差異。 倘若產生的實際未來利潤較預期少,重 大的遞延稅項資產需作回撥,此回撥將 會在該期間的損益中確認。

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Estimate fair value of investment properties and property, plant and equipment

The valuation of investment properties and land and building classified under property, plant and equipment under the fair value model requires management's input of various assumptions and factors relevant to the valuation. The Group conducts annual revaluation, using independent professionally qualified valuers. The assumptions underlying the valuations are agreed with the valuers prior to adoption.

Deferred tax

At 30 June 2011, a deferred tax asset of HK\$27,572,000 (2010: HK\$25,396,000) in relation to tax losses have been recognised in the Group's consolidated statement of financial position. The recognition of the deferred tax asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are less than expected, a material reversal of deferred tax assets may arise, which would be recognised in profit or loss for the period in which such a reversal takes place.

At each reporting date the Group reviews receivables for evidence of impairment on both an individual and collective basis. No impairment has been recognised on receivables through the provision account for the two years ended 30 June 2011 and 2010.

Included in the Group's trade receivables balance are debtors with a carrying amount of HK\$477,000 (2010: HK\$422,000) which are past due as at the reporting date for which the Group has not made any provision. These receivables are related to a number of diversified debtors that has a good track record of credit with the Group. Based on past credit history, management believe that no impairment allowance is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered to be fully recoverable. Except for deposits received from tenants, the Group does not hold any other collateral over these balances.

No amounts in relation to other receivables were past due at the reporting date (2010: HK\$Nil).

26.有息借貸(續)

所有貸款為浮動利率有息貸款,銀行貸款於結算日之實際利率為1.50%(二零一零年:1.09%)

有息借貸包括可即為要求償還的定期 貸款,以已攤銷成本值列賬。沒有任何 部份的定期貸款在需在一年後清還及 附有可即時要求還款條款及已分類為 一項流動負債,預期需於一年內清還。

所有銀行貸款需符合財務機構一般借款安排之承諾,若本集團違反提款時的承諾將會被要求即時還款。再者,若干本集團之定期貸款合約已包含給予借款人有自行決定的權力要求隨時還款的條款,而無需理會本集團是否已履行合約規定之還款責任。

本集團已定期監控符合此等承諾,已履行定期貸款之約定還款而相信只要本集團繼續符合此等要求,銀行不會行駛其權力要求本集團即時還款。本集團之流動資金風險管理已載於賬項附註31.3。於二零一一年六月三十日,沒有任何提款時的承諾有被違反(二零一零年:無)。

26.INTEREST-BEARING BORROWINGS (Continued)

All borrowings are interest-bearing at floating rates. The effective interest rate of the bank loans at the reporting date is 1.50% (2010: 1.09%).

The interest-bearing bank borrowings, including the term loans repayable on demand, are carried at amortised cost. None of the portion of term loans due for repayment after one year which contain a repayment on demand clause and that is classified as a current liability is expected to be settled within one year.

All of the banking facilities are subject to the fulfillment of covenants that are commonly found in lending arrangements with financial institutions. If the Group was to breach the covenants the drawn down facilities would become repayable on demand. In addition, certain of the Group's term loan agreements contain clauses which give the lender the right at its sole discretion to demand immediate repayment at any time irrespective of whether the Group has met the scheduled repayment obligations.

The Group regularly monitors its compliance with these covenants, is up to date with the scheduled repayments of the term loans and does not consider it probable that the bank will exercise its discretion to demand repayment for so long as the Group continues to meet these requirements. Further details of the Group's management of liquidity risk are set out in Note 31.3. As at 30 June 2011, none of the covenants relating to drawn down facilities had been breached (2010; Nil).

31.2 信貸風險

信貸風險乃指金融工具的另一合約 方未能履行金融工具上的條款導致 本集團蒙受財務上的損失,本集團 及本公司面對信貸風險主要來自主 要源自銀行結存及現金與貿易及其 他應收賬款,主要來自租戶之租金 收入。

銀行結存及現金通常存放在有高信貸評級之金融機構而本集團及本公司認為信貸風險其不重大。

來自租戶之租金收入,管理層已持續性地有信貸政策及監控信貸風險。承租人在租約開始前繳交租客按金,加上本集團於每一年結日檢討個別貿易欠款之可收回金額以確保就不能收回金額有足夠減值虧損撥備。

本集團及本公司並無高度集中之信 貸風險,最大之信貸風險主要來自 各金融資產之賬面值,本集團其無 提供任何其他擔保令本集團有信貸 風險。

31.2 Credit risk

Credit risk refers to the risk that the counterparty to a financial instrument would fail to discharge its obligation under the terms of the financial instrument and cause a financial loss to the Group. The Group's and the Company's exposure to credit risk mainly arises from the bank balances and cash and trade and other receivables, primarily rents receivable from tenants.

Bank balances and cash are normally placed at financial institutions that have sound credit rating and the Group and the Company considers the credit risk to be insignificant.

For rent receivables from tenants, management has a credit policy in place and the exposure to credit risk is monitored on an on-going basis. Rental deposits are required from tenants prior to the commencement of leases. In addition, the Group reviews the recoverable amount of each individual trade debt at each reporting date to ensure that adequate impairment losses are made for irrecoverable amounts.

The Group and the Company have no significant concentration of credit risk, with exposure spread over a number of counterparties and tenants. Hence, the maximum exposure to credit risk is represented by the carrying amounts of each class of financial assets. The Group does not provide any other guarantees which would expose the Group to credit risk.

31.3 流動資金風險(續)

本集團及本公司於二零一一年及二零一零年六月三十日餘下的已簽約到期之財務負債按未貼現的現金流量(包括根據合約訂定利率計算利息支出或,若是浮息,則根據報下日的現行利率)編制之分析如下數值權人可選擇負債在何時要履行,該負債按本集團及本公司最早需支付之日期方式進行,每一還款期被分配到本集團及本公司最早需支付之日期。

尤其是,當定期貸款包含銀行有自 行決定的權力可要求即時還款的條 款,分析中的現金流出乃根據該實 體最早需付款的期間來呈列,即倘 若借款人行駛其無條件的權利要求 即時還款。其他銀行借貸的到期分 析乃按約定的還款日期來制定。

31.3 Liquidity risk (Continued)

Analysed below is the Group's and the Company's remaining contractual maturities for its financial liabilities as at 30 June 2011 and 2010, based on undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the reporting date). When the creditor has a choice of when the liability is settled, the liability is included on the basis of the earliest date on when the Group and the Company can be required to pay. Where the settlement of the liability is in instalments, each instalment is allocated to the earliest period in which the Group and the Company is committed to pay.

Specifically, for term loans which contain a repayment on demand clause which can be exercised at the bank's sole discretion, the analysis shows the cash outflow based on the earliest period in which the entity can be required to pay, that is if the lenders were to invoke their unconditional rights to call the loans with immediate effect. The maturity analysis for other bank borrowings is prepared based on the scheduled repayment dates.

The table that follows summarises the maturity analysis of term loans with a repayment on demand clause based on agreed scheduled repayments set out in the loan agreements. The amounts include interest payments computed using contractual rates. As a result, these amounts were greater than the amounts disclosed in the "on demand" time band in the maturity analysis above. Taking into account the Company's financial position, the directors do not consider that it is probable that the bank will exercise its discretion to demand immediate repayment. The directors believe that such term loans will repaid in accordance with the scheduled repayment dates set out in the loan agreements.

31.4 利率風險

利率風險指財務工具之公允價值或 現金流量會隨著市場利率改變而浮 動之風險。除按揭貸款及銀行結存 外,本集團及本公司並無重大有息 借貸資產。

本集團及本公司之利率風險主要來 自從銀行收取之利息、按揭貸款及 有息借貸,其中包括銀行貸款、董 事墊款及有關連公司墊款,此類安 排以浮動利率,因此本集團及本 揭貸款及有息借貸條款,當香港 優惠利率及香港銀行同業拆息 優惠利率及香港銀行同業拆息變 動,利率會跟隨改變。本集團及本 公司並無使用調期利率對沖利率風 險。

本集團自數年起已跟隨有關管理利 率風險的政策,並認為已見成效。

31.4 Interest rate risk

Interest rate risk relates to the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. Except for mortgage loans and bank balances, the Group and the Company has no significant interest-bearing assets.

The Group's and the Company's interest rate risk arises primarily from interest receivable from bank balances, mortgage loans and interest-bearing borrowings which includes bank loans, advances from a director and a related company. These arrangements issued at variable rates expose the Group and the Company to cash flow interest rate risk. In accordance with the terms of the mortgage loan and the interest-bearing borrowings, the interest rate will be adjusted should the Hong Kong dollar prime rate and Hong Kong Interbank Offer Rate be changed. The Group and the Company has not used any interest rate swaps to hedge its exposure to interest rate risk.

The policies to manage interest rate risk have been followed by the Group since prior year are considered to be effective.

截至二零一一年六月三十日止年度 FOR THE YEAR ENDED 30 JUNE 2011

31.4 利率風險(續)

於二零一一年六月三十日,預期利 率將上調/下調50點子,若其他因 素不變,會減少/增加本集團之除 税後盈利及保留溢利約4,431,000 港元(二零一零年:增加/減少本 集團之除稅後盈餘及減少/增加 本集團之保留溢利約5,319,000港 元)。該50點子之上調/下調為管 理層對直至下一個報告日利率之轉 變之評估。

31.5 外匯風險

外匯風險指財務工具之公允價值或 未來現金流量會隨著外匯匯率改變 而浮動的風險。本集團主要經營在 香港、馬來西亞及中國,大部份交 易之主要貨幣為港元、馬來西亞林 吉特(「林吉特」)及人民幣(「人民 幣1)。外匯風險主要來自未來商業 交易或確認非功能貨幣資產及負債 的時候。本集團認為外幣風險主要 來自人民幣,本集團並無參與任何 衍生工具對沖外幣風險。

31. 金融風險管理目標及政策(續) 31. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (Continued)

31.4 Interest rate risk (Continued)

At 30 June 2011, it is estimated that a general increase/decrease of 50 basis points in interest rates, with all other variables held constant, would decrease/increase the Group's profit after income tax and retained profits by approximately HK\$4,431,000 (2010: increase/decrease the Group's loss after income tax and decrease/increase the Group's retained profits by approximately HK\$5,319,000). The 50 basis point increase/ decrease represents management's assessment of a reasonably possible change in interest rates over the period until the next annual reporting date.

31.5 Foreign currency risk

Foreign currency risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group operates mainly in Hong Kong, Malaysia and the PRC with most of the transactions denominated in Hong Kong dollars, Malaysian Ringgit ("RM") or Renminbi ("RMB"). Foreign currency risk arises when future commercial transactions or recognised assets and liabilities are denominated in a currency that is not the entity's functional currency. The Group considers its foreign currency exposure is mainly arising from the exposure of Renminbi. The Group has not entered into any derivative instruments to hedge the foreign exchange exposures.

At 30 June 2011 if Hong Kong dollar had weakened/strengthened by 5% against Australian dollars with all other variables held constant, profit after income tax for the year would have been HK\$Nil (2010: loss after income tax for the year would have been HK\$597,000 lower/higher), mainly as a result of foreign exchange gains/losses on translation of Australian dollars denominated bank balances.

31.5 外匯風險(續)

於二零一一年六月三十日,若港元較人民幣弱/強5%而其他因素維持不變,本年之除税後盈利將為289,000港元(二零一零年:除税後虧損為0港元),主要由於將人民幣資產及負債兑換時匯兑差額所賺取/損失。

本集團並無與澳洲元作對沖外幣風 險。唯是管理層監控外匯風險並在 有需要時對沖重大外匯風險。

本集團並無與美元作對沖外幣風險,由於港元與美元的兑換率範圍已被嚴格規管,外匯兑換的永久變動將影響綜合財務報表。

本公司於結算日並無重大之外匯風險。

31.5 Foreign currency risk (Continued)

At 30 June 2011 if Hong Kong dollars had weakened/strengthened by 5% against RMB with all other variables held constant, profit after income tax for the year would have been HK\$289,000 (2010: loss after income tax for the year would have been HK\$Nil lower/higher), mainly as a result of foreign exchange gains/losses on translation of RMB denominated assets and liabilities.

The Group does not hedge its foreign currency risk with Australian dollars. However, management monitors the foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

The Group does not hedge its foreign currency risks with United States dollars as the rate of exchange between Hong Kong dollars and the United States dollars is controlled within a tight range. Permanent changes in foreign exchange rates would have an impact on consolidated financial statements.

The foreign exchange risk exposed to the Company at the reporting date is immaterial.

31.6 其他價格風險

其他價格風險指財務工具之公允價 值或未來現金流量會隨著市場價格 (利率變動及外匯變動除外)改變而 浮動的風險。本集團主要面對已分 類為按公允價值計入損益之金融資 產的上市證券市價的變動。管理層 會監控價格的變動,有需要時作出 適當的行動。

本集團自數年起已跟隨有關管理 其他價格風險的政策,並認為已見 成效。

商業投資假設性的10%(二零一零年:10%)價格變動對本集團本年之業績影響如下:

31.6 Other price risk

Other price risk relates to the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than changes in interest rates and foreign exchange rates). The Group is mainly exposed to change in market prices of listed equity securities in respect of its investments in listed equity classified as financial assets at fair value through profit and loss. The management will monitor the price movements and take appropriate actions when it is required.

The policies to manage other price risk have been followed by the Group since prior years and are considered to be effective.

A hypothetical 10% (2010: 10%) change in prices of trading investments would result in an effect to the Group's result for the year as follows:

- 第2層:就資產或負債而直接 (即價格)或間接(即從價格推 衍) 可觀察之資料輸入(不包括 第1層所包含之報價);及

31.7 Fair value measurements recognised in the consolidated statement of financial position

The following table presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy. The hierarchy groups financial assets and liabilities into three levels based on the relative reliability of significant inputs used in measuring the fair value of these financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in the fair value hierarchy within which the financial asset or liability is categorised in its entirety is based on the lowest level of input that is significant to the fair value measurement.

與過去報告期間比較,量度公允價 值使用的重估方法及技術沒有改 變。

(a) 上市證券

上市證券以港元為主,公尤價 值的釐訂已參考於報告日的上 市牌價。

本集團購入的衍生工具其無在 河活躍市場上交易。此類合約 的公允價值以重估技術使可觀 察之資料輸入最大化來釐訂, 如貨幣及利率(第二層)。

為維持或調整資本結構,本集團需調整 派予股東之股息、發行新股或出售資產 以減低債務。

1. FINANCIAL RISK MANAGEMENT AND FAIR VALUE MEASUREMENTS (Continued)

31.7 Fair value measurements recognised in the consolidated statement of financial position (Continued)

There have been no transfers between levels 1, 2 and 3 in the reporting period.

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting periods.

(a) Listed securities

The listed equity securities are denominated in Hong Kong dollars. Fair values have been determined by reference to their quoted bid prices at the reporting date.

(b) Derivatives

The derivatives entered into by the Group are not traded on active markets. The fair values of such contracts are estimated using a valuation technique that maximises the use of observable market inputs e.g. market currency and interest rates (Level 2).

32. CAPITAL MANAGEMENT

The Group manages its capital to ensure that the Group will be able to continue as a going concern for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt.

截至二零一一年六月三十日止年度 FOR THE YEAR ENDED 30 JUNE 2011

32.資本管理(續)

本集團監控其資產負債比率,此比率以 負債淨額除以總資本,因此,本集團詮 釋負債淨額為借貸總額(包括在綜合資 產負債表中的流動及非流動有息借貸、 董事及有關連公司墊款)減去銀行存款 及現金。總資本為在綜合財務狀況表中 呈報的權益總額。

年內,本集團之策略,由二零零九年起 沿用至今,要維持資產負債比率不超 過50%,二零一一年及二零一零年六月 三十日之資產負債比率如下:

32. CAPITAL MANAGEMENT (Continued)

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debts divided by total capital. For this purpose, the Group defines net debt as total borrowings (including current and non-current interest-bearing borrowings, advances from a director and a related company as shown in the consolidated statement of financial position) less bank balances and cash. Total capital is equity as shown in the consolidated statement of financial position.

During the year, the Group's strategy, which was unchanged from 2009, was to maintain a gearing ratio of not more than 50%. The gearing ratio at 30 June 2011 and 2010 were as follows:

| | | 二零一一年 | 二零一零年 |
