19. Material changes in the quarterly results compared to the results of the immediate preceding quarter

For the financial quarter under review, the Group achieved an operating profit before gain from changes in fair value of biological assets less estimated point-of-sale costs of RM19.5 million as compared to RM39.4 million for the immediate preceding financial quarter. The results for the financial quarter under review were affected by lower volume sold for timber products. The adverse impact was, however, partially mitigated by better selling prices obtained from plywood and veneer which were 6% and 1% respectively higher compared to that of the immediate preceding financial quarter.

The Group recognised a loss from changes in fair value of biological assets of RM25.9 million as the softwood log prices soften at the end of financial quarter under review compared to immediate preceding financial quarter. Similarly, due to lower crude palm oil price during the financial quarter under review, the Group's share of the losses from changes in fair value of biological assets of an associate involved in oil palm plantation was RM16.3 million compared to RM0.7 million recognised in the immediate preceding financial quarter.

Due to the US Dollar strengthening against NZ Dollar for the financial quarter under review as compared to immediate preceding financial quarter, the Group also recognised an unrealised loss of RM7.5 million arising from the translation of US Dollar loan by a foreign subsidiary in New Zealand as compared to a gain of RM10.1 million in the immediate preceding financial quarter.

After accounting for net finance costs of RM13.7 million which included the recognition of net loss from changes in fair value of financial instruments amounting to RM8.8 million, the Group recorded a loss before taxation of RM30.0 million for the financial quarter under review.

20. Review of performance of the Group for the quarter and financial year-to-date

For the financial quarter under review, the Group recorded an operating profit of RM19.5 million. After accounting for losses from changes in fair value of biological assets less estimated point-of-sale costs of RM25.9 million, net finance costs and foreign exchange differences of RM15.0 million and share of losses after tax of associates and jointly-controlled entities of RM8.6 million, the Group recorded a loss before taxation of RM30.0 million. However, a positive operating cash flow before changes in working capital of RM59.5 million was achieved.

For the financial quarter under review, the Group sold 186,501 m³ of hardwood logs, 133,188 m³ of softwood logs, 55,910 m³ of plywood and 32,749 m³ of veneer. Average prices achieved were RM484/m³ for hardwood logs, RM299/m³ for softwood logs, RM1,902/m³ for plywood and RM1,050/m³ for veneer. Prices for hardwood logs achieved by the Group during the financial quarter under review remain stable due to tight log supply and still relatively robust demand from India and China. Plywood demand from Japan remains weak.

21. Commentary on the outlook of the Group

The global economic outlook remains fluid and increasingly uncertain. The health of US economy, the recovery of Japanese housing sector and the sustainability of timber demand from China will play a key role in the pace and extent of a recovery in the timber industry going forward and this will impact upon the performance of the Group for the financial year.

Faced with this volatile and uncertain operating environment in which the Group operates, and with constant pressure on margins, the Group continues to work on improving operational efficiency by enhancing the productivity of its workforce and its equipment fleet, emphasising tight control over cash cost of production.

22. Variation of actual profit from forecast profit and shortfall in profit guarantee

The Group did not issue any profit forecast for this quarter and therefore comments on variances with forecast profit are not applicable.
