NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL INFORMATION

1. General information

The Company is a limited liability company incorporated in the Cayman Islands on 9 August 2006.

The Company's shares have been listed on the Main Board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") since 10 July 2007. The Company together with its subsidiaries are hereinafter collectively referred to as the Group. The Group is principally engaged in the manufacture and sale of electronic products and the provision of related subcontracting services.

This condensed consolidated interim financial information for the nine months ended 30 September 2013 has not been audited and was approved for issue by the Board of Directors on 28 October 2013.

2. Basis of preparation and significant accounting policies

This condensed consolidated interim financial information for the nine months ended 30 September 2013 has been prepared in accordance with HKAS 34, "Interim financial reporting". This condensed consolidated interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2012, which have been prepared in accordance with Hong Kong Financial Reporting Standards ("HKFRSs").

Except as described below, the accounting policies applied are consistent with those of the annual financial statements for the year ended 31 December 2012, as described in those annual financial statements.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

(a) New and amended standards adopted by the Group

The following amendments to standards are mandatory for the first time for the financial year beginning 1 January 2013:

HKAS 1 (Amendment) "Presentation of financial statements" is effective for annual periods beginning on or after 1 July 2012. The main change resulting from these amendments is a requirement for entities to group items presented in 'other comprehensive income' (OCI) on the basis of whether they are potentially reclassifiable to profit or loss subsequently (reclassification adjustments). The amendments do not address which items are presented in OCI.

HKFRS 10 "Consolidated financial statements", with related amendment for transition guidance, is effective for annual periods beginning on or after 1 January 2013. The objective of HKFRS 10 is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities to present consolidated financial statements. Defines the principle of control, and establishes controls as the basis for consolidation. Set out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee. It also sets out the accounting requirements for the preparation of consolidated financial statements.

HKAS 27(Revised 2011) "Separate financial statements" is effective for annual periods beginning on or after 1 January 2013. HKAS 27 (revised 2011) includes the provisions on separate financial statements that are left after the control provisions of HKAS 27 have been included in the new HKFRS 10.

HKFRS 13 "Fair value measurements" is effective for annual periods beginning on or after 1 January 2013. HKFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across HKFRSs. The requirements, which are largely aligned between HKFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within HKFRSs or US GAAP.

There is no significant impact to the Group for adoption of these new and amended standards.

Regent Manner (BVI) Limited was incorporated in the British Virgin Islands under the International Business Companies Acts of the British Virgin Islands and is exempted from payment of the British Virgins Islands income tax.

In accordance with Departmental Interpretation and Practice Note 21 (Revised) paragraph 16 published by the Inland Revenue Department of Hong Kong, the directors of the Company considered that Regent Manner Limited ("Regent HK"), a wholly owned subsidiary with Hong Kong manufacturing business involved in the manufacturing activities in the PRC, is entitled to 50:50 apportionment of profits generated from the sale of goods manufactured in the PRC. As a result, Regent HK provided for Hong Kong profits tax at 8.25% on the estimated assessable profits arising in Hong Kong for the nine months ended 30 September 2013 (for the nine months ended 30 September 2012: 8.25%).

Regent HK operates through a subcontracting factory in Dongguan, the PRC. The factory is subject to the PRC corporate income tax at a rate of 25% on the deemed profit generated in the PRC. The deemed profit is calculated at a rate of 7% on the total deemed revenue which is determined by applying 7% mark-up on the total processing costs incurred by the subcontracting factory. The subcontracting factory has stopped its operation in 2013 and all of its business has been moved to Regent Electron (Dongguan) Co., Ltd. as at 30 September 2013.

Other PRC subsidiaries are subject to the PRC Corporate Income Tax. The New Corporate Income Tax Law, which became effective on 1 January 2008, introduced the unification of the income tax rate for domestic-invested and foreign-invested enterprises at 25%.

7. Earnings per share

	For the nine months ended 30 September	
	2013	2012
	US$'000	*US$'000*
	(Unaudited)	(Unaudited)
Profit attributable to equity holders of the Company *(US$'000)*	**42,996**	48,405
Weighted average number of ordinary shares in issue *('000)*	**2,149,765**	2,107,580
Basic and diluted earnings per share *(US$ per share)*	**0.0200**	0.0230

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company by the weighted average numbers of ordinary shares in issue during the period.

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Company has only one category of dilutive potential ordinary shares, which is the employees share option scheme. For the employees share option scheme, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Company's shares during the period when the options are outstanding) based on the monetary value of the subscription rights attached to outstanding options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the options. The result of the comparison is anti-dilutive and therefore does not result in dilutive ordinary shares for the calculation of diluted earnings per share for the nine months ended 30 September 2013.

8. Dividends

On 18 March 2013, the directors of the Company proposed and declared a final dividend in respect of the year ended 31 December 2012 of HK$0.05 per ordinary share, totalling HK$107,488,273 (equivalent to approximately US$13,861,000) (final dividend for the year ended 31 December 2011: approximately US$18,808,000). Such interim dividend was paid on 22 October 2013.

MANAGEMENT DISCUSSION AND ANALYSIS

Business and Financial review

The Group is principally engaged in the provision of integrated production solutions deploying surface-mount technology ("SMT") for manufacturers of thin-film transistor liquid crystal display ("TFT-LCD") panels and various electronic products, with an aim to become a specialized provider of electronic manufacturing services ("EMS"). The Group's integrated production solutions include materials procurement and management, process engineering design, SMT processing, quality assurance, logistics management and after-sales services.

Revenue

For the nine months ended 30 September 2013, the Group recorded an unaudited consolidated revenue of approximately US$1,000,239,000 (for the nine months ended 30 September 2012: approximately US$1,200,434,000), representing a decrease of approximately 16.7% over the corresponding period of last year. Decrease in revenue during the period was primarily due to (1) the reduction of sales of LED light bars applicable to high-end large-size tablet computers in quarter one and two; (2) the increased proportion of sales of subcontracting service (for which raw materials were provided by customers) in quarter three as compared with the corresponding period of last year.

Gross Profit

Due to (1) the increasing proportion of sales of control boards for TFT-LCD and touch-panels which have higher gross profit margins; (2) increase of overall utilization rate of production facilities as a result of the consolidation of production capacity of the factory that was running in relatively lower utilization rate in the past and (3) the increased proportion of sales of subcontracting service (for which raw materials were provided by customers) in quarter three as compared with the corresponding period of last year, the overall gross profit margin of the Group for the nine months ended 30 September 2013 increased to approximately 8.6% from approximately 7.0% for the corresponding period of last year.

Due to the increase of overall gross profit margin, the unaudited consolidated gross profit for the nine months ended 30 September 2013 increased by approximately 2.4% to approximately US$85,641,000 (for the nine months ended 30 September 2012: approximately US$83,667,000).

Net Profit

In line with the increase of gross profit margin, the net profit margin for the nine months ended 30 September 2013 also increased to approximately 4.3% from 4.0% for the corresponding period of last year. However, as an one-off provision for impairment of trade receivables of a particular customer amounted to approximately US$3,162,000 was made during the second quarter of 2013, the unaudited consolidated profit before income tax for the nine months ended 30 September 2013 dropped by approximately 3.3% to approximately US$58,290,000 (for the nine months ended 30 September 2012: approximately US$60,267,000).

Having deducted the income tax expense for the nine months ended 30 September 2013, the unaudited consolidated net profit after tax became approximately US$42,996,000 as compared with approximately US$48,405,000 for the corresponding period of last year, representing a decline of approximately 11.2%.

Liquidity and Financial Resources

As at 30 September 2013, the Group's unaudited net current assets was approximately US$212,191,000 (31 December 2012: approximately US$218,746,000) which consisted of current assets amounted to approximately US$661,265,000 (31 December 2012: approximately US$733,730,000) and current liabilities amounted to approximately US$449,074,000 (31 December 2012: approximately US$514,984,000). The current ratio, defined as current assets over current liabilities, was 1.47 times as at 30 September 2013, which was higher than 1.42 times as at 31 December 2012.

As at 30 September 2013, the cash and bank balances amounted to approximately US$169,438,000 (31 December 2012: approximately US$150,612,000) while the unsecured bank loan repayable within one year was approximately US$18,579,000 (31 December 2012: approximately US$20,439,000); and the bank loan repayable beyond one year was approximately US$28,321,000 (31 December 2012: approximately US$41,200,000).

The gearing ratio, defined as total borrowings (other than payables in ordinary course of business) over total equity, as at 30 September 2013 was approximately 12% (31 December 2012: approximately 16%).

The Board is of the opinion that the Group is in a strong and healthy financial position and has sufficient resources in support of its working capital requirement and to meet its foreseeable capital expenditure.

Treasury Policy and Exchange Risk Exposure

The Group centralizes funding for all of its operations at the Group level where foreign exchange exposure is reviewed and monitored. This policy allows the Group to better control its treasury operations and lower average cost of capital.

These capital expenditures were fully financed by the internal resources of the Group and bank borrowings.

As at 30 September 2013, the Group had 9,234 employees (as at 30 September 2012: 12,000 employees). The total wages and related cost for the nine months ended 30 September 2013 amounted to approximately US$51,013,000 (nine months ended 30 September 2012: approximately US$50,781,000).

Prospects

Products and business

During the first three quarters of 2013, the sales orders for SMT production solutions applied to LED light bars for tablet computers and control boards for touch-panels kept surging. In the future, the above businesses, together with the business of SMT production solutions specialized for TFT-LCD products, will continue to be the main business of the Group. The Group's new business in relation to the SMT production solutions for LED general lighting and white appliances has started to make contribution to the Group. The Group will keep developing new solutions for more advanced applications and other high-end electronic products in order to expand the source of income and enhance profitability.

Customers

The Group strives to become a leading EMS provider in the global TFT-LCD panel industry. In this regard, the Group intends to strengthen its relationships with leading TFT-LCD panel makers by continuously adopting co-location strategy. Furthermore, the Group will continue to maintain its focus on the global major players of TFT-LCD panel as well as touch-panel industry from China, Japan, Korea and Taiwan, the international brands of LED lighting equipment and white appliances manufacturers in the PRC, and will enlarge its customer base by exploring opportunity of business with other global manufacturers.

Production capacity

The Group will also expand its production capacity to cater for increasing demand from customers and to continuously invest in advanced production facilities to enhance production efficiency and quality. During the first three quarters of 2013, the Group has kept enhancing the production facilities of the plants in Xiamen and Suzhou respectively to cope with the new orders for manufacturers of touch-panels and control panels of advanced tablet-computers. The total number of SMT production lines as at 30 September 2013 was 179.

Industry

In the long run, thanks to the government policies promoting energy-saving in many countries, technology evolution, as well as the increasing desire for advanced energy-saving devices in the consumer market, particularly the common application of touch-panel. With those surging demand, the TFT-LCD industry is expected to show healthy growth driven by growing market demand for new generation of TFT-LCD products. Furthermore, the demand from the consumer and industrial and commercial market for energy-saving devices and LED lighting equipment is accelerating. It is favourable for the Group to expand its new business in those markets.

The Group will capture this business opportunity by working closely with its major customers to strive for promising operating results and enhance shareholders' value. The Group's management is confident that its business will continue to grow in the foreseeable future and generate good returns for the Company's shareholders.

Code provision A.2.1 stipulates that the roles of chairman and chief executive officer should not be performed by the same individual. As Mr. Wu Kai-Hsiung, a director, resigned as the chief executive officer and was re-designated as a non-executive director with effect from 22 January 2013, and since then Mr. Wu Kai-Yun, the chairman of the Company, took over as the chief executive officer, the Company deviated from code provision A.2.1 for the period from 22 January 2013 to 30 September 2013.

Currently, Mr. Wu Kai-Yun serves as the chairman of the Board and the chief executive officer of the Company. Mr. Wu is the founder of the Group. He has extensive experience in the surface-mount technology business and possesses good reputation, which are key qualifications for the chairmanship. The Group has been moving forward under his leadership as the chairman. Meanwhile, Mr. Wu possesses such competent management skills and business acumen as shall be required for the chief executive officer in his performance of daily management. The Board is comprised of three executive directors (including the chairman), one non-executive director and three independent non-executive directors, each of whom has appropriate skills and experience required by the Group. In addition, the general managers in charge of the operations of the Company's subsidiaries are acted by other unconnected persons. Rules for the proceedings of Board meetings also maintain a mechanism for reporting of interest and abstention from voting.

The Board believes that the current structure of the Board and voting mechanism have already ensured a balance between directors' rights and responsibilities. The Board believes that with Mr. Wu's rich experience in the industry, his roles as both the chairman and chief executive officer not only can enhance communications between the Board and the management team, but also assure that the management team can effectively carry out the policies approved by the Board.
