CGC ANNOUNCEMENT

It is expected that the net loss attributable to the shareholders of CGC for the Reporting Period to be around RMB60 million to RMB100 million as compared with a net profit attributable to the shareholders of RMB3.95 million for the corresponding period last year. The basic loss per share for the Reporting Period is expected to be around RMB0.0453 to RMB0.0756 as compared with an earnings per share of RMB0.003 for the corresponding period last year. The change was due to (i) the continued weakness in demand in Europe and Brazil, the key markets of TPV Technology Limited (“**TPV**”), a subsidiary of CGC, for its TV business, which resulted in a decrease in both sales volume and gross profit; and (ii) the severance payment made by TPV in connection with the restructuring and streamlining of the business of its subsidiary TPV Vision.

The basic loss per share for the Reporting Period is expected to be around RMB0.0748 to RMB0.0816 as compared with an earnings per share of RMB0.0247 for the corresponding period last year. The change was due to the depreciation of Renminbi during the Reporting Period which resulted in a substantial decrease in the fair value of the unexpired derivative financial instruments contracted by Great Wall Kaifa for foreign currency exchange risks hedging purpose. However, in terms of the profit/loss realized upon settlement of such derivative financial instruments, the profit before tax recorded for the Reporting Period was RMB81.17 million. Besides, the profit of the main businesses of Great Wall Kaifa during the Reporting Period increased by 26.71% as compared with the corresponding period last year due to the recovery in the global economy during the Reporting Period.
