MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The uncertainties brought about by the Federal Reserve's announcements on quantitative easing tapering and further fueled by the PRC's vacillating money market and weak economic statistics have continued to pester the Hong Kong market. Most investors adopted a wait-and-see approach, resulting in a sluggish market turnover for the first half of 2014 and entrapping our Group in the low business cycle. However, since the beginning of the second half of 2014, macro data and market sentiment appears to be back on the rising curve. The anticipated launch of the Shanghai Hong Kong Stock Connect later in the year is expected to provide abounding investment opportunities and further underpin Hong Kong's leadership position in the region's capital market.

The Group recorded a loss of HK\$93.7 million for the six months ended 30 June 2014 as compared with a loss of HK\$71.4 million for the same period of last year mainly due to loss on fair value revaluation of our investment property as at 30 June 2014.

Broking, trading and investment

The underperformance of local market together with fierce market competition continued to pull down revenue for broking business for the six months ended 30 June 2014. Revenue for broking recorded for the first half of 2014 was HK\$23.7 million, representing 7.9% decrease from HK\$25.7 million for the same period in 2013. Operating loss increased to HK\$12.7 million for the six-month period ended 30 June 2014 from HK\$11.3 million for the same corresponding period in 2013.

Trading and investment incurred a loss of HK\$38.6 million for the six months ended 30 June 2014 as compared with a loss of HK\$66.5 million for the same period in 2013. Unrealized loss on financial assets at fair value through profit or loss of HK\$24.8 million was included.

Margin financing and money lending

Revenue recorded for the six months ended 30 June 2014 was HK\$9.9 million which was about the same for the same corresponding period in 2013. Contribution from this segment sharply increased from HK\$1.4 million for the six months ended 30 June 2013 to HK\$2.7 million for the six months ended 30 June 2014. The loan portfolio size was decreased by 14.8% with the balance of HK\$190.8 million as at 30 June 2014 as compared with that of HK\$224.0 million as at 31 December 2013.

Corporate advisory and underwriting

Revenue from our corporate advisory and underwriting business increased from HK\$0.2 million for the six months ended 30 June 2013 to HK\$1.9 million for the six months ended 30 June 2014. We had been successful in trimming the operating loss to HK\$1.5 million for the six months ended 30 June 2014 as compared to HK\$4.2 million for the same corresponding period in 2013.

Wealth management

Revenue recorded for the six months ended 30 June 2014 was HK\$1.8 million as compared with HK\$0.9 million for the same corresponding period in 2013. Operating loss was slightly increased to HK\$1.4 million for the six months ended 30 June 2014 from HK\$1.3 million for the same period in 2013.

Property investment

Fair value revaluation loss recorded for the six months ended 30 June 2014 was HK\$37 million as compared with fair value revaluation gain of HK\$17.1 million for the same corresponding period in 2013. Gross rental income was substantially increased from HK\$1.8 million for the first six months of 2013 to HK\$4.0 million for the six months ended 30 June 2014.

LIQUIDITY AND FINANCIAL RESOURCES

The Group had obtained short term credit facilities which were reviewed annually and a long term mortgage loan from a number of banks. The banking facilities for the share margin finance operations were secured by the securities of our margin clients and the Group. The banking facilities for the money lending operations were clean loans. The outstanding credit facilities were guaranteed by the Company.

As at 30 June 2014, the Group's long term bank borrowings apart from those for share margin finance business and personal loan business amounted to HK\$187.6 million (31 December 2013: HK\$185.0 million), which, when related to the Group's equity of HK\$404.2 million (31 December 2013: HK\$502.6 million), represented a gearing ratio of approximately 46.4% (31 December 2013: 36.8%).

The Group had a cash balance of HK\$127.8 million at the end of the current period, an increase of 25.1% from the end of 2013. The Group had sufficient working capital base to meet its operational needs.

In addition to salary, other fringe benefits include medical subsidies, life insurance, provident fund and subsidized external training. Continuous professional training will continue to be arranged for those staff registered with the Securities and Futures Commission. PROSPECTS

Our Group stands out amongst our peers in being well equipped with integrated platforms, systems and sales channels to support expansion of products and market coverage beyond the local market. We are assiduously pursuing transformation from a traditional local retail brokerage company to a versatile regional financial institution, and already we have had many successes in broadening client base, products, services and markets coverage. We will deepen client penetration through partnerships with institutions specialized in wealth management products and trading models. We are confident that this strategy will build a sustainable business model and steer the Group ahead of the increasingly volatile and ever evolving business environment.

As a result of the overhauling our corporate finance and equity capital market business, we have added exciting new deals to the pipeline and optimistically expect to launch an IPO application by the end of 2014. Along with renewed focus on the corporate market, the Group has also increased emphasis and strengthened its M&A and financial advisory services.

Our new strategies demand stellar human capital. We are actively recruiting new talents and increasingly cross-training in-house — our comprehensive Management Trainee program is one of such endeavours to breed financial talents that uphold the Group's culture and standards.

MANAGEMENT OF RISKS

The Group set out in its 2013 annual report and financial statements the principal risks and uncertainties that could impact its performance; these have remained unchanged since the annual report was published. The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk and equity price risk. The Group reviews and monitors each of these risks closely at all times.
