I am pleased to submit to the shareholders of the Company ("Shareholders") the annual report of the Company and its subsidiaries (collectively known as the "Group") for the financial year ended 31 December 2015.

### **Annual Results and Review**

The Group recorded a turnover of approximately RMB817,970,000 for the year ended 31 December 2015 as compared to approximately RMB844,469,000 last year, representing a decrease of approximately 3.1%. The gross profit margin was approximately 23% for the year ended 31 December 2015. The gross profit margin for the year ended 31 December 2014 was also approximately 23%. The profit attributable to equity Shareholders was approximately RMB73,182,000 for the year under review, representing an increase of approximately RMB14,783,000 over the previous year of approximately RMB58,399,000. Basic earnings per share was approximately RMB0.19.

The decrease in turnover of the Group was mainly due to the decrease in international market price of juice concentrate. Adversely affected by the overall international market, the international market price of the juice concentrate industry in China continued to drop in 2015, which in turn had the impact on the export price of the Group.

Under the trend of depreciation of Renminbi against US dollar, the Group has enhanced its cooperation with domestic renowned financial institutions to appropriately reduce the US dollar loans portfolio. The directors of the Company ("Directors") believe that lowering the proportion of US dollar loans can reduce the Group's exchange rate risk and finance costs, and can better facilitate its business development. In expanding the domestic market sales, the Group continued to maintain close and stable business relationships with certain renowned beverage manufacturers in China and has developed new good customers with broadened sales channels. The market share of the Company in terms of sales volume in the domestic market also increased. For research and development, the Group continued to undertake the research project under the National Science and Technology Support Program of the "12th Five-Year Plan" on the "Research and Industrialization Demonstration of Key Technologies on Apple Comprehensive Processing", accomplished the research project under the National Agricultural Fund Transfer Program 2013 on "Efficient Processing

本集團收入的下降主要是由於國際濃縮果 汁市場價格下降所致,受國際大環境的影響,中國濃縮果汁行業國際銷售價格在二 零一五年繼續下降,進而影響本集團的出 口價格。

在人民幣對美元貶值趨穩的形勢下,本 集團繼續加強了與國內著名金融機構的合 作,適度調減了美元貸款的比例,本公司 董事(「董事」)相信,通過降低美元貸款的 比例,可以有效降低本集團匯率風險和融 資成本,以便更好地促進業務的發展。在 擴大國內市場銷售方面,本集團積極致力 於與國內著名飲料加工生產商保持優質、 穩定的合作關係,並積極開發新的優良客 戶,開拓新的銷售渠道,銷售量佔國內市 場份額亦有所提升。在研發方面:本集團 繼續承擔[十二•五]國家科技支撐計劃課 題「蘋果綜合加工關鍵技術研究及產業化示 範」的研究工作,完成了二零一三年度國 家農轉資金項目「蘋果濃縮清汁高效加工技 術集成及產業化示範」、二零一三年度山東 省自主創新專項「蘋果生產專業信息服務 系統建設及蘋果汁加工技術優化與應用示

### **Analysis of Industry and Our Market Share**

In 2015, the total volume of China's apple juice concentrate exports was approximately 473,800 tonnes, representing an increase of 4% as compared to approximately 455,800 tonnes in 2014. Although the Chinese apple juice concentrate industry has only begun mass production since the late 90's of last century, the industry grew at a tremendous rate and has claimed a world market share of over 50% within just a decade, owing to the abundant apple supplies in the PRC. Excluding China, Europe is the second main production site of apple juice concentrate in the world. Hence the export volume and price of the China's apple juice concentrate is affected not only by global economy, but also the production and sales of apple juice concentrate in Europe. In the first half of 2013, since the global economy was growing in a slow pace, the demand of juice market became weak and the international market price of apple juice concentrate decreased significantly. In the second half of 2013, the international market price of apple juice concentrate gradually became stable and was recovered to a reasonable level. In 2014, due to the increasing competition of producers of apple juice concentrates in Europe and low growth pace of global economy, the international market price of apple juice concentrate decreased continuously until 2015.

### 行業和本公司市場份額分析

二零一五年年度,中國濃縮蘋果汁出口量 約為473,800噸,與二零一四年年度出口 量約455,800噸相比增加4%。中國濃縮 蘋果汁行業大規模生產起始於上世紀九十 年代後期,但由於中國有著豐富的蘋果資 源,發展速度十分驚人,僅十年左右就 佔據了世界濃縮蘋果汁市場超過50%的份 額。世界主要濃縮蘋果汁的產區除中國 外,歐洲為世界第二大產區,因此除了受 世界經濟的影響,歐洲濃縮蘋果汁的產銷 情況也會影響到中國濃縮蘋果汁的出口量 和價格。在二零一三年上半年,由於全球 經濟低速增長、果汁市場需求疲軟,濃縮 蘋果汁的國際市場價格出現了大幅下滑, 在二零一三年下半年,濃縮蘋果汁的國際 市場價格逐漸穩定並恢復到相對合理的價 格區間。二零一四年因為歐洲濃縮蘋果汁 生產商競爭不斷增加及全球經濟繼續低速 增長,使得濃縮蘋果汁的國際市場價格在 二零一四年度不斷走低,一直延續到二零 一五年年度。

Since apple juice itself is nutritious, people's increasing pursuit for green and healthy food is bound to bring more rooms for development for the apple juice market. Currently, 80% of the world's apple juice consumption market is concentrated in the developed countries with solid demands and steady growth. In these major consumer countries, we already have relatively fixed market shares and customer base. Meanwhile, we believe that the dense population in the developing countries and people's increasing attention on dietary nutrition, natural apple juice will undoubtedly be one of the best options. This gradually maturing consumer market will surely become a take-off area of future apple juice consumption. In the long run, healthy and pure juice will become more and more popular.

Being a leader in the Chinese apple juice concentrate industry and through our proactive and visionary leadership, we have gradually expanded the market shares of our products and will seek to secure our leading position in the industry for more rapid and better development.

### **Prospects and Outlook**

As a mild raw material, apple juice concentrate can be mixed with different fruit and vegetable juice, to fulfill the market requirements like low cost and good taste. Therefore the demand of apple juice concentrate is solid and steady.

With the rising demand brought by the global economic recovery, we expect both the export volume and export price of apple juice will steadily stabilise at a rational and normal level. In addition, with the gradual implementation of specific measures favourable to the agricultural industry under the PRC government's macroeconomic policies as well as the gradual improvement of various relevant PRC laws and regulations, the Group will enjoy better development and financing opportunities. Aiming at enlarging its business scale, the Group will strive to further enlarge its market, enhance productivity, diversify products, expand sales, disperse markets and to develop financing channels, etc.

作為中國濃縮蘋果汁行業龍頭企業,本公司領導鋭意進取,審時度勢,在逐步擴大國內市場佔有率的同時,穩定本公司在本行業的出口領導地位,謀求公司更快更好的發展。

### 前景與展望

濃縮蘋果汁作為具有溫和性質的基料,可以和不同水果汁、蔬菜汁等混合生產,以同時滿足低成本、好風味等市場需求,所以需求是剛性而穩定的。

In terms of juice production capacity, volatility in the industry will force some of the small and medium domestic enterprises out of the market. Moderate reshuffling in the industry will favour industry consolidation and improve industry competition. The Group aims to further increase its annual juice concentrate production capacity and to strengthen its leading position in the industry by targeting small and medium enterprises in the industry, both domestic and abroad, through merger and acquisitions and to rationally adjust the Group's existing production capacities according to changes in the sources of raw materials and to extend the research on different types of juice concentrate and production capacity. On domestic market sales, as the domestic consumer market for apple juice concentrate gradually expands, the Group will continue to maintain good business relationships with existing customers in the coming year while actively exploring new customers through our prime product quality and comprehensive services, with a view to opening a new page in our domestic market sales. On research and development, in 2016, as the presiding unit, the Group will continue to undertake the research project under the National Science and Technology Support Program of the "12th Five-Year Plan" on the "Demonstration on the Research and Industrialization of Key Technologies on Apple Comprehensive Processing", and its acceptance.

在果汁產能方面,行業的波動將使國內部 份中小型企業退出市場競爭,行業適度洗 牌將有利於提高行業集中度,改善行業的 競爭環境。本集團將著眼於國內外同行業 的中小企業,採取兼並收購等資本運作手 段,同時對本集團內現有產能根據原料資 源的變化進行合理的調整,進一步提高本 集團年生產濃縮果汁的生產能力並加大多 種類濃縮果汁的研發與生產能力,鞏固本 集團於行業內的領導地位;在國內市場銷 售方面,隨著國內濃縮果汁消費市場的日 益擴大,本集團在新的年度會繼續與現有 客戶保持良好的業務關係,並積極開拓新 的客戶,以優良的品質,完善的服務,打 開國內市場銷售的新局面。在研究與開發 方面,二零一六年,本集團作為主持單位 繼續承擔[十二•五]國家科技支撐計劃[蘋 果綜合加工關鍵技術研究及產業化示範」課 題的研究,並將完成驗收工作。

At present, the Group has a sound financial base. The Group is also well positioned to take advantage of the State's policy on development of new villages and agriculture with a view to developing rural villages, enriching farmers and expanding domestic demands. The board of Directors (the "Board") and I have full confidence in the Group's future development. Our employees will continue to support the Group and to contribute to the Group's continuous and steady development.

目前本集團財務狀況良好,且本集團符合 國家建設新農村、發展農業、繁榮農村、 富裕農民、擴大內需的政策導向,本人及 本公司董事會(「董事會」)對集團未來發展 充滿信心,本集團全體員工將繼續努力, 為本集團的持續穩定發展作出貢獻。

### **Dividend**

The Board proposes a final dividend of approximately RMB0.05 per share for the financial year 2015 in the forthcoming annual general meeting.

### **Appreciation**

During the reporting period, although the international market price of apple juice concentrate decreased, due to the decrease in finance cost and increase in investment income, both the net profit and net profit margin of the Company still increased significantly. The Directors strongly believe that the Company will have even more development opportunities in 2016, given that some small and medium domestic enterprises have been forced out of the market and the whole international market is gradually recovering. On behalf of the Board, I would like to express my sincere gratitude to all the investors, loyal customers and suppliers for their appreciation and unfailing support to the Group.

### **Financial Review**

#### Results

For the year ended 31 December 2015, the Group's turnover decreased to approximately RMB817,970,000 as compared to approximately RMB844,469,000 in 2014, representing a decrease of approximately RMB26,499,000 or 3.1%. The Group's turnover was principally derived from the manufacture and sale of apple juice concentrate, pear juice concentrate, bio-feedstuff and related products. For the year ended 31 December 2015, the sale of apple juice concentrate was approximately 82% of the total sale of the Group (2014: approximately 81%). The decrease in turnover was mainly due to the decrease in international market selling price of the apple juice concentrate in the reporting period.

For the year ended 31 December 2015, the Group's gross profit was approximately RMB189,351,000 and the gross profit margin remained approximately 23%. For the corresponding period in 2014, the gross profit was approximately RMB199,592,000 and gross profit margin was also approximately 23%.

For the year ended 31 December 2015, the Group's net profit (i.e. the profit for the year attributable to equity Shareholders of the Company) increased to approximately RMB73,182,000 as compared to approximately RMB58,399,000 for the corresponding period in 2014, representing an increase of approximately RMB14,783,000 or 25%. The increase in net profit was mainly attributable to the decrease in finance cost and increase in investment income.

### Distribution Costs and Administrative Expenses

For the year ended 31 December 2015, the Group incurred distribution costs of approximately RMB49,985,000, as compared to approximately RMB49,942,000 in 2014, representing a slight increase of approximately RMB43,000. The Group's distribution costs mainly included transport, import and export service charge, export inspection and marketing expenses. Such slight increase was mainly due to the rise in sales volume.

## Management Discussion and Analysis 管理層討論及分析

For the year ended 31 December 2015, the Group incurred administrative expenses of approximately RMB49,561,000 as compared to approximately RMB50,421,000 in 2014, representing a slight decrease of approximately RMB860,000 or 2%. Such slight decrease was mainly attributable to the tightened control of administrative expenses by the Group.

### **Net Finance Costs**

For the year ended 31 December 2015, the net finance costs of the Group were approximately RMB23,392,000, as compared to approximately RMB37,963,000 for the corresponding period in 2014, representing a decrease of approximately RMB14,571,000 or 38%. Such decrease was attributable to five continuous decrease in domestic interest rate in the PRC in 2015 and the increase in exchange gain.

### **Investment Income**

For the year ended 31 December 2015, the investment income recognized by the Group was approximately RMB7,160,000 as compared to approximately RMB2,731,000 in 2014, representing a significant increase of RMB4,429,000 or 162%. Such increase was mainly attributable to two areas: investment gain of approximately RMB2,938,000 from sale of 50% equity interest in a joint venture company of the Group, Yantai Tongli Beverage Industries Co., Ltd., in 2015; and gain from investment in wealth management products of approximately RMB2,512,000.

### 財務成本淨額

截至二零一五年十二月三十一日止年度,本集團的財務成本淨額約為人民幣23,392,000元,比二零一四年同期約人民幣37,963,000元減少約人民幣14,571,000元或38%,財務成本淨額減少一方面由於在二零一五年年度國內連續五次降息的影響,另一方面是由於匯兑收益增加所致。

### 投資收入

截至二零一五年十二月三十一日止年度,本集團投資收入約為人民幣7,160,000元。與二零一四年約人民幣2,731,000元相比,大幅增加約人民幣4,429,000元或162%。該增加主要是由於二零一五年本集團出售其合營公司烟台統利飲料工業有限公司的50%股權而獲得約人民幣2,938,000元股權轉讓收入,以及理財收入約人民幣2,512,000元所致。

I. On 17 September 2012, the Company entered into a framework agreement with Yantai Andre Pectin Co., Ltd. ("Andre Pectin") for the sale of pomace to Andre Pectin and determined the annual caps for the sale of pomace for the three years ended 31 December 2015. The framework agreement took effect on 1 January 2013 and expired on 31 December 2015.

As of the date of signing the above framework agreement, Andre Pectin was an associate of Andre Group, which was a substantial shareholder of the Company and controlled 37.90% interest in Andre Pectin as of the date of signing the agreement. Andre Pectin was also an associate of Mr. Wang An, who was a Director and indirectly controlled 37.90% interest in Andre Pectin through his 90% interest in Andre Group. Therefore, Andre Pectin was a connected person of the Company. The sale of pomace by the Company to Andre Pectin as contemplated under the framework agreement constituted continuing connected transactions under the Listing Rules. As each of the applicable percentage ratios was more than 0.1% but less than 5%, the transactions under the framework agreement were only subject to the reporting and announcement requirements but exempt from the independent Shareholders' approval requirement under the Listing Rules. The Company has complied with the applicable disclosure requirements in accordance with the Listing Rules.

於簽署上述框架協議之日,安德利 果膠為安德利集團的聯繫人士, 安德利集團為本公司的主要股東並 於協議簽署之日控制安德利果膠 37.90%權益;安德利果膠亦為本 公司董事王安先生的聯繫人士,王 安先生透過其於安德利集團的90% 權益間接控制安德利果膠37.90% 權益。因此,安德利果膠為本公司 的關連人士,根據上市規則,本公 司根據框架協議銷售果渣予安德利 果膠乃持續關連交易。由於適用的 各項百分比率均高於0.1%但低於 5%,框架協議項下的交易僅須遵 守上市規則下的申報及公告規定而 獲豁免遵守獨立股東批准的規定。 本公司已符合上市規則的有關披露 要求。

根據框架協議,須依據以下定價原則(並按以下次序)售賣果渣產品予 安德利果膠:

- 中國政府規定的價格;或
- 倘無政府定價,則以中國政 府制定的指導價;或
- 倘既無政府定價亦無政府指 導價,則以投標定價或其他 可獲得的市價;或

where none of the above is applicable or available, a price to be agreed between the parties. The agreed price shall be calculated based on the reasonable costs incurred in providing the pomace products plus reasonable profits. The annual transaction cap was determined based on the historical amounts of pomace sold by the Group to Andre Pectin, estimated potential growth of the Group, the expected economic growth of the PRC, demand by Andre Pectin and expected increase in the pomace price. Under the Listing Rules, President was a substantial shareholder of the Company and thus was a connected person of the Company. As an applicable percentage ratio in respect of the annual caps under the product purchase framework agreement (other than the profit ratio) exceeded 5%, the transactions contemplated under the product purchase framework agreement constituted non-exempt continuing connected transactions under the Listing Rules and were subject to the requirements of reporting, announcement, independent Shareholders' approval and annual review under the Listing Rules.

### 4 Accounting treatments for a business combination involving enterprises under and not under common control

(1) Business combinations involving enterprises under common control

A business combination involving enterprises under common control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The assets acquired and liabilities assumed are measured based on their carrying amounts in the consolidated financial statements of the ultimate controlling party at the combination date. The difference between the carrying amount of the net assets acquired and the consideration paid for the combination (or the total par value of shares issued) is adjusted against share premium in the capital reserve, with any excess adjusted against retained earnings. Any costs directly attributable to the combination is recognised in profit or loss when incurred. The combination date is the date on which one combining enterprise obtains control of other combining enterprises.

  - (2) Business combinations involving enterprises not under common control

A business combination involving enterprises not under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties both before and after the business combination. Where (1) the aggregate of the acquisition-date fair value of assets transferred (including the acquirer's previously held equity interest in the acquiree), liabilities incurred or assumed, and equity securities issued by the acquirer, in exchange for control of the acquiree, exceeds (2) the acquirer's interest in the acquisition-date fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill (see Note III.16). If (1) is less than (2), the difference is recognised in profit or loss for the current period. The costs of issuing equity or debt securities as a part of the consideration for the acquisition are included in the carrying amounts of these equity or debt securities upon initial recognition. Other acquisition-related costs are expensed when incurred. Any difference between the fair value and the carrying amount of the assets transferred as consideration is recognised in profit or loss. The acquiree's identifiable assets, liabilities and contingent liabilities, if the recognition criteria are met, are recognised by the Group at their acquisition-date fair value. The acquisition date is the date on which the acquirer obtains control of the acquiree.

### 5 Consolidated financial statements

### (1) General principles

The scope of consolidated financial statements is based on control and the consolidated financial statements comprise the Company and its subsidiaries. Control exists when the investor has all of following: power over the investee; exposure, or rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered. The financial position, financial performance and cash flows of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

When the accounting period or accounting policies of a subsidiary are different from those of the Company, the Company makes necessary adjustments to the financial statements of the subsidiary based on the Company's own accounting period or accounting policies. Intra-group balances and transactions, and any unrealised profit or loss arising from intra-group transactions, are eliminated when preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains, unless they represent impairment losses that are recognised in the financial statements.

### 5 合併財務報表的編製方法

### (1) 總體原則

合併財務報表的合併範圍以控 制為基礎予以確定,包括本公 司及本公司控制的子公司。控 制,是指本集團擁有對被投資 方的權力,通過參與被投資方 的相關活動而享有可變回報, 並且有能力運用對被投資方的 權力影響其回報金額。在判斷 本集團是否擁有對被投資方的 權力時,本集團僅考慮與被投 資方相關的實質性權利(包括 本集團自身所享有的及其他方 所享有的實質性權利)。子公 司的財務狀況、經營成果和現 金流量由控制開始日起至控制 結束日止包含於合併財務報表 中。

### 5 Consolidated financial statements (cont'd)

(2) Subsidiaries acquired through a business combination Where a subsidiary was acquired during the reporting period, through a business combination involving enterprises under common control, the financial statements of the subsidiary are included in the consolidated financial statements based on the carrying amounts of the assets and liabilities of the subsidiary in the financial statements of the ultimate controlling party as if the combination had occurred at the date that the ultimate controlling party first obtained control. The opening balances and the comparative figures of the consolidated financial statements are also restated.

Where a subsidiary was acquired during the reporting period, through a business combination involving enterprises not under common control, the identifiable assets and liabilities of the acquired subsidiaries are included in the scope of consolidation from the date that control commences, based on the fair value of those identifiable assets and liabilities at the acquisition date.

### (3) Disposal of subsidiaries

When the Group loses control of a subsidiary, the Group derecognises assets, liabilities, and other related items in shareholders' equity in relation to that subsidiary. The remaining equity investment is remeasured at its fair value at the date when control is lost. Any resulting gains or losses are recognised as investment income of the current period.

## 7 Foreign currency transactions and translation of foreign currency financial statements

When the Group receives capital in foreign currencies from investors, the capital is translated to Renminbi at the spot exchange rate at the date of the receipt. Other foreign currency transactions are, on initial recognition, translated to Renminbi at the spot exchange rates on the dates of the transactions.

Monetary items denominated in foreign currencies are translated to Renminbi at the spot exchange rate at the balance sheet date. The resulting exchange differences are generally recognised in profit or loss, unless they arise from the re-translation of the principal and interest of specific borrowings for the acquisition and construction of qualifying assets (see Note III.14). Non-monetary items that are measured at historical cost in foreign currencies are translated to Renminbi using the exchange rate at the transaction date. Non-monetary items that are measured at fair value in foreign currencies are translated using the exchange rate at the date the fair value is determined; the resulting exchange differences are recognised in profit or loss, except for the differences arising from the retranslation of available-for-sale financial assets, which are recognised in other comprehensive income.

- (2) Presentation of financial assets and financial liabilities Financial assets and financial liabilities generally are presented separately in the balance sheet, and are not offset. However, a financial asset and a financial liability are offset and the net amount is presented in the balance sheet when both of the following conditions are satisfied:
  - the Group currently has a legally enforceable right to set off the recognised amounts
  - the Group intends either to settle on a net basis, or to realise the financial asset and settle the financial liability simultaneously.
- (3) Derecognition of financial assets and financial liabilities

A financial asset is derecognised if the Group's contractual rights to the cash flows from the financial asset expire or if the Group transfers substantially all the risks and rewards of ownership of the financial asset to another party.

Where a transfer of a financial asset in its entirety meets the criteria for derecognition, the difference between the two amounts below is recognised in profit or loss:

- the carrying amount of the financial asset transferred;
- the sum of the consideration received from the transfer and any cumulative gain or loss that has been recognised directly in shareholders' equity.

The Group derecognises a financial liability (or part of it) only when its contractual obligation (or part of it) is discharged, cancelled or expires.

- (a) significant financial difficulty of the issuer or obligor;
- (b) a breach of contract by the borrower, such as a default or delinquency in interest or principal payments;
- (c) it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- (d) the disappearance of an active market for that financial asset because of financial difficulties faced by the issuer;

- (4) Impairment of financial assets (cont'd) For the calculation method of impairment of receivables, refer to Note III.9. The impairment of other financial assets is measured as follows:
  - Available-for-sale financial assets Available-for-sale financial assets are assessed for impairment on an individual basis and on a collective group basis. When an available-forsale financial asset is impaired, the cumulative loss arising from decline in fair value that has been recognised directly in shareholders' equity is reclassified to profit or loss even though the financial asset has not been derecognised.

If, after an impairment loss has been recognised on an available-for-sale debt instrument, the fair value of the debt instrument increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. An impairment loss recognised for an investment in an equity instrument classified as available-for-sale is not reversed through profit or loss. The impairment loss on an investment in an unquoted equity instrument whose fair value cannot be reliably measured is not reversed.

### (5) Equity instrument

The consideration received from the issuance of equity instruments net of transaction costs is recognised in shareholders' equity. Consideration and transaction costs paid by the Company for repurchasing selfissued equity instruments are deducted from shareholders' equity.

When the Company repurchases its own shares, those shares are treated as treasury shares. All expenditures relating to the repurchase are recorded in the cost of the treasury shares, with the transaction entering into the share register. Treasury shares are excluded from profit distributions and are stated as a deduction under shareholders' equity in the balance sheet.

When treasury shares are cancelled, the share capital should be reduced to the extent of the total par value of the treasury shares cancelled. Where the cost of the treasury shares cancelled exceeds the total par value, the excess is deducted from capital reserve (share premium), surplus reserve and retained earnings in that order. If the cost of treasury shares cancelled is less than the total par value, the difference is recorded in the capital reserve (share premium).

When treasury shares are disposed of, any excess of proceeds above cost is recognised in capital reserve (share premium); otherwise, the shortfall is deducted against capital reserve (share premium), surplus reserve and retained earnings in that order.

### 9 Impairment of receivables

Receivables are assessed for impairment on an individual basis and on a collective group basis as follows.

Where impairment is assessed on an individual basis, an impairment loss in respect of a receivable is calculated as the excess of its carrying amount over the present value of the estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the original effective interest rate. Impairment losses are recognised in profit or loss.

The assessment is made collectively where receivables share similar credit risk characteristics (including those having not been individually assessed as impaired), based on their historical loss experiences, and adjusted by the observable factors reflecting current economic conditions.

If, after an impairment loss has been recognised on receivables, there is a recovery in the value of the financial asset which can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss. A reversal of an impairment loss will not result in the asset's carrying amount exceeding what the amortised cost would have been had no impairment loss been recognised in prior years.

### 10 Inventories

(1) Classification and cost

Inventories include raw materials, work in progress, semi-finished goods and finished goods.

Inventories are initially measured at cost. Cost of inventories comprises all costs of purchase, costs of conversion and other expenditures incurred in bringing the inventories to their present location and condition. In addition to the purchasing cost of raw materials, work in progress and finished goods include direct labor costs and an appropriate allocation of production overheads.

(2) Cost of inventories transferred out Cost of inventories transferred out is calculated using the weighted average method.

Consumables including low-value consumables and packaging materials are amortised in full when received for use. The amortisation is included in the cost of the related assets or recognised in profit or loss for the current period.

(3) Basis for determining the net realisable value and provisioning methods for impairment losses of inventories

At the balance sheet date, inventories are carried at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale and relevant taxes. The net realisable value of materials held for use in the production is measured based on the net realisable value of the finished goods in which they will be incorporated. The net realisable value of the inventory held to satisfy sales or service contracts is measured based on the contract price, to the extent of the quantities specified in sales contracts, and the excess portion of inventories is measured based on general selling prices.

Any excess of the cost over the net realisable value of each item of inventories is recognised as a provision for the impairment, and is recognised in profit or loss.

Where the initial investment cost is less than the Group's interest in the fair value of the investee's identifiable net assets at the date of acquisition, the investment is initially recognised at the investor's share of the fair value of the investee's identifiable net assets, and the difference is recognised in profit or loss.

After the acquisition of the investment, the Group recognises its share of the investee's profit or loss and other comprehensive income as investment income or losses and other comprehensive income respectively, and adjusts the carrying amount of the investment accordingly. Once the investee declares any cash dividends or profit distributions, the carrying amount of the investment is reduced by that amount attributable to the Group. Changes in the Group's share of the investee's owners' equity, other than those arising from the investee's net profit or loss, other comprehensive income or profit distribution ("other changes in owners' equity"), is recognised directly in the Group's equity, and the carrying amount of the investment is adjusted accordingly.

Unrealised profits and losses resulting from transactions between the Group and its joint ventures are eliminated to the extent of the Group's interest in the joint ventures. Unrealised losses resulting from transactions between the Group and its joint ventures are eliminated in the same way as unrealised gains but only to the extent that there is no impairment.

### 12 Fixed assets

### (1) Recognition of fixed assets

Fixed assets represent the tangible assets held by the Group for use in production of goods or for administrative purposes with useful lives over one accounting year.

The cost of a purchased fixed asset comprises the purchase price, related taxes, and any directly attributable expenditure for bringing the asset to working condition for its intended use. The cost of self-constructed assets is measured in accordance with the policy set out in Note III.13.

Where the parts of an item of fixed assets have different useful lives or provide benefits to the Group in a different pattern, thus necessitating use of different depreciation rates or methods, each part is recognised as a separate fixed asset.

Any subsequent costs including the cost of replacing part of an item of fixed assets are recognised as assets when it is probable that the economic benefits associated with the costs will flow to the Group, and the carrying amount of the replaced part is derecognised. The costs of the day-to-day maintenance of fixed assets are recognised in profit or loss as incurred.

Fixed assets are stated in the balance sheet at cost less accumulated depreciation and impairment losses.

(5) Disposal of fixed assets

The carrying amount of a fixed asset is derecognised:

Gains or losses arising from the retirement or disposal of an item of fixed asset are determined as the difference between the net disposal proceeds and the carrying amount of the item, and are recognised in profit or loss on the date of retirement or disposal.

#### 13 Construction in progress

The cost of self-constructed assets includes the cost of materials, direct labour, capitalised borrowing costs (see Note III.14), and any other costs directly attributable to bringing the asset to working condition for its intended use.

A self-constructed asset is included in construction in progress before it is transferred to fixed asset when it is ready for its intended use. No depreciation is provided against construction in progress.

### 14 Borrowing costs

Borrowing costs incurred directly attributable to the acquisition and construction of a qualifying asset are capitalised as part of the cost of the asset. Other borrowing costs are recognised as financial expenses when incurred.

During the capitalisation period, the amount of interest (including amortisation of any discount or premium on borrowing) to be capitalised in each accounting period is determined as follows:

- Where funds are borrowed specifically for the acquisition and construction of a qualifying asset, the amount of interest to be capitalised is the interest expense calculated using effective interest rates during the period less any interest income earned from depositing the borrowed funds or any investment income on the temporary investment of those funds before being used on the asset.
- To the extent that the Group borrows funds generally and uses them for the acquisition and construction of a qualifying asset, the amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the weighted average of the excess amounts of cumulative expenditures on the asset over the above amounts of specific borrowings. The capitalisation rate is the weighted average of the interest rates applicable to the general-purpose borrowings.

在資本化期間內,本集團按照下 列方法確定每一會計期間的利息 資本化金額(包括折價或溢價的攤 銷):

### 14 Borrowing costs (cont'd)

The effective interest rate is determined as the rate that exactly discounts estimated future cash flow through the expected life of the borrowing or, when appropriate, a shorter period to the initially recognised amount of the borrowings.

During the capitalisation period, exchange differences related to the principal and interest on a specific-purpose borrowing denominated in foreign currency are capitalised as part of the cost of the qualifying asset. The exchange differences related to the principal and interest on foreign currency borrowings other than a specific-purpose borrowing are recognised as a financial expense when incurred.

The capitalisation period is the period from the date of commencement of capitalisation of borrowing costs to the date of cessation of capitalisation, excluding any period over which capitalisation is suspended. Capitalisation of borrowing costs commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities of acquisition and construction that are necessary to prepare the asset for its intended use are in progress, and ceases when the assets become ready for their intended use. Capitalisation of borrowing costs is suspended when the acquisition and construction activities are interrupted abnormally for a period of more than three months.

#### 15 Intangible assets

Intangible assets are stated in the balance sheet at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see Note III.17). For an intangible asset with finite useful life, its cost less estimated residual value and accumulated impairment losses is amortised using the straight-line method over its estimated useful life, unless the intangible asset is classified as held for sale.

The amortisation period for such intangible assets is as follows:

Item

Amortisation period (years)

Land use right

35 - 50 years

An intangible asset is regarded as having an indefinite useful life and is not amortised when there is no foreseeable limit to the period over which the asset is expected to generate economic benefits for the Group. At the balance sheet date, the Group does not have any intangible assets with indefinite useful life.

Expenditure on an internal research and development project is classified into expenditure during the research phase and expenditure during the development phase.

Expenditure during the research phase expensed when incurred. Expenditure during the development phase is capitalised if development costs can be measured reliably, the product or process is technically and commercially feasible, and the Group intends to and has sufficient resources to complete the development. Capitalised development costs are stated in the balance sheet at cost less impairment losses (see Note III.17). Other development expenditure is recognised as an expense in the period in which it is incurred.

#### 16 Goodwill

The initial cost of goodwill represents the excess of cost of acquisition over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under a business combination not involving enterprises under common control.

Goodwill is not amortised and is stated in the balance sheet at cost less accumulated impairment losses (see Note III.17). On disposal of an asset group or a set of asset groups, any attributable goodwill is written off and included in the calculation of the profit or loss on disposal.

### 17 Impairment of assets other than inventories and financial assets

The carrying amounts of the following assets are reviewed at each balance sheet date based on internal and external sources of information to determine whether there is any indication of impairment:

- fixed assets
- construction in progress
- intangible assets
- long-term equity investments
- goodwill

If any indication exists, the recoverable amount of the asset is estimated. In addition, the Group estimates the recoverable amounts of goodwill at each yearend, irrespective of whether there is any indication of impairment. Goodwill is allocated to each asset group or set of asset groups, which is expected to benefit from the synergies of the combination for the purpose of impairment testing.

The recoverable amount of an asset (or asset group, set of asset groups) is the higher of its fair value (see Note III.18) less costs to sell and its present value of expected future cash flows.

An asset group is composed of assets directly related to cash-generation and is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or asset groups.

## 17 Impairment of assets other than inventories and financial assets (cont'd)

The present value of expected future cash flows of an asset is determined by discounting the future cash flows, estimated to be derived from continuing use of the asset and from its ultimate disposal, to their present value using an appropriate pre-tax discount rate.

An impairment loss is recognised in profit or loss when the recoverable amount of an asset is less than its carrying amount. A provision for impairment of the asset is recognised accordingly. Impairment losses related to an asset group or a set of asset groups are allocated first to reduce the carrying amount of any goodwill allocated to the asset group or set of asset groups, and then to reduce the carrying amount of the other assets in the asset group or set of asset groups on a pro rata basis. However, such allocation would not reduce the carrying amount of an asset below the highest of its fair value less costs to sell (if measurable), its present value of expected future cash flows (if determinable) and zero.

Once an impairment loss is recognised, it is not reversed in a subsequent period.

#### 18 Fair value measurement

Unless otherwise specified, the Group measures fair value as follows:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When measuring fair value, the Group takes into account the characteristics of the particular asset or liability (including the condition and location of the asset and restrictions, if any, on the sale or use of the asset) that market participants would consider when pricing the asset or liability at the measurement date, and uses valuation techniques that are appropriate in the circumstances and for which sufficient data and other information are available to measure fair value. Valuation techniques mainly include the market approach, the income approach and the cost approach.

#### 19 Provisions

A provision is recognised for an obligation related to a contingency if the Group has a present obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Where the effect of time value of money is material, provisions are determined by discounting the expected future cash flows. Factors pertaining to a contingency such as the risks, uncertainties and time value of money are taken into account as a whole in reaching the best estimate. Where there is a continuous range of possible outcomes for the expenditure required, and each possible outcome in that range is as likely as any other, the best estimate is the mid-point of that range. In other cases, the best estimate is determined according to the following circumstances:

#### 19 Provisions (cont'd)

- Where the contingency involves a single item, the best estimate is the most likely outcome
- Where the contingency involves a large population of items, the best estimate is determined by weighting all possible outcomes by their associated probabilities.

The Group reviews the carrying amount of a provision at the balance sheet date and adjusts the carrying amount to the current best estimate.

#### 20 Revenue recognition

Revenue is the gross inflow of economic benefit arising in the course of the Group's ordinary activities when the inflows result in increase in shareholders' equity, other than increase relating to contributions from shareholders. Revenue is recognised in profit or loss when it is probable that the economic benefits will flow to the Group, the revenue and costs can be measured reliably and the following conditions are met.

#### (1) Sale of goods

Revenue is recognised when the general conditions stated above and the following conditions are satisfied:

- Significant risks and rewards of ownership of goods have been transferred to the buyer
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable under the sales contract or agreement.

### 22 Government grants (cont'd)

If a government grant is in the form of a transfer of a monetary asset, it is measured at the amount received or receivable. If a government grant is in the form of a transfer of a non-monetary asset, it is measured at fair value.

Government grants related to assets are grants whose primary condition is that the Group qualifying for them should purchase, construct or otherwise acquire longterm assets. Government grants related to income are grants other than those related to assets. A government grant related to an asset is recognised initially as deferred income and amortised to profit or loss on a straightline basis over the useful life of the asset. A grant that compensates the Group for expenses to be incurred in the future is recognised initially as deferred income, and released to profit or loss in the periods in which the expenses are recognised. A grant that compensates the Group for expenses already incurred is recognised in profit or loss immediately.

#### 23 Income tax

Current tax and deferred tax are recognised in profit or loss except to the extent that they relate to a business combination or items recognised directly in equity (including other comprehensive income).

Current tax is the expected tax payable calculated at the applicable tax rate on taxable income for the year, plus any adjustment to tax payable in respect of previous years.

At the balance sheet date, current tax assets and liabilities are offset only if the Group has a legally enforceable right to set them off and also intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

## 23 Income tax (cont'd)

Deferred tax assets and deferred tax liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases, which include the deductible losses and tax credits carried forward to subsequent periods. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is not recognised for the temporary differences arising from the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting profit nor taxable profit (or deductible loss). Deferred tax is not recognised for taxable temporary differences arising from the initial recognition of goodwill.

At the balance sheet date, deferred tax is measured based on the tax consequences that would follow from the expected manner of recovery or settlement of the carrying amount of the assets and liabilities, using tax rates enacted at the reporting date that are expected to be applied in the period when the asset is recovered or the liability is settled.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date, and is reduced to the extent that it is no longer probable that the related tax benefits will be utilised. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

### 24 Operating leases and finance leases

A lease is classified as either a finance lease or an operating lease. An operating lease is a lease other than a finance lease.

#### (2) Assets leased out under operating leases

Fixed assets leased out under operating leases, except for investment properties, are depreciated in accordance with the Group's depreciation policies described in Note III.12(2). Impairment losses are recognised in accordance with the accounting policy described in Note III.17. Income derived from operating leases is recognised in profit or loss using the straight-line method over the lease term. If initial direct costs incurred in respect of the assets leased out are material, the costs are initially capitalised and subsequently amortised in profit or loss over the lease term on the same basis as the lease income. Otherwise, the costs are charged to profit or loss immediately.

#### (3) Assets acquired under finance leases

When the Group acquires an asset under a finance lease, the asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments, each determined at the inception of the lease. At the commencement of the lease term, the minimum lease payments are recorded as long-term payables. The difference between the carrying amount of the leased assets and the minimum lease payments is accounted for as unrecognised finance charges. Initial direct costs attributable to a finance lease incurred by the Group are added to the carrying amount of the leased asset. Depreciation and impairment losses are accounted for in accordance with the accounting policies described in Notes III.12 (2) and III.17, respectively.

If there is reasonable certainty that the Group will obtain ownership of a leased asset at the end of the lease term, the leased asset is depreciated over its estimated useful life. Otherwise, the leased asset is depreciated over the shorter of the lease term and its estimated useful life.

#### 27 Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system after taking the materiality principle into account. Two or more operating segments may be aggregated into a single operating segment if the segments have the similar economic characteristics and are same or similar in respect of the nature of each segment's products and services, the nature of production processes, the types or classes of customers for the products and services, the methods used to distribute the products or provide the services, and the nature of the regulatory environment.

Inter-segment revenues are measured on the basis of the actual transaction price for such transactions for segment reporting. Segment accounting policies are consistent with those for the consolidated financial statements.

### 28 Significant accounting estimates and judgments

The preparation of the financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates as well as underlying assumptions and uncertainties involved are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Notes V.13 and Note IX contain information about the assumptions and their risk factors relating to impairment of goodwill and fair value of financial instruments. Other key sources of estimation uncertainty are as follows:

Impairment of receivables

As described in Note III.9, receivables that are measured at amortised cost are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such evidence exists, an impairment loss is recognised. Objective evidence of impairment includes observable data that comes to the attention of the Group about loss events such as a significant decline in the estimated future cash flow of an individual debtor or the portfolio of debtors, and significant changes in the financial environment that have an adverse effect on the debtor. If there is objective evidence of a recovery in the value of receivables which can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed.

### - Provision for impairment of inventories

As described in Note III.10, the net realisable value of inventories is under management's regular review, and as a result, provision for impairment of inventories is recognised for the excess of inventories' carrying amounts over their net realisable values. When making estimates of net realisable value, the Group takes into consideration the use of inventories and other information available to form the underlying assumptions, including the inventories' market prices and the Group's historical operating costs. The actual selling price, the costs of completion and the costs necessary to make the sale and related taxes may vary based on changes in market conditions and product saleability, manufacturing technology and the actual use of the inventories, resulting in the changes in the provision for impairment of inventories. The net profit or loss may then be affected in the period when the impairment of inventories is adjusted.

Impairment of assets other than inventories and financial assets

As described in Note III.17, assets other than inventories and financial assets are reviewed at each balance sheet date to determine whether the carrying amount exceeds the recoverable amount of the assets. If any such indication exists, an impairment loss is recognised.

The recoverable amount of an asset (or an asset group) is the greater of its fair value less costs to sell and its present value of expected future cash flows. When a market price of the asset (or the asset group) cannot be obtained reliably, the fair value of the asset cannot be estimated reliably, the recoverable amount is calculated based on the present value of estimated future cash flows. In assessing the present value of estimated future cash flows, significant judgements are exercised to estimate the asset's production, selling price, related operating expenses and discount rate to calculate the present value. All relevant materials which can be obtained are used for estimation of the recoverable amount, including the estimation of the production, selling price and related operating expenses based on reasonable and supportable assumptions.

 Depreciation and amortisation of assets such as fixed assets and intangible assets

As described in Notes III.12 and 15, assets such as fixed assets and intangible assets are depreciated and amortised over their useful lives after taking into account residual value. The estimated useful lives of the assets are regularly reviewed to determine the depreciation and amortisation costs charged in each reporting period. The useful lives of the assets are determined based on historical experience of similar assets and estimated technical changes. If there have been significant changes in the factors used to determine the depreciation or amortisation, the rate of depreciation or amortisation is revised prospectively.

#### Income tax

The Group is subject to income taxes in numerous jurisdictions. There are many transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgment is required from the Group in determining the provision for income taxes in each of these jurisdictions. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

#### 13 Goodwill (cont'd)

(2) Impairment provision for goodwill (cont'd)

The recoverable amounts of Anyue Andre Lemon Industry Technology Co., Ltd., Yongji Andre Juice Co., Ltd. and Yantai Longkou Andre Juice Co., Ltd. are determined based on the present value of expected future cash flows. The present value of expected future cash flows was projected based on the next five-year financial forecast approved by management and a pre-tax discount rate of 10.07% (2014: 7.00%). The cash flows beyond the five-year forecast period were assumed to be stable. Based on the estimated recoverable amount, no impairment loss was recognised. However, as key assumptions on which management has made in respect of future cash projections are subject to change, management believes that any adverse change in the assumptions would cause the carrying amount to exceed its recoverable amount.

Key assumptions used in estimating the present value of expected future cash flows of Anyue Andre Lemon Industry Technology Co., Ltd., Yongji Andre Juice Co., Ltd. and Yantai Longkou Andre Juice Co., Ltd. include gross profit margin of 10%~24% and sales volume increase of 0%~13%, which were determined by management based on past performance.

安岳安德利檸檬產業科技有限 公司、永濟安德利果蔬汁有 限公司及烟台龍口安德利果汁 飲料有限公司的可收回金額以 預計未來現金流量現值的方法 確定。本集團根據管理層批 准的最近未來5年財務預算和 10.07% (2014年:7.00%)税 前折現率預計該資產組的未來 現金流量現值。超過5年財務 預算之後年份的現金流量均假 設保持穩定。對可收回金額的 預計結果並沒有導致確認減值 損失。但預計該資產組未來現 金流量現值所依據的關鍵假設 可能會發生改變,管理層認為 如果關鍵假設發生負面變動, 則可能會使本公司的賬面價值 超過其可收回金額。

對安岳安德利檸檬產業科技有 限公司、永濟安德利果蔬汁 有限公司和烟台龍口安德利果 汁飲料有限公司預計未來現金 流量現值的計算採用了10% ~24%的毛利率和0%~13%的 銷售數量增長率作為關鍵假 設。管理層根據預算期間之前 的歷史情況確定這些假設。

#### VIII Risk related to financial instruments (cont'd)

The Group aims to seek the appropriate balance between the risks and benefits from its use of financial instruments and to mitigate the adverse effects that the risks of financial instruments have on the Group's financial performance. Based on such objectives, the Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The internal audit department of the Group undertakes both regular and ad-hoc reviews of risk management controls and procedures.

#### (1) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Group's credit risk is primarily attributable to cash at bank, receivables, debt investments and derivative financial instruments entered into for hedging purposes and other financial assets. Exposure to these credit risks are monitored by management on an ongoing basis.

The cash at bank of the Group is mainly held with well-known financial institutions. Management does not foresee any significant credit risks from these deposits and does not expect that these financial institutions may default and cause losses to the Group.

In respect of receivables, the risk management committee of the Group has established a credit policy under which individual credit evaluations are performed on all customers to determine the credit limit and terms applicable to the customers. These evaluations focus on the customers' financial position, the external ratings of the customers and their bank credit records where available. Receivables are due within 180 days from the date of billing. Debtors with balances are requested to settle all outstanding balances before any further credit is granted. Normally, the Group does not obtain collateral from customers.

#### (1) 信用風險

信用風險,是指金融工具的一方不能履行義務,造成另一方發生財務損失的風險。本集團的信用風險主要來自貨幣資金、應收款項、債券投資和為套期目的簽訂的衍生金融工具等。管理層會持續監控這些信用風險的敞口。

本集團除現金以外的貨幣資金主要存放於信用良好的金融機構, 管理層認為其不存在重大的信用 風險,預期不會因為對方違約而 給本集團造成損失。

#### VIII Risk related to financial instruments (cont'd)

#### (1) Credit risk (cont'd)

In monitoring the Group's credit risk, customer data are analysed by the Group according to some factors, such as ageing and maturity date.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer rather than the industry, country or area in which the customers operate and therefore significant concentrations of credit risk arise primarily when the Group has significant exposure to individual customers. At the balance sheet date, 53% (2014: 76%) of the total accounts receivable and other receivables were due from the ten largest customers of the Group. In addition, the debtors of the Group that are neither past due nor impaired mainly relate to a wide range of customers for whom there was no recent history of default.

Investments are normally only in liquid securities quoted on a recognised stock exchange, except where entered into for long-term strategic purposes, and counterparties have equivalent or higher credit ratings than the Group. Given their high credit standing, management does not expect any investment counterparty to fail to meet its obligations.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheet. The Group does not provide any other guarantees which would expose the Group to credit risk.

#### (1) 信用風險(續)

為監控本集團的信用風險,本集 團按照賬齡、到期日等要素對本 集團的客戶資料進行分析。

本集團一般只會投資於有活躍市場的證券(長遠戰略投資除外),而且交易對方的信用評級須高於或與本集團相同。鑒於交易對方的信用評級良好,本集團管理層並不預期交易對方會無法履行義務。

本集團所承受的最大信用風險敞口為資產負債表中每項金融資產的賬面金額。本集團沒有提供任何其他可能令本集團承受信用風險的擔保。

#### (2) Liquidity risk

Liquidity risk is the risk that an enterprise will encounter difficulty in meeting obligations that are settled by delivering cash or another financial asset. The Company and its individual subsidiaries are responsible for their own cash management, including short term investment of cash surpluses and the raising of loans to cover expected cash demands, subject to approval by the Company's board when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor its liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash, readily realisable marketable securities and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The following tables show the remaining contractual maturities at the balance sheet date of the Group's financial liabilities, which are based on contractual cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the balance sheet date) and the earliest date the Group can be required to pay:

#### (3) Interest rate risk

Interest-bearing financial instruments at variable rates and at fixed rates expose the Group to cash flow interest rate risk and fair value interest risk, respectively. The Group determines the appropriate weightings of the fixed and floating rate interest-bearing instruments based on the current market conditions and performs regular reviews and monitoring to achieve an appropriate mix of fixed and floating rate exposure. The Group does not enter into financial derivatives to hedge interest rate risk.

#### (b) Sensitivity analysis

As at 31 December 2015, it is estimated that a general increase of 50 basis points in interest rates, with all other variables held constant, would increase the Group's equity by RMB31,683 (2014: RMB192,752), and net profit by RMB31,683 (2014: RMB192,752).

The sensitivity analysis above indicates the instantaneous change in the net profit and equity that would arise assuming that the change in interest rates had occurred at the balance sheet date and had been applied to re-measure those financial instruments held by the Group which expose the Group to fair value interest rate risk at the balance sheet date. In respect of the exposure to cash flow interest rate risk arising from floating rate non-derivative instruments held by the Group at the balance sheet date, the impact on the net profit and equity is estimated as an annualised impact on interest expense or income of such a change in interest rates. The analysis is performed on the same basis for the previous year.

#### (4) Foreign currency risk

In respect of cash at bank and on hand, accounts receivable and payable, short-term loans and other assets and liabilities denominated in foreign currencies other than the functional currency, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

#### XI Capital management

The Group's primary objectives when managing capital are to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders, by pricing products and services commensurately with the level of risk and by securing access to finance at a reasonable cost.

The Group defines "capital" as including all components of equity plus any loans from related parties with no fixed terms of repayment, less unaccrued proposed dividends. The balances of related party transactions are not regarded by the Group as capital.

The Group's capital structure is regularly reviewed and managed to achieve an optimal structure and return for shareholders. Factors for the Group's consideration include: its future funding requirements, capital efficiency, actual and expected profitability, expected cash flows, and expected capital expenditure. Adjustments are made to the capital structure in light of changes in economic conditions affecting the Group.

The Group's capital structure is monitored on the basis of an adjusted net debt-to-capital ratio. For this purpose, adjusted net debt is defined as total debt (which includes short-term loans and long-term payables) plus unaccrued proposed dividends, less related-party loans with no fixed repayment terms and cash and cash equivalents.

During 2015, the Group's strategy, which was unchanged from 2014, was to maintain an adjusted net debt-to-capital ratio of no more than 30%. In order to maintain or adjust the ratio, the Group may adjust the amount of dividends paid to shareholders, request new loans, issue new shares, or sell assets to reduce debt.

Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.

#### 十一 資本管理

本集團資本管理的主要目標是保障本 集團的持續經營,能夠通過制定與風 險水平相當的產品和服務價格並確保 以合理融資成本獲得融資的方式,持 續為股東提供回報。

本集團對資本的定義為股東權益加上 沒有固定還款期限的關聯方借款並扣 除未確認的已提議分配的股利。本集 團的資本不包括與關聯方之間的業務 往來餘額。

本集團定期覆核和管理自身的資本結構,力求達到最理想的資本結構和股東回報。本集團考慮的因素包括:本集團未來的資金需求、資本效率、現實的及預期的盈利能力、預期的現金流、預期資本支出等。如果經濟狀況發生改變並影響本集團,本集團將會調整資本結構。

本集團通過經調整的淨債務資本率來 監管集團的資本結構。經調整的淨債 務為總債務(包括短期借款及長期應 付款),加上未確認的已提議分配的 股利,扣除沒有固定還款期限的關聯 方借款以及現金和現金等價物。

本集團2015年的資本管理戰略與2014年度一致,維持經調整的淨債務資本率不超過30%。為了維持或調整該比例,本集團可能會調整支付給股東的股利金額,增加新的借款,發行新股,或出售資產以減少負債。

本公司或本公司的子公司均無需遵循 的外部強制性資本要求。
