NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2016

1. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules").

2A. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values, as appropriate.

The accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 September 2016 are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 March 2016.

In the current period, the Group has applied, for the first time, the following amendments to Hong Kong Financial Reporting Standards ("HKFRSs") issued by the HKICPA that are relevant for the preparation of the Group's condensed consolidated financial statements:

Amendments to HKFRS 11	Accounting for Acquisitions of Interests in Joint Operations
Amendments to HKAS 1	Disclosure Initiative
Amendments to HKAS 16 and HKAS 38	Clarification of Acceptable Methods of Depreciation and Amortisation
Amendments to HKFRSs	Annual Improvements to HKFRSs 2012–2014 Cycle
Amendments to HKAS 16 and HKAS 41	Agriculture: Bearer Plants
Amendments to HKAS 27	Equity Method in Separate Financial Statements
Amendments to HKFRS 10, HKFRS 12 and HKAS 28	Investment Entities: Applying the Consolidation Exception

The application of the above amendments to HKFRSs in the current interim period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or disclosures set out in these condensed consolidated financial statements.

2B. CHANGE IN ACCOUNTING POLICIES

During the year ended 31 March 2016, the Group changed its accounting policy in respect of its leasehold land and buildings from the revaluation model to the cost model. The changes in accounting policies have been accounted for retrospectively and the relevant comparative figures have been restated.

Details of the effects of the changes in accounting policies as described above are disclosed in note 2B to the Group's consolidated financial statements for the year ended 31 March 2016. The effects on the results for the preceding interim periods by line items presented in the condensed consolidated statement of profit or loss or other comprehensive income are as follows:

3. REVENUE

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods sold in the normal course of business, net of discounts and related taxes.

4. SEGMENTAL INFORMATION

Whilst the chief operating decision makers, the Company's executive directors, regularly review revenue by geographical location of customers, information about profit or loss by geographical location of customers is not separately provided to the executive directors for their review. Financial information reported to the executive directors for the purposes of resource allocation and performance assessment is aggregated and focuses on the consolidated gross profit analysis of the business of manufacturing and trading of eyewear products of the Group as a whole.

As a result, there is only one operating segment for the Group, which is manufacturing and trading of eyewear products. Financial information regarding this segment can be made by reference to the condensed consolidated statement of profit or loss and other comprehensive income.

The Group's revenue is arising from manufacturing and sales of eyewear products.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

Although the global business environment continued to be difficult, the Group's financial performance remained relatively stable during the period under review. For the six months ended 30 September 2016, the Group's turnover slightly decreased by 1.01% to HK$528 million (2015: HK$533 million), and its profit attributable to the owners of the Company increased by 7.68% to HK$32 million (2015: HK$30 million). Basic earnings per share increased to HK12 cents (2015: HK11 cents).

The operating costs, especially wages, continued to increase in Southern China where the Group's production bases are located. However, the Group continued to improve its operating efficiency by carrying out various projects to streamline operation. Furthermore, the mild depreciation of Renminbi against the U.S. dollar during the period under review also alleviated part of the Group's cost pressure. As a result of the positive impact of the above factors, the Group was able to manage its gross profit margin and net profit margin at 23.41% (2015: 21.60%) and 6.00% (2015: 5.44%) respectively in spite of the challenging environment.

The ODM Business

During the period under review, original design manufacturing ("ODM") business continued to be the largest source of the Group's revenue, and contributed 85% of the Group's total consolidated turnover. In comparison with the same period of the last fiscal year, the Group's total ODM turnover slightly decreased by 0.44% to HK$451 million (2015: HK$453 million). The market demand for eyewear was generally weak, and the Group's stable performance in such a volatile market was mainly due to its solid and consistent service levels in product development, delivery and quality, which formed a key component of its customers' global supply chains. In terms of geographical allocation, Europe and United States continued to be the two largest markets of the Group, and accounted for 59% and 39% (2015: 59% and

35%) of the Group's ODM turnover respectively. The Group's ODM turnover to Europe decreased by 1.49% to HK$264 million (2015: HK$268 million), while that to the United States increased by 8.75% to HK$174 million (2015: HK$160 million) for the six months ended 30 September 2016. Customers from the European countries suffered from the strong US dollar and became very cautious in stock replenishment. On the other hand, the economy of the United States showed a relatively better improvement. Stronger consumer confidence there helped to stimulate market demand, which in turn benefited the Group's ODM business in the United States. In terms of product mix, sales of plastic frames, metal frames and others accounted 54%, 45% and 1% (2015: 57%, 42% and 1%) of the Group's ODM turnover respectively.

The Branded Eyewear Distribution Business

For the six month ended 30 September 2016, the Group recorded a small decrease in branded eyewear distribution turnover by 3.75% to HK$77 million (2015: HK$80 million), which represented 15% of the Group's total consolidated turnover. Strong US dollar reduced the purchasing power of most of the Asian countries generally. Consumer confidence in certain Asian countries such as Japan and Korea remained weak, which adversely affected the order volume from these regions. Meanwhile, the political and social unrest in some emerging countries weakened market demand and caused hesitation for customers in stock replenishment in view of such uncertainty. Accordingly, Group's business with these countries were adversely affected. However, the Group recorded steady growth in its distribution turnover in China during the period, as a result of the Group's efforts in expanding distribution network there and enhancing the product offerings. The growth in China partly mitigated the negative impact from other regions. Asia continued to be the largest market of the Group. Within Asia, China and Japan were the top performing countries that contributed 47% and 18% of the Group's total distribution turnover respectively.

LIQUIDITY AND CAPITAL RESOURCES

The Group continued to maintain a strong liquidity and financial position. As at 30 September 2016, it held a cash and bank balance of HK$385 million and did not have any bank borrowings. Net cash inflow from operation amounted to HK$91 million during the six months ended 30 September 2016. The Group will continue to cautiously manage its cashflow, without compromising the needs to invest in the strategically important assets and business opportunities that will drive the its long term growth.

Given the Group's strong cash position, the Directors have again resolved to declare an interim special dividend of HK1.5 cents per share on the top of the interim dividend of HK4.5 cents per share for the six months ended 30 September 2016. The Directors will continue to monitor the dividend policy closely to ensure that an optimal balance can be achieved between the retention of sufficient liquidity in the Group to prepare for the uncertainty ahead and the distribution of earnings to the shareholders respectively.

As at 30 September 2016, the net current assets and current ratio of the Group were approximately HK$615 million and 3.8:1 respectively. The total equity attributable to owners of the Company decreased to HK$909 million as at 30 September 2016 from HK$925 million as at 31 March 2016. The Group implements an effective control on credit exposure and inventory. Accordingly, debtor turnover period and inventory turnover period were managed at a level of 104 days and 58 days respectively. The Group adopted prudent but yet proactive approach in managing working capital. The Directors are confident that the financial position of the Group will remain strong, and the Group has sufficient liquidity and financial resources to meet its present commitments and future business needs.

PROSPECTS

Looking ahead to the second half of the 2016/17 fiscal year, the Directors believe that the global economy will continue to be volatile. Britain voted to leave the European Union in the Brexit referendum. This unprecedented event is expected to bring disorder to the European economy as well as the global economy. The uncertainty about the potential interest rate hikes for the U.S. dollar is anticipated to affect the market sentiment, and in turn undermine the market demand for most of the Asian and European countries since their purchasing power is sensitive to the movement of the U.S. dollar. The economy of China is also slowing down, which will have a profound impact on the global economy as China has been the major source of growth for many countries for the past decade.

To cope with the challenges ahead, the Group will continue to improve its operating efficiency by further automating its production processes, improving mould design, increasing labor productivity and optimizing material consumption. The Group will deepen relationship with its strategic customers and intensify integration with their supply chains. Meanwhile, the Directors expect that product demand from customers will be affected by the uncertain economic environment and become even more volatile in the future. The Group will therefore introduce measures to shorten its production lead-time and continue to maintain a flexible production capacity so that it can take advantage of the business opportunities as they may arise as a result of market change, industry business cycle and other seasonal factors.

For the distribution business, the Group will further explore new distribution channels. Product variety will be widened by incorporating innovative elements to the products, introducing different price segments for different product collections and adopting unique design for products which are tailor-made for specific markets. The Group will continue to optimize its brand portfolio and seek new licensing opportunities. During the last fiscal year, the Group obtained the worldwide exclusive right to manufacture and distribute eyewear products for the reputable brand "Agnes b.". The first collection of "Agnes b." will be launched in the second half of the current fiscal year. Taking this opportunity, the Directors are also pleased to announce that the Group has obtained the exclusive right to distribute in China, Hong Kong and Macau the eyewear products for another reputable brand "Bally". These two new brands are expected to provide the Group with new business opportunities and will contribute to the Group's future growth.

We anticipate that the business environment ahead will be full of challenges. Levering on our strength and competence, we are confident that we can overcome such challenges, continue to create long-term value for our shareholders and deliver the objective to achieve sustainable growth in the long run.

Having made specific enquiry of all directors, the Directors confirmed that they had complied with the required standard set out in the Model Code throughout the six months ended 30 September 2016.
