ANNOUNCEMENT CONNECTED TRANSACTION

BEIJING AIRPORT OPERATION GUARANTEE SUPPORTING FACILITIES RECONSTRUCTION PROJECT DESIGN AGREEMENT

The Board announces that on 10 April 2017, the Company and Airport Construction Corporation entered into the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement to provide services in relation to the design for the reconstruction projects to reconstruct supporting facilities, which include facilities such as road pavement, power supply system, air-conditioning and ventilation system, and electrical systems such as the broadcasting and monitoring system, of the Beijing Airport for further improving its service guarantee capability, satisfying the national energy saving and emission reduction requirements and ensuring the steady and safe operation of the Beijing Airport.

LISTING RULES IMPLICATIONS

As at the date of this announcement, the Parent Company is the controlling shareholder of the Company. Airport Construction Corporation is a wholly-owned subsidiary of the Parent Company. Airport Construction Corporation is therefore a connected person of the Company. Accordingly, the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement constitutes a connected transaction of the Company under Chapter 14A of the Listing Rules.

As each of the applicable percentage ratios (as defined under Rule 14.07 of the Listing Rules) in respect of the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement when aggregated with the Previous Transactions is more than 0.1% but less than 5%, the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement is subject to the reporting and announcement requirements but is exempt from the independent shareholders' approval requirement of the Company under Chapter 14A of the Listing Rules.

BEIJING AIRPORT OPERATION GUARANTEE SUPPORTING FACILITIES RECONSTRUCTION PROJECT DESIGN AGREEMENT

Date

10 April 2017

Parties

- (1) the Company; and
- (2) Airport Construction Corporation

Term

The term of the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement shall commence from the signing date of the letter of appointment after the agreement takes effect, i.e., the date when the agreement is signed and affixed with the respective company chops of the parties thereto, and continue until the completion of the reconstruction projects contemplated under the agreement and the reconstruction projects have passed the inspection by the Company.

Scope of services under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement

Pursuant to the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement, Airport Construction Corporation agreed to provide services in relation to the design for the reconstruction projects to reconstruct operation guarantee supporting facilities, which include facilities such as road pavement, power supply system, air-conditioning and ventilation system, and electrical systems such as the broadcasting and monitoring system, for securing the safe and steady operation of the Beijing Airport, and such services shall include but not limited to the following:

- (i) taking responsibility for producing design in accordance with the technical specifications and standards imposed under national regulations and the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement and submitting design documents and the relevant quality guarantee in accordance with the content, timing and quantity requirements as provided under the Agreement;

- (ii) guaranteeing a reasonable life span of 50 years for the design;
- (iii) taking responsibility for examining the design information provided by foreign parties and the relevant liaison work;
- (iv) participating in the design examination to be conducted by the relevant officials after the submission of design documents by Airport Construction Corporation and making necessary adjustments and supplements within the originally agreed work scope based on the examination results. The reconstruction projects should be implemented within one year after the submission of design documents by Airport Construction Corporation and Airport Construction Corporation should be responsible for clarifying the design, handling the relevant design issues and participating in the completion inspection for the Company and reconstruction provider. If the reconstruction projects are not implemented within one year, Airport Construction Corporation should still be responsible for the aforesaid work and be entitled to receive reasonable consultation fee from the Company after mutual negotiation based on the work required; and
- (v) taking responsibility for making amendments or supplements in response to omissions or errors in the design documents. Taking responsibility for adopting remedial measures in response to losses resulted from accidents caused by any quality issues with the reconstruction projects, waiving the design fee for the relevant substandard work and paying to the Company an amount of damages that equals to 100% of the actual loss after mutual negotiation.

Consideration and Payment

The consideration payable to Airport Construction Corporation by the Company in respect of the provision of services under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement is estimated to be RMB17,581,700.

The consideration is determined upon mutual negotiation after taking into account the requirements under the relevant regulations of the PRC, including the “Regulations on Pricing Management of Project Survey and Design 《工程勘察設計收費管理規定》” and the “Measures for the Budget Estimation of Civil Aviation Projects 《民航建設工程概算編製辦法》”. Further, such consideration does not exceed the budget amount for the reconstruction projects estimated by the Company after taking into account the costs estimates for the reconstruction projects and the prevailing market prices. Therefore, the Company considers that the consideration is on normal commercial term and is fair and reasonable.

The Company agreed to pay to Airport Construction Corporation (i) RMB3,516,340 within 30 days from the effective date of the Beijing Airport operation Guarantee Supporting Facilities Reconstruction Project Design Agreement, which amounts to 20% of the consideration; (ii) RMB5,274,510 within 30 days from the submission date of the design documents including project technical proposal, design drawings and technical specifications by the Airport Construction Corporation, which amounts to 30% of the consideration; (iii) RMB7,032,680 after acknowledging the receipt of all documents from Airport Construction Corporation by the Company, which amounts to 40% of the consideration; (iv) RMB1,758,170 after the completion and acceptance of the projects and that the settlement way has been reached and the final settlement documents have been mutually agreed by both parties, which amounts to 10% of the consideration.

REASONS FOR AND BENEFITS OF ENTERING INTO THE BEIJING AIRPORT OPERATION GUARANTEE SUPPORTING FACILITIES RECONSTRUCTION PROJECT DESIGN AGREEMENT

The Beijing Airport operation guarantee supporting facilities reconstruction project includes provision of reconstruction design services for facilities such as road pavement, power supply system, air-conditioning and ventilation system, and electrical systems such as the broadcasting and monitoring system. Given the vast variety, broad coverage and strong comprehensiveness of the relevant design work, entrusting Airport Construction Corporation to provide reconstruction design services for Beijing Airport operation guarantee supporting facilities reconstruction project can guarantee the construction quality of the projects as well as reconstruction progress and at the same time ensure that the fees for the reconstruction projects do not exceed the Company's investment amount in the projects.

The purchase mode of provision of reconstruction design services for Beijing Airport operation guarantee supporting facilities reconstruction project will be conducted by inviting public tender. The Company organized two rounds of public tender for the project and Airport Construction Corporation was the only participating tenderer. Given that there were less than three tenderer submitting tender documents in both of the two rounds of public tender, as approved by the CAAC North China Regional Administration (民航華北地區管理局), the design service provider can be selected without the tender procedure.

After considering the business performance, overall quality of the design outline including the quality management, scale and price controls, design cycle and control, coordination work arrangement and onsite services plans of the design, design experience, reputation, title and work allocation of the responsible parties, design fee quotation and other relevant factors of Airport Construction Corporation, the Company selected Airport Construction Corporation as the design service provider for the reconstruction projects of Beijing Airport operation guarantee supporting facilities reconstruction project. The selection process was fair in the whole course and complied with the PRC laws and regulations and the relevant requirements of the Company.

Airport Construction Corporation has first-tier qualification in project design and possesses ample knowledge and experience in airport construction projects design, therefore the Company considers that it is able to satisfy the requirements of the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement.

In light of the above, the Directors (including the independent non-executive Directors) are of the view that the terms of the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement are on normal commercial terms and are fair and reasonable and the transactions contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement are in the interest of the shareholders of the Company as a whole.

LISTING RULES IMPLICATIONS

As at the date of this announcement, the Parent Company is the controlling shareholder of the Company. Airport Construction Corporation is a wholly-owned subsidiary of the Parent Company. Airport Construction Corporation is therefore a connected person of the Company. Accordingly, the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement constitutes a connected transaction of the Company under Chapter 14A of the Listing Rules.

As each of the applicable percentage ratios (as defined under Rule 14.07 of the Listing Rules) in respect of the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement when aggregated with the Previous Transactions is more than 0.1% but less than 5%, the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement is subject to the reporting and announcement requirements but is exempt from the independent shareholders' approval requirement of the Company under Chapter 14A of the Listing Rules.

BOARD'S APPROVAL

The Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement was approved by the Board. Since no Director has material interest in the transaction contemplated under the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement, none of the Directors abstained from voting at the Board's meeting to approve the Beijing Airport Operation Guarantee Supporting Facilities Reconstruction Project Design Agreement.

GENERAL

The Company is principally engaged in the operation of the Beijing Airport.

The Parent Company is principally engaged in the provision of ground handling services for domestic and international aviation enterprises, including the supply of water, electricity, steam and energy, airport management services and counter services.

Airport Construction Corporation is principally engaged in the provision of a full range of services for the construction of civil airports, including engineering design, investigation, consultation, site-selection, pre-feasibility study, feasibility study, construction, research, project supervision and management.
