BUSINESS REVIEW

In the first half of 2017, the improvement in China's economic growth has resulted in an increase in the demand for copper products across the country and an increase in copper prices. As a result, the Group recorded an increase in sales volume of copper products in the first half of 2017 as compared with the first half of 2016, which translated into an increase in turnover by 187.5% as compared with the same period Last Year. Such increase in sales was contributed not only by the increase in the Group's trading volume of electrolytic copper but also by the increase in production volume of its recycled copper products. Along with the increase in production and sales volume of recycled copper products, VAT refunds under the Comprehensive Utilisation of Resources Policy also recorded a corresponding increase during the period ended 30 June 2017. Furthermore, the improvement in the liquidity of our customers has resulted in the recovery of several long overdue trade receivable balances.

In order to take advantage of the expected recovery of the industrial metal market, the Group underwent several fund raising activities during and subsequent to the period ended 30 June 2017, namely, an issuance of 74,074,074 new ordinary shares for HK\$200 million in June 2017, an issuance of convertible bonds with a total principal amount of HK\$250 million in April 2017 and an issuance of convertible bonds with a total principal amount of HK\$600 million in August 2017.

FUTURE PROSPECTS/OUTLOOK

China's gross domestic product in the first half of 2017 grew by 6.9%, which was higher than last year's 6.7%. This would appear to indicate that China's economy has stabilized and is back on its growth track. After several years of price adjustment, the commodity market in China has finally witnessed signs of stabilization along with the recommencing of the expansion phase of the economy. With the expected continued improvement in China's economy, commodity prices in China, especially industrial metal prices, are expected to continue to increase in the coming future. Potential demand for industrial metals will also increase if the global economy continues to improve. Recently, it has been reported that China is considering to prohibit the import of scrap metals into China as from next year. Such new policy, if instigated and properly enforced, will be a further catalyst for the improvement of industrial metal prices. On the monetary front, there were signs of easing in liquidity in China's financial markets. At this juncture, we will be looking to increase our financial strength so that we will be able to take full advantage of further improvements in the market environment to strengthen our business and increase profitability. At the same time, we shall also continue to seek suitable acquisition opportunities to help grow our business.

HUMAN RESOURCES

As at 30 June 2017, the Group had a total of approximately 480 employees (31 December 2016: 477). The Group's staff costs for the six months ended 30 June 2017 were approximately RMB31.5 million. The Group offers competitive remuneration schemes to its employees. In addition, discretionary bonuses and share options may also be granted to eligible employees based on individual and the Group's performance. The Group is committed to nurturing a learning and sharing culture across its organization. Heavy emphasis is placed on the training and development of individual employees and team building, as the Group's success is dependent on the contribution of all functional divisions comprising skilled and motivated professionals. The Group is also committed to social responsibility by employing disabled staff and providing appropriate working conditions and protection to them.

DIVIDENDS

The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2017 (for the six months ended 30 June 2016: nil).

Bank loans and other borrowings included three entrusted loans totalled approximately RMB300.0 million from Mianyang Science Technology City Development Investment (Group) Co., Ltd. (綿陽科技城發展投資(集團)有限公司) ("Mianyang Development Group"). Pursuant to the entrusted loan agreement signed among Mianyang Tongxin Copper Co., Ltd. * Total interest-bearing debts/Total equity.

The improvement of current ratio and quick ratio as at 30 June 2017 compared with those as at 31 December 2016 were primarily attributable to (i) issuance of 74,074,074 new ordinary shares for HK\$200 million on 12 June 2017 and (ii) the conversion of convertible bonds, which were issued in April 2015, into 90,881,295 ordinary shares on 18 April 2017, whose derivative component was accounted for as an item of current liabilities at 31 December 2016.

Management Discussion and Analysis

The decrease in debt to equity ratio and net debt to equity ratio as at 30 June 2017 compared with those as at 31 December 2016 was mainly because of (i) the issuance of 74,074,074 new ordinary shares for HK\$200 million on 12 June 2017; (ii) conversion of convertible bonds, which were issued in April 2015, into 90,881,295 ordinary shares on 18 April 2017; and (iii) the net profit for the six months ended 30 June 2017.

COMMODITY RISK

The major raw materials used in the production of our recycled copper products are scrap copper. We are exposed to fluctuations in the prices of raw materials which are influenced by global as well as regional supply and demand conditions. Fluctuations in the prices of raw materials could adversely affect our financial performance. The Group uses copper futures contracts to mitigate part of its exposure against price fluctuations of copper raw materials. The market value of futures contracts is based on the quoted market price at the settlement on the balance sheet date. The Group did not have outstanding copper futures contracts as at 30 June 2017 (as at 31 December 2016: nil). Net profit of RMB0.6 million only from futures contracts was recognized during the six months ended 30 June 2017 (six months ended 30 June 2016: net loss of RMB400).

FOREIGN CURRENCY RISK

The functional currency of a majority of the entities within the Group is RMB and most of the transactions are settled in RMB. However, we are exposed to currency risk primarily related to the cash and cash equivalents and convertible bonds, both of them are denominated in Hong Kong dollars. The balance of cash and cash equivalents as at 30 June 2017 including approximately HK\$80.2 million and USD9,000 (in total equivalent to approximately RMB71.6 million) were held in banks in Hong Kong. The liability component of convertible bonds amounted to approximately HK\$243.0 million was translated into approximately RMB210.9 million as at 30 June 2017.

As at 30 June 2017, the Group's bank loans and other borrowings and obligations under finance leases were denominated in RMB. The Group did not commit to any financial instruments to hedge against foreign exchange exposure during the six months ended 30 June 2017. During the six months ended 30 June 2017, the Company incurred an exchange difference on translation of financial statements of non-PRC entities equivalent to RMB31,000, part of which was resulted from translating the convertible bonds from HKD to RMB.

SIGNIFICANT INVESTMENTS HELD

Except for investments in subsidiaries and associate companies, the Group did not hold any significant investment in equity interest in any other company during the six months ended 30 June 2017.

MATERIAL ACQUISITIONS AND DISPOSALS OF SUBSIDIARIES AND AFFILIATED COMPANIES

During the six months ended 30 June 2017, save as the above, the Group did not make any material acquisitions and disposals of subsidiaries and affiliated companies.

CAPITAL EXPENDITURES

For the six months ended 30 June 2017, the Group's capital expenditures represent additions to property, plant and equipment (including construction in progress) of approximately RMB16.7 million. The capital expenditures were mainly financed from internal resources.

CAPITAL COMMITMENTS

As at 30 June 2017, the capital commitments in respect of the acquisition of property, plant and equipment and lease prepayments on lands contracted for but not provided in the consolidated financial statements amounted to RMB39.8 million (as at 31 December 2016: RMB40.9 million).

SIGNING OF ANNUAL PROCUREMENT AGREEMENT INVOLVING ISSUE OF CONSIDERATION SHARES UNDER GENERAL MANDATE

On 15 August 2017, the Company entered into respective annual procurement agreements with four suppliers, pursuant to which each supplier agreed to supply a target amount of copper scrapped raw materials to the Company from 15 August 2017 to 14 August 2018, the purchase price of which shall be partly satisfied with cash and partly satisfied with consideration shares.

Management Discussion and Analysis

For each ton of copper scrap raw materials supplied by a supplier, the Company will pay (i) up to RMB3,000 by way of issuance of a maximum number of 1,172 consideration shares at an Issue Price of HK\$3 per consideration share; and (ii) the remainder of the balance in cash. The arrangements under the annual procurement agreements are expected to encourage such suppliers to achieve the targeted raw material supply amount with a view to broadening the Group's supplier base to cater for the Group's production needs.

As the targeted amount of supply of copper scrap raw materials from the suppliers is 56,000 tonnes in aggregate, the maximum number of consideration shares that the Company may issue pursuant to the annual procurement agreements is 65,632,000 Shares. The consideration shares will be allotted and issued to the subscribers within 10 business days from 14 August 2018. Each of the subscribers is a wholly-owned company of the relevant supplier.

4 SEGMENT REPORTING

The Group manages its businesses by business operations. In a manner consistent with the way in which information is reported internally to the Group's most senior executive management for the purposes of resource allocation and performance assessment, the Group has presented the following four reportable segments, namely recycled copper products segment, power transmission and distribution cables segment, communication cables segment and aluminium products segment as at 30 June 2017.

- (i) Recycled copper products segment: use of scrap copper and electrolytic copper for the manufacturing of recycled copper products and trading of copper products;
- (ii) Power transmission and distribution cables segment: manufacturing sales of power transmission and distribution cables;
- (iii) Communication cables segment: manufacturing and sales of communication cables; and
- (iv) Aluminium products segments: sales of aluminium products.

(a) SEGMENT RESULTS

For the purposes of assessing segment performance and allocating resources between segments, the Group's most senior executive management monitors the results attributable to each reportable segment on the following bases:

Revenue and expenses are allocated to the reportable segments with reference to sales generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments.

The measure used for reporting segment profit/(loss) is "profit/(loss) after taxation". To arrive at reportable segment profit/(loss), the Group's profit/(loss) is further adjusted for items not specially attributed to individual segments, such as head office or corporate administrative costs.

A measurement of segment assets and liabilities is not provided regularly to the Group's most senior executive management and accordingly, no segment assets or liabilities information is presented.
