PROSPECTS

There was positive momentum in consumption in the second half of 2017 and first quarter of 2018 and the Group's same store sales growth improved over the period. Development of the Group's e-business was on track. But there are uncertainties in macroeconomic prospect which could be headwind to the consumption environment in the PRC and the Group's business in the second half of 2018. Nevertheless, the management believes the outlook for the second half of 2018 remains optimistic.

The Group will continue to develop its business by adopting a multi-brand strategy. While the Group expects Cabbeen Lifestyle will continue to contribute the majority of its revenue in the coming few years, it expects the business scale of Cabbeen Urban will grow at faster pace with improved brand awareness and increase in retail channels. On the other hand, the Group has started a brand reshaping exercise for its young brand 2AM and will position it as a mid-tier, young and fashionable brand.

前景

於二零一七年下半年及二零一八年第一季度, 消費呈現良好勢頭且本集團同店銷售增長於期 內亦有所改善。本集團電子商務發展已步入正 軌。惟宏觀經濟前景不明朗,可能對中國消費 環境及本集團二零一八年下半年業務產生不利 影響。然而,管理層相信二零一八年下半年的 前景依然樂觀。

本集團將繼續通過採納多品牌策略發展其業務。本集團預期未來幾年卡賓休閒將繼續貢獻 其大部分的收益,但隨著品牌知名度提升及零售渠道增加,其預期卡賓都市的業務規模亦將 迅速增長。另一方面,本集團已就其年輕品牌 淩晨兩點開展品牌重塑活動,並將該品牌定位 為中端、年輕及時尚的潮牌。 In addition, the Group plans to launch "Cabbeen Love", a brand for children's wear, in the second half of 2018, in line with the Group's multi-brand expansion strategy. Cabbeen Love is a middle-end fashion brand targeted at 3 to 12 years old kids, which extends the street and sports style of Cabbeen Lifestyle, mainly releasing the stylish Casual Luxury series. The Group plans to open Cabbeen Love Stores in second- and third-tier cities, and also sell products simultaneously through Wechat malls.

此外,本集團計畫於二零一八年下半年推出卡賓童裝品牌「Cabbeen Love」,以配合本集團多品牌擴展的策略。Cabbeen Love 定位為專為3至12歲的孩子設計的中檔時尚童裝品牌,延續Cabbeen Lifestyle 街頭與運動風格,主打潮流輕奢系列。本集團計畫在二三線城市開設Cabbeen Love專門店,並同步透過微商城銷售產品。

The total revenue for the six months ended 30 June 2018 amounted to RMB558.1 million, an increase of 37.5% or RMB152.1 million as compared with RMB406.0 million for the six months ended 30 June 2017. The increase in the revenue was mainly attributable to the same store sales growth of its offline retail stores, expansion of the Group's online retail channels and the absence of product repurchase.

截至二零一八年六月三十日止六個月之總收益 為人民幣558.1百萬元,較截至二零一七年六 月三十日止六個月的人民幣406.0百萬元增加 37.5%或人民幣152.1百萬元。收益增加乃主 要由於本集團線下零售店舖的同店銷售增長、 擴大網上零售渠道及沒有產品回購。

The Group continues its multi-brand strategy and provides a wide variety of products to its customers. During the six months ended 30 June 2017 and 2018, Cabbeen Lifestyle continued to be the main brand of the Group and contributed a majority of the Group's revenue.

Gross profit and gross profit margin

The gross profit was RMB267.3 million for the six months ended 30 June 2018 compared to RMB217.3 million in the same period in 2017, an increase of 23.0%, which was attributable to the increase in same store sales growth of our retail stores and sales volume of online platforms.

Gross profit margin decreased from 53.5% for the six months ended 30 June 2017 to 47.9% for six months ended 30 June 2018. The decrease in gross profit margin was attributable to the increase in provision for sales rebates of RMB21.3 million and decrease in percentage contribution from self-managed offline retail business.

本集團繼續堅持其多品牌戰略及向其客戶提供 多樣化產品。於截至二零一七年及二零一八年 六月三十日止六個月,卡賓休閒仍為本集團主 要品牌及本集團主要收益來源。

毛利及毛利率

按品牌劃分的收益

截至二零一八年六月三十日止六個月之毛利為人民幣267.3百萬元,而二零一七年同期為人民幣217.3百萬元,增幅為23.0%,乃由於我們的零售店舖同店銷售增長及網上平台銷量增加。

毛利率由截至二零一七年六月三十日止六個月之53.5%減少至截至二零一八年六月三十日止六個月之47.9%。毛利率減少乃由於積分返利撥備增加人民幣21.3百萬元及線下自營零售業務貢獻百分比減少。

Other income

Other income primarily consists of interest income from bank deposits, government grants and net foreign exchange differences. The slight increase in other revenue from RMB22.6 million for the six months ended 30 June 2017 to RMB24.5 million for the six months ended 30 June 2018 was mainly due to an increase in bank deposit interest income.

Selling and distribution expenses

Selling and distribution expenses consist of mainly operating cost for e-commerce sales channels, advertising and promotion, and logistic and delivery expenses. As a result of the Group's continued efforts to improve cost and logistic efficiency and closure of non-performing self-managed retail stores, selling and distribution expenses as a percentage on revenue decreased to 12.8% for the six months ended 30 June 2018 from 14.2% for the six months ended 30 June 2017.

Administrative and other operating expenses

Administrative and other operating expenses mainly comprised of staff costs, design, research and development expenses, management consulting expenses, provision for inventories, office rental, depreciation and amortization charges and other miscellaneous expenses. Administrative and other operating expenses for the six months ended 30 June 2018 amounted to RMB50.6 million representing an increase of RMB6.4 million or 14.5% from that of the same period in 2017. The increase in administrative expenses for the six months ended 30 June 2018 was mainly attributable to a reversal of provision for doubtful debts of RMB14.0 million in the same period last year.

Profit from operations

The Group recorded profit from operations of RMB169.9 million (2017: RMB 138.1 million) for the six months ended 30 June 2018, representing an increase of approximately 23.1%. Operating margin decreased from 34.0% for the six months ended 30 June 2017 to 30.4% for the six months ended 30 June 2018 which mainly attributable to decrease in gross profit margin.

其他收入

其他收入主要包括銀行存款的利息收入、政府補助及淨匯兑差額。其他收入由截至二零一七年六月三十日止六個月的人民幣22.6百萬元微升至截至二零一八年六月三十日止六個月的人民幣24.5百萬元,主要由於銀行存款利息收入增加所致。

銷售及分銷開支

銷售及分銷開支主要包括電子商貿銷售渠道的經營成本、廣告及推廣以及物流及付運費用。由於本集團持續致力於提升成本及物流效益及關閉低產自營店,銷售及分銷開支佔收益的百分比由截至二零一七年六月三十日止六個月之14.2%下降至截至二零一八年六月三十日止六個月的12.8%。

行政及其他營運開支

行政及其他營運開支主要包括員工成本、設計、研發開支、管理諮詢費用、存貨撥備、辦公室租金、折舊及攤銷開支及其他雜項開支。截至二零一八年六月三十日止六個月,行政及其他營運開支為人民幣50.6百萬元,較二零一七年同期增加人民幣6.4百萬元或14.5%。截至二零一八年六月三十日止六個月,行政開支增加乃主要由於在去年同期有壞賬撥備回撥人民幣14.0百萬元。

經營溢利

截至二零一八年六月三十日止六個月,本集團錄得經營溢利人民幣169.9百萬元(二零一七年:人民幣138.1百萬元),增幅為約23.1%。經營利潤率由截至二零一七年六月三十日止六個月的34.0%減至截至二零一八年六月三十日止六個月的30.4%乃主要由於毛利率下降。

Management Discussion and Analysis (continued)

管理層討論及分析(續)

Finance costs

For the six months ended 30 June 2018, the Group's finance costs amounted to RMB9.4 million (2017: RMB7.3 million) or 1.7% (2017: 1.8%) of the Groups revenue. Finance costs represent primarily interest expenses for a Hong Kong dollar bank loan of a subsidiary operated in Hong Kong. The increase in interest expenses for the six month ended 30 June 2018 was because of the increase in bank loan interest rate.

Income tax

For the six months ended 30 June 2018, income tax expenses of the Group amounted to RMB51.4 million (2017: RMB42.8 million) and the effective tax rate was 32.0% (2017: 32.7%).

Profit for the period

Profit for the six months ended 30 June 2018 increased by 24.1% or RMB21.2 million to RMB109.1 million from RMB88.0 million for the same period in 2017. Net profit margin for the six months ended 30 June 2018 was 19.6% (2017: 21.7%). Basic and diluted earnings per share for the six months ended 30 June 2018 increased to RMB0.1640 (2017: RMB0.1249) and RMB0.1637 (2017: RMB0.1248), respectively. The increase in net profit was mainly a result of increase in revenue.

Other key financial ratios

Average inventory turnover days of the Group were 200 days for the six months ended 30 June 2018, as compared to 296 days in the same period in 2017. The improvements in inventory turnover was because of samestore sales growth and increase in sales volume during the six months ended 30 June 2018.

融資成本

截至二零一八年六月三十日止六個月,本集團的融資成本為人民幣9.4百萬元(二零一七年:人民幣7.3百萬元)或佔本集團收益1.7%(二零一七年:1.8%)。融資成本主要為於香港經營附屬公司之以港元計值的銀行貸款的利息開支。截至二零一八年六月三十日止六個月的利息開支增加乃由於銀行貸款息率上升。

所得税

截至二零一八年六月三十日止六個月,本集團的所得税開支為人民幣51.4百萬元(二零一七年:人民幣42.8百萬元),實際税率為32.0%(二零一七年:32.7%)。

其他主要財務比率

截至二零一八年六月三十日止六個月,本集團 平均存貨周轉天數為200日,而二零一七年同 期則為296日。存貨周轉改善乃由於截至二零 一八年六月三十日止六個月同店銷售增長及銷 量增加。 Average turnover days of trade and bills receivables decreased to 91 days for the six months ended 30 June 2018 as compared to 135 days for the same period in 2017. The decrease was attributable to the increase in revenue generated from online sales as a percentage of the Group's total sales, as the Group offered shorter credit period for its online sales.

截至二零一八年六月三十日止六個月,貿易應收款項及應收票據平均周轉天數減至91日, 而二零一七年同期則為135日。有關減少乃由 於線上銷售收入佔本集團總銷售收入比率增加 而本集團線上銷售賬期較短。

Average trade and bills payable turnover days were 247 days (2017: 307 days) for the six months ended 30 June 2018. This is consistent with the credit period granted by the Group's suppliers and the Group's practice of using 6-month bank bills to settle trade payables.

截至二零一八年六月三十日止六個月,貿易應付款項及應付票據平均周轉天數為247日(二零一七年:307日)。有關天數與本集團供應商所授出信貸期及本集團以6個月銀行匯票支付貿易應付款項的慣例一致。

Accordingly, the Board considers the Group's exposure to the fluctuations of the exchange rate is primarily with respect to Hong Kong Dollars.

The Group manages its foreign exchange risk by performing regular reviews of the Group's net foreign exchange exposures and to mitigate the impact on exchange rate fluctuations by entering into currency hedge arrangement if necessary. 本集團管理其外幣風險之方式為定期審視其淨 外幣風險,並於有需要時訂立貨幣對沖安排, 以減輕匯率波動帶來的影響。截至二零一七年 十二月三十一日止年度及截至二零一八年六月 三十日止六個月,本集團概無訂立任何遠期外 匯或對沖合約。

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, Review of interim financial information performed by the independent auditor of the entity, issued by the Hong Kong Institute of Certified Public Accountants. A review of the interim financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial report as at 30 June 2018 is not prepared, in all material respects, in accordance with International Accounting Standard 34, Interim financial reporting.

IFRS 9, Financial instruments, (b) including the amendments to IFRS 9, Prepayment features with negative compensation

IFRS 9 replaces IAS 39, Financial instruments: recognition and measurement. It sets out the requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items.

The Group has applied IFRS 9 retrospectively to items that existed at 1 January 2018 in accordance with the transition requirements. The Group has recognised the cumulative effect of initial application as an adjustment to the opening equity at 1 January 2018. Therefore, comparative information continues to be reported under IAS 39.

There is no impact of transition to IFRS 9 on retained earnings and reserves at 1 January 2018.

> Further details of the nature and effect of the changes to previous accounting policies and the transition approach are set out below:

Classification of financial (i) assets and financial liabilities

> IFRS 9 categories financial assets into three principal classification categories: measured at amortised cost, at fair value through other comprehensive income (FVOCI) and at fair value through profit or loss (FVPL). These supersede IAS 39's categories of heldto-maturity investments, loans and receivables, available-for-sale financial assets and financial assets measured at FVPL. The classification of financial assets under IFRS 9 is based on the business model under which the financial asset is managed and its contractual cash flow characteristics.

> Non-equity investments held by the Group are classified into one of the following measurement categories:

> amortised cost, if the investment is held for the collection of contractual cash flows which represent solely payments of principal and interest. Interest income from the investment is calculated using the effective interest method;

 - Classification of financial assets and financial liabilities (Continued)

An investment in equity securities is classified as FVPL unless the equity investment is not held for trading purposes and on initial recognition of the investment the group makes an election to designate the investment at FVOCI (non-recycling) such that subsequent changes in fair value are recognised in other comprehensive income. Such elections are made on an instrument-by-instrument basis, but may only be made if the investment meets the definition of equity from the issuer's perspective. Where such an election is made, the amount accumulated in other comprehensive income remains in the fair value reserve (non-recycling) until the investment is disposed of. At the time of disposal, the amount accumulated in the fair value reserve (non-recycling) is transferred to retained earnings. It is not recycled through profit or loss. Dividends from an investment in equity securities, irrespective of whether classified as at FVPL or FVOCI (nonrecycling), are recognised in profit or loss as other income.

At the date of initial application, an entity recognised any difference between the fair value of the entire hybrid instrument and the sum of the fair value of its components in the opening retained earnings of the reporting period.

The fair value of the convertible loan is equal to the sum of the fair values of the conversion option and the loan as at 1 January 2018 so no opening retain adjustment is required.

The measurement categories for all financial liabilities remain the same.

The carrying amounts for all financial liabilities at 1 January 2018 have not been impacted by the initial application of IFRS 9.

The Group did not designate or dedesignate any financial asset or financial liability at FVPL at 1 January 2018.

Credit losses

IFRS 9 replaces the "incurred loss" model in IAS 39 with an "expected credit loss" ECL model. The ECL model requires an ongoing measurement of credit risk associated with a financial asset and therefore recognises credit losses earlier than under the "incurred loss" model in IAS 39.

The Group applies the new ECL model to financial assets measured at amortised cost (including cash and cash equivalents, trade and other receivables). Financial assets measured at fair value are not subject to the ECL assessment.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the group expects to receive).

信貸虧損 (ii)

國際財務報告準則第9號 以預期信貸虧損「預期信 貸虧損」模式取代了國際 會計準則第39號的「已產 生虧損 | 模式。預期信貸 虧損模式要求持續計量金 融資產相關的信貸風險, 因此確認預期信貸虧損的 時間較根據國際會計準則 第39號之「已產生虧損」 會計模式確認之時間為早。

本集團將新預期信貸虧損 模式應用於按攤銷成本計 量的金融資產(包括現金及 現金等價物、貿易及其他 應收款項)。按公平值計量 的金融資產毋須進行預期 信貸虧損評估。

計量預期信貸虧損

預期信貸虧損為信貸虧損 的概率加權估計。信貸虧 損以所有預期現金差額的 現值(即根據合同應付予本 集團的現金流量與本集團 預計收取的現金流量之間 的差額)計量。

ECLs are measured on either of the following bases:

- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date.

Significant increases in credit risk

In assessing whether the credit risk of a financial instrument (including a loan commitment) has increased significantly since initial recognition, the Group compares the risk of default occurring on the financial instrument assessed at the reporting date with that assessed at the date of initial recognition. In making this reassessment, the Group considers that a default event occurs when (i) the borrower is unlikely to pay its credit obligations to the group in full, without recourse by the Group to actions such as realising security (if any is held); or (ii) the financial asset is 90 days past due. The Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forwardlooking information that is available without undue cost or effort.

- an actual or expected significant deterioration in the operating results of the debtor; and

When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

 Basis of calculation of interest income on credit-impaired financial assets

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on the amortised cost (i.e. the gross carrying amount less loss allowance) of the financial asset.

At each reporting date, the Group assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;

Write-off policy

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

The Group has concluded that there would be no material impact for the initial application of the new impairment requirements.

IFRS 15 establishes a comprehensive framework for recognising revenue and some costs from contracts with customers. IFRS 15 replaces IAS 18, *Revenue*, which covered revenue arising from sale of goods and rendering of services, and IAS 11, *Construction contracts*, which specified the accounting for construction contracts.

The Group has elected to use the cumulative effect transition method and has recognised the cumulative effect of initial application as an adjustment to the opening balance of equity at 1 January 2018. Therefore, comparative information has not been restated and continues to be reported under IAS 18. As allowed by IFRS 15, the Group has applied the new requirements only to contracts that were not completed before 1 January 2018 (if any).

IFRS 15, Revenue from contracts with customers (Continued)

Further details of the nature and effect of the changes on previous accounting policies are set out below:

(i) Timing of revenue recognition

Previously, revenue arising from sale of goods was generally recognised at a point in time when the risks and rewards of ownership of the goods had passed to the customers.

Under IFRS 15, revenue is recognised when the customer obtains control of the promised good or service in the contract. This may be at a single point in time or over time. IFRS 15 identifies the following three situations in which control of the promised good or service is regarded as being transferred over time:

- Α. When the customer simultaneously receives and consumes the benefits provided by the entity's performance, as the entity performs:
- В. When the entity's performance creates or enhances an asset (for example work in progress) that the customer controls as the asset is created or enhanced;

 - C. When the entity's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date.

If the contract terms and the entity's activities do not fall into any of these 3 situations, then under IFRS 15 the entity recognises revenue for the sale of that good at a single point in time, being when control has passed. Transfer of risks and rewards of ownership is only one of the indicators that is considered in determining when the transfer of control occurs.

The adoption of IFRS 15 does not have a significant impact on when the Group recognises revenue from sale of goods and this change in accounting policy had no material impact on opening balances as at 1 January 2018.

(ii) Significant financing component

IFRS 15 requires an entity to adjust the transaction price for the time value of money when a contract contains a significant financing component, regardless of whether the payments from customers are received significantly in advance of revenue recognition or significantly deferred.

Previously, the Group only applied such a policy when payments were significantly deferred, which was not common in the Group's arrangements with its customers. The Group did not apply such a policy when payments were received in advance.

It is not common for the Group to receive payments significantly in advance of revenue recognition in the Group's arrangements with its customers.

To reflect this change in presentation, contract liabilities, including receipts in advance from customers, unredeemed loyalty points liabilities and refund liabilities, with amount of RMB38,245,000 are now separately presented under trade and other payables at 30 June 2018, as a result of the adoption of IFRS 15.

IFRIC 22, Foreign currency transactions and advance consideration

This interpretation provides guidance on determining "the date of the transaction" for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) arising from a transaction in which an entity receives or pays advance consideration in a foreign currency.

The Interpretation clarifies that "the date of the transaction" is the date on initial recognition of the non-monetary asset or liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance of recognising the related item, the date of the transaction for each payment or receipt should be determined in this way. The adoption of IFRIC 22 does not have any material impact on the financial position and the financial result of the Group.

3 **REVENUE**

The principal activities of the Group are the sale of menswear and related accessories in the People's Republic of China (the "PRC"). Revenue represents the sales value of goods sold less returns, discounts and value added taxes.

The Group had one customer with whom transactions have exceeded 10% of the Group's revenue for the six months ended 30 June 2018 (six months ended 30 June 2017: two). The amounts of sales to this customer amounted to RMB74,590,000 (six months ended 30 June 2017: RMB101,656,000).

The Group normally grants a credit period of 90 to 270 days to its customers. There were no trade receivables that were past due at the end of the reporting period but not impaired. Receivables that were current relate to customers for whom there was no recent history of default. During the reporting period, the Group kept assessing the expected credit loss of all receivables and established a provision of doubtful debts. The provision for doubtful debts is recorded using a provision account unless the Group is satisfied that recovery is remote, in which case the expected credit loss is written off against trade receivables and the provision for doubtful debts directly. The Group does not hold any collateral over these balances.

As at 30 June 2018, 16% (31 December 2017: 25%) and 52% (31 December 2017: 69%) of the total trade and other receivables were due from the Group's largest customer and the five largest customers respectively.

(i) Fair value hierarchy

The following table presents the fair value of the Group's financial instruments measured at the end of the reporting period, categorised into the three-level fair value hierarchy as defined in IFRS 13, Fair value measurement. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available

The fair value of conversion option embedded in convertible loan is determined using binomial lattice model and the significant unobservable input used in the fair value measurement is expected volatility. The fair value measurement is positively correlated to the expected volatility. As at 31 December 2017 and 30 June 2018, it is estimated that with all other variables held constant, an increase/ decrease in the expected volatility by 5% would have decreased/increased the Group's profit by RMB364,000 (2017: RMB313,000).

可轉換貸款內含之轉換權 之公平值乃採用二項式點 陣 模 式 釐 定 , 而 公 平 值 計量所用之重要不可觀察 輸入數據為預期波幅。公 平值計量與預期波幅呈正 相關關係。於二零一七年 十二月三十一日及二零 一八年六月三十日,估計 當預期波幅上升/下降 5%而所有其他變量保持 不變,本集團之溢利將減 少/增加人民幣364,000 元(二零一七年:人民幣 313,000元)。

(Continued)

IFRS 16, Leases

As discussed in the 2017 annual financial statements, currently the Group classifies leases into operating leases and accounts for the lease arrangements depending on the classification of the lease. Upon the adoption of IFRS 16, where the Group is the lessee under the lease the Group will be required to account for all leases in a similar way to current finance lease accounting, i.e. recognise and measure a lease liability at the present value of the minimum future lease payments and recognise a corresponding "right-of-use" asset at the commencement date of the lease, subject to practical expedients. IFRS 16 will primarily affect the Group's accounting as a lessee of leases for items of property, plant and equipment which are currently classified as operating leases.

Upon the initial adoption of IFRS 16 at 1 January 2019, the present value of most of the future minimum lease payments that are payable after 6 months will be recognised as lease liabilities, with corresponding right-of-use assets recognised as non-current assets. The Group will need to perform a more detailed analysis to determine the amounts of new assets and liabilities arising from operating lease commitments on adoption of IFRS 16, after taking into account the applicability of the practical expedient and adjusting for any leases entered into or terminated between now and the adoption of IFRS 16.

22 截至二零一八年六月三十日止 六個月已頒佈惟尚未生效的修 訂、新訂準則及詮釋的可能影 響(續)

國際財務報告準則第16號,租賃

於二零一九年一月一日初步採納國際財務報告準則第16號後,6個月後應付的大部分最低未來租賃付款的現值將確認為租賃負債,而相應使用權資產確認為非流動資產。經考慮實際權宜方法報過期第16號之間已訂立或終止的任何知數後,本集團將須進行更為詳細的分析以釐定於採納國際財務報告準則第16號時經營租約承擔所產生的新資產及負債的金額。
