This condensed consolidated interim financial information is presented in Hong Kong Dollar and all values are rounded to nearest thousand (HK\$’000) except when otherwise indicated.

This condensed consolidated interim financial information has not been audited.

### 2 BASIS OF PREPARATION

This condensed consolidated interim financial information for the six months ended 30 June 2019 has been prepared in accordance with the Hong Kong Accounting Standards (“**HKAS**”) 34 “Interim financial reporting” issued by the Hong Kong Institute of Certified Public Accountants (the “**HKICPA**”). The condensed consolidated interim financial information should be read in conjunction with the annual consolidated financial statements for the year ended 31 December 2018, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“**HKFRSs**”).

### 3 ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the annual consolidated financial statements for the year ended 31 December 2018, as described in those annual consolidated financial statements, except for the adoption of new and amended standards as set out below.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

#### (a) New and amended standards adopted by the Group

The following new standards, amendments to standards and interpretation have been adopted by the Group for the first time for the financial year beginning on 1 January 2019:

|                      |                                                      |
|----------------------|------------------------------------------------------|
| HKAS 19 (Amendments) | Plan Amendment, Curtailment or Settlement            |
| HKAS 28 (Amendments) | Long-term Interests in Associates and Joint Ventures |
| HKFRS 9 (Amendments) | Prepayment Features with Negative Compensation       |
| HKFRS 16             | Leases                                               |
| HKFRSs (Amendments)  | Annual Improvements to HKFRSs 2015 – 2017 Cycle      |
| HK (IFRIC) – Int 23  | Uncertainty over Income Tax Treatments               |

A number of new or amended standards became applicable for the current reporting period, and the Group had to change its accounting policies and make retrospective adjustments as a result of adopting HKFRS 16 Leases (“**HKFRS 16**”).

The impact of the adoption of HKFRS 16 is disclosed below. The other standards did not have material impact on the Group's accounting policies and did not require any adjustments.

(i) **HKFRS 16 Leases**

*Changes in the accounting policies*

From 1 January 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the condensed consolidated interim statement of comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the fixed lease payments. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be determined, or the Group's incremental borrowing rate.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- prepayment, and
- any initial direct costs.

Right-of-use assets are presented within "property, plant and equipment" in the condensed consolidated interim balance sheet, within which the corresponding underlying assets would be presented if they were owned by the Group.

Payments associated with short-term leases are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

*Impact of adoption*

The Group has adopted HKFRS 16 retrospectively from 1 January 2019, but has not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provision in the standard. The adjustments arising from the new leasing rules are therefore recognised in the opening condensed consolidated interim balance sheet on 1 January 2019.

On adoption of HKFRS 16, the Group recognised lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of HKAS 17 Leases ("HKAS 17"). These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 January 2019 (date of initial application of HKFRS 16). The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 January 2019 was 5.2%.

For leases previously classified as finance leases the entity recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application. The measurement principles of HKFRS 16 are only applied after that date.

In applying HKFRS 16 for the first time, the Group has used the following practical expedients permitted by this standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics; and
- the accounting for operating leases with a remaining lease term of less than 12 months as at 1 January 2019 as short-term leases

The reconciliation between the operating lease commitments disclosed applying HKAS 17 as at 31 December 2018 and the lease liabilities recognised in the opening of condensed consolidated interim balance sheet as at 1 January 2019 (date of initial application of HKFRS 16) is as follows:

|                                                                                             | <i>HK\$'000</i> |
|---------------------------------------------------------------------------------------------|-----------------|
| Operating lease commitments disclosed as at 31 December 2018                                | 146,541         |
| Discounted using the lessee's incremental borrowing rate at the date of initial application | 105,684         |
| Add: finance lease liabilities recognised as at 31 December 2018                            | 2,472           |
| Less: short-term leases recognised on a straight-line basis as expense                      | (540)           |
| Add: adjustments for reassessment of extension and termination options of lease contracts   | 23,898          |
| Lease liabilities recognised as at 1 January 2019                                           | <u>131,514</u>  |
| Of which are:                                                                               |                 |
| Current lease liabilities                                                                   | 33,419          |
| Non-current lease liabilities                                                               | <u>98,095</u>   |
|                                                                                             | <u>131,514</u>  |

The associated right-of-use assets were measured at the amount equal to the lease liabilities, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the consolidated balance sheet as at 31 December 2018. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

The recognised right-of-use assets relate to the following types of assets:

|                   | <b>30 June 2019</b><br><i>HK\$'000</i> | 1 January 2019<br><i>HK\$'000</i> |
|-------------------|----------------------------------------|-----------------------------------|
| Properties        | <b>118,054</b>                         | 126,907                           |
| Medical equipment | <b>2,324</b>                           | 2,721                             |
|                   | <u><b>120,378</b></u>                  | <u>129,628</u>                    |

The change in accounting policy affected the following items in the condensed consolidated interim balance sheet on 1 January 2019:

- property, plant and equipment (right-of-use assets) – increase by HK\$129,628,000
- property, plant and equipment (medical equipment) – decrease by HK\$2,721,000
- prepayments – decrease by HK\$330,000
- accruals – decrease by HK\$2,465,000
- borrowings – decrease by HK\$2,472,000
- lease liabilities – increase by HK\$131,514,000

### (b) Segment information

Management has determined the operating segments based on the reports reviewed by the chief operating decision-maker that are used to making strategic decisions. The chief operating decision-maker is identified as the executive directors of the Company. The executive directors consider the business from a client perspective and assesses the performance of the operating segments based on segment revenue and segment results for the purposes of allocating resources and assessing performance. These reports are prepared on the same basis as this condensed consolidated interim financial information.

Management considers the business is mainly located in HK and the PRC, which the revenue and segment results are determined by the geographical location in which the client is operated. Management has therefore identified the reportable segment based on the Group's geographic perspective, namely HK and the PRC.

Capital expenditure comprises additions to property, plant and equipment and intangible assets.

Other income, other gains/(losses), net, listing expenses, finance expenses, and income tax expense are not included in segment results.

The segment results for the six months ended 30 June 2019 are as follows:

## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

#### Overview

For the six months ended 30 June 2019, we generated 51.0% (six months ended 30 June 2018: 52.7%) of our revenue in Hong Kong and 49.0% (six months ended 30 June 2018: 47.3%) in the PRC. Our business was experienced a rapid growth during the six months ended 30 June 2019, generating total revenue of HK\$264.6 million for the six months ended 30 June 2019 (six months ended 30 June 2018: HK\$192.3 million), representing an increase of 37.6% from the corresponding period in 2018. In particular, the revenue of the PRC operations also recorded an increase of 42.6% in Hong Kong dollar terms during the six months ended 30 June 2019 primarily as a result of the strong growth in revenue of the eye hospitals in Shenzhen and Beijing. The depreciation of Renminbi has lowered our growth when reporting in Hong Kong dollar terms. In Renminbi, our revenue in PRC increased by 51.1%.

The revenue of the eye hospital in Shenzhen amounted to HK\$103.2 million during the six months ended 30 June 2019 (six months ended 30 June 2018: HK\$81.5 million), representing a promising growth rate of 26.5% in Hong Kong dollar terms. In Renminbi, the revenue increased by 34.1%.

The revenue of the eye hospital in Beijing which commenced business operations since January 2018 increased by 165.3% in Hong Kong dollar terms and amounted to HK\$25.1 million (six months ended 30 June 2018: HK\$9.5 million). In Renminbi, the revenue increased by 181.2%. Although the revenue of the eye hospital in Beijing is catching up in good progress, it incurred a net loss amounted to HK\$3.9 million during the six months ended 30 June 2019 (six months ended 30 June 2018: HK\$17.6 million). Our Directors are satisfied with the performance of the eye hospital in Beijing, and we expect that its profitability will keep improving in the second half of 2019.

We will further expand our service network in the Guangdong-Hong Kong-Macau Greater Bay Area (粵港澳大灣區) and other PRC regions.

Our first eye hospital in Huizhou, Guangdong province, is planned to open in the fourth quarter of 2019 or the first quarter of 2020. The eye hospital in Huizhou will have ten consultation rooms and three operation theatres. The eye hospital in Huizhou is expected to strengthen our service network in Guangdong province.

On 28 March 2019, we completed the acquisition of Kunming Eye Hospital and this will help the Group to establish the service network in Southwest China which has increasing demand for high quality ophthalmic services. After the acquisition, the Kunming Eye Hospital was under renovation and opened for full operation during June 2019.

On 26 March 2019, the Group entered into an agreement with independent third parties to acquire 100% equity interest of Shanghai Lucida Medical Scientific Ltd (the “**acquiree**”) in Shanghai, the PRC, at a maximum cash consideration of RMB82,900,000 (equivalent to approximately HK\$92,475,000) which is subject to contingent consideration payments based on the cash and cash equivalents and equity value of the acquiree at the date of completion. The acquisition is expected to be completed by end of September 2019.

Gross profit margin increased to 37.5% (six months ended 30 June 2018: 32.8%) during the six months ended 30 June 2019 and the amount of gross profit increased to HK\$99.3 million (six months ended 30 June 2018: HK\$63.1 million). The increase of the gross profit margin was primarily due to the improving profitability of our eye hospital in Beijing.

Net profit for the six months ended 30 June 2019 increased by 175.6% to HK\$33.1 million, primarily due to (i) increase of revenue by 37.6% and (ii) the improving financial performance of the eye hospital in Beijing during the six months ended 30 June 2019. These two factors increased the amount of net profit significantly during the six months ended 30 June 2019.

In addition to the increase in the sales of vision aid products by 47.7%, the increase was primarily driven by the increase in the revenue generated from the provision of ophthalmic services to HK\$245.3 million during the six months ended 30 June 2019 from HK\$179.2 million during the six months ended 30 June 2018, representing an increase of 36.8%, because of the increase in the number of surgeries performed by us and the number of our ophthalmologists/physicians in Hong Kong and the PRC.

The revenue generated from our business operations in Hong Kong accounted for 51.0% of our total revenue, represented a decrease from 52.7% as compared with the six months ended 30 June 2018, primarily because of the increase in the amount of revenue of the PRC of 42.6% for the six months ended 30 June 2019 which was at a faster pace than that of Hong Kong of 33.1%.

### *Provision of ophthalmic services*

The ophthalmic services provided by us included surgeries for the treatment of not only cataract, glaucoma and strabismus, but also eye diseases, including corneal and vitreoretinal diseases. Generally speaking, ophthalmic services are outpatient or daycare procedures, performed under local anaesthesia. Hence, unlike other hospitals, clinics or nursing homes, we are not constrained by bed capacity and do not focus on providing large inpatient facilities at our eye centres/hospitals or clinics. The following table sets forth the total surgery fees, the total number of surgeries performed by us and the average fee per surgery:
