NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2020

1. GENERAL

The Company is a public limited company incorporated in Hong Kong with limited liability on 9 December 1993.

The shares of the Company were listed on the GEM (“GEM”) of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”) with effect from 18 August 2004. On 18 June 2014, the Company transferred the listing of its shares from GEM to the Main Board of the Stock Exchange. The registered office of the Company is situated at Rooms 2708-11, 27th Floor, West Tower, Shun Tak Centre, 168-200 Connaught Road Central, Hong Kong, and the principal place of business of the Company is situated at 63 Huan Shi Road South, Information Technology Park, Nansha District, Guangzhou City, the People’s Republic of China (the “PRC”).

The consolidated financial statements are presented in Hong Kong dollars (“HK\$”), which is the functional currency of the Company.

The Company is an investment holding company and is also engaged in sourcing of raw materials and equipment and trading of flexible printed circuit (“FPC”) and related products. Its subsidiaries established in the PRC are principally engaged in manufacture and sale of FPC, flexible packaging substrates, sourcing and sale of electronic components and other components and products during the six months ended 30 June 2020.

2. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard 34 Interim Financial Reporting issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Listing Rules”).

The financial information relating to the year ended 31 December 2019 included in the condensed consolidated interim financial statements as comparative information does not constitute the Company’s statutory annual consolidated financial statements for that year but is derived from those financial statements. Further information relating to these statutory financial statements required to be disclosed in accordance with section 436 of the Companies Ordinance of the Laws of Hong Kong ((Cap.622) the “Companies Ordinance”) is as follows:

The Company has delivered the financial statements for the year ended 31 December 2019 to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Companies Ordinance.

The Company’s auditor has reported on those financial statements. The auditor’s report was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its report; and did not contain a statement under sections 406(2), 407(2) or 407(3) of the Companies Ordinance.

The Interim Financial Statements are unaudited but have been reviewed by the audit committee of the Company.

3. PRINCIPAL ACCOUNTING POLICIES

The consolidated financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Other than changes in accounting policies resulting from application of new Hong Kong Financial Reporting Standards (“HKFRSs”), the condensed consolidated financial statements for the six months ended 30 June 2020 have been prepared in accordance with the Hong Kong Financial Reporting Standards issued by the HKICPA and the accounting policies and methods of computation used therein are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2019.

Application of new and amendments to Hong Kong Financial Reporting Standards (“HKFRSs”)

In the current interim period, the Group has applied, for the first time, the following new and amendments to HKFRSs issued by the HKICPA which are mandatory effective for the annual period beginning on or after 1 January 2020 for the preparation of the Group’s condensed consolidated financial statements:

Amendments to HKFRS 3	Definition of a Business
Amendments to HKFRS 7, HKFRS 9 and HKAS 39	Interest Rate Benchmark Reform
Amendments to HKAS 1 and HKAS 8	Definition of Material
Amendments to HKFRS 16	COVID-19-Related Rent Concessions
Revised Conceptual Framework	Revised Conceptual Framework for Financial Reporting

The application of the new and amendments to HKFRSs in the current period has had no material impact on the Group’s financial performance and positions for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

4. REVENUE AND SEGMENTS INFORMATION

Revenue represents the net amounts received and receivable by the Group for the sales of FPC, flexible packaging substrates and other to external customers, net of discounts and sales related taxes.

(a) Business segments

For the six months ended 30 June 2020, the Group had two business segments, namely (i) the circuit boards and components business and (ii) other. These segments are the basis on which the Group reports its key segment information.

Principal activities are as follows:

Circuit boards and components business – the manufacture and sale of FPC and flexible packaging substrates (including components)

Other – the sourcing and sale of electronic components

On 21 March 2018, the two-tiered profits tax rates regime was implemented in Hong Kong. Under the two-tiered profits tax rates regime, the first HK\$2,000,000 of profits of qualifying group entity will be taxed at 8.25%, and profits above HK\$2,000,000 will be taxed at 16.5%. For the periods ended 30 June 2020 and 30 June 2019, Hong Kong Profits Tax of the qualified entity was calculated in accordance with the two-tiered profits tax rates regime.

The provision for PRC Enterprise Income Tax is based on the estimated taxable income for each PRC subsidiary and at its applicable tax rate. Under the Law of the People's Republic of China on Enterprise Income Tax (the "EIT Law") and Implementation Regulation of the EIT Law, the tax rate of the PRC subsidiaries is 25% from 1 January 2008 onwards.

Both of AKM Electronics Industrial (Panyu) Ltd. ("AKM Panyu") and AKM Electronics Technology (Suzhou) Company Limited ("AKM Suzhou") were awarded with the Foreign Invested Advanced-Technology Enterprise Certificate, whereby AKM Panyu is entitled to tax rate reduction from 25% to 15% for three years commenced from 1 January 2018 and AKM Suzhou is entitled to tax rate reduction from 25% to 15% for three years commenced from 1 January 2019.

MANAGEMENT DISCUSSION AND ANALYSIS

Financial Review

For the six months ended 30 June 2020 (the “Period”), the revenue of the Group amounted to approximately HK\$663,476,000, representing an increase of approximately 5.35% as compared to approximately HK\$629,766,000 for the corresponding period of last year. The increase in revenue for the Period was mainly attributable to the increased order levels from major customers of the circuit boards and components business. The overall gross profit margin for the Period decreased to approximately 9.89% (the corresponding period of 2019: approximately 10.02%), while the gross profit margin of the circuit boards and components business decreased to approximately 10.14% (the corresponding period of 2019: approximately 10.36%), which was mainly due to impacts of the novel coronavirus pandemic and fierce market competition. The profit attributable to the owners of the Company was approximately HK\$5,359,000, representing a decrease of approximately 32.45% as compared to approximately HK\$7,933,000 for the corresponding period of last year. The decrease of the profit attributable to the owners of the Company for the Period was due to the increase in costs for operation, including the distribution costs and administrative expenses, due to the outburst of novel coronavirus pandemic, and the increase in research and development (“R&D”) expenses of the Group, mainly due to the increased R&D investment in new materials, new products and new production techniques.

Other income of the Group for the Period amounted to approximately HK\$21,169,000, representing an increase of approximately 60.15% as compared to approximately HK\$13,218,000 for the corresponding period of last year. The increase in other income was mainly due to the increase in government grants.

The distribution costs of the Group for the Period amounted to approximately HK\$11,825,000, representing an increase of approximately 38.91% as compared to approximately HK\$8,513,000 for the corresponding period of last year. The increase in distribution costs was mainly attributable to the increase in commission for sales agents and other miscellaneous expenses, such as transportation costs and other logistics costs due to the outburst of novel coronavirus pandemic and the increase in wages and bonus for the increase of members of sales team of the Group.

The administrative expenses of the Group for the Period amounted to approximately HK\$23,763,000, representing an increase of approximately 31.27% as compared to approximately HK\$18,103,000 for the corresponding period of last year. The increase in administrative expenses was mainly due to the offset of provisions made for bonus payment in 2018 in the accounts for the six months ended 30 June 2019 which had not occurred in the period under review to affect the salaries and bonus of management staff, being part of the administrative expenses of the Group, and the increase in miscellaneous expenses incurred for enhancing epidemic precautionary measures.

The R&D expenses of the Group for the Period amounted to approximately HK\$40,213,000, representing an increase of approximately 19.22% as compared to approximately HK\$33,730,000 for the corresponding period of last year. The increase in R&D expenses was mainly due to the increase in R&D investment in new materials, new products and new production techniques.

The finance costs of the Group for the Period amounted to approximately HK\$4,353,000, representing an increase of approximately 498.76% as compared to approximately HK\$727,000 for the corresponding period of last year. The increase in finance costs was mainly due to the increase in bank loans for the part payment of capital contribution to AKMMeadville and working capital.

Business Review and Prospects

Business Review

The Group is principally engaged in the businesses of the manufacture and sales of FPC and flexible packaging substrates (including components) which are used in electronic products.

For the six months ended 30 June 2020, the revenue of the Group amounted to approximately HK\$663,476,000, representing an increase of approximately 5.35% as compared to approximately HK\$629,766,000 for the corresponding period of last year. The increase in revenue was mainly attributable to the increased order levels from major customers of the circuit boards and components business. During the Period, the revenue from the circuit boards and components business was approximately HK\$646,032,000, while the revenue of circuit boards and components business for the corresponding period of last year was approximately HK\$599,911,000. The revenue from the “other” business was approximately HK\$17,444,000 for the six months ended 30 June 2020, while the revenue from the “other” business for the corresponding period of last year was approximately HK\$29,855,000. For the six months ended 30 June 2020, the profit attributable to the owners of the Company amounted to approximately HK\$5,359,000, representing a decrease of approximately 32.45% as compared to approximately HK\$7,933,000 for the corresponding period of last year. The decrease of the profit attributable to the owners of the Company for the Period was due to the increase in costs for operation, including the distribution costs and administrative expenses, due to the outburst of the novel coronavirus pandemic and the increase in R&D expenses of the Group, mainly due to the increased R&D investment in new materials, new products and new production techniques.

During the period under review, the Group's sales of circuit boards and components increased by approximately 7.69% as compared to the corresponding period of last year, and its gross profit margin decreased to approximately 10.14% (the corresponding period of 2019: approximately 10.36%). The revenue of the "other" business of the Group was mainly derived from the business of sourcing and sales of electronic components, which amounted to approximately HK\$17,444,000 and accounted for approximately 2.63% of the total sales volume of the Group.

During the period under review, despite being influenced by unfavorable factors such as the global novel coronavirus pandemic and the instability in Sino-US relations, as well as new adjustment in the electronics industry due to technological development in 5G network, wearable products, augmented reality and virtual reality, the Group continued to push forward and adhere to the "major customer strategy" and maintained a slight increase in revenue. The Group will continue to deem application areas such as mobile phones, consumer electronics, new energy car cells, vehicle electronics, optic camera modules, wireless charges modules and display modules as the key development directions. The Group will also proactively enhance its technological strengths and standards, strengthen upstream and downstream co-operation and capture opportunities, in order to achieve better operating results.

During the period under review, the Group has commenced the establishment of a new overseas factory in Vietnam, in order to serve international major customers which have already set up factories in Vietnam. The Vietnam factory will mainly engage in surface mounting and component assembling for FPC. The Group has established a branch office in Korea and an overseas factory in India. The establishment of such overseas factories and institutions will assist the Group in enhancing the service capability for international major customers and the Group's international development. During the period under review, in order to seize the development opportunity in the field of new energy cars, AKM Electronics Industrial (Panyu) Limited ("AKM Panyu") (a wholly-owned subsidiary of the Company) jointly established 廣州安博新能源科技有限公司 (transliteration "Guangzhou Anbo New Energy Technology Co. Ltd.") with a cooperation partner. The joint venture, which is owned as to 55% by AKM Panyu, specializes in the development of new energy car electronics module products that is expected to facilitate market exploration and industrial upgrade in the industrial electronics field by the Group.

During the period under review, the Group's R&D investment increased by approximately 19.22% to approximately HK\$40,213,000 from approximately HK\$33,730,000 for the corresponding period of last year. The increase in R&D expenses was mainly due to increase in R&D investment in new materials, new products and new production techniques. Facing the market prospect of 5G network, development trend of products such as wearable products, augmented reality and virtual reality, as well as the constant increasing demand from downstream customers in product structure and complexity, the Group continued to invest and has started to provide customers with Liquid Crystal Polymer (LCP)-based products with high speed and high frequency.

As disclosed in the Company's circular dated 20 December 2017, the Group intended to establish an intelligent factory with ancillary facilities in the existing factory of the Group in Nansha, Guangdong, PRC for assembling new application modules of FPC. During the period under review, the construction of the main building was completed and certain plants has commenced production operation.

Outlook

The Group has become an authorised supplier for a number of world-renowned high technology enterprises. To meet the requirements of the global supply chain system of such customers, the Group has established two production bases (Southern China Guangzhou Factory and Eastern China Suzhou Factory), an overseas factory in India and has commenced the establishment of another new overseas factory in Vietnam. The factory in India merely conducts post assembly operations including surface mounting and component assembling for customers and has commenced operation. The Group has also established sales centre, R&D centre, supply chain management, intelligent manufacturing and digital services, etc. which are independent from the manufacturing system to cater for the comprehensive needs of the Group's customers. Under the guidance of the strategy of "developing major customers" and with the gradual uplift of the Group's capabilities in R&D, production, quality management, supply chain management and intelligent management, the Group's capability to satisfy the "one-stop demand" of such customers has also been largely improved.

Following the rapid development trend in the global electronics products market and the increased applications of new technologies, new products based on technological innovation and intelligent manufacturing have gradually become the mainstream of the industry. Also, the global novel coronavirus pandemic and the instability in Sino-US relations brought forth a relatively high degree of uncertainties to the market. As major international customers have a heightened demand for supply chain security and domestic protection, the Group is facing a more challenging competitive environment. The Group will maintain a prudent attitude towards the future and will pay close attention to the changes in the economy, industry and major customers. The Group will enhance the risk management and internal capability, adhere to the major customer strategy, continuously uplift the product technological capabilities, seize the market opportunities in new application fields and strengthen the localization service in the overseas markets. By the integration of upstream and downstream resources as well as enhancement in its risk resistance capability, the Group will strive to change the risks into opportunities and continuously improve its operating results.

The management of the Group is of the opinion that, following the commercial launch of the 5G network, the popularity of “5G” smartphones and the development of wearable products, augmented reality and virtual reality product markets and the threat of novel coronavirus pandemic, the global interaction module is changing. With the continuous expansion in application fields for electronics products, the circuit boards and components business is expected to maintain its growth momentum in the foreseeable future. The Group is confident in overcoming the unfavorable impacts brought forth by the novel coronavirus pandemic to keep on improving its operating results, so as to present satisfactory results and bring favorable returns to its shareholders.
