## MANAGEMENT DISCUSSION AND ANALYSIS

Champion Alliance International Holdings Limited (the “Company” or “Champion Alliance International Holdings”; together with its subsidiaries (collectively, the “Group”)) is principally engaged in the production and sale of metallised packaging paper for cigarette package manufacturers. The Company has an operating history of more than 10 years, with two main line of products, being transfer metallised paper and laminated metallised paper. Since 2019, the Group diversified its business with household paper products and new energy operation (steam for industrial use, household heating, and electricity supply). The Group will hence continue to stride with its three core businesses.

### MARKET REVIEW

Since the beginning of 2020, the PRC’s economy faced difficult challenges amidst the outbreak of the novel coronavirus (COVID-19) (the “COVID-19 Outbreak”). Various regions in the country that were hardest-hit by the pandemic imposed strict lockdown measures such as factory suspension, which resulted in a sharp decline in economic activities. In the first half of 2020, China’s gross domestic product (GDP) decreased 1.6% year-on-year.

Hubei Mengke Paper Co., Ltd (湖北盟科紙業有限公司) (“Hubei Mengke”), which is a subsidiary of the Company engaging in the production and processing of cigarette packaging products, is situated in one of the worst-hit regions, namely Hubei Province, where the industry chain was shut down under the lockdown measures. In the first half of 2020, the GDP of Hubei Province decreased by 19.3% year-on-year, and the value-added output of industrial enterprises above the designated size in the province dropped 20.8% year-on-year, creating a considerable impact to the cigarette packaging business of the Group.

In addition, total retail sales of consumer goods in China decreased by 11.4% year-on-year, which demonstrated that domestic consumption will take some time to recover even though the pandemic has been contained. Faced with the impact on industries and consumption, household paper and new energy markets continue to be tested by volatility.

In the past few years, the PRC government extended its effort in the structural reform of tobacco market. In July 2019, the State Council issued the Opinions on Implementing Healthy China Action (《關於實施健康中國行動的意見》) which suggested special actions including cigarette control, promotion of mental health and cancer prevention. Relevant tariffs, price adjustments and other integrated measures will also be studied to improve the effectiveness of smoking control. Therefore, the cigarette packaging business is expected to face greater challenge as the market anticipates tightened control over the tobacco industry.

## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

Hampered by the COVID-19 Outbreak, the operation of Hubei Mengke was suspended after the statutory holidays for Chinese New Year as part of the Chinese government's countermeasures in containing the COVID-19 Outbreak. Despite the gradual resumption of operation since the end of March, the large-scale lockdown led to the suspension of production and sales activities. Certain orders which were scheduled to be delivered were delayed, impeding the Group's cigarette packaging business.

To proactively fight the pandemic, the Group has made its employees' health as first priority and has taken a number of preventive measures. The Group follows the government's measures and suggestions (including staying at home and social distancing) to reassign working hours of the Group's staff. During the pandemic, the Group strives to maintain a close communication with existing suppliers, customers and government authorities, while stepping up its effort in sales and marketing and production upon resumption of Hubei Mengke's operation.

#### Sales and Marketing

In the first half of 2020, hindered by the above-mentioned issues, the Group's sales revenue of cigarette packaging products increased only by 0.4%.

During the six months ended 30 June 2020 (the "Period"), the Group continued to expand its cigarette packaging business into new markets such as Anhui Province and engage new customers in China. At the end of the Period, there were 2 projects in tender and negotiation stages.

Among all the projects that were under negotiation at the end of 2019, 2 of them were concluded in the first half of 2020, while another 2 projects were under implementation stage. The Group's new projects are mainly scattered over Anhui and Jiangsu areas.

During the Period, the Group hired a total of 12 sales representatives to formulate marketing strategies, devise marketing plans, manage sales business, organise cargo transportation and develop customer service models, in order to boost sales.

#### Production Capacity of Cigarette Packaging Business

The Group operates and owns one production facility located in Yichang, Hubei Province in China with an aggregate gross floor area of approximately 10,800 sq.m.

The below table sets forth the production capacity, actual production volume and utilisation rates of the production base in Yichang, Hubei Province for the six months ended 30 June 2020 and their comparison with the corresponding period in 2019.

	Six months ended 30 June	
	2020	2019
Production capacity ( <i>thousand metres</i> )	<b>102,400</b>	102,400
Actual production volume ( <i>thousand metres</i> )	<b>66,541</b>	48,794

## FUTURE OUTLOOK

The COVID-19 Outbreak exerted massive impact on the global and China's economies. Although the pandemic is being gradually contained, and governments around the world actively seek measures to pull their economies back on track, they will take time to recover upon such impact from the pandemic, thereby clouding the short-term outlook. Fortunately, industrial production activities resumed as the lockdown measures have been eased in various provinces and cities of China. Despite that the domestic consumption growth is still in the period of negative growth, the negative growth rate of total retail sales of consumer goods has been narrowing for the fourth consecutive months, showing sign that the pandemic is tapering off. The Group expects that the overall operating environment will improve in the second half of this year.

Looking forward, the tobacco market anticipates government control policy over the industry in the coming years. Although such policy direction is set to lower the demand for tobacco related products, the Group will continue to consolidate its market position through technique innovation and greater marketing and promotion efforts. The Group will focus on the market development in Jiangsu Province, Anhui Province and other markets in China, so as to grasp the opportunities arising from the traditional peak season of the sector and businesses catching up with delayed orders upon the pandemic being contained. The Group is still optimistic about the long-term outlook of the cigarette packaging industry.

While solidifying its cigarette packaging business, the Group will continue to explore its household paper product and new energy operations, adopt diversification and tap the enormous room for development brought by the growth in demand for domestic consumption and the rise of living standard. Through its professional management team of the new energy business including supply of steam for industrial use, household heating and electricity supply, the Group aims to create huge growth potential. Furthermore, new business models emerge in various sectors during the pandemic and are anticipated to offer new support to the economic recovery and transformation. The Group will continue to strive for better results and thus to maximise returns to shareholders and society through its peerless dedication to optimise its businesses.

## 2.1 BASIS OF PREPARATION

The interim condensed consolidated financial information for the six months ended 30 June 2020 has been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 Interim Financial Reporting.

The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual consolidated financial statements for the year ended 31 December 2019, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”).

The interim condensed consolidated financial information is presented in RMB, and all values are rounded to the nearest thousand except when otherwise indicated.

## 2.2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies adopted in the preparation of this interim condensed consolidated financial information are consistent with those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2019.

## NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### 2.3 CHANGES IN ACCOUNTING POLICIES

In the Period, the Group has applied, for the first time, the following amendments to HKFRSs and HKASs that are relevant for the preparation of the Group's condensed consolidated financial statements:

Amendments to HKFRS 3	Definition of a Business
Amendments to HKFRS 9, HKAS 39 and HKFRS 7	Interest Rate Benchmark Reform
Amendments to HKFRS 1 and HKAS 8	Definition of Material
Amendments to HKFRS 16	COVID-19 Related Rent Concessions

Save as disclosed below regarding the impact of HKFRS 16 COVID-19 Related Rent Concessions, the adoption of other new or revised amendments does not have a material impact to the Group's results of operations or financial position.

The amendment to HKFRS 16 provides relief to lessees from applying lease modification accounting to coronavirus disease ("COVID-19") related rent concessions. The relief applies to lessees only. Lessors are required to apply the existing requirements of HKFRS 16. The amendment applies to annual reporting periods beginning on or after 1 June 2020 and early application is permitted.

The practical expedient applies only to rent concessions occurring as a direct consequence of the COVID-19 pandemic and only if all of the following conditions are met:

- the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- any reduction in lease payments affects only payments originally due on or before 30 June 2021; and
- there is no substantive change to other terms and conditions of the lease.

The Group has assessed all COVID-19 related rent concessions given by lessors and has elected to early adopt the amendments and applies the practical expedient to all qualifying COVID-19 related rent concessions granted to the Group during the Period. The rent concessions received have been accounted for other income recognised in profit or loss in the Period. There is no impact on the opening balance of equity at 1 January 2020.

In preparing the Interim Financial Information, the significant judgements made by the management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2019.

### 5 REVENUE (Continued)

Notes: (Continued)

(a) **Disaggregated revenue information** (Continued)

**Geographical market**

All revenue from contracts with customers were generated in Mainland China.

(b) **Performance obligations**

Information about the Group's performance obligations is summarised below:

**Sale of goods**

The performance obligation is satisfied upon delivery of the cigarette packaging products and payment is generally due within 30 to 150 days from delivery, except for new customers and the sale of steam for industrial use and heating and electricity, where payment in advance is normally required. Some household paper products sales contracts provide customers with volume rebates which give rise to variable consideration subject to constraint.

**Processing services**

Revenue from the provision of processing services is recognised over time, using an input method to measure progress towards complete satisfaction of the service, because the Group's performance enhances an asset that the customer controls as the asset is enhanced. The input method recognises revenue on the basis of labour time spent on the services.

The credit period is generally 30 to 150 days. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables to minimise the credit risk. Overdue balances are reviewed regularly by senior management.
