

橋奥切刷業園有限公司 HUNG HING PRINTING GROUP LIMITED.

**HUNG HING** 

# Corporate Profile

The Hung Hing Printing Group, listed on the Hong Kong Stock Exchange, is a major global player in book and package printing, consumer product packaging production, corrugated box manufacturing, paper trading, and design innovation in these areas.

With a 70-year history of producing tailor-made printing solutions for clients around the world, Hung Hing has a heritage of excellence built on a foundation of craftsmanship and innovation.

Headquartered at the Tai Po Industrial Estate in Hong Kong, we have seven manufacturing facilities, including one in Hong Kong, five in China (Shenzhen, Zhongshan, Heshan and Foshan in the Guangdong province and Wuxi, near Shanghai) and one in Hanoi, Vietnam. The Group's total production floor space around 600,000 square meters, with a workforce of around 6,600 in Hong Kong, China and Vietnam. All the company's activities focus on pursuing three major goals: to maintain operational excellence, add value, and achieve success for all stakeholders. Its clients include leading local and multinational corporations around the world. Through its design hub Beluga and investments in new development opportunities, the Group is also pioneering new capabilities including digital+print products to help drive innovation.

Hung Hing's financial objective is to deliver consistent returns and long-term growth to shareholders from a leading position in its industry. The strategy to achieve this involves resilience and long-term commitment in fixed and human assets, and an unwavering focus on quality, efficiency and customer service.

# Environmental, Social and Governance Report

The Hung Hing Printing Group's Environmental, Social and Governance Report (report) lists out the operating principles and policies of the Group and describes how we put these into action to achieve sustainable growth, keeping major stakeholders in mind.

This report includes our Vietnam facility, which has completed its first full year of operation. The Group has a total of 8 sites under its direct administration with 6 sites in China, a site in Vietnam and headquarters in Hong Kong. This report covers scopes 1 and 2 emissions data for each of the sites as well as air travel mileage by Group employees.

Every site has an ESG team responsible for the execution of the ESG principles and strategies set out by the Board of Directors. During the year, our Vietnam factory passed numerous industrial standards audits covering ethics, environment and quality, including ICTI-ETP<sup>1</sup>, SMETA<sup>2</sup>, ISO14000 and ISO9001. The following table lists out all the standards awarded to Hung Hing's manufacturing sites.

	Shenzhen	Heshan	Zhongshan	Shunde	Wuxi	Vietnam
ISO9000	Yes	Yes	Yes	Yes	Yes	Yes
ISO14001	Yes	Yes	Yes	Yes	Yes	Yes
ISO50001	Yes					
SMETA	Yes	Yes	Yes	Yes	Yes	Yes
ICTI-ETP	Yes	Yes				Yes
RBA <sup>3</sup>	Yes					

In 2020, we further invested in green energy with phase II of a solar power system installed at our Hong Kong headquarters. The total capacity of the solar power system reached 527kWp with the yearly output equivalent to about one third of the 2020 electricity consumption of our headquarters.

Our total investment in environmental improvement amounted to HK\$5.4 million.

We strive to provide complete transparency to our business partners on our ESG initiatives. Besides sharing our ESG report with them, we also publish our ESG performance on various platforms which are accessible by participants in the industry.

Platform name	Website address	Description
EcoVadis	www.ecovadis.com	A website for business sustainability information
Higg Index	https://portal.higg.org/	A platform developed by 'Sustainable Apparel Coalition' with a suite of tools to measure user's sustainability performance
RBA Responsible Business Alliance	https://www.rba-online.org	Formerly the 'Electronic Industry Citizenship Coalition' and now focused on 'Advancing Sustainability Globally'
ICTI-Ethical Toy Program	https://www.ethicaltoyprogram.org	Advancing ethical manufacturing in the toy industry

# Engaging with our stakeholders

Our stakeholders drive the way we operate and how we prioritise resources towards key priorities. It is important that their voices are heard at all times, even during the COVID-19 pandemic. In 2020, most trade exhibitions were cancelled or postponed, so we put more effort into online channels to interact with customers. We shared updates via email with customers on a regular basis and posted to our online platforms. The purpose of this was to convey the measures we have implemented in order to safeguard the health and safety of our employees and show how we maintained normal operations. In addition to the existing channels used to collect feedback from our stakeholders, the ESG and marketing teams prepared a corporate social

responsibility presentation, which concentrated on topics of concern raised by our customers. The presentation covers our environmental performance, efforts and results of utilising and sourcing environmentally-friendly materials, and our approach towards reducing emissions.

The presentation addresses the needs of customers who have requested more in-depth information on environmental protection.

Besides the above customer centric presentation, the table below lists the channels and information collected from various stakeholders in 2020.

Stakeholder	Communication channels	Information covered
Investors	Annual report; annual general meetings; company emails, company websites, investor enquiries	Business performance; adoption of new technology; geographical diversification; investment strategy
Customers	Meetings; customer satisfaction surveys; factory audits; customer requests for information; global partner conference	International environmental and ethical trends; knowledge of new technologies and market trends; material supply stability and material safety; conflict minerals; intellectual property protection; modern slavery prevention; business contingency plan
Employees	Regular worker representative meetings; suggestion boxes; suggestion emails; dedicated emails to chairman and independent board director for whistle-blowers; employee interest groups	Employee benefits; operational, factory and office facility improvements; employee recreational activities; working environment
Suppliers	Supplier questionnaires; site visits; business meetings	Cost impact of higher safety and environmental compliance requirements; procurement management, supply chain stability
Community	Engagement with NGOs and charitable organisations	Labour rights; employee health and benefits; long- term partnerships and collaboration with charitable organisations
Government, Industry	Factory visits; seminars; industrial association gatherings; government websites, announcements, subscription- based emails for industrial information	Occupational health and safety; environmental protection; fire safety; career development opportunities; intellectual property protection; safety regulation updates

All stakeholder feedback received is analysed and prioritised according to the level of concern and significance to our operation. This is displayed in the following material aspects chart:

# Environment

- A. Reduction in the use of plastic materials for packaging
- B. Environmental impact of our operations
- C. Measures to fight climate change
- D. Product carbon footprint and carbon offset options
- E. New materials or technologies for environmental protection

# Social responsibility

- F. Fire safety
- G. Occupational health and safety
- H. Modern slavery prevention and protection of minors

- I. Fair employment opportunities
- J. Employee compensation and benefits
- K. Training and career advancement opportunities
- L. Conflict minerals
- M. Contributions to the community

## Governance and business practices

- N. Intellectual properties protection
- O. Ethical conduct with business partners
- P. Anti-corruption measures
- Q. Prevention and reporting of misconduct
- R. Material and product safety

# Environment

The use of green energy, environmentally-friendly materials and an energy efficient production process is key to sustainable manufacturing. In 2020, we installed an additional 327kWp of solar panels on the roof of our Hong Kong headquarters. The total capacity of this green energy system is now 527kWp, allowing it to generate 562,000 kWh of solar power annually. During the year, we also participated in carbon credit programmes and acquired 480 tonnes of carbon credit. This small start gave us experience in carbon credit exchange, which in the future may become an effective mechanism to achieve carbon neutrality.

Our environmental policy (published on the Group's website at https://www.hunghingprinting.com/en-US/environmental.php) supports responsible forestry for use in our products. Despite the disturbance and interruption of world-wide supply chains throughout the year and the increased price of paper, the Group remained true to its goals of using certified and highly-recycled paper and more than 90% of the paper we used came from these sources. Our use of plastic packaging reduced by 21.5% to 325.48 tonnes in 2020 compared to 414.98 tonnes in 2019. We also sourced various types of bio-degradable plastic materials and samples, from which customers could select.

Our ongoing effort to replace highly volatile organic compounds (VOC) materials and streamline operations has helped to reduce the use of cleaning agents with high VOC content. VOC emissions have significantly reduced to 50.43 tonnes in 2020 from 96.12 tonnes in 2019, marking a reduction of 47.5%.

We continued to receive customer enquiries on the carbon footprint of our products and the options available to reduce it. We provide these figures to customers using an established formula based on the materials and process used to manufacture each product. The parameters in this formula are regularly updated based on data collected from suppliers and our own internal data. We also have a source of carbon credits that is available to customers to off-set their carbon footprints.

Since we joined the Shenzhen government carbon trade programme, our Shenzhen factory has been close to or exceed the carbon emissions target – our 2020 unaudited figures also close to the target.

	2016	2017	2018	2019	2020
	Audited	Audited	Audited	Audited	Unaudited
Emission index <sup>4</sup>	0.652	0.628	0.604	0.549	0.531
Emission Target TCO2e	24,936	26,465	22,882	18,211	16,354
Actual emission TCO2e	22,960	22,940	20,430	18,799	16,388
Quota Surplus	1,976	3,525	2,452	-588	-34

The Group has accessed a green loan with advantageous low interest rates to invest in more green projects for environmental improvement.

<sup>4</sup> Ton of CO<sub>2</sub> equivalent emission per 10,000RMB value added production

# Use of energy

In 2020, the solar power panels installed at the Hong Kong headquarters generated a total of 463,000kWh of electricity. The solar-panel covered roof also helped reduce the indoor temperature and electricity consumption associated with air conditioning in the facility. All of our production sites enjoy reliable electricity supply with only a few days of interruption reported at the Vietnam and Heshan sites over the course of the year. Natural gas is used as a heat source for steam boilers in corrugated board production. A mix of natural gas and Towngas (in Hong Kong) is used for cooking purposes in our canteens.

Petrol is used by passenger cars and all vehicles owned by the Group comply with the relevant car emission regulations<sup>5</sup>. We are gradually introducing electric vehicles across our fleet during scheduled replacement. Currently, the Group has 4 electric passenger vehicles, 33 electric forklifts and 220 electric pallet trucks across all its sites.

	Electricity (MWh) Power and heating,	Natural Gas (M³)	Towngas (MJ)	Diesel (Tonnes)	Petrol (Tonnes)
Usage	passenger vehicles	Steam boiler and cooking	Cooking	Heavy duty vehicles	Passenger vehicles
2020	60,483	3,595,665	323,328	104.5	92.45
2019	67,616	3,256,793	335,472	76.83	154.43

In 2020, business air travel was limited to domestic flights within China and totalled 56,000 km across all employees of the Group.

<sup>5</sup> Measures on Supervision of Exhaust Pollution from Automobiles in the People's Republic of China

## Use of resources

Paper is a renewable resource and is considered carbon neutral by itself. It is the major resource within our operations and there is a dedicated section in our environmental policy which elaborates on our stance on the use of paper. We prefer to use paper sourced from well-managed forest plantations or paper with high recycled content and recommend the same to our customers. Our responsible paper supply policy is in line with globally recognised forestry certification schemes and is implemented across all our production sites, including the new Vietnam site. In 2020, our production operations used over 140,000 tonnes of paper, of which 50,000 tonnes was certified paper.

At the Hong Kong headquarters, we promote and practise a paperless office. Our purchases and shipping workflows are managed electronically. Approvals are done using electronic signatures and documents are sent to business partners via email and digital copies are stored. This campaign has achieved a 36% reduction – equivalent to over 130,000 sheets – in the use of A4 paper at our headquarters in 2020 compared to 2019.

Other resource materials derived from fossil fuels include ink, glue and varnishing oil. Due to our ongoing effort to use more environmentally-friendly alternatives with low VOC, the total VOC emissions of these materials have reduced from 96.12 tonnes CO<sub>g</sub>e in 2019 to 50.43 tonnes in 2020. Fresh water comes from the municipal supply across all our sites. Employee training and water-saving installations have resulted in a reduction of 13% in water usage, from 1,224,513M<sup>3</sup> in 2019 to 1,057,315M<sup>3</sup> in 2020. This is despite the increased use of water for sanitation and disinfection during the COVID-19 pandemic.

## Waste handling

We have incorporated the 3Rs (reduce, reuse, recycle) principles into our operations. Our paper engineers always provide advice to customers on how to reduce the use of materials in product design, which not only saves materials but also production and shipping costs. Whenever appropriate, we recommend customers to use materials with recycled content, especially in packaging items – over 90% of the paper and plastic materials we use have recycled content. Whenever materials cannot be further reused in our operations, they are separated into different categories for disposal or recycling.

Recyclable materials were sold to collectors and also used for other purposes. In 2020, we recycled 39,192 tonnes of paper, 863 tonnes of wood, 393 tonnes of plastic and 149 tonnes of metal. In China, all hazardous waste, including liquid chemicals, chemically contaminated containers, cleaning rags and sludge from waste water treatment, was collected and treated by authorised agents who have the right qualifications<sup>7</sup> to handle hazardous waste.

<sup>6</sup> Forestry Stewardship Council Chain of Custody Certification ; Programme for the Endorsement of Forest Certification Schemes Chain of Custody

<sup>7</sup> Regulation on the Management of the Shifting of Hazardous Waste (危險廢物轉移聯單管理辨法)

# Social Responsibility

#### Our employees

Employees are the most important asset of the Group. Our success is a result of their continued effort. They build connections with our business partners and shape our operations and culture. We offer competitive remuneration and benefits to attract and retain talented individuals.

The geographical spread of our sites means we employ people from different areas and backgrounds. Our ethics policy ensures all employees are treated equally and no discrimination of any kind is tolerated, and their rights are safeguarded from recruitment stage and through their advancement in the Group.

We take a zero-tolerance approach to any kind of exploitation of human rights. In the recruitment process, we interview candidates to ensure their documents are genuine, they are coming to work of their own free will and that their age meets minimum requirements for employment. Our recruitment procedure is regularly reviewed to ensure compliance with regulations wherever we operate<sup>8</sup>, and includes remedial action and grievance redressal steps for any violations or compliance issues found. Our procedures align with the latest regulations, industrial standards and best practice from our business partners.

#### Health and safety

Providing a healthy and safe working environment is our responsibility. Throughout the year, we remained on high alert to combat COVID-19. We rigidly followed the recommended practice of wearing face masks whenever staff came into contact with others. Video conferencing platforms were widely used for external and internal meetings. Canteen tables were partitioned to reduce the chance of transmission. Work from home arrangements and staggered team scheduling helped reduce the chances of infection. As of the end of 2020, there was not a single case of COVID-19 across the entire workforce of 6,612.

Whenever new or refurbished machines are integrated, a factory health and safety team will conduct a safety and environmental risk assessment of operation and use of materials, to ensure it complies with relevant occupational health and safety regulations<sup>9</sup>. All chemicals used in the production process have an MSDS (Material Safety Data Sheet), which is posted in the workshop, and recommended precautionary steps are strictly followed including the use of Personal Protection Equipment (PPE).

#### **Development and Training**

We provide various types of training to our employees, from basic health and safety knowledge such as precautionary steps to prevent contraction of COVID-19, to occupational health and safety, skills and management training, and knowledge on how to advance their career. In 2020, we provided 139,724 hours of in-house training to 57,483 attendees. Employees also attended various external web-based or tele-conference sessions in areas which interested them.

We strive to provide a pleasant workplace for our employees and encourage them to live an enjoyable and balanced lifestyle. HH Marketplace, our Hong Kong office employee platform, established to help staff get discounts on consumer products, was expanded to become a multipurpose platform. It was used as a marketplace to extend the life of used furniture, and in 2020, used as a channel to invite Hong Kong staff to give a helping hand to a colleague in China whose family member has a critical illness.

Labor Contract Law of the People's Republic of China (中華人民共和國勞動合同法) Hong Kong Employment Ordinance (香港僱傭條例) The Labour Code of Vietnam (越南勞動法)

Law of The People's Republic of China on Prevention and Control of Occupational Diseases (中華人民共和國職業病防治法)

We are a part of our community wherever we operate and our employees come from. It is our obligation to nurture the community when we have the ability to do so. We encourage our employees to support the community either with their time or financially, or both. 2020 marked 15 years of our participation in the Caring Company programme, in partnership with a local charity. We also donated HK\$260,000 to communities in mainland China, Hong Kong and Vietnam.

#### Our community

# Governance

# Our suppliers

We work closely with our suppliers as they are an integral part of our business success. We prefer to have longterm relationships with reliable suppliers who share our philosophy on ethics and sustainability. Local suppliers are preferred, to minimise carbon footprint for transportation and ensure shorter lead times. We communicate openly and transparently with our suppliers and welcome any complaints or suggestions for improvement. We aspire to have long-term relationships based on transparency and open discussions. This makes it more viable to develop environmentally-friendly materials or other mutually beneficial arrangements like returning waste materials or chemical containers. For major suppliers, we have regular meetings at management level to develop strategic cooperation agreements. With this high level of involvement, we achieve a stable and discounted supply of paper, ink and other major raw materials.

Our suppliers are cooperative in helping us to address customer concerns on conflict minerals, namely tin, tantalum, tungsten and gold (3TG), which are primarily mined in conflict zones in Africa. They act promptly in accordance to safety regulation updates associated with chemical safety such as Substance of Very High Concern (SVHC). Of the 175 major suppliers who supplied us with over 85% of the overall value of our production materials in 2020, 147 completed our ethical and environmental questionnaire and are fully compliant with our requirements.

## Business integrity and anti-corruption

We operate our business with the highest standards of integrity and will not tolerate any misconduct or bribery. All our employees and trading partners are well aware of our zero-tolerance policy in this regard. Our new employee training programmes also include anti-bribery content. Every year, we remind our employees of this by circulating the company's anti-corruption policy and corporate guidelines to handle any client gifts. The anti-corruption policy is displayed in meeting rooms within the factories and is an integral part of our corporate social responsibility policy which we send out to new trading partners.

We only choose business partners on the grounds that it will bring the best value to all parties. We welcome the signing of intellectual protection, anti-competition and nondisclosure of content agreements.

Our whistle blower policy is posted clearly on the Group's website. Complaints can be directed to various levels of management, ranging from operating unit heads up to independent non-executive directors or the chief executive. In 2020, we did not receive any complaints at the group level. To the best of our knowledge, no legal proceedings regarding corrupt practices have been brought against the Group or our employees in 2020.

# Our customers

Many of our customers are world-renowned brand names. They stick to the highest standards of ethical and product safety. We carried out regular ethical standards audits throughout the year to ensure our practices comply with the latest requirements and meet customers' expectations.

For product safety, we regularly test our materials against the latest safety and environmental standards<sup>10</sup> to ensure compliance. Europe and various states in the USA have established lists of SVHCs<sup>11</sup> (Substances with Very High Concern), which are updated several times a year. We track these lists on an ongoing basis. We also subscribe to the newsletters of various testing laboratories to stay informed on the latest information in materials safety. Upon coming across pertinent new information, we contact suppliers to confirm compliance or request them to find appropriate replacements. All of this work is documented in our ISO9000 quality management system to ensure product quality and regulation compliance.

Following customers' requests, we have sourced an alternative varnish coating to replace PP lamination film, which is normally used on book covers for protection but makes the product less recyclable.

From time to time, customers request a confidential production process to protect their intellectual property design. We have established stringent procedures throughout the production process, right from the time the design files are received, through to the delivery of the finished product. Production is done in an enclosed area with CCTV recordings and handled by designated employees who have signed non-disclosure agreements.

The Group does not hold any consumer data. Customer contact information is limited to necessary content and is solely for conducting our business purpose. We have signed General Data Protection Regulation with some of our European customer and strictly follow it in our business activities.

We keep track of customer complaints and suggestions for improvement. In 2020, we received 470 complaints. We responded to these promptly following root cause investigation, and proceeded with corrective action.

China electricity emission data according to China Southern Power Grid 2019 Green Development Annual Report <<中國南方電網有限責任公司之2019 年綠色發展年刊>> http://www.csg.cn/shzr/zrbg/202006/P020200628626242299778.pdf

Hong Kong electricity emission data according to CLP 2020 Sustainability Report https://sustainability.clpgroup.com/en/2020

# 2020 Environmental, Social and Governance (ESG) Content Index

Indicators	Description	ESG report Page
Subject Area A. Environm	ental	
Aspect A1: Emissions		
General Disclosure	Information on:	Page 5~6
	<ul> <li>(a) the policies; and</li> <li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.</li> </ul>	
KPI A1.1	The types of emissions and respective emission data.	Page 12
KPI A1.2	Greenhouse gas emissions in total (in tonnes) and, where appropriate, intensity(e.g. per unit of production volume, per facility).	Page 12
	Scope 1 emissions	
KPI A1.3	Total hazardous waste produced (in tonnes) and, where appropriate, intensity.	Page 12
KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity	Page 12
KPI A1.5	Description of measures to mitigate emissions and results achieved.	Page 5~6
KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, reduction initiatives and results achieved.	Page 7
Aspect A2: Use of Resour	ces	
General disclosure	Policies on the efficient use of resources, including energy, water and other raw materials.	Page 7
KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in'000s) and intensity (e.g. per unit of production volume, per facility).	Page 12
KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	Page 12
KPI A2.3	Description of energy use efficiency initiatives and results achieved.	Page 6
KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency initiatives and results achieved.	Page 7
KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	Page 12

Indicators	Description	ESG report Page
Aspect A3: The Environme	nt and Natural Resources	
General disclosure	Policies on minimising the issuer's significant impact on the environment and natural resources.	Page 5~7
KPI A3.1	Description of the significant impacts of activities on the environment and natural resources and the actions taken to manage them.	Page 5~7
Subject Area B. Social		
Employment and Labour P	ractices	
Aspect B1: Employment		
General Disclosure	Information on:	Page 8
	<ul><li>(a) the policies; and</li><li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer</li></ul>	
	relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, and other benefits and welfare.	
KPI B1.1	Total workforce by gender, employment type, age group and geographical region.	Page 13
KPI B1.2	Employee turnover rate by gender, age group and geographical region.	Page 14
Aspect B2: Health and Saf	ety	
General Disclosure	Information on:	Page 8
	<ul><li>(a) the policies; and</li><li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer</li></ul>	
	relating to providing a safe working environment and protecting employees from occupational hazards.	
KPI B2.1	Number and rate of work-related fatalities.	Page 14
KPI B2.2	Lost days due to work injury.	Page 14
KPI B2.3	Description of occupational health and safety measures adopted, how they are implemented and monitored.	Page 8

Indicators	Description	ESG report Page
Aspect B3: Development a	Ind Training	
General disclosure	Policies on improving employees' knowledge and skills for discharging duties at work. Description of training activities.	Page 8
KPI B3.1	The percentage of employees trained by gender and employee category (e.g. senior management, middle management).	Page 15
KPI B3.2	The average training hours completed per employee by gender and employee category.	Page 15
Aspect B4: Labour Standa	rds	
General disclosure	Information on:	Page 8
	<ul><li>(a) the policies; and</li><li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer</li></ul>	
	relating to preventing child and forced labour.	
KPI B4.1	Description of measures to review employment practices to avoid child and forced labour.	Page 8
KPI B4.2	Description of steps taken to eliminate such practices when discovered.	Page 8
<b>Operating Practices</b>		
Aspect B5: Supply Chain M	<b>N</b> anagement	
General Disclosure	Policies on managing environmental and social risks of the supply chain.	Page 10
KPI B5.1	Number of suppliers by geographical region.	Page 15
KPI B5.2	Description of practices relating to engaging suppliers, number of suppliers where the practices are being implemented, how they are implemented and monitored.	Page 10
Aspect B6: Product Respo	nsibility	
General Disclosure	Information on:	Page 11
	<ul><li>(a) the policies; and</li><li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer</li></ul>	
	relating to health and safety, advertising, labelling and privacy matters relating to products and services provided and methods of redress.	

Indicators	Description	ESG report Page
KPI B6.1	Percentage of total products sold or shipped subject to recalls for safety and health reasons.	Page 16
KPI B6.2	Number of products and service related complaints received and how they are dealt with.	Page 11,16
KPI B6.3	Description of practices relating to observing and protecting intellectual property rights.	page 11
KPI B6.4	Description of quality assurance process and recall procedures.	page 11
KPI B6.5	Description of consumer data protection and privacy policies, how they are implemented and monitored.	page 11
Aspect B7: Anti-corruption	1	
General Disclosure	Information on:	Page 10
	<ul><li>(a) the policies; and</li><li>(b) compliance with relevant laws and regulations that have a significant impact on the issuer</li></ul>	
	relating to bribery, extortion, fraud and money laundering.	
KPI B7.1	Number of concluded legal cases regarding corrupt practices brought against the issuer or its employees during the reporting period and the outcomes of the cases.	Page 10
KPI B7.2	Description of preventive measures and whistle-blowing procedures, how they are implemented and monitored.	Page 10
Community		
Aspect B8: Community Inv	vestment	
General Disclosure	Policies on community engagement to understand the needs of the communities where the issuer operates and to ensure its activities take into consideration the communities' interests.	Page 9
KPI B8.1	Focus areas of contribution (e.g. education, environmental concerns, labour needs, health, culture, sport).	Page 9
KPI B8.2	Resources contributed (e.g. money or time) to the focus area.	Page 16
