II. CHAIRMAN'S MESSAGE

Dear valued stakeholders,

It gives me great pleasure, on behalf of the board (the "Board") of directors (the "Directors", each a "Director") of Zhong Ao Home Group Limited (the "Company" together with its subsidiaries the "Group"), to present the Group's Environmental, Social and Governance (ESG) report for 2020.

2020 was an unprecedented and difficult year. The outbreak of Coronavirus ("COVID-19") has dealt a devastating blow to the global economy and caused disruptions to business activities of a great number of companies. Despite the challenges, the Group has shown tremendous resilience and reacted promptly by implementing measures such as increasing the frequency of disinfection on public facilities, providing owners with home disinfection services and conducting online training sessions to replace face to face training sessions.

It is our employees' drive and dedication which contributed to our success and resilience during the pandemic. Since our employees are the most valuable asset for the Group, their well-being is our top priority. The Group strives to create a safe, healthy and fair working environment for its employees. We also realise that employees' work-life balance is not only important for physical and mental health, it can also improve productivity, and performance. Therefore, various activities such as sports competitions, travel trips and music performance were organised throughout the year, encouraging our employees to find balance between work and life.

Environmental degradation will lead to irreversible and severe changes for ecosystems, economies and people. Therefore, ensuring environmental sustainability is of high importance for us. In the fight against environmental degradation, the Group is committed to reducing emissions and minimising negative environmental impacts through implementation of the environmental management system ("EMS") across our properties. The Group has also implemented relevant initiatives, such as implementation of metering systems to monitor the energy and water consumption, installation of LED lighting and energy efficient water pumps.

It is indeed a special privilege for me to present the ESG efforts that we have made in 2020. Going forward, the Group will continue to strengthen the connection between sustainability and our business by implementing sustainability programmes and measures to improve the economic, environmental, and social well-being of the communities.

Yours faithfully,

Liu Jian
