NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2021

1. GENERAL

The Company is a public limited company incorporated in Hong Kong with limited liability on 9 December 1993.

The shares of the Company were listed on the GEM ("GEM") of The Stock Exchange of Hong Kong Limited (the "Stock Exchange") with effect from 18 August 2004. On 18 June 2014, the Company transferred the listing of its shares from GEM to the Main Board of the Stock Exchange. The registered office of the Company is situated at Rooms 2708-11, 27th Floor, West Tower, Shun Tak Centre, 168-200 Connaught Road Central, Hong Kong, and the principal place of business of the Company is situated at 63 Huan Shi Road South, Information Technology Park, Nansha District, Guangzhou City, the People's Republic of China (the "PRC").

The consolidated financial statements are presented in Hong Kong dollars ("HK\$"), which is the functional currency of the Company.

The Company is an investment holding company and is also engaged in sourcing of raw materials and equipment and trading of flexible printed circuit ("FPC") and related products. Its subsidiaries established in the PRC are principally engaged in manufacture and sale of FPC and flexible packaging substrates, sourcing and sale of electronic components and other components and products during the six months ended 30 June 2021.

2. BASIS OF PREPARATION

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard 34 Interim Financial Reporting issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules").

The financial information relating to the year ended 31 December 2020 included in the condensed consolidated interim financial statements as comparative information does not constitute the Company's statutory annual consolidated financial statements for that year but is derived from those financial statements. Further information relating to these statutory financial statements required to be disclosed in accordance with section 436 of the Companies Ordinance of the Laws of Hong Kong ((Cap.622) the "Companies Ordinance") is as follows:

The Company has delivered the financial statements for the year ended 31 December 2020 to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Companies Ordinance.

The Company's auditor has reported on those financial statements. The auditor's report was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its report; and did not contain a statement under sections 406(2), 407(2) or 407(3) of the Companies Ordinance.

The Interim Financial Statements are unaudited but have been reviewed by the audit committee of the Company.

3. PRINCIPAL ACCOUNTING POLICIES

The consolidated financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Other than changes in accounting policies resulting from application of new Hong Kong Financial Reporting Standards ("HKFRSs"), the condensed consolidated financial statements for the six months ended 30 June 2021 have been prepared in accordance with the Hong Kong Financial Reporting Standards issued by the HKICPA and the accounting policies and methods of computation used therein are the same as those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2020.

Application of new and amendments to Hong Kong Financial Reporting Standards ("HKFRSs")

In the current interim period, the Group has applied, for the first time, the following new and amendments to HKFRSs issued by the HKICPA which are mandatory effective for the annual period beginning on or after 1 January 2021 for the preparation of the Group's condensed consolidated financial statements:

Amendments to HKFRS 3	Definition of a Business
Amendments to HKFRS 7, HKFRS 9 and HKAS 39	Interest Rate Benchmark Reform
Amendments to HKAS 1 and HKAS 8	Definition of Material
Amendments to HKFRS 16	COVID-19-Related Rent Concessions
Revised Conceptual Framework	Revised Conceptual Framework for Financial Reporting

The application of the new and amendments to HKFRSs in the current period has had no material impact on the Group's financial performance and positions for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

The increase in revenue for the Period was mainly attributable to the increased order levels from major customers of the circuit boards and components business. The overall gross profit margin for the Period decreased to approximately 8.10% (the corresponding period of 2020: approximately 9.89%), while the gross profit margin of the circuit boards and components business decreased to approximately 8.20% (the corresponding period of 2020: approximately 8.20% (the corresponding period of 2020: approximately 10.14%), which was mainly due to the combined effects of the decrease in product prices due to fierce market competition and the increase in the costs of raw materials. The profit attributable to the owners of the Company was approximately HK\$1,219,000, representing an increase of approximately 109.35% as compared to approximately HK\$5,359,000 for the corresponding period of last year. The increase of the profit attributable to the owners of the profit attributable to the owners of the corresponding period of last year. The increase in sales revenue.

Other income of the Group for the Period amounted to approximately HK\$34,874,000, representing an increase of approximately 64.74% as compared to approximately HK\$21,169,000 for the corresponding period of last year. The increase in other income was mainly due to the increase in government grants and scrap income.

The distribution costs of the Group for the Period amounted to approximately HK\$13,888,000, representing an increase of approximately 17.45% as compared to approximately HK\$11,825,000 for the corresponding period of last year. The increase in distribution costs was mainly attributable to the increase in transportation costs and other logistics costs due to increase in sales.

The administrative expenses of the Group for the Period amounted to approximately HK\$36,428,000, representing an increase of approximately 53.30% as compared to approximately HK\$23,763,000 for the corresponding period of last year. The increase in administrative expenses was mainly due to the increase in salary expenses and employee welfare expenses, the increase in loss from disposal of fixed assets arising from the disposal of replaced equipments and the increase in impairment of idle equipments or equipments with reduced utilization rate due to changes in product structure and changes in production techniques.

The research and development ("R&D") expenses of the Group for the Period amounted to approximately HK\$52,515,000, representing an increase of approximately 30.59% as compared to approximately HK\$40,213,000 for the corresponding period of last year. The increase in R&D expenses was mainly due to the increase in R&D investment in new materials, new products and new production techniques by the Group, such as investments in R&D of high frequency and high speed flexible printed circuit and module products, High Density Interconnector (HDI) flexible printed circuit products as well as intelligent innovation.

The finance costs of the Group for the Period amounted to approximately HK\$6,484,000, representing an increase of approximately 48.95% as compared to approximately HK\$4,353,000 for the corresponding period of last year. The increase in finance costs was mainly due to the overall increase in interest expenses as a result of increase in bank loans for working capital and the increase in interest expenses for discounted notes receivable.

BUSINESS REVIEW AND PROSPECTS

Business Review

The Group is principally engaged in the businesses of the manufacture and sales of FPC and flexible packaging substrates (including components) which are used in electronic products.

For the six months ended 30 June 2021, the revenue of the Group amounted to approximately HK\$1,017,311,000, representing an increase of approximately 53.33% as compared to approximately HK\$663,476,000 for the corresponding period of last year. The increase in revenue was mainly attributable to the increased order levels from major customers of the circuit boards and components business. During the Period, the revenue from the circuit boards and components business was approximately HK\$998,644,000, while the revenue of circuit boards and components business for the corresponding period of last year was approximately HK\$646,032,000. The revenue from the "other" business was approximately HK\$18,667,000 for the six months ended 30 June 2021, while the revenue from the "other" business for the corresponding period of last year was approximately HK\$17,444,000. For the six months ended 30 June 2021, the profit attributable to the owners of the Company amounted to approximately HK\$11,219,000, representing an increase of approximately 109.35% as compared to approximately HK\$5,359,000 for the corresponding period of last year. The increase of the profit attributable to the owners of the profit attributable to the significant increase in sales revenue.

During the period under review, the Group's sales of circuit boards and components increased by approximately 54.58% as compared to the corresponding period of last year, and its gross profit margin decreased to approximately 8.20% (the corresponding period of 2020: approximately 10.14%). The decrease in gross profit margin was mainly due to the combined effects of the decrease in product prices due to fierce market competition and the increase in the costs of raw materials. During the period under review, the revenue of the "other" business of the Group was mainly derived from the business of sourcing and sales of electronic components, which amounted to approximately HK\$18,667,000 and accounted for approximately 1.83% of the total sales volume of the Group.

During the period under review, being influenced by the global novel coronavirus pandemic and the instability in Sino-US relations, while benefiting from the promotion of 5G smart phones, the continuous growth of smart wearable devices and the increase in demand for FPC from the automobile industry, the domestic FPC industry has shown a relatively significant growth. The Group continued to implement and adhere to the strategy of "developing major customers" and strengthen customer development and customer services. Against the backdrop of recovery of the industry, our turnover also increased significantly as compared to the corresponding period of last year. However, the gross profit margin of products decreased to a certain extent due to the combined effects of the decrease in product prices due to fierce market competition and the increase in the costs of raw materials. The Group will continue to deem FPC and flexible packaging substrates products used in mobile phones, consumer electronics, new energy car cells, vehicle electronics, camera compact modules, display modules, wearable devices and other application areas as the key development directions. The Group will also proactively enhance its technological strengths and standards, expand its production capacity, strengthen upstream and downstream co-operation and capture opportunities, in order to achieve better operating results.

During the period under review, the Group's R&D investment increased by approximately 30.59% to approximately HK\$52,515,000 from approximately HK\$40,213,000 for the corresponding period of last year. The increase in R&D expenses was mainly due to increase in R&D investment in new materials, new products and new production techniques by the Group, such as investments in R&D of high frequency and high speed flexible printed circuit and module products, High Density Interconnector (HDI) flexible printed circuit products as well as intelligent innovation. Facing the market prospect of 5G network, development trend of consumer electronic products, as well as the constant increasing demand from downstream customers in product structure and complexity, the Group continued to invest in R&D, and have started mass production on high frequency and high speed flexible printed circuit products based on Liquid Crystal Polymer (LCP) and High Density Interconnector (HDI) flexible printed circuit products for our customers during the period under review.

During the period under review, following the Group's new intelligent manufacturing plant in Nansha, Guangzhou came into operation, and our investment made on equipment in recent years, the Group's production capacity has been improved and the Group's ability to serve its customers has been strengthened. During the period under review, the Group's new factory in Vietnam started to provide samples to customers, and our plan for the construction of a new plant in Suzhou factory has commenced.

Outlook

The Group has become an authorised supplier for a number of world-renowned high technology enterprises. To meet the requirements of the global supply chain system of such customers, the Group has established two production bases (Southern China Guangzhou Factory and Eastern China Suzhou Factory), and two overseas factories in India and Vietnam. The factories in India and Vietnam merely conduct post assembly operations including surface mounting and component assembling for customers. The Group has also established sales centre, R&D centre, quality control, supply chain management, intelligent manufacturing and information technology, etc. which are independent departments from the manufacturing system to cater for the comprehensive needs of the Group's customers. Under the guidance of the strategy of "developing major customers" and with the gradual uplift of the Group's capabilities in R&D, production, quality management, supply chain management and intelligent management, the Group's capability to satisfy the "one-stop demand" of such customers has also been largely improved.

Affected by the global novel coronavirus pandemic and the instability in Sino-US relations, greater fluctuation, increasing uncertainties and wider application of new technologies have become the characteristics of the global electronic products market. In the meantime, as major international customers have increasing concern on supply chain security, the Group is facing a more challenging competitive environment. The Group will maintain a prudent attitude towards the future and will pay close attention to the changes in the economy, industry and major customers. The Group will enhance the risk management and internal capability, adhere to the major customer strategy, continuously uplift the product technological capabilities, seize the market opportunities in new application fields and strengthen the localization service in the overseas markets. By the integration of upstream and downstream resources as well as enhancement in its risk resistance capability, the Group will strive to change the risks into opportunities and continuously improve its operating results.

The management of the Group is of the view that, following the popularity of "5G" smart phones, the increasing demand for wearable products and new energy vehicle electronic products, despite the continuing threat of the novel coronarius pandemic, the circuit boards and components industry is expected to maintain its growth momentum in the foreseeable future. The Group will continue to invest in the circuit boards industry, adhere to the strategy of "developing major customers", strengthen its core capabilities, enhance the strategic cooperation with relevant shareholders and AKMMeadville Electronics (Xiamen) Co., Ltd (安捷利美維電子 (廈門) 有限責任公司), overcome various difficulties and keep on improving its operating results, so as to present satisfactory results and bring favourable returns to its shareholders.
