#### **BUSINESS REVIEW**

In the first half of 2021, the pandemic remained severe around the globe. The first quarter saw a promising growth in GDP, which was slowed down again in the second quarter. This reflected that the pace of economic recovery was volatile and relied on the control of the outbreak. This, coupled with the outbreak in Guangdong in May, has left market demand for corrugated packaging in a precarious state.

Since 2021, the Chinese government has prohibited wastepaper imports, and thus upstream manufacturers of the corrugated packaging industry have found it difficult to source raw materials to make containerboard. At the same time, domestic wastepaper demand rose and pushed up prices to high levels. Despite the increase in corrugated packaging products prices, the cost of wastepaper was too high that the Group could not pass on the rising costs to our customers entirely. In addition, global consumer demand remained highly unstable. As a result, the corrugated packaging industry was under tremendous pressure.

As the Group's upstream business has been affected by the supply of waste paper and the rising costs of other raw materials for making containerboard, on the basis of costs consideration, the Group has been purchasing some containerboard overseas for supplying our downstream business for the production of corrugated paper boards and carton boxes. The payment of containerboard imports was settled in US dollars, but the Group's revenue was mainly generated from domestic sales denominated in Renminbi. Fluctuations in the Renminbi exchange rate have as a result put pressure on the Group. Fortunately, the Renminbi exchange rate remained relatively stable in the first half of 2021, which had no adverse effects on the Group's profitability.

As China is gradually recovering from the COVID-19 pandemic, the Group's total sales volume and average selling prices increased. Revenue in the first half of 2021 rose 26% against the first half of 2020. In the first half of 2021, containerboard and corrugated packaging accounted for 25% and 75% of revenue, respectively. Compared to the first half of 2020, revenue from containerboard sales rose by 2% and revenue from corrugated packaging sales rose by 37%. Despite the increase in total sales volume and average selling prices, the cost of raw materials and operating overheads costs were relatively high, which resulted in the Group recording a small profit in the first half of 2021.

The Group's inventory level was higher at the end of June 2021 as compared to that at the end of last year to meet demand during peak season. Additionally, high raw material prices also contributed to the higher inventory costs. As the Group has sufficient working capital, its gearing ratio and net gearing ratio remained at very low levels at the end of June 2021, and the bad debt ratio was close to zero, which presents a strong financial position of the Group.

In addition, the Group is still in the process of installing a pulp production line at the leased facility in the Philippines. However, the construction period becomes hardly predictable as the COVID-19 pandemic is still prevalent in the region. The Group will actively monitor the local situation so as to facilitate the commencement of production as soon as possible. Consequently, it could satisfy the business needs of our Group's upstream business, bringing the Group's production volume and overall business back on track.
