BUSINESS REVIEW

China's economy continues to recover from the Coronavirus Disease 2019 ("COVID-19") pneumonia pandemic. Overall, China's GDP increased by 12.7% through the first half of 2021, putting the country on track to meet its growth target of over 6% in 2021.

In January 2021, the General Administration of Customs of the People's Republic of China reclassified high-grade copper scrap as resource and re-approved imports. All imports of copper scrap were prohibited previously. As a result, the amount of China's copper scrap imports jumped by 73% in the first half of 2021 and is expected to increase by more than 50% in 2021. With the release of import prohibition of copper scrap into China and solid recovery of industrial production, the management adjusted its strategy to focus more on production of refined copper products by making use of scrap copper that became more abundant to reduce its trading activities of finished copper products. Such strategy successfully reduced the fluctuation of copper prices inherent in the Group's business of trading electrolytic copper. By focusing on business of sales of recycled copper products, the Group realized a positive gross profit margin of 1.1% and also recorded a significant decrease in its net loss in the first half of 2021.

FUTURE PROSPECTS/OUTLOOK

In the first quarter of 2021, the Group completed the new issuance of shares to Mianyang Fule Investment Co., Ltd.* (綿陽富樂投資有限公司) ("Fule"), a state-owned enterprise ("SOE") in Sichuan Province. With Fule as the Group's single largest shareholder, the management expects to better consolidate its business and strengthen its financial positions. We are continuing to work hard in restructuring our overall financing and shareholding structure. Once such restructuring is complete, we expect the Group to be able to take advantage of an improving economy to achieve better operational and financial performance. In addition, we aim to enforce more stringent management on trade receivables to further improve our cash flow situation in the second half of this year.

HUMAN RESOURCES

As at 30 June 2021, the Group had a total of approximately 665 employees (31 December 2020: 729). The Group's staff costs for the six months ended 30 June 2021 were approximately RMB23.7 million. The Group offers competitive remuneration schemes to its employees. In addition, discretionary bonuses and share options may also be granted to eligible employees based on individual and the Group's performance. The Group is committed to nurturing a learning and sharing culture across its organization. Heavy emphasis is placed on the training and development of individual employees and team building, as the Group's success is dependent on the contribution of all functional divisions comprising skilled and motivated professionals. The Group is also committed to social responsibility by employing disabled staff and providing appropriate working conditions and protection to them.

DIVIDENDS

The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2021 (for the six months ended 30 June 2020: nil).

FINANCIAL REVIEW

REVENUE

Our revenue represents the fair value of consideration received or receivable for sales of goods and services in the ordinary course of business. Revenue is shown net-of-VAT and other taxes, returns and discounts after eliminating sales within the Group.

The following table sets forth an analysis of our revenue:

	For the six months ended 30 June	
	2021 RMB'000	2020 RMB'000
Sales from trading of electrolytic copper	429,230	8,209,482
Sales of recycled copper products	2,856,319	1,955,972
Sales of power transmission and distribution cables	13,289	9,582
Sales of communication cables	46,248	8,751
Sales of scrap materials	8,597	1,633
Others	1,465	938
	3,355,148	10,186,358

Revenue for the six months ended 30 June 2021 amounted to RMB3,355.1 million, representing a decrease of 67.1% from RMB10,186.4 million for the six months ended 30 June 2020.

Revenue from copper products amounted to RMB3,285.5 million (including revenue from trading of electrolytic copper of RMB429.2 million and revenue from recycled copper products of RMB2,856.3 million) for the six months ended 30 June 2021, representing a decrease of 67.7% from RMB10,165.4 million for the six months ended 30 June 2020, reflecting mainly a decrease of 74.2% in the sales volume of all copper products from 257,664 metric tons for the six months ended 30 June 2020 to 66,404 metric tons for the six months ended 30 June 2021, and an increase of 25.4% in average selling price from RMB39,452 per ton for the six months ended 30 June 2020 to RMB49,478 per ton for the six months ended 30 June 2021. Since the Group intended to focus on the sales of recycled copper product which can generate higher gross profit, the sales from trading of electrolytic copper decreased from RMB8,209.5 million for the six months ended 30 June 2020 to RMB429.2 million for the six months ended 30 June 2021.

Management Discussion and Analysis

Revenue from sales of power transmission and distribution cables amounted to RMB13.3 million for the six months ended 30 June 2021, representing an increase of 38.7% from RMB9.6 million for the six months ended 30 June 2020. Lower revenue from sales of power transmission and distribution cables for the six months ended 30 June 2020 was primarily attributable to the suspension of production as a result of COVID-19. Revenue from sales of communication cables amounted to RMB46.2 million for the six months ended 30 June 2021, representing an increase of 428.5% from RMB8.8 million for the six months ended 30 June 2020.

LOSS FOR THE PERIOD

Our loss for the six months ended 30 June 2021 was RMB72.1 million whereas loss for the six months ended 30 June 2020 was RMB156.2 million. The decrease in loss was mainly due to the increase of 178.8% in VAT refunds under the Comprehensive Utilisation of Resources Policy from RMB23.1 million for the six months ended 30 June 2020 to RMB64.5 million for the six months ended 30 June 2021, and the increase of 160.5% in government grant from RMB21.0 million for the six months ended 30 June 2020 to RMB54.8 million for the six months ended 30 June 2021.

The Group's inventories increased by RMB1,013.2 million to RMB1,330.0 million (as at 31 December 2020: RMB316.8 million). During the six months ended 30 June 2021, the inventory turnover days were 44.9 days as compared with 9.7 days for the year ended 31 December 2020. Such increase was mainly attributable to the decrease in sales from trading of electrolytic copper during the six months ended 30 June 2021.

Trade and bills receivables decreased by RMB953.2 million to RMB1,176.5 million as at 30 June 2021 (as at 31 December 2020: RMB2,129.7 million). During the six months ended 30 June 2021, the receivables turnover days were 89.2 days as compared with 36.3 days for the year ended 31 December 2020. The increase in receivable turnover days was mainly due to the decrease in sales from trading of electrolytic copper which have a shorter debt collection period.

Trade and bills payables decreased by RMB362.5 million to RMB706.1 million as at 30 June 2021 (as at 31 December 2020: RMB1,068.6 million) while the payable turnover days were 48.4 days, compared with 17.9 days for the year ended 31 December 2020. The increase in payable turnover days as compared to last year was mainly due to the decrease in purchase from the suppliers of electrolytic copper during the six months ended 30 June 2021, which had a shorter credit period.

The Group's total interest-bearing borrowings decreased by RMB28.9 million to RMB1,856.8 million as at 30 June 2021 (31 December 2020: RMB1,885.7 million). The increase was mainly due to the decrease of bank loans and other borrowings.

Bank loans and other borrowings included three entrusted loans totaled approximately RMB299 million from Mianyang Science Technology City Development Investment (Group) Co., Ltd.* (綿陽科技城發展投資(集團)有限公司) ("Kefa"). Pursuant to the entrusted loan agreement signed among Tongxin, a wholly-owned subsidiary of the Company, Kefa and the entrusted bank, the entrusted loans expired on 27 August 2016, 23 September 2016 and 18 November 2016 respectively. COMMODITY RISK

The major raw materials used in the production of our recycled copper products are scrap copper. We are exposed to fluctuations in the prices of raw materials as well as finished goods which are influenced by global as well as regional supply and demand conditions. Fluctuations in the copper prices could adversely affect our financial performance. The Group uses copper futures contracts to mitigate part of its exposure against price fluctuations of copper. The market value of futures contracts is based on the quoted market price as at the date of consolidated statement of financial position. The Group did not have any outstanding copper futures contracts as at 30 June 2021 (as at 31 December 2020: Nil). Net loss of nil was recognized for the six months ended 30 June 2021 (six months ended 30 June 2020: net loss of RMB0.3 million) from futures contracts.

FOREIGN CURRENCY RISK

The functional currency of a majority of the entities within the Group is RMB and most of the transactions are settled in RMB. However, we are exposed to currency risk primarily related to the cash and cash equivalents, loan from a related party, note payable, the convertible bonds and contingent consideration liabilities, all of which are mainly denominated in HKD. The balance of cash and cash equivalents as at 30 June 2021 including HK\$0.2 million and USD5,487 (in total equivalent to approximately RMB0.2 million) were held in banks in Hong Kong.

As at 30 June 2021, the Group's interest-bearing bank and other borrowings and finance lease payables were denominated in RMB but the convertible bonds and notes payable were denominated in HKD, with an aggregate principal amount of HK\$696.3 million. During the year ended 31 December 2018, the Group has completed the acquisitions of certain target groups, the considerations are subject to adjustment pursuant to earn-out arrangements and will be settled partly by cash considerations in HKD and partly by allotment and issue of consideration shares which are denominated in HKD. The Group did not commit to any financial instruments to hedge its foreign exchange exposure during the six months ended 30 June 2021. During the six months ended 30 June 2021, the Company incurred an exchange difference on translation of financial statements of entities outside of mainland China equivalent to RMB6.2 million, part of which was resulted from translating the note payable, loan from a related party, convertible bonds and contingent consideration liabilities from HKD to RMB.

SIGNIFICANT INVESTMENTS HELD

Saved as disclosed elsewhere in this report, except for investments in subsidiaries and associates, the Group did not hold any significant investment in equity interests in any other companies during the six months ended 30 June 2021.

1 GENERAL INFORMATION AND BASIS OF PREPARATION (continued)

(b) BASIS OF PREPARATION (continued)

This interim financial report contains unaudited interim condensed consolidated financial information and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2020 annual financial statements. The unaudited condensed consolidated interim financial information and notes thereon do not include all of the information required for full set of financial statements prepared in accordance with International Financial Reporting Standards (“IFRSs”) issued by the IASB.

The financial information relating to the financial year ended 31 December 2020 that is included in the interim financial report as comparative information does not constitute the Group’s statutory annual consolidated financial statements for that financial year but is derived from those financial statements. Statutory annual consolidated financial statements for the year ended 31 December 2020 are available from the Group’s registered office.

2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group’s annual consolidated financial statements for the year ended 31 December 2020, for the first time for the current period’s financial information.

For these unaudited consolidated financial results, the Group has applied the new and amendments to IFRSs and interpretations. The adoption of new and revised standards did not have substantial effect on the financial performance and position of the Group.

3 SEGMENT REPORTING

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments as follows:

- (a) Recycled copper products segment: use of scrap copper and electrolytic copper for the manufacturing and trading of recycled copper products, and trading of electrolytic copper and nickel products;
- (b) Power transmission and distribution cables segment: manufacturing and sales of power transmission and distribution cables; and
- (c) Communication cables segment: manufacturing and sales of communication cables.

(a) SEGMENT RESULTS

Management monitors the results of the Group's operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit, which is a measure of adjusted profit before tax. The adjusted profit before tax is measured consistently with the Group's profit before tax except that certain interest income, corporate and other unallocated income/(expenses), certain finance costs as well as share of profits of associates are excluded from such measurement.

A measurement of segment assets and liabilities is not provided regularly to the Group's most senior executive management and accordingly, no segment assets or liabilities information is presented.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the prevailing market prices.

14 CAPITAL, RESERVES AND DIVIDENDS (continued)

(c) STATUTORY RESERVES

In accordance with the Wholly Foreign Owned Enterprise Law applicable to the subsidiaries in the PRC, the subsidiaries are required to make appropriations to the Statutory Reserve Fund (the "SRF"). At least 10% of the after tax profits as determined in accordance with the applicable PRC accounting standards and regulations must be allocated to the SRF until the cumulative total of the SRF reaches 50% of the subsidiaries' registered capital. Subject to approval from the relevant PRC authorities, the SRF may be used to offset any accumulated losses or increase the registered capital of the subsidiaries. The SRF is not available for dividend distribution to shareholders.

The application of the share premium account is governed by the Companies Law of the Cayman Islands. Under the Companies Law of the Cayman Islands, the funds in the share premium account of the Company are distributable to shareholders of the Company provided that immediately following the date on which the dividend is proposed to be distributed, the Company will be in a position to pay off its debts as they fall due in the ordinary course of the business.

(e) SHARE-BASED PAYMENT RESERVE

Share-based payment reserve represents the portion of the fair value of unexercised share options granted to employees of the Group at grant date that has been recognised in accordance with the accounting policy adopted for equity-settled share option expense to the financial statements.

The amount will either be transferred to the share premium account when the option is exercised, or be released directly to retained profits if the option is lapsed or forfeited.

(f) CONVERTIBLE BONDS EQUITY RESERVE

Convertible bonds equity reserve arises from the residual amount of the net proceeds of convertible bonds less the fair value of liability component and derivative component at the date of issuance. The equity component will remain as a separate line item within equity until the conversion option is exercised (in which case the corresponding portion of the equity component will be transferred to share capital and share premium). Where the conversion option remains unexercised at the expiry date, the balance will be released to the retained earnings/accumulated losses.

FAIR VALUES

The carrying amounts of the Group's financial assets and financial liabilities as reflected in the consolidated statement of financial position approximate their respective fair values.

CAPITAL RISK MANAGEMENT

The Group manages its capital to ensure that it will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior year.

The capital structure of the Group consists of debt, which includes borrowings and amounts due to related parties, and equity attributable to owners of the Company, which includes share capital and reserves.

The Group's management reviews the capital structure regularly. The Group considers the cost of capital and the risks associated with each class of capital, and will balance its overall capital structure through the payment of dividends, issuance of new shares as well as raising of borrowings, if necessary.

17 FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2 inputs: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs: unobservable inputs for the asset or liability.

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

17 FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENT (continued)

Other than the calculation method of fair value of contingent consideration liabilities which is based on discounted cash flows forecasts prepared by the management, the fair values of the non-current portion of pledged deposits and non-current portion of interest-bearing bank and other borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The Group's own non-performance risk for finance leases payable and interest-bearing bank and other borrowings as at 30 June 2021 was assessed to be insignificant. The fair value of the liability portion of the convertible bonds is estimated by discounting the expected future cash flows using an equivalent market interest rate for a similar convertible bond with consideration of the Group's own non-performance risk.
