	Six months ended 30 September	
	2021 <i>HK</i> \$'000 (Unaudited)	2020 <i>HK</i> \$'000 (Unaudited)
Profit for the period attributable to owners of the Company	8,674	12,309

Effect of dilutive potential ordinary shares in respect of the Company's share option schemes (notes (ii) & (iii))	381,879	24,446,140
Weighted average number of ordinary shares for the purpose of diluted earnings per share	406,344,844	430,409,105

#### Notes:

- (i) Basic earnings per share is calculated by dividing profit for the period attributable to owners of the Company by the weighted average number of ordinary shares in issue of the Company during the period.
- (ii) The calculation of diluted earnings per share is based on profit for the period attributable to owners of the Company and the weighted average number of ordinary shares after adjustment for the effect of the exercise of the Company's outstanding share options under Pre-IPO share option scheme and Share Option Scheme, and assuming the exercise is made at no consideration at the beginning of the period.
  - The Company's share options outstanding as at 30 September 2021 and 2020 had dilutive effect to the earnings per share because the sum of exercise price and option value of the Company's share options were lower than the average market price of the Company's shares for the six months ended 30 September 2021 and 2020.
- (iii) The effect of convertible bonds issued by a subsidiary is not considered for the calculation of diluted earnings per share as it increases profit for the period attributable to owners of the Company.

#### **REVIEW**

#### **Market Review**

The global economy continued on the road of recovery since the outbreak of the novel coronavirus (COVID-19) in 2020. While certain countries have loosened travel restrictions with the implementation of the COVID-19 vaccine, other parts of the world continued to impose stringent travel restrictions which limit the ability to travel and conduct in-person meetings and economic activities. Global and Asia economy slowly recovers from standstill since COVID-19 was declared by World Health Organisation as a global pandemic on 11 March 2020. Despite the recovery of financial markets with most of the stock indices recouping their earlier losses in June 2020, Hong Kong's capital market activities remained weak and have yet to recover to the pre-pandemic level.

Global capital markets have reacted positively to the approval and wide acceptance of the vaccination programmes since December 2020. However, the initial benefit of the surge in fair value of its investments from the news have been reduced by the recent volatility of the market. Infections surged in a certain part of the world earlier this year and sparked renewed lockdowns and loomed over the prospect of recovery. The continual stringent regulatory environment and the uncertainties in the PRC property corporations further drive volatility in the capital market. The pace of the recovery on economic activities to pre-pandemic level remains to be seen.

The Group strives to maintain its profitability by prudent cost and capital management approach, and its comprehensive and diversified services offered to clients. The Group's strategy is well positioned to benefit from the recovery and its project pipeline remains resilient despite these challenges and was able to offset the slower economic activities with growth in corporate finance advisory services' income despite the setback in the investment fund.
