Smart IP in I-hawk System 弘鵠系統中的智慧IP

The two major intelligent IPs of “Intelligent Control Elf” and “Zero-sense Residential Area” are the main intelligent achievements of “Geek Community 2.0 Product System” of Redsun Properties.

“Zero-touch Residential Area” is committed to providing owners with a safer, more convenient, healthier and more energetic community life. In terms of community safety management, Redsun Geek Community has provided four contactless door opening methods for the property owners, namely, face recognition, mobile phone APP, Bluetooth and QR code. In order to create a more convenient and healthy residential life, Geek Community has introduced intelligent facilities such as unmanned gymnasium, unmanned vending machine, automatic delivery cabinet and a health cabin to realize a truly zero-contact and smart community ecology with a fully-covered intelligent system.

“Intelligent Control Elf” introduced leading technologies to daily safety management service of the community at indoor area, such as the introduction of intelligent AI cameras, Eyes of Angel, hawk eye protection and other systems, which can automatically alarm according to the abnormal entry and exit conditions identified, so as to create a safer and more secure residential environment with multiple guards. Redsun Geek Community also leveraged indoor intelligent voice-control system, one-button scene control, face recognition and other systems for remote monitoring of home appliances to provide users with a convenient home life.

Quality Training

We have established a regular quality training mechanism to regularly conduct regional and project-level quality education and training for our employees, and compiled training outcome documents for each training session, such as attendance forms, training site photos, training videos, courseware, assessment results, etc., which effectively promoted the implementation of quality management standards of Redsun Properties in the frontline.

質量培訓

我們搭建了常態化的質量培訓機制，定期對員工開展區域和項目層面的質量教育和培訓，並且就每場培訓形成培訓成果文件，例如簽到表、培訓現場照片、培訓視頻、課件、考核結果等，有效促進了弘陽地產的質量管理標準在一線的落實。

EXAMPLE 示例

Quality Training for Constructors
施工方質量培訓

During the Reporting Period, we actively conducted quality training and promotion for suppliers and contractors to promote the unification of quality management standards among all parties of the project and to ensure the implementation of the project management system. For example, as the constructors and supervisors had different understanding on the management systems and requirements of Redsun Properties Group and the region, the project department organized special training on management behavior for specific problems encountered in quality management, clarified the quality management behavior requirements of Redsun Properties, and answered and explained some questions. The training effectively strengthened the management behavior and improved the quality control of all parties on site construction.

報告期內，我們積極對供應商和承建方開展質量培訓和宣貫，以促進質量管理標準在項目各方中的統一，及保障項目管理體系的實施。例如，由於各施工方及監理方對弘陽地產集團、區域的管理制度和要求的理解不一致，項目部針對質量管理中遇到的具體問題組織了管理行為專項培訓，明確弘陽地產的質量管理行為要求，並對一些疑問的地方進行解答和梳理。該培訓有效強化管理行為落地，提高了各方對現場施工的質量管控。

輿情管理

為了主動發現客戶訴求、積極化解矛盾，我們建立了《輿情及危機公關管理辦法》、《新聞發言人管理辦法》等輿情管理制度，實時預警各類與產品和服務相關的輿情，實現第一時間應對並處理弘陽地產品牌層面的負面信息與客戶意見。

During the Reporting Period, we further improved the public opinion management system, optimized the public opinion rating evaluation, classified public opinion and identified crisis for complaints caused by product defects and services, general customer disputes and more serious group customer complaints, and added early warning process and performance linkage mechanism.

For the prevention before customer crisis and the follow-up response, we have established a full cycle public opinion management mechanism, covering monitoring, research, judgement, response and other links. After public opinion events, we have strengthened the core management's ability to analyze, judge and deal with public opinions, and continuously improved the predictability, pertinence, initiative and effectiveness of customer relationship management.

報告期內，我們進一步完善了輿情管理制度，優化了輿情等級評估，對由於產品缺陷及服務引起的投訴、一般客戶糾紛和較嚴重的群體性客戶投訴進行輿情歸類和危機識別，並新增了預警流程，以及績效掛鉤機制。

針對客戶危機發生前的預防和發生後的應對，我們建立了全週期的輿情管理機制，覆蓋監測、研判、應對等各個環節，並在輿情事件後加強核心管理層對輿情的分析、判斷、處置和危機處理能力，不斷提高客戶關係管理工作的預見性、針對性、主動性和有效性。

It also summarized various data in relation to delivery, complaints and other aspects, integrated the case analysis of typical projects of complaint and delivery, deeply analyzed the actual product and service quality, and pointed out the deficiencies.

The Customer Value Day Symposium in July 2021
2021年7月客戶價值日專題會

本次專題會上，弘陽地產邀請合作方針對2021年半年度客戶滿意度報告進行了專題分享，通過對各區域不同階段客戶滿意度成績進行細緻地分析。一方面，指出弘陽地產的「銷售服務、交付服務、維修服務」持續保持高分的亮眼表現；另一方面，也結合交付、投訴等各項數據進行總結，整合投訴和交付典型項目的案例分析，對實際產品與服務品質進行深度剖析，指出不足。

After in-depth analysis, Redsun Properties plans to focus on the sustainability of customer maintenance after delivery in the future, make continuous efforts and improvement in product, quality and property, require all functional departments to promote the implementation of key matters, e.g. “31998” delivery password and “332 Benchmarking of Products and Services”, and firmly grasp the project quality control, in order to ensure the delivery quality and promote Redsun's products and services.

經過深度分析，弘陽地產計劃將在未來重點關注交付後客戶維護工作的持續性，在產品、質量、物業三個板塊上重點提升、持續發力，要求各職能部門持續推進「31998」交付密碼和「332產品與服務標桿打造」等重點事項的落地實施，繼續穩抓工程品質管控，保障交付品質，通過客戶界面的正面傳播，提升弘陽產品力和服務力。

客戶交流活動

EXAMPLE 示例

Transformation of Old Urban Areas
老舊城區改造

In order to repay customers for their trust and support, Redsun Properties jointly carried out "Rejuvenation Action" with Redsun Services during the Reporting Period.

為了回饋老客戶對弘陽地產的信賴和支持，我們於報告期內與弘陽服務共同開展「煥新行動」。

In terms of the action, Redsun Properties and Redsun Services made use of their respective advantages to carry out division of labour and provided high-quality services to customers in all aspects, from the facility transformation in urban areas to the optimization of property management services.

在該行動中，弘陽地產與弘陽服務利用各自優勢進行分工，從城區的設備改造到物業服務的優化，全方面的向客戶提供優質服務。

Optimization of Ancillary Facilities
配套設施優化

The capricious COVID-19 is one of the main challenges in the implementation of this year's "Rejuvenation Action". In order to control the spread of the pandemic, the living radius of many customers shrinks down to the community. The community has become not only a strategic space for pandemic prevention and control, but also a very important leisure living space. Therefore, old community reconstruction projects of Redsun Properties focus more on improving the leisure facilities of the community and making the community more livable.

新冠疫情的反覆是今年煥新行動實施過程中的主要挑戰之一。為了控制疫情傳播，很多客戶的生活半徑縮小至社區，社區不但成為疫情防控的戰略空間，更成為十分重要的休閒生活空間。因此，弘陽地產老舊社區改造項目更聚焦於改善社區的休閒配套設施，讓社區更加宜居。

PARTNER COOPERATION

Redsun Properties upholds the cooperative principle of sincere cooperation and joint development, maintains a good win-win relationship with its suppliers and other partners in the same industry, and is committed to creating a better business environment and promoting the common progress of the real estate industry as a whole. At the same time, we will fulfill our social responsibilities into the whole process of enterprise development, pay attention to social development, spare no effort to carry out charitable projects, and comprehensively care for the vulnerable groups in society through the establishment of schools, respecting the elderly and helping the children, disaster relief and other aspects, so as to contribute our loving power to the construction of a better society.

Supplier management

We are fully aware of the importance of good supply chain management in providing quality services and promoting enterprise development. By formulating and issuing the Supplier Management Measures of Redsun Properties Group (《弘陽地產集團供應商管理辦法》), we clarified the responsibilities of various departments and the management process of suppliers, and systematically streamlined the contents of supplier access, evaluation, hierarchical management, communication mechanism, complaints and supervision and management, etc., so as to make enterprise management more institutionalized and systematic.

夥伴合作

弘陽地產秉持誠信合作、共同發展的合作宗旨，與供應商及其他同行業夥伴保持良好的合作共贏關係，互利互惠，致力於營造更美好的營商環境，促進房地產行業整體的共同進步。同時，我們將履行社會責任融入企業發展的全過程，關注社會發展，不遺餘力開展慈善項目，通過興辦學校、尊老扶幼、賑災救援等方面，全面關愛社會中的弱勢群體，為構建美好社會貢獻愛心力量。

供應商管理

我們深知良好的供應鏈管理對於提供優質服務與促進企業發展的重要性。我們通過制定並發布《弘陽地產集團供應商管理辦法》，明確各部門職責及供應商管理流程，對供應商准入、評估、分級管理、溝通機制、投訴與監督管理等內容進行系統性梳理，整體性呈現，使企業管理更加制度化、體系化。

Supplier access process
供應商准入流程

For further guarantee of quality, we continuously improve the supplier grading management system. After establishing the supply relationship, we implement the grading management system for suppliers and assign them to the appropriate level. Through quarterly, semi-annual and annual performance evaluations of various suppliers, we classified our suppliers into five levels: excellent suppliers, qualified suppliers, restricted suppliers, unqualified suppliers and blacklisted suppliers, and managed them in different levels. Suppliers with a performance evaluation score of 65 or above are qualified. For suppliers with unqualified evaluation, we will limit their use by labeling on the procurement management platform.

While paying attention to building a comprehensive procurement management system, Redsun Properties emphasizes the cooperation feelings of excellent suppliers and excellent project teams and has established an incentive mechanism for excellent suppliers. In response to the rating results of suppliers, we have formulated a compliant, reasonable and systematic assessment system as well as a reward and punishment system to motivate the suppliers' enthusiasm for providing high-quality services by way of giving rewards, and take punitive measures such as demotion to inferior suppliers. For excellent suppliers, we will invite them to participate in the supplier conference and issue them with honorary certificates. At the same time, we will give them priority procurement rights, preferential bid settlement and other incentives. We will terminate the cooperation with blacklisted suppliers whose bad behaviors, gross negligence or failure to fulfill their responsibilities and obligations as agreed in the contract cause adverse effects and losses to the Company, and we will never cooperate with them.

為進一步保障質量，我們不斷完善供應商分級管理體系。在確定供應關係之後，對供應商開展分級管理制度，為供應商評定相應等級。通過對各類供應商開展季度、半年度、年度履約評估，我們將供應商分為優秀供應商、合格供應商、限制條件使用供應商、不合格供應商及黑名單五個等級，並進行分級管理。履約評估得分在65分及以上的供應商為合格，對於評估不合格的供應商，我們則會在招採管理平台上通過貼標籤的方式限制使用。

在注重打造完善的招採管理體系的同時，弘陽地產重視優秀供應商、優秀項目團隊的合作感受，建立了優秀供應商激勵機制。針對供應商的評級結果，我們制定了合規、合理、系統的考核制度以及獎懲制度，通過給予獎勵的方式激發供應商提供優質服務的熱情，對劣質供應商採取降級等懲罰措施。對於優秀的供應商，我們將邀請參加供應商大會並為其頒發榮譽證書，同時給予優先集採權、優先清標結算等獎勵。對於合作過程中存在不良行為、嚴重過失、或未能按合同約定履行自身責任及義務給公司造成惡劣影響與損失的黑名單供應商，我們則會與其終止合作，並秉持永不合作的態度。

As a member of the "Corporate Anti-fraud Alliance", Redsun Properties always adheres to clean procurement and resolutely resists any acts of unfair competition and corruption in the procurement process and supplier performance process. When we sign project contracts with all suppliers, we include the **Integrity Agreement** as a standard clause, which clearly stipulates the possible non-compliant behaviors of both parties during the contract signing and procurement process, clarifies the responsibilities and obligations of both parties, and jointly maintains the culture of integrity in the industry. We include business ethics as an evaluation standard in all inspections during the cooperation and have zero tolerance towards suppliers with poor integrity or who violate the relevant terms of the compliance letter.

供應商廉潔管理

弘陽地產作為「企業反舞弊聯盟」的成員，始終堅持陽光採購，堅決抵制採購過程及供應商履約過程中任何不正當競爭和貪污腐敗的行為。我們在與所有供應商簽訂項目合同時，將《廉正協議書》作為標準條款包含在內，針對合同簽訂、採購流程中雙方可能存在的不良行為做出了明確規定，明確雙方的責任與義務，共同維護行業內的良好風氣。我們將商業道德作為考核標準納入合作環節的所有考察中，對於有誠信不佳行為或違反合規承諾函相關條款的供應商持零容忍的態度。

Environmental and social management of suppliers

Building a sustainable supply chain is one of the important tasks for enterprises to fulfill their social responsibilities and realize their long-term interests. In addition to business ethics, we also included suppliers' performance in occupational health and safety, environmental management and quality aspects in the Supplier Management Measures of Redsun Properties Group (《弘陽地產集團供應商管理辦法》) in the supplier access, evaluation and rating system, and put forward general requirements for safe and civilized construction, so as to require suppliers to operate in compliance, actively assume social responsibilities and cooperate to build a harmonious supply chain.

Suppliers are required to provide safety, quality and environmental qualifications and certification at the supplier access stage, and can only be approved to enter supplier database after qualification evaluation. In addition, we included the site safety and civilized construction, labor management, occupational health and safety management and quality management performance as important indicators in all inspection and inspection work during the cooperation process, and conducted full-cycle standardization and assessment on the responsible performance of suppliers to enable the construction of a responsible supply chain. During the Reporting Period, we conducted on-site evaluation on 1,942 suppliers and found no major non-compliance incidents involving labor disputes, environmental violations, etc.

We uphold the green and low carbon concepts, actively explore low-carbon supply chain solutions, and promote and lead the green construction of the supply chain. As the co-sponsor of the New Hongqiao Alliance, Redsun Properties will, jointly with relevant professional organizations, conduct a survey of the basic carbon emission data of major suppliers, establish a carbon emission database of the supply chain, and focus on building a low-carbon management system to facilitate the development of carbon footprint and carbon emission reduction of future projects.

In terms of green procurement, we give priority to the selection of renewable resources and products and equipment that are conducive to energy conservation and emission reduction, continuously reduce the procurement of high-pollution and high-emission derivative products, establish a guiding mechanism for the selection of low-carbon products, and promote the green development of the entire industrial chain.

我們在供應商准入階段即要求供應商提供安全、質量及環境方面的資質及認證，並對其審核通過後才可納入供應商庫。此外，我們將現場安全文明施工情況、勞工管理、職業健康安全以及質量管理方面的表現作為重要指標納入合作過程中的所有考察巡檢工作中，對供應商的負責任表現進行全週期性的規範與考核，賦能負責任供應鏈的建設。報告期內，我們對1,942家供應商開展了現場巡檢審核，未發現涉及勞工爭議、環境違規等方面的重大違規事件。

我們秉承綠色低碳理念，積極探索低碳供應鏈解決方案，推動並引領供應鏈綠色建設。弘陽地產作為新虹橋聯盟的聯合發起方，將聯合相關專業機構，開展對主要供應商的碳排放基礎數據調查，建立供應鏈碳排放數據庫，著力建設低碳管理體系，助力未來項目碳足跡、碳減排工作的開展。
