Environmental, Social and Governance Report
2021

About this Report

This is the sixth Environmental, Social and Governance Report (“ESG Report”) published by China Environmental Technology Holdings Limited and its subsidiaries (the “Group”), which aims to disclose our Environmental, Social and Governance (“ESG”) performance. Regarding Corporate Governance, please refer to page 12 - 24 of our Annual Report 2021.

Reporting Principles and Guidance

This ESG Report is complied with the “comply or explain” provisions in the “Environmental, Social and Governance Reporting Guide” under Appendix 27 of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited. This ESG report is further guided by principles of materiality, quantification, balance and consistency. Please find more details as below:

Materiality:

Through communication with stakeholders, interviews with management and evaluation of substantive topics, we were able to identify economic, environmental and social topics of this report. These topics have a meaningful impact on our operation as well as the decision-making process of our stakeholders.

Quantification:

All facts and data in this report have been checked and analyzed to demonstrate year over year comparison. For data used for metrics calculation please refer to the "Table of Performance Data" in this report.

Balance:

We disclose both positive and negative aspects of our operation and performance regarding ESG topics for our stakeholders to review.

Consistency:

To keep the comparability of information, unless otherwise stated, the statistic method in this report is consistent with the past. We also make sure that all information is listed in a meaningful order.

Reporting Period and Boundary

This report disclosed our key ESG performances and outlines our milestones on our sustainability journey during the reporting period from 1 January 2021 to 31 December 2021. Our reporting boundary covers 100% of the Group's total revenue in 2021, which is limited to wastewater treatment and its office operations in Mainland China.

BOD Statement

To create sustainable value, the Group endeavor to operate our business in an environmental and socially responsible way. We have set up effective corporate governance framework to manage and review our ESG policies and results. The Board is responsible for making ESG related strategies, overseeing environment management, people management, products quality control, safety, and customer satisfaction. Senior management also actively involves in ESG performance. And all departments run daily business in a manner consistent with our ESG strategies.

We conducted ESG materiality assessment and internal discussion to identify and focus on the metrics most relevant to the Group. This helps us prioritize and allocate resources and establish proper ESG plans, which are approved by the Board of Directors. In addition, the Board has oversight of our approach to sustainability and our processes and procedures to mitigate environmental impacts.

Stakeholder Engagement

As a responsible business, we have the responsibility to build a thriving future where we can create long-term value for our stakeholders. The stakeholders of the Group include shareholders, investors, customers, employees, business partners, industry practitioners, charity groups, etc.

To understand the full spectrum of ESG aspects of the operation covers, the Group has engaged both the internal and external stakeholders about its potential environmental and social impacts. We interact and communicate with stakeholders through different channels such as meetings, interviews, employee performance evaluation interviews and substantive issue surveys, listen to the voices of stakeholders, understand their demands and actively respond to their concerns.

Environmental Performance

“Technology revolution improve the eco-environment, a better eco-environment creates a harmonic earth, a harmonic earth gives us happy lives.” has always been our vision. We always integrate ESG considerations into our business plans to protect the environment, save energy, operate at low carbon and mitigate impacts on the environment.

Environment Protection

To our best knowledge, we have complied with all relevant laws and regulations regarding environmental issues during the reporting year in the regions we operate. This includes but not limited to the PRC Environmental Protection Law and the Law on the Prevention and Control of Water Pollution. During the year, the Group was not aware of any non-compliance with relevant standards, rules and regulations that have a significant impact on the Group.

We established targets to minimize the adverse impact that our operations may have on the environment. We regularly review our performance and assess the progress of these targets.

Change all company owned vehicles to electric vehicles by 2030

Move towards 100% paper recycling rate

Make sure all company owned appliances are with energy efficiency label by 2025

Achieve 100% emissions complying with legal requirements

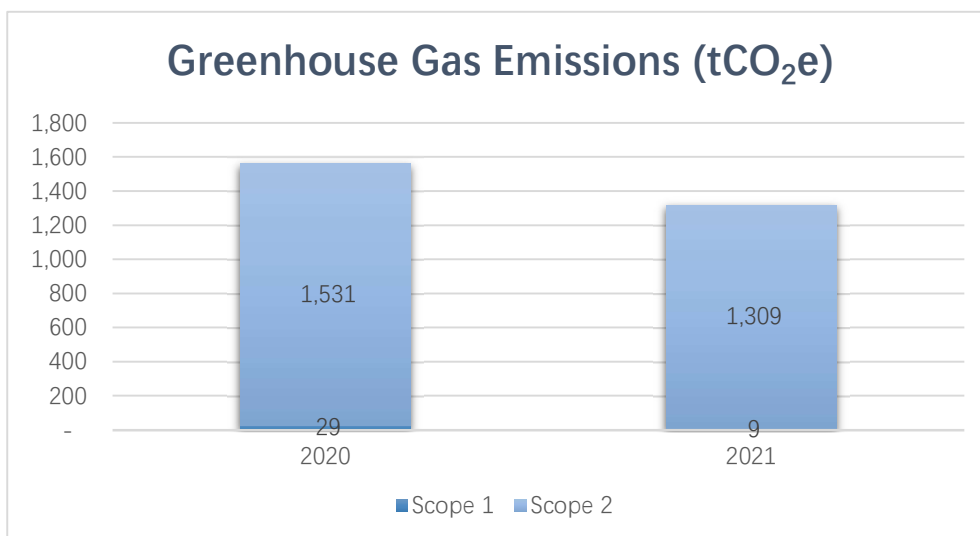

Energy Consumption

We dedicate to using energy efficiently to conserve resources and tackle climate change. In this reporting year, we consumed 7837.94 GJ of energy, which includes electricity and petrol. Compare with 2020, energy consumption decreased by 16%. Energy consumption intensity was 0.18 GJ per thousand revenues in HKD.

Greenhouse Gas Emissions

Greenhouse gas (“GHG”) emissions pose severe impact on our climate that we shall never neglect. We are motivated to cultivate awareness and behavioral changes in employee to cut GHG emission through daily practices such as selecting energy-efficient products. In this reporting year, total greenhouse gas emissions were 1318.53 tCO₂e, which decreased about 15% comparing with 2020. Total scope one emissions were 9.5 tCO₂e. Total scope two emissions were 1309.03 tCO₂e, which are mainly from electricity consumption. Emission intensity was 0.03 tCO₂e per thousand revenues in HKD.

Water Management

To cope with water global water shortage issue, we are devoted to using water resources wisely and efficiently. Within our operating locations, we emphasize water conservation practices and explore every possible means to better utilise and preserve water resources. In this reporting year, we consumed 7.59 m³ of fresh water in our office operations.

We strive to reduce water usage and conserve water resources. We also advise our customers to cut down water usage and promote water recycling by sewage treatment and water purification.

Material Consumption

The Group is committed to upholding high standards of environmental stewardship and to minimizing its impact on the environment and the community. We work diligently to reduce material consumption in our operations. We promote green workflow and require our employees to save water, save energy, use more digital files than hard copies and classify waste. At our water treatment sites, commonly applied chemicals are used efficiently. Compare with other similar projects in the industry, our usages are at a lower level. Other materials are reused in subsequent projects whenever possible.

The following table shows the material consumption in our business operations in this reporting year:

	Unit	2020	2021
Paper Consumption	Kg	278.05	298.05
Paper Recycling	kg	75.00	70.00
Tonner Consumption	kg	8.96	7.00
Polyaluminium chloride (PAC)	tonnes	2,947.05	2593.17
Polyacrylamide (PAM)	tonnes	98.25	86.44

Emissions Management

We strictly comply with all local and global laws and regulations regarding environmental protection. In our operations, we effectively monitor and control all elements of the environment to make sure that emissions of exhaust gas, wastewater and other wastes meet the requirements of corresponding standards and regulations.

Regarding emissions of exhaust gas and greenhouse gas, as well as discharging toxic and non-toxic wastes into water or on land, in this reporting year, the Group was not aware of any non-compliance with relevant standards, rules and regulations that have a significant impact on the Group.

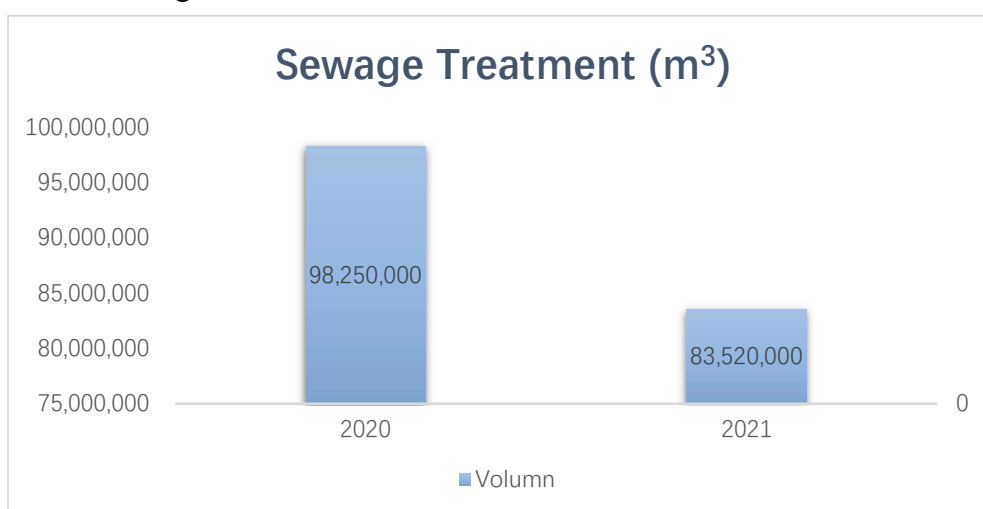

Exhaust Gas Emissions

The air contaminants produced by our company-owned vehicles include sulphur oxides (SO_x), nitrogen oxides (NO_x) and particulate matter (PM), which were 0.05 kg, 2.02 kg and 0.15 kg respectively. We encourage our employees to use public transport to reduce pollution.

Wastewater Discharge

We strictly comply with national Integrated wastewater discharge standard (GB8978-1996) and all other related national requirements. We are committed to guaranteeing up-to-standard wastewater discharge. As one of the best providers of wastewater treatment technology and products in China market, we keep close monitoring of our treatment facilities and undergo testing on quality of water treated. Illegal water emission is strictly forbidden. All treated water is channeled and air-tight before discharge. We promote water recycling and thus wastewater discharge is avoided. In this reporting year, 9 patents were applied to make sure that we can serve our customers in a more energy-saving and environment-friendly way. Moreover, we advise our customers and continuously develop new technology to reduce wastewater discharge to the environment to minimize water pollution.

One major market of our operation is water quality enhancement of rivers and lakes. We would like to cleanse and restore natural environment during our business by providing high quality water bodies. On sites of our projects, we work closely with customers to pay great attention not only to our own products but also to the wastewater discharging, energy recycling and sludge treatment throughout the entire project. During 2021, 83,520,000 cubic meters of sewage were treated by the sewage plants in Shandong, Guangdong, Hebei, Shaanxi, Heilongjiang, Tianjin, Anhui and Ningxia for which the Group provided technologies and services.

Waste Discharge

Wastes generated by the Group can be classified into two categories: 1) in the wastewater treatment plant, sludge containing heavy metals or pollutants is generated during water treatment and purification; 2) general waste was generated from our office operations. We improve the percentage of nonhazardous wastes recycling as much as possible. At the same time, all waste discharges complied with laws and related regulations. In this reporting year, 5,380 tonnes of sludge and 0.11 tonnes of general waste were generated. We guarantee air-tight enclosed channeling and storage of waste without exposure to the environment, followed by complete detoxification and dehydration of waste upon discharge point.

The Group is dedicated to promoting waste reduction and separation at the source. Unavoidable wastes are recycled and reused as far as possible, disposal is only our least preferred solution.

Climate Change

The Group is dedicated to managing the potential physical risks and transitional risks which could be caused by climate change. The Group also makes development strategies based on the industry's best practices to enhance the ability to respond to climate change. Taking several important factors into consideration, such as our business, capability, resource allocation, adaptable technologies and related public policies, we set our working target as below:

- Evaluate and maintain the list of carbon emissions to make strategies and targets accordingly;
- Set carbon emission reduction target and reduce carbon emissions step by step based on the industry's best practice;
- Improve energy usage efficiency in operation. Abandon fossil fuels step by step when possible;
- Use more renewable energy in operations. Change to low-carbon even zero-carbon energy when possible;
- Improve our operational process to cope with potential risks from climate change, including physical and transitional risks;
- Work with stakeholders, such as employees, suppliers and customers, to enhance their adaptive capabilities to respond to future climate change;
- Identify and evaluate potential risks and opportunities caused by climate change;
- Add policies regarding how to withstand extreme weather into our sustainability strategy;
- Pay close attention to global and domestic development in acclimation. Learn more related knowledge and best practices that can be adopted by the Group.

Policy Reviews and Assessment

The corporate governance committee works closely with different departments and assesses ESG-related policies whenever necessary. These policies are reviewed annually and reported to the BOD.

Employment and Labour Practices

Our employees are among our most valuable assets and key enablers in achieving our ESG targets. Based on the principle of "people-oriented", the Group protects our employees' rights and interests as much as we can. For our employees, we provide all kinds of training and development opportunities, ensure their health and safety, and create a working environment of diversity, harmony, equality and inclusion.

Recruitment

Fair and just recruitment is the first step to protecting employees' rights and interests. The Group strictly complies with relevant laws and regulations, including but not limited to the Employment Ordinance (Chapter 57 of the laws of Hong Kong) and the Labour Law of the PRC. Our HR department establishes and implements recruiting policies, which are overseen by Management, the internal audit department and the BOD to ensure effective compliance.

The Group recruits talents through the internet, which is more efficient. We are committed to offering equal opportunities to all applicants and employees irrespective of their inherent background. Any discrimination on race, gender, religion, national origin, physical or mental disability, age, sexual orientation, and gender identity is strictly prohibited during the employment process. We also have a report mailbox for employees so the Group would investigate and take action to prevent any prohibited conduct timely. Besides, in terms of diversity, we not only hire high-caliber local applicants for local positions but also give opportunities to candidates from other regions. In this reporting year, we hired 3 new employees including two males and one female.

Compensation and Welfare

We take fair and good compensation and welfare as one of the most important ways to improve our employees' happiness. The Group provides competitive compensation packages, pays social insurance and benefits as well as provides paid annual leave for our employees. We also purchased employer liability insurance and accident insurance for all employees.

In this reporting year, the Group is not aware of any non-compliance with relevant rules and regulations on employment, recruitment and promotion, working hours, holidays, equal opportunity, discrimination and welfare.

Labour Standard

As a responsible company, the Group strictly complies with all labor-related laws and regulations. An identification check is needed during the hiring process to ensure the employee reaches the legal minimum age and experience for working based on laws and regulations as well as company policies. If there is any violation, we will terminate the labor contract, investigate accountability, and punish responsible people. If there are illegal activities involved, the Group will report to law enforcement institutions.

During the year ended 31 December 2021, the Group has not identified any non-compliance in relation to child or forced labor-related laws and regulations.

Staff Development

We believe that the development of employees is closely related to the growth of the Group. So we actively provide all kinds of training and development opportunities for our employees. We strive to build our group into a career platform to attract various types of talents to work together.

Training

We pay high attention to our employees' growth and enable them to develop themselves to their fullest potential. The Group provides employees with a set of comprehensive development and training plans, including company regulation and policy training, work skills training and project management training. The training improves our employees' abilities in various ways and enhances the team spirit inside the Group. On the other hand, we offer special training for managers and technicians with job duties based on the needs of respective positions involving environmental risk management, safety, and quality assurance.

Training categories

In this reporting year, we had 22 sessions of training in a total of 439 hours with 45 attendees, which covered 100% of our employees.

Health and Safety

It is one of our prime responsibilities to provide a safe and healthy environment for all individuals associated with the Group including staff, contractors and all persons working within its premises. Fire facilities have been installed in all offices and premises. To prevent potential risks, we conduct emergency drills as required by the government. Above the basic insurance required by the government, we also purchased additional insurance for our employees to protect them in a better way.

We specified safety regulations to protect on-site workers. We strictly check the working documents of all on-site contractors to make sure that they have the qualification to work safely. We require our suppliers and business partners should also comply with occupational health and safety regulations. We assess the risk management input of all suppliers regularly and require them to purchase commercial insurance for their employees and necessary assets.

By the end of the year 2021, no work-related fatalities and no lost days due to work injury have been reported to our management. We have achieved no work injury accidents for three consecutive years.

Covid-19 Prevention and Control

In view of COVID-19 pandemic, the Group has implemented certain workplace health and safety measures to prevent our staff member infected. To comply with the Prevention and Control of Disease Ordinance (Chapter 599 of the laws of Hong Kong) and recommendations from Chinese Center for Disease Control and Prevention, we have requested our staff members to wear masks in workplace. Policies on flexible working hours and work-from-home were adopted to safeguard the health and safety of our employees. Personal protective equipment was offered to staff to avoid infection. Non-essential business travel is prohibited.

Operating Practice

Supply Chain Management

The Group is aware of the broader impact of our operations from every stage of our supply chain, so we have made policies and regulations accordingly. In addition to commercial considerations, we also emphasize on social and environmental considerations during the selection of suppliers. Addressing the sustainability risks in our supply chain is one of our major ways of minimizing potential negative environmental and social impacts of our procurement decisions.

These policies come up to an open, equitable and ethical purchasing process for all parties by offering equal opportunities to our suppliers and contractors from various geographical locations. Before making agreements with cooperative partners, monitoring visits and checks are conducted to make sure we have the same vision. At the same time, we would like to identify significant potential partners based on their possible impacts on both our operations and the environment. In this way, we believe our partners and us will elevate the standards of sustainability together.

In this reporting year, we worked with 20 suppliers, which are all from mainland China. Our relationship with partners is based on cooperation and mutual trust.

Service Responsibility

As a responsible company, the Group is fully aware of the importance to comply with relevant laws and regulations concerning the provision of our services. This includes but not limited to the Law of the PRC on Protection of Customer Rights and Interests, the Copyright Law of the People's Republic of China. We aim to deliver high-quality standards for the service provided. We constantly communicate with our customers to ensure our service level is up to standards. Communication and feedback channels are created for quality assurance and recall procedures. During the year ended 31 December 2021, the Group did not recall any products due to health or safety reasons, nor received any service-related complaints.

The Group respects and values the management of intellectual property rights with the patent registration process in place with the corresponding process in the regions we operate. We assure you that the Group's business and customer information are well protected with no misappropriation and are in line with our operation guidelines as well as industry best practices.

Personal Data Protection

The Group strictly follows the Personal Data (Privacy) Ordinance (Chapter 486 of the laws of Hong Kong) and the Law of the PRC on Protection of Customer Rights and Interests to protect the privacy of individuals about personal data accessed by the Group. The Group has its internal procedures to prevent customers' personal information from being misused. Personal data is collected only for lawful

and relevant purposes. During the year ended 31 December 2021, the Group did not record any personal data breach or leakage case.

Anti-corruption

The Group believes that high moral standards and credibility are essential for its long-term development. We strictly comply with relevant laws and regulations, including but not limited to the Prevention of Bribery Ordinance (Chapter 201 of the laws of Hong Kong), “Anti-Money Laundering Law of the People’s Republic of China”, and upholds requirements addressing anti-corruption, anti-bribery, and conflict of interest.

The Group has established a complete set of precaution and reporting procedures to ensure a fair and harmonious corporate culture. Employees can report corruption through reporting mailbox. We also delivered anti-corruption materials to our BOD and conducted online training accordingly. All employees must comply with the Code of Conduct. Any violation of regulations could result in disciplinary actions. The guidelines are delivered and clearly stated during employees’ orientation to ensure they are acquainted with the Code of Conduct.

Our employees are expected to carry out their work in a responsible and honest manner. All staff must avoid receiving any money or in-kind donation or gifts from either clients or any third parties. If there is any donation of significant amount, employee should immediately report to the senior. Integrity violation will result in serious penalty depending on the corruption cases. In this reporting year, the Group did not observe nor receive any legal cases regarding corrupt practices, bribery, conflicts of interest, extortion, fraud, money laundering brought against the Group or its employees.

Community

Community Investment

In China Environmental Technology Holdings Limited, we recognized the importance of our communities to the continued success and growth of our business. The Group pursue sustainable development of our community by assessing and managing the social impact of our operations on the marketplace and by supporting initiatives that create effective and lasting benefits to communities in our operating boundaries. We strive to exert positive impacts on our society amidst business operation and encourage our teams to engage in their communities through donations, volunteering activities and fundraising work.

Data Summary

		2021	2020
Environment	Exhaust Gas		
	Nitrogen oxides(kg)	2.02	-
	Sulphur oxides(kg)	0.05	-
	Particulate matter(kg)	0.15	-
	Greenhouse Gas		
	Scope 1: direct GHG emissions (tCO ₂ e)	9.50	28.86
	Scope 2: indirect GHG emissions from energy (tCO ₂ e)	1,309.03	1,529.94
	Scope 3: other GHG emissions (tCO ₂ e)	1.10	1.34
	Total GHG emissions (tCO ₂ e)	1,319.62	1,560.14

ESG Report Content Index

Key Performance Indicators	HKEX ESG requirements	Chapter/Appendix	
A. Environment			
Aspect A1: Emissions	General Disclosure Relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste. Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer	Emissions management	
	KPI A1.1	The types of emissions and respective emissions data.	Emissions management
	KPI A1.2	Direct (Scope 1) and energy indirect (Scope 2) greenhouse gas emissions (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Emissions management
	KPI A1.3	Total hazardous waste produced (in tonnes) and, (where appropriate), intensity (e.g. per unit of production volume, per facility).	Emissions management
	KPI A1.4	Total non-hazardous waste produced (in tonnes) and, where appropriate, intensity (e.g. per unit of production volume, per facility).	Emissions management
	KPI A1.5	Description of emissions target(s) set and steps taken to achieve them.	Environment management
	KPI A1.6	Description of how hazardous and non-hazardous wastes are handled, and a description of reduction target(s) set and steps taken to achieve them.	Environment management
Aspect A2: Use of Resources	Policies on the efficient use of resources, including energy, water and other raw materials.	Environment management	
	KPI A2.1	Direct and/or indirect energy consumption by type (e.g. electricity, gas or oil) in total (kWh in '000s) and intensity (e.g. per unit of production volume, per facility).	Environment management
	KPI A2.2	Water consumption in total and intensity (e.g. per unit of production volume, per facility).	Environment management
	KPI A2.3	Description of energy use efficiency target(s) set and steps taken to achieve them.	Environment management
	KPI A2.4	Description of whether there is any issue in sourcing water that is fit for purpose, water efficiency target(s) set and steps taken to achieve them.	Environment management
	KPI A2.5	Total packaging material used for finished products (in tonnes) and, if applicable, with reference to per unit produced.	We do not report on this issue as it is not material to our business. Our business does not manufacture or sell any physical product.

Aspect A3: The Environment and Natural Resources	Policies on minimizing the issuer's significant impact on the environment and natural resources.		Environment management
	KPI A3.1	Description of the significant impacts of business activities on the environment and natural resources and the actions taken to manage them.	Environment management
Aspect A4: Climate Change	Policies on identifying and handling significant climate related matters which have or will impact on the issuer.		Policies regarding Climate change (check and review)
	KPI A4.1	Description of the significant climate-related issues which have impacted, and those which may impact, the issuer, and the actions taken to manage them.	Policies regarding Climate change (check and review)
B. Social			
Aspect B1: Employment	General Disclosure Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, and other benefits and welfare.		Recruitment and compensations
	KPI B1.1	Total workforce by gender, employment type (for example, full- or parttime), age group and geographical region.	Data summary
	KPI B1.2	Employee turnover rate by gender, age group and geographical region.	Data summary
Aspect B2: Health and Safety	General Disclosure Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to providing a safe working environment and protecting employees from occupational hazards.		Health and safety Covid-19 prevention and control
	KPI B2.1	Number and rate of work-related fatalities occurred in each of the past three years including the reporting year.	Health and safety Data Summary
	KPI B2.2	Lost days due to work injury.	Health and safety Data Summary
	KPI B2.3	Description of occupational health and safety measures adopted, how they are implemented and monitored.	Health and safety Covid-19 prevention and control
Aspect B3: Development and Training	General Disclosure Policies on improving employees' knowledge and skills for discharging duties at work. Description of training activities.		Training
	KPI B3.1	The percentage of employees trained by gender and employee category (e.g. senior management, middle management).	Data Summary
	KPI B3.2	The average training hours completed per employee by gender and employee category.	Data Summary
Aspect B4: Labour Standards	General Disclosure Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to preventing child and forced labour.		Labour standards
	KPI B4.1	Description of measures to review employment practices to avoid child and forced labour.	Labour standards
	KPI B4.1	Description of steps taken to eliminate such practices when discovered.	Labour standards

Aspect B5: Supply Chain Management	General Disclosure Policies on managing environmental and social risks of the supply chain.	Supply chain management	
	KPI B5.1	Number of suppliers by geographical region.	Supply chain management Data summary
	KPI B5.2	Description of practices relating to engaging suppliers, number of suppliers where the practices are being implemented, and how they are implemented and monitored.	Supply chain management
	KPI B5.3	Description of practices used to identify environmental and social risks along the supply chain, and how they are implemented and monitored.	Supply chain management
	KPI B5.4	Description of practices used to promote environmentally preferable products and services when selecting suppliers, and how they are implemented and monitored.	Supply chain management
Aspect B6: Product Responsibility	General Disclosure Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to health and safety, advertising, labelling and privacy matters relating to products and services provided and methods of redress.	Product responsibility	
	KPI B6.1	Percentage of total products sold or shipped subject to recalls for safety and health reasons.	Product responsibility Data summary
	KPI B6.2	Number of products and service-related complaints received and how they are dealt with.	Product responsibility Data summary
	KPI B6.3	Description of practices relating to observing and protecting intellectual property rights.	Product responsibility
	KPI B6.4	Description of quality assurance process and recall procedures.	Product responsibility
	KPI B6.5	Description of consumer data protection and privacy policies, and how they are implemented and monitored.	Privacy protection
Aspect B7: Anti-corruption	General Disclosure Information on: (a) the policies; and (b) compliance with relevant laws and regulations that have a significant impact on the issuer relating to bribery, extortion, fraud and money laundering.	Anti-corruption	
	KPI B7.1	Number of concluded legal cases regarding corrupt practices brought against the issuer or its employees during the reporting period and the outcomes of the cases.	Anti-corruption
	KPI B7.2	Description of preventive measures and whistle-blowing procedures, and how they are implemented and monitored.	Anti-corruption
	KPI B7.3	Description of anti-corruption training provided to directors and staff.	Anti-corruption

Aspect B8: Community Investment	General Disclosure		Community investment
	Policies on community engagement to understand the needs of the communities where the issuer operates and to ensure its activities take into consideration the communities' interests.		
	KPI B8.1	Focus areas of contribution	Community investment
KPI B8.2	Resources contributed	Community investment
