CHAIRMAN'S STATEMENT

2021年是以應對挑戰為主旋律的一年，我們面對著市場態勢與外部環境的諸多不確定性，以信念夯實根基，以品質保障穩定，以變革驅動發展。我們積極應對監管要求、順應監管政策、擁抱行業變化，持續踐行成為「幸福生活營運商」的初心，致力於實現公司的可持續發展。

對於企業，我們堅持深耕提質，穩健發展。在整體發展戰略上，我們遵循「1+1+X」戰略，聚焦長期深耕地區，持續挖掘區域與城市、板塊價值。2021年，我們以浙江為大本營，泛長三角為主戰場，在不斷深耕中總結出「根據地模式」、「旗艦模式」等與本集團發展相匹配的戰略抓手，不斷夯實企業成長質量、提高產品與服務質量。

對於產品，我們堅持品質服務，守正創新。我們堅持持續提升產品質量，充分發揮四大產品線優勢及特質，實現對客群「全周期、全地域、全齡段」的需求覆蓋，精準落子，為客戶提供最具適配性的住宅產品。在服務層面，我們聚焦保障工程進度、產品交付以及服務平台的發展，為客戶帶來交付全程的優質體驗。

對於環境，我們堅持綠色共生，和諧發展。本集團持續踐行長期主義，致力於成為助力綠色變革的房地產企業。在2021年，我們持續加強綠色建造和綠色營運，積極識別和應對氣候變化帶來的影響，並以研發創新促進綠色設計和綠色施工，持續推動節節減排和污染物管控，為國家實現「碳達峰」、「碳中和」目標貢獻一份力量。

The main theme of 2021 was addressing the challenges. In the face of the considerable uncertainties in the market and in the external environment, we were able to solidify our foundations with conviction, ensure stability with quality and drive development with change. We actively responded to regulatory requirements, complied with regulatory policies and embraced changes in the industry, stayed true to our initial aspiration to be a "Happy Life Operator (幸福生活營運商)" and strived to achieve the sustainable development of the Company.

As for business development, we stay committed to the strategy of deep rooting and quality improvement to pursue sound development. In terms of overall development strategy, we followed the "1+1+X" strategy, focusing on long-term deep rooting, and continued to explore the value of regions, cities and segments. In 2021, with Zhejiang as the main base and Pan-Yangtze River Delta as the main battlefield, the Group has concluded the "localized model (根據地模式)" and "flagship model (旗艦模式)" and other strategic grasps that match with the development of the Group in the course of continuous deep cultivation, so as to constantly strengthen the quality of corporate growth and improve the quality of products and services.

As for our products, we persevered in providing quality services and making innovations based on the traditions. We have been continuously improving the quality of our products, and fully leveraged the advantages and product characteristics of the four product lines to achieve customer needs of "full-cycle, full-region and full-age", so as to precisely deliver the most suitable residential products to the customers. As for our services, we focused on ensuring the progress of the construction projects and the delivery of products and the development of our service platforms to bring our customers a quality experience throughout the whole delivery process.

As for the environment, we are committed to green co-existence and harmonious development. While adhering to long-termism, the Group strives to be a real estate enterprise that contributes to the green transformation. In 2021, we continued to strengthen green construction and green operation, actively identified and addressed the impacts of climate change, promoted green design and green construction through research and development innovations, and continued to promote energy saving and pollutant control, thus contributing to the country's goal of "carbon peaking" and "carbon neutrality".

對於員工，我們堅持以人為本，精誠團結。我們努力建設祥生大家庭，為員工創造公平平等的工作環境，保障員工基本權益。我們將員工的健康與安全放在首位，並充分考慮員工的福祉。2021年，我們正式啟動「共享基金」，對生活困難的員工進行「1對1」精準幫扶，切實增強員工的安全感和歸屬感。

對於社會，我們堅持與愛隨行，美好與共。「落其實者思其樹，飲其流者懷其源」是祥生控股賴以發展的公益信念，我們積極投身城市建設、扶貧助學、助殘助孤、賑災慈善等各項公益事業。以「四葉草計劃」為載體，以「健康基金」、「助學基金」、「童夢基金」、「共享基金」四大子項目為抓手，我們持續攜手各方落地公益活動。

立足當下，面對挑戰，祥生控股將在未來繼續以匠心築就幸福生活，為消費者提供更好的產品和服務，為股東及投資者創造更大的價值，為提升社會幸福感作出努力，為「成為一家有溫度、有擔當、健康可持續的品質標杆企業」而持續奮鬥。

As for our employees, we are always people-oriented and we stress solidarity. We seek to build a Shinsun family, create a fair and equal working environment for our employees and protect their basic rights and interests. We place the health and safety of our employees as our top priority and give due consideration to their well-being. The Sharing Fund project was officially launched in 2021, targeting to provide one-to-one precise support to the employees who have difficulties in life so as to enhance their sense of security and belonging.

As for the society, we have always tried to share love and contribute to the greater good. In our public welfare endeavors, we believed in the saying "The one who eats a fruit thinks about the tree; the one who drinks water thinks about the water source". We actively participated in various public welfare undertakings, such as urban construction, poverty alleviation and education, helping the disabled and orphans and disaster relief and charity. Under the Clover Plan, we have continued to join hands with various parties to implement public welfare and support activities through the four sub-items of Health Fund, Education Fund, Children's Dream Fund and Sharing Fund.

We will remain firmly grounded and stand up to the challenges squarely, and will stay committed to creating a happy life with ingenuity. Through providing better products and services for consumers, creating more values for shareholders and investors, and contributing to the public well-being, we will continue to strive to become a warm, responsible, healthy and sustainable quality benchmark enterprise.

During the Reporting Period, we continue to improve and innovate the “energy-gathering” landscape system, which covers five major components, namely the “ritual system”, “self-cultivation system”, “vitality system”, “intelligent system” and “ecosystem”, which organically combines community landscape with aesthetic, safety, social, health and other user needs, so that property owner can feel the humanized care. 祥生杭州大學城北景觀設計 Shinsun Hangzhou College Town North Landscape Design

對於祥生杭州大學城北地塊，本集團充分考慮可持續性與健康性原則，基於「聚能」景觀系統的五大維度，在傳統全齡社區的基礎上植入「健康」概念，對業主日常的生活細節進行延伸，加強了對健康的關注與呵護。從客戶歸家、康體健身、兒童活動、園林綠地、設施設備等不同層面進行全方位考慮，構築了多樣化的社區景觀。

Technological innovation

Shinsun Holdings is committed to applying innovative technologies to product design, actively exploring the research and development efforts on assembled building technologies, exploring solutions to improve building quality, safety and construction efficiency, and empowering the product transformation and upgrade of Shinsun Holdings.

案例 Case

PC¹技術在裝配式建築中的應用 Application of PC¹ Technology in Assembled Buildings

祥生控股所在的多個營運地均對住宅性質土地有裝配率與預制率要求，例如紹興、寧波、舟山、諸暨等地區。PC構件是多數裝配式建築項目的重要組成部分，我們在廚房和衛生間內牆部位採用陶粒混凝土牆板（PC牆板），水電開槽。相對傳統的頁岩磚，該技術只需對線盒位置部分機械開槽，在減少工程量的同時又保持美觀。

Several locations where Shinsun Holdings operates have assembly and prefabrication rate requirements on land for residential use, such as Shaoxing, Ningbo, Zhoushan, Zhuji, etc. PC components are important part of most assembled building projects, and we use ceramsite concrete wall panels (PC wall panels) for the interior wall parts of kitchens and bathrooms with plumbing and electrical slotting. Compared to the traditional shale tiles, this technology only requires partial mechanical slotting at the wire box locations, reducing the amount of work while maintaining aesthetics.

出於對PC技術專業性的考慮，為了保證項目PC工程保證保量按時完成，祥生控股會委派專門的技術負責人於項目PC工程進行施工前的技術交底。

Out of consideration for the professionalism of PC technology, in order to ensure the quality and timely completion of the PC project of projects, Shinsun Holdings will assign a special technical person to conduct pre-construction technical briefing for the PC project of projects.

**案例
Case****將疫情防護融入室內裝修****Integrating Prevention and Protection against the COVID-19 Pandemic into Interior Decoration**

基於對新冠疫情防護的經驗總結，我們將室內空間設計與常態化的防疫需求相融合，在玄關櫃入口處做開放式設計，方便進門的消毒、殺菌環節，且在底部預留紫外線消毒燈插座，可實現全方位安全處理。同時，我們在玄關櫃中段進行封閉式設計，方便收納，避免未消毒的衣物與室內儲存物品產生直接接觸。

Based on our experience in prevention and protection against the COVID-19 pandemic, we integrate the interior space design with the regular pandemic prevention needs by making an open design at the entrance of the entrance cabinet to facilitate the disinfection and sterilization link at the entrance door, and reserving UV disinfection lamp sockets at the bottom, which can achieve all-round safety treatment. At the same time, we make a closed design in the middle section of the entrance cabinet to facilitate storage and avoid direct contact between unsterilized clothes and indoor storage items.

Creating Quality Products

The Group adheres to its corporate positioning of “happy life operator”, with the vision of becoming a healthy and sustainable quality benchmark enterprise, and insists on providing high-quality and reliable products to its customers. Based on a systematic and hierarchical quality management process, we strictly require ourselves to improve the quality management system through digital means, continuously improve the standard of quality inspection, and strengthen the quality management level of our personnel.

祥生控股嚴格遵循《中華人民共和國建築法》、《建設工程質量管理條例》、《建設工程施工現場管理規定》、《住宅建築規範》、《建築工程施工質量驗收統一標準》等國家及地方法律法規和標準規範。在項目立項及設計階段，我們嚴格按照相關要求開展重大地質風險評估和第三方審圖，保障重要設計結構的安全性。在施工階段，我們通過集團、區域、事業部三級管控，建立了覆蓋事前、事中、事後的質量管理流程，對施工過程中的質量風險進行主動識別和預防，並通過評估閉環式提升質量管控效率。

In the construction stage, we have established a quality management process covering before, during and after the relevant events through the control on three-level of the Group, region and business unit to proactively identify and prevent quality risks in the construction process and enhance the efficiency of quality control by evaluating the closed-loop type.

施工過程質量管理流程
Quality Management Process in Construction Process

報告期內，我們著重加強了質量檢查制度的建設。為持續提高工程品質，規範銷售前的項目聯合檢查管理動作，我們編製了《祥生地產銷售三寶聯合檢查及評分管理辦法》。同時，為了持續響應市場發展需求，我們不斷提升迭代各工程管理制度和施工作業標準指引以及辦法，並升級了第三方專項飛檢制度。本年度，我們編製完成《祥生地產飛行巡檢5.0體系》，細化了質量管理的評分項，並加強了對施工過程中紅線管理行為的關注，提升項目工程質量和管理水平，從而降低項目施工和交付風險。

高品質交付質量是我們提升產品力的重要保障。本年度，本集團在季度飛行檢查的基礎上，增加了《地下工程第三方專項飛行檢查制度》，進一步規範施工過程中、交付前等環節的管理標準及流程。為了有效預防交付問題，我們以「工地開放日」的形式，聯動業主參與工程質量監督，向主業展示施工過程及交付效果，用經得起推敲的品質獲得客戶的滿意。2021年，本集團的工程第三方飛行檢查綜合得分86.99，較2020年相比穩健提升。

施工第三方的質量提升也是祥生控股質量管理體系的重要目標之一。報告期內，我們進一步修訂了《祥生地產供方管理制度》，對供方的定級、評估、以及違規處罰等全流程管理機制進行了優化。

During the Reporting Period, we focused on strengthening construction of the quality inspection system. In order to continuously improve the quality of the projects and standardize the management actions of joint inspection of projects before sales, we prepared the Administrative Measures of Shinsun Property for Joint Inspection and Scoring of Three Treasures for Sales. This year, we completed the preparation of Unannounced Inspection 5.0 System of Shinsun Property, which refined the scoring items for quality management and strengthened the focus on red-line management behaviors during construction to improve project works quality and management, thereby reducing project construction and delivery risks.

High quality delivery is an important guarantee for us to enhance our product power. This year, the Group added the Third Party Special Unannounced Inspection System for Underground Construction to the quarterly unannounced inspection to further standardize the management standards and processes during the construction process and before delivery. In order to effectively prevent delivery problems, we have adopted the form of "construction site open day" to link up with the property owners to participate in project quality supervision, show the construction process and delivery results to the property owners, and gain customer satisfaction with quality that can stand up to scrutiny. In 2021, the composite score of the Group's projects in the third-party unannounced inspection was 86.99, realizing a steady increase as compared to 2020.
