Despite the recurring COVID-19 pandemic and complex international environment continuing caused new impacts on the recovery of the world economy, China stayed ahead of the world in terms of economic growth and pandemic prevention. Meanwhile, China has been promoting the "Dual Carbon" goal which is to achieve carbon emission peak by 2030 and carbon neutrality by 2060, with imposing relevant policies on promoting energy transformation drives the rapid growth of natural gas consumption. As China's carbon neutrality target has been further specified, efforts have been made to accelerate the development of low-carbon energy structure. In the context of the trend of the clean energy, the increasing demand for a shift from "coal to gas", it is clearly that natural gas will be one of the dominant energy sources in the energy consumption market, in which the Group operates.

Seizing opportunities in the transformation of the energy structure and the development of the clean energy sector, the Group has continued to optimize the cost and business structures and to seek and explore the expansion of its LNG distribution channel through proposed collaboration with industry player(s) and/or state-owned enterprises; foster strategic cooperation with global renowned oil and gas supplier to facilitate the trading business of the Group and sought to further expand collaboration with quality end users of nature gas.

### BUSINESS REVIEW Group results

For the year ended 31 March 2022 and at present, the Group has been principally engaged in (i) trading of oil and gas products and the provision of related consultancy services; and (ii) processing, distribution, sales, trading and transportation of LNG and other auxiliary operations and networks in the PRC.

For the year ended 31 March 2022, the Group recorded gross amounts from operations of approximately RMB7,902 million (2021: approximately RMB7,189 million) with profit after tax of approximately RMB96 million (2021: approximately RMB52 million). The Group's performance for the year ended 31 March 2022 was contributed mainly by the production and sales of LNG (as further elaborated under the section headed "Production and sales of LNG").

#### Production and sales of LNG

During the year ended 31 March 2022, the Group produced approximately 522 million cubic meters of LNG, representing a decrease of approximately 4 million cubic meters or 0.8% compared with the last year. The revenue from the sales of LNG for the year ended 31 March 2022 was approximately RMB1,631 million representing an increase of approximately RMB458 million or 39.1% compared with the last year, contributing approximately 20.6% of the total turnover of the Group. Gross profit, increased by approximately RMB41 million to approximately RMB204 million (2021: approximately RMB163 million), gross profit margin, however, decreased slightly from approximately 13.9% to approximately 12.5%.

With the growing gap between LNG consumption and domestic production, coupled with the substantial increase in domestic gas prices, has led to a significant increase in the average selling prices of LNG. However, as the purchase cost of natural gas surged simultaneously due to the high and volatile of the import gas prices, the gross profit margin for the production and sales of LNG decreased marginally.

### 業務回顧集團業績

截至二零二二年三月三十一日止年度及目前,本集團主要在中國從事(i)買賣石油及天然氣產品以及提供相關諮詢服務;及(ii)液化天然氣的加工、分銷、銷售、貿易及運輸以及其他附屬業務及網絡。

截至二零二二年三月三十一日止年度,本集團錄得經營業務總額約人民幣7,902,000,000元(二零二一年:約人民幣7,189,000,000元),除稅後溢利約人民幣96,000,000元(二零二一年:約人民幣52,000,000元)。截至二零二二年三月三十一日止年度,本集團的表現主要來自液化天然氣的生產及銷售(於「生產及銷售液化天然氣」章節進一步闡述)。

### 生產及銷售液化天然氣

截至二零二二年三月三十一日止年度,本集團生產約522,000,000立方米的液化天然氣,較去年減少約4,000,000立方米或0.8%。截至二零二二年三月三十一日止年度,液化天然氣的銷售收益約為人民幣1,631,000,000元,較去年增加約人民幣458,000,000元或39.1%,佔本集團總營業額約20.6%。毛利增加約人民幣41,000,000元至約人民幣204,000,000元(二零二一年:約人民幣163,000,000元),然而毛利率由約13.9%略微下降至約12.5%。

隨著液化天然氣消耗量與國內產量的差距不斷擴大,加上國內天然氣價格大幅上漲,導致液化天然氣的平均售價大幅上升。然而,由於進口天然氣價格高昂且波動大導致天然氣採購成本同步上漲,生產及銷售液化天然氣的毛利率略微下降。

### Sales of piped gas and construction of gas pipeline infrastructure

During the year ended 31 March 2022, revenue arising from sales of piped gas and related services increased to approximately RMB662 million from approximately RMB493 million, representing an increase of approximately RMB169 million or 34.3% compared with the last year, contributing approximately 8.4% of the total turnover of the Group. Gross profit, however, decreased to approximately RMB14 million from approximately RMB59 million, as a result of a huge increase in the purchase price of the natural gas since the fourth quarter of 2021. Gross profit margin, decreased significantly from approximately 12% to 2.1%.

### Oil and gas transactions

During the year ended 31 March 2022, gross amounts of oil and gas sales contracts increased to approximately RMB5,528 million from approximately RMB5,418 million, representing an increase of approximately RMB110 million or 2% compared with the last year, contributing approximately 70% of the total turnover of the Group. Gross profit, increased to approximately RMB74 million from approximately RMB68 million, gross profit margin increased from approximately 1.2% to 1.3%.

At present, the international oil prices surged due to the war in Ukraine, and the war has left global oil and gas markets in the uncertain and unstable, causing supply issues and price spikes. In facing this crisis, the management will continue to adopt cautionary steps while seeking for profitable trading opportunities.

### **Prospect**

Looking ahead, despite the recurring COVID-19 pandemic continuing to create a series of uncertainties, the global economy is expected to continue to recover at a steady pace. Affected by the geopolitical turmoil, energy prices fluctuate at high level, causing an impact on short-term energy supply. Under the effective measures imposed by the PRC government, the fundamentals for the long-term improvement of China economy will remain unchanged.

Along with the steady recovery of the domestic economy and a clear low-carbon goal, the PRC government persists in preventing and controlling pollution with full force, being resolute in promoting clean production in enterprises, and steadily implements coal-control objectives in key regions, and as a result the demand of natural gas will maintain steady growth. The Group expects that such policies in the natural gas market would be conducive to the market environment, in which the Group operates.

### 銷售管道天然氣及興建天然氣管道 基礎設施

截至二零二二年三月三十一日止年度,管道天然氣及相關服務的銷售收益由約人民幣493,000,000元增加至約人民幣662,000,000元,較去年增加約人民幣169,000,000元或34.3%,佔本集團總營業額約8.4%。然而,毛利由約人民幣59,000,000元減少至約人民幣14,000,000元,主要是由於自二零二一年第四季度開始天然氣採購價大幅上漲所致。毛利率由約12%大幅下降至2.1%。

### 石油及天然氣交易

截至二零二二年三月三十一日止年度,來自石油及天然氣銷售合約總額由約人民幣5,418,000,000元增加至約人民幣5,528,000,000元,較去年增加約人民幣110,000,000元或2%,佔本集團總營業額約70%。毛利由約人民幣68,000,000元增加至約人民幣74,000,000元,毛利率由約1.2%增加至1.3%。

目前,由於烏克蘭的戰爭,國際油價飆升, 而戰爭導致全球石油及天然氣市場處於不 確定及不穩定的狀態,引發供應問題及價 格飆升。面臨此危機,管理層將繼續採取 審慎措施,同時尋求有利可圖的貿易機會。

### 前景

展望未來,儘管新冠肺炎疫情的反覆持續帶來一系列不確定因素,全球經濟預期將繼續穩步復甦。受地緣政治動盪影響,能源價格高位波動,對短期能源供應造成影響。在中國政府實施的有效措施下,中國經濟長期向好的基本面將維持不變。

隨著國內經濟穩步復甦,低碳目標明確,中國政府全力預防及控制污染,堅決推動企業清潔生產,在重點地區穩步實現煤炭控制目標,因此,天然氣需求將會保持穩定增長。本集團預期有關天然氣市場的政策將對本集團經營所在的市場環境有利。

The management is mindful of the market environment and will continue to adopt cautionary steps and implement various strategies to mitigate the adverse impact on the business arising from challenges as in this market condition. Looking forward, the Group will continue to develop its businesses in natural gas sector and to explore new business opportunities in order to create value for its shareholders.

管理層密切關注市場環境,並將繼續採取謹慎措施及實施各項策略,以緩解在此市場狀況下各種挑戰對業務帶來的不利影響。展望未來,本集團將繼續發展其在天然氣領域的業務,並探索新的商機,以為其股東創造價值。

In determining the recoverable amount, the Group's management assessed the value in use of the cash-generating unit by discounting the estimated future cash flows expected to arise from the cash-generating unit to the present value. Significant judgment and assumptions were required in the process such as the use of discount rates, growth rates, estimated average purchase price of natural gas and average selling price of liquefied natural gas during the forecast period as set out in note 4 to the consolidated financial statements.

於釐定可收回金額時, 貴集團的管理層評估現金產生單位的使用價值,方法為將現金產生單位預期產生的估計未來現金流量貼現至現值。誠如綜合財務報表附註4所載,該過程需要作出重大判斷及假設,如採用預測期內之貼現率、增長率、天然氣估計平均購買價及液化天然氣平均售價。

# AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion, solely to you, as a body, in accordance with section 90 of the Bermuda Companies Act and our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors of the Company.

- Conclude on the appropriateness of the Company's directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

# 獨立核數師報告書

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in the independent auditor's report is Pang Wai Hang.

從與治理層溝通的事項中,本行決定哪些事項對本期間綜合財務報項項。除我最為重要,因而構成關鍵審核事事項項,或法規不容許公開披露此等事項或此等事項的情況下,本行認為披露此等事項的有別不良後果將超越中級不否會於核數師報告中描述此等事項。

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of HKFRS 2 Share-based Payment, leasing transactions that are accounted for in accordance with HKFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in HKAS 2 Inventories or value in use in HKAS 36 Impairment of Assets

For financial instruments which are transacted at fair value and a valuation technique that unobservable inputs is to be used to measure fair value in subsequent periods, the valuation technique is calibrated so that at initial recognition the results of the valuation technique equals the transaction price.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved where the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power over the investee to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Group, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### **Basis of consolidation (Continued)**

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income of subsidiaries are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with Group's accounting policies.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Goodwill

Goodwill arising from a business combination is carried at cost less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A cash-generating unit (or group of cash-generating units) to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising on an acquisition in a reporting period, the cash-generating unit (or group of cash-generating units) to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit (or group of cash-generating units).

On disposal of the relevant cash-generating unit or any of the cash-generating unit within the group of cash-generating units, the attributable amount of goodwill is included in the determination of the amount of profit or loss on disposal. When the Group disposes of an operation within the cash-generating unit (or a cash-generating unit within a group of cash-generating units), the amount of goodwill disposed of is measured on the basis of the relative values of the operation (or the cash-generating unit) disposed of and the portion of the cash-generating unit (or the group of cash-generating units) retained.

The Group's policy for goodwill relating to the acquisition of an associate is described below.

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Investments in associates

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

# 於聯營公司之投資

聯營公司為本集團對其具有重大影響力的實體。重大影響力乃指可參與投資對象之財務及營運政策決定的權力,惟對該等政策並無控制權或共同控制權。

聯營公司的業績與資產及負債,乃按 權益會計法列入該等綜合財務報表。 作權益會計用途的聯營公司財務報表 按本集團就相似情形下的類似交易和 事件採用的相同會計政策編製。根據 權益法,於聯營公司之投資初步在綜 合財務狀況報表按成本確認,並於其 後對確認本集團應佔該聯營公司之損 益及其他全面收入作出調整。當本集 團應佔一間聯營公司虧損超出其於該 聯營公司之權益(包括任何實際上構 成本集團於聯營公司投資淨值其中部 分之長遠權益)時,本集團會終止確認 其應佔之進一步虧損。當本集團產生 法定或推定責任或代表該聯營公司付 款時,方會確認額外虧損。

For the year ended 31 March 2022 截至二零二二年三月三十一日止年度

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Investments in associates (Continued)

The Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill, which forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with HKAS 36 to the extent that the recoverable amount of the investment subsequently increases.

When the Group's ownership interest in an associate is reduced, but the Group continues to apply the equity method, the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest is reclassified to profit or loss if that gain or loss would be required to be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with its associate, profits and losses resulting from the transactions with the associate are recognised in the Group's consolidated financial statements only to the extent of interests in the associate that are not related to the Group.

倘一集團實體與其聯營公司交易,與 該聯營公司交易所產生之盈虧僅於該 聯營公司權益與本集團無關的情況下, 方會於本集團綜合財務報表內確認。

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Revenue recognition

Revenue is recognised to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Group uses a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

#### 收益確認

本集團確認收益以描述向客戶轉讓承 諾貨品或服務,該金額反映實體預期 就交換該等貨品或服務有權獲得的代 價。具體而言,本集團使用五步法確 認收益:

- 步驟一:識別與客戶訂立之合約
- 步驟二:識別合約中之履約責任
- 步驟三: 釐定交易價
- 步驟四:將交易價分配至合約中 的履約責任
- 步驟五:於(或隨著)實體完成履 約責任時確認收益

本集團於(或隨著)完成履約責任時(即 與特定履約責任相關的貨品或服務的 「控制權」轉讓予客戶時)確認收益。

履約責任指一項明確貨品或服務(或一批貨品或服務)或一系列大致相同的明確貨品或服務。

倘符合以下其中一項條件,則控制權 為隨時間轉移,而收益則參考相關履 約責任的完成進度隨時間確認:

- 客戶於本集團履約時同時收取及 消耗本集團履約所提供的利益;
- 於增設或加強資產時,本集團履 約增設或加強客戶控制的資產;
- 本集團的履約並無增設對本集 團具有替代用途的資產,而本集 團對迄今已完成履約的款項擁 有強制執行權。

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### **Revenue recognition (Continued)**

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

#### Contract assets and contract liabilities

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with HKFRS 9. In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis.

## Over time revenue recognition: measurement of progress towards complete satisfaction of a performance obligation

Output method

The progress towards complete satisfaction of a performance obligation in relation to the LNG transportation service is measured based on output method, which is to recognise revenue on the basis of direct measurements of the value of the goods or services transferred to the customer to date relative to the remaining goods or services promised under the contract, that best depict the Group's performance in transferring control of goods or services.

#### Input method

The progress towards complete satisfaction of a performance obligation in relation to the construction of gas pipeline infrastructure is measured based on input method, which is to recognise revenue on the basis of the Group's efforts or inputs to the satisfaction of a performance obligation relative to the total expected inputs to the satisfaction of that performance obligation, that best depict the Group's performance in transferring control of goods or services.

合約負債指本集團因已向客戶收取代價(或代價金額到期應付),而須向客戶轉讓貨品或服務的責任。

就同一份合約而言,合約資產及合約負債按淨額基準入賬及呈列。

#### 隨時間確認收益:計量完成履約責 任的進度

#### 輸出法

完成履行與液化天然氣運輸服務有關的履約責任的進展根據輸出法衡量,即根據直接計量迄今轉移予客戶的貨品或服務價值相對合約下承諾的餘下貨品或服務確認收益,有關計量最能説明本集團於轉移貨品或服務的控制權時的表現。

#### 投入法

完成履行與天然氣管道基礎設施建設 有關的履約責任的進度乃根據投入法 衡量,即根據本集團為履行履約責任 的付出或投入相比履行履約責任的總 預期投入而確認收益,有關計量最能 説明本集團於轉移貨品或服務控制權 時的表現。

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### Revenue recognition (Continued) Principal versus agent

When another party is involved in providing goods or services to a customer, the Group determines whether the nature of its promise is a performance obligation to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for those goods or services to be provided by the other party (i.e. the Group is an agent).

The Group is a principal if it controls the specified good or service before that good or service is transferred to a customer

The Group is an agent if its performance obligation is to arrange for the provision of the specified good or service by another party. In this case, the Group does not control the specified good or service provided by another party before that good or service is transferred to the customer. When the Group acts as an agent, it recognises revenue in the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the specified goods or services to be provided by the other party.

#### Leasing

#### Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### The Group as a lessee

For contracts entered into or modified or arising from business combinations on or after the date of initial application, the Group assesses whether a contract is or contains a lease, at inception of the contract or modification date or acquisition date, as appropriate. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less from the commencement date and do not contain a purchase option) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

# 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Leasing (Continued) The Group as a lessee (Continued)

Lease liabilities

At the commencement date of a lease, the Group recognises and measures lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted by using the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- the exercise price of purchase option if the Group is reasonably certain to exercise the option; and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising an option to terminate the lease

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

#### Right-of-use assets

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement date and any initial direct costs, less lease incentives received. Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, provision is recognised and measured under HKAS 37 "Provision, Contingent Liabilities and Contingent Assets". The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories

Leasing (Continued)

Right-of-use assets (Continued)

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. They are depreciated over the shorter period of lease term and useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The Group presents right-of-use assets as a separate line in the consolidated statement of financial position.

The Group applies HKAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss.

#### Refundable rental deposits

Refundable rental deposits paid are accounted under HKFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

#### Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Foreign currencies (Continued)

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. RMB) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the year. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

#### **Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Any specific borrowing that remains outstanding after the related assets is ready for its intended use or sale is included in the general borrowing pool for calculation of capitalisation rate on general borrowings.

Investment income earned on the temporary investment of specific borrowing pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Retirement benefit costs

Payments to the state-managed retirement schemes and the Mandatory Provident Fund Scheme are recognised as expense when employees have rendered service entitling them to the contributions.

#### **Short-term employee benefits**

Short-term employee benefits are recognised at the undiscounted amount of the benefits expected to be paid as and when employees rendered the services. All short-term employee benefits are recognised as an expense unless another HKFRS requires or permits the inclusion of the benefit in the cost of an asset.

A liability is recognised for benefits accruing to employees (such as wages and salaries, annual leave and sick leave) after deducting any amount already paid.

#### **Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit/loss before tax because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Taxation (Continued)

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies HKAS 12 *Income Taxes* requirements to the leasing transaction as a whole. Temporary differences relating to right-of-use assets and lease liabilities are assessed on a net basis. Excess of depreciation on right-of-use assets over the lease payments for the principal portion of lease liabilities resulting in net deductible temporary differences.

遞延税項資產及負債乃根據於報告期 末已立法或實際上已立法之稅率(及 稅法)按預期於清償負債或變現資產 之期間適用之稅率計量。

遞延税項負債及資產之計量反映於報告期末,本集團預期收回或清償其資產及負債賬面值之方式所產生之稅務 後果。

就計量本集團確認使用權資產及相關租賃負債之租賃交易之遞延税項而言,本集團首先釐定税項扣減是否歸屬於使用權資產或租賃負債。

就税項扣減歸屬於租賃負債之租賃交易而言,本集團對租賃交易整體應用香港會計準則第12號所得稅的規定的與使用權資產及租賃負債有關的暫差額按淨額基準評估。使用權資產折舊超出租賃負債主要部分的租賃付款。部分導致產生可扣減暫時差額淨額。

## 3. SIGNIFICANT ACCOUNTING POLICIES (Continued) Taxation (Continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle current tax liabilities and assets on a net basis.

Current and deferred tax is recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

#### Property, plant and equipment

Property, plant and equipment are tangible assets that are held for use in the production or supply of goods or services, or for administrative purpose (other than construction in progress as described below). Property, plant and equipment are stated at cost less subsequent accumulated depreciation and accumulated impairment losses, if any.

Plant and machinery in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

### Property, plant and equipment (Continued) Ownership interests in leasehold land and building

When the Group makes payments for ownership interests of properties which includes both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition.

To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "right-of-use assets" in the consolidated statement of financial position. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold land, the entire properties are classified as property, plant and equipment.

Depreciation is recognised so as to write off the cost of assets other than construction in progress less their residual value over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

#### Intangible asset

#### Intangible asset acquired separately

Intangible asset with finite useful lives that is acquired separately is carried at cost less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible asset with finite useful life is recognised on a straight-line basis over its estimated useful life. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

#### Intangible asset (Continued)

Intangible asset acquired in a business combination Intangible asset acquired in a business combination is recognised separately from goodwill and is initially recognised at its fair value at the acquisition date (which is regarded as its cost).

Subsequent to initial recognition, intangible asset acquired in a business combination with finite useful life is reported at costs less accumulated amortisation and any accumulated impairment losses, on the same basis as intangible assets that is acquired separately.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset are measured at the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

## Impairment on property, plant and equipment, right-of-use assets, and intangible assets other than goodwill

At the end of the reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use assets, intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of property, plant and equipment, right-of-use assets, and intangible assets are estimated individually. When it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

## Impairment on property, plant and equipment, right-of-use assets, and intangible assets other than goodwill (Continued)

In testing a cash-generating unit for impairment, corporate assets are also allocated to relevant cash-generating units, when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be established. The Group assesses whether there is indication that corporate assets may be impaired. If such indication exists, the recoverable amount is determined for the cash-generating unit or group of cash-generating units to which the corporate asset belongs, and is compared with the carrying amount of the relevant cash-generating unit or group of cash-generating units.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a cash-generating unit, the Group compares the carrying amount of a group of cash-generating units, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of cash-generating units, with the recoverable amount of the group of cash-generating units. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of cash-generating units. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit or the group of cash-generating units. An impairment loss is recognised immediately in profit or loss.

## Impairment on property, plant and equipment, right-of-use assets, and intangible assets other than goodwill (Continued)

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit or a group of cash-generating units) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit or a group of cash-generating units) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

#### **Inventories**

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a weighted average method. Net realisable value of inventories represents the estimated selling price in the ordinary course of business less all estimated costs of completion and costs necessary to make the sale.

#### **Provisions**

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

#### Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

### 3. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### **Financial instruments (Continued)**

Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers which are initially measured in accordance with HKFRS 15. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

#### Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Classification and subsequent measurement of financial assets (Continued)

All other financial assets are subsequently measured at FVTPL except that at initial recognition of a financial asset the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if that equity investment is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which HKFRS 3 Business Combinations applies.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is a part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

In addition, the Group may irrevocably designate a financial asset that are required to be measured at the amortised cost or fair value through other comprehensive income ("FVTOCI") as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

Amortised cost and interest income Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become creditimpaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the creditimpaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer creditimpaired.

#### (ii) Equity instruments designated as at FVTOCI

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investment revaluation reserve; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will be transferred to retained profits.

Dividends from these investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the other income line item in profit or loss.

(iii) Financial assets at FVTPL

Financial assets at FVTPL are measured at fair value at the end of the reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss excludes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

#### Impairment of financial assets and contract assets

The Group performs impairment assessment under expected credit loss ("ECL") model on financial assets (including trade and other receivables, long-term receivable, amount due from an associate, amount due from a non-controlling equity owner of a subsidiary, amount due from a related party, pledged bank deposits and bank balances and cash), and other items (contract assets and financial guarantee contracts) which are subject to impairment under HKFRS 9. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are made based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Group always recognises lifetime ECL for trade receivables arising from contracts with customers and contract assets. The ECL on these assets are assessed individually for debtors with significant balances or that are credit impaired and/or collectively using a provision matrix based on the past due status of the remaining debtors.

For all other instruments, the Group measures the loss allowance equal to 12-month ECL, unless there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

#### (i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;

#### (i) 信貸風險大幅增加

尤其是,在評估信貸風險是否 顯著增加時,將考慮以下資料:

- 金融工具外部(倘有)或內 部信用評級之實際或預期 顯著惡化;
- 外部市場信貸風險指標顯著惡化,如信貸息差、債務人信用違約掉期價格大幅增加;

- (i) Significant increase in credit risk (Continued)
  - an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise

Despite the foregoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if i) the financial instrument has a low risk of default, ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term, and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

For financial guarantee contracts, the date that the Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of financial guarantee contracts, the Group considers the changes in the risk that the specified debtor will default on the contract.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

無論上述評估結果如何,本集團假設,於合約付款逾期超過30日時,信貸風險已自初始確認起大幅增加,除非本集團有合理及可靠資料證明可予收回則當別論。

就財務擔保合約而言,本集團成為不可撤銷承擔一方的日期被視為評估減值的初始確認日期。 評估自初始確認財務擔保合約後信貸風險是否已大幅增加時,本集團考慮特定債務人將會出現違約的風險變化。

(ii) Definition of default

For internal credit risk management, the Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above assessment, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

#### (iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- (a) significant financial difficulty of the issuer or the borrower;
- (b) a breach of contract, such as a default or past due event;
- (c) the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider; or
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

#### (iv) Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, for example, when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

#### (v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

Generally, the ECL is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

For a financial guarantee contract, the Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed. Accordingly, the expected losses is the present value of the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Group expects to receive from the holder, the debtor or any other party.

No Measurement and recognition of ECL (Continued)
For ECL on financial guarantee contracts for which the effective interest rate cannot be determined, the Group will apply a discount rate that reflects the current market assessment of the time value of money and the risks that are specific to the cash flows but only if, and to the extent that, the risks are taken into account by adjusting the discount rate instead of adjusting the cash shortfalls being discounted.

Where ECL is measured on a collective basis or cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments;
- Past due status and ageing status; and
- Nature, size and industry of debtors.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit impaired, in which case interest income is calculated based on the amortised cost of the financial asset.

For financial guarantee contracts, the loss allowances are recognised at the higher of the amount of the loss allowance determined in accordance with HKFRS 9; and the amount initially recognised less, where appropriate, cumulative amount of income recognised over the guarantee period.

#### Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

Non-substantial modifications of financial liabilities

For non-substantial modifications of financial liabilities that do not result in derecognition, the carrying amount of the relevant financial liabilities will be calculated at the present value of the modified contractual cash flows discounted at the financial liabilities' original effective interest rate. Transaction costs or fees incurred are adjusted to the carrying amount of the modified financial liabilities and are amortised over the remaining term. Any adjustment to the carrying amount of the financial liability is recognised in profit or loss at the date of modification.

#### Derivative financial instruments

Derivatives, including contracts to buy or sell non-financial items that can be settled net in cash or another financial instrument unless such contracts were entered into and continue to be held for the purpose of the receipt or delivery of the relevant non-financial items in accordance with the Group's expected purchase or sale requirements, are initially recognised at fair value at the date when derivative contracts are entered into and are subsequently remeasured to their fair value at the end of the reporting period. The resulting gain or loss is recognised in profit or loss.

### 4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the amounts of assets, liabilities, revenue and expenses reported and disclosures made in the consolidated financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

## 4. KEY SOURCES OF ESTIMATION UNCERTAINTY (Continued) Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of resulting a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

#### Impairment of goodwill

The carrying value of goodwill at 31 March 2022 amounted to RMB34,070,000 (2021: RMB34,070,000). The Group is required to carry out an impairment assessment of goodwill at least annually or when there is indication that the cashgenerating unit to which the goodwill has been allocated may be impaired. In determining the recoverable amount, the Group assesses the value in use of the cash-generating unit to which the goodwill has been allocated by discounting their estimated future cash flows to the present value. Significant judgment and assumptions were required in the process such as the use of discount rates, growth rates, estimated average purchase price of natural gas and average selling price of LNG during the forecast period. Where the actual future cash flows are less than expected or change in facts and circumstances which results in downward revision of future cash flows, a material impairment loss may arise.

#### Impairment of trade receivables

Trade receivables with significant balances or that are credit impaired are assessed for ECL individually. In addition, the Group uses provision matrix to calculate ECL for the remaining trade receivables based on the past due status of various debtors that have similar loss patterns. The provision matrix is based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and supportable available without undue costs or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered.

The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Group's trade receivables are disclosed in note 41 and 24, respectively. As at 31 March 2022, the trade receivables is approximately RMB1,228,207,000 (2021: RMB1,428,649,000), net of accumulated impairment loss of approximately RMB11,476,000 (2021: RMB20,403,000).

#### 估計不確定性之主要來源

以下為於報告期末所作出有關未來的 主要假設及估計不確定性的其他主要 來源,並具有重大風險而可能導致須 於下一財政年度就資產及負債的賬面 值作出重大調整。

#### 貿易應收賬款的減值

預期信貸虧損撥備易受估計變動影響。有關預期信貸虧損及本集團的貿易應收賬款的資料分別於附註41及24披露。於二零二二年三月三十一日,貿易應收賬款約為人民幣1,228,207,000元(二零二一年:人民幣1,428,649,000元),累計減值虧損淨額約為人民幣11,476,000元(二零二一年:人民幣20,403,000元)。

For the year ended 31 March 2022 截至二零二二年三月三十一日止年度

# 4. KEY SOURCES OF ESTIMATION UNCERTAINTY (Continued) Key sources of estimation uncertainty (Continued)

#### Income taxes

The Group is subject to income taxes in numerous jurisdictions. Significant judgement is required in determining the provision for income taxes. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. In addition, the realisability of the deferred tax asset mainly depends on whether sufficient future profits or taxable temporary differences will be available in future. In cases where the actual future profits generated are less than expected, a material reversal of deferred tax assets may arise, which would be recognised in profit or loss for the period in which such a reversal takes place. The carrying amount of deferred tax asset is detailed in note 22.

#### 5. SEGMENT INFORMATION AND REVENUE

Information reported to the Group's executive directors, being the chief operating decision maker ("CODM"), for the purposes of resource allocation and performance assessment focuses on the nature of operations.

Specifically, the Group's reportable segments are as follows:

**Revenue (Continued)** 

#### (b) Performance obligations for contracts with customers

For sales of LNG, piped gas and vehicle gas at refuelling stations, performance obligation is satisfied when the relevant goods have been delivered to the customer's specified location, premises or vehicles, being the point at which the control of the goods has been transferred to customers and revenue is recognised. The Group generally requires customers to make full payment in advance in respect of sales of LNG and piped gas except for certain customers to which the Group allows an average credit period of 30 days to 180 days. When the Group receives payment in advance before delivery of goods, this will give rise to contract liabilities until the goods have been delivered to the customers.

For provision of LNG transportation service, revenue is recognised over time using output method when the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group delivers the goods by the Group's vehicles. The Group requires customers to pay in advance in respect of provision of LNG transportation service. When the Group receives payment in advance before delivery of goods, this will give rise to contract liabilities until the LNG transportation service has been provided to the customers.

For construction of gas pipeline infrastructure, revenue is recognised over time using input method when the Group's performance creates the pipeline infrastructure that the customer controls as the pipeline infrastructure is created. The revenue is recognised over time based on the stage of completion of the contract using input method. The service period is typically less than one year. The customers usually pay 50% of the consideration in advance before the commencement of the project, which give rise to the contract liabilities, and remaining consideration will be settled upon the completion of the project.

All contracts with customers for sales of goods or provision of services are for period of one year or less. As permitted under HKFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

#### 17. RIGHT-OF-USE ASSETS (Continued)

In addition, the Group owns several industrial buildings where its manufacturing facilities are primarily located. The Group is the registered owner of these property interests, including the underlying leasehold lands. Lump sum payments were made upfront to acquire these property interests. The leasehold land components of these owned properties are presented separately only if the payments made can be allocated reliably.

The Group has obtained the land use right certificates for all leasehold lands except for leasehold lands with carrying amount of RMB2,852,000 (2021: RMB3,004,000) in which the Group is in the process of obtaining.

The Group regularly entered into short-term leases for leased properties. As at 31 March 2022 and 2021, the portfolio of short-term leases is similar to the portfolio of short-term leases to which the short-term lease expense disclosed in this note above.

Note:

During the year ended 31 March 2022, gain on early termination of leases represented the net difference of decrease in right-of-use assets of approximately RMB460,000 and the decrease in lease liabilities of approximately RMB486,000.

#### Restrictions or covenants on leases

In addition, lease liabilities of RMB1,935,000 (2021: RMB880,000) are recognised with related right-of-use assets of RMB1,853,000 (2021: RMB850,000) as at 31 March 2022. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

#### 17. 使用權資產(續)

此外,本集團擁有多項工業樓宇(主要放置其生產設施)。本集團為該等物業權益(包括相關租賃土地)的註冊擁有人。本集團已就收購該等物業權益支付一次性付款。僅在已付款項能夠可靠分配的情況下,該等自有物業的租賃土地部分方會獨立呈列。

本集團已就所有租賃土地獲取土地使用權證書,惟賬面值為人民幣2,852,000元(二零二一年:人民幣3,004,000元)的租賃土地除外,本集團正在申領該租賃土地的土地使用權證書。

本集團定期就租賃物業訂立短期租賃。於二零二二年及二零二一年三月三十一日,短期租賃組合與上文本附註所披露的短期租賃開支所對應的短期租賃組合相若。

#### 附註:

截至二零二二年三月三十一日止年度,提前終止租賃之收益指使用權資產減少約人民幣460,000元及租賃負債減少約人民幣486,000元之淨差額。

#### 租賃限制或契諾

此外,於二零二二年三月三十一日,確認租賃負債為人民幣1,935,000元(二零二一年:人民幣880,000元),相關使用權資產為人民幣1,853,000元(二零二一年:人民幣850,000元)。除出租人持有的租賃資產中的抵押權益外,租賃協議不會施加任何契諾。租賃資產不得用作借貸抵押。

For the purposes of impairment testing, goodwill has been allocated to UHL and its subsidiaries which represent the production and sales of LNG segment, together as one group of cash-generating units ("CGUs"), which represents the lowest level within the Group at which goodwill is monitored for internal management purposes and is not larger than the operating segment of production and sales of LNG, that are expected to benefit from the business combination.

The recoverable amount of the group of CGUs is determined from value in use calculations. The key assumptions for the value in use calculations are those regarding the discount rates, growth rates and expected changes to selling price and direct costs of LNG during the projection period. The directors of the Company estimate discount rates using pretax rates that reflect current market assessments of the time value of money and the risks specific to the group of CGUs. The growth rates are based on industry growth forecasts. Changes in selling prices and direct costs are based on past practices and expectations of future changes in the market.

就減值測試而言,商譽已被分配至聯榮及其附屬公司(代表生產及銷售液化天然氣分部,共同作為一個現金產生單位(「現金產生單位」)組別,為本事便且的而被監察,不會大於生產及銷售液化天然氣之經營分部。預期將受益於業務合併。

For the year ended 31 March 2022 截至二零二二年三月三十一日止年度

#### 18. GOODWILL (Continued)

The calculation uses cash flow projections based on financial budgets approved by management covering a 5-year period, and a discount rate of 15.70% (2021: 16.05%) for the year ended 31 March 2022. The cash flows projections beyond the 5-year period are extrapolated using a steady 2% (2021: 2%) growth rates. This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. Other key assumptions for the value in use calculations relate to the estimation of cash inflows/outflows which include budgeted sales and gross margin, such estimation is based on the unit's past performance and management's expectations for the market development. The directors of the Company believe that any reasonably possible change in any of these assumptions would not cause the aggregate carrying amount of the assets of the group of the CGUs to exceed the aggregate recoverable amount of the assets of the group of the CGUs.

The management determines that there is no further impairment in respect of goodwill during the years ended 31 March 2022 and 2021.

#### 19. INTANGIBLE ASSET

The intangible asset of the Group represents a subsidiary's exclusive operating right of sales of piped gas to Chinese Baijiu distillery factories located in Renhuai City of Guizhou Province in the PRC under a supplementary agreement entered into among the subsidiary, another subsidiary of the Company and 貴州燃氣(集團)有限責任公司 (Guizhou Gas (Group) Co., Ltd) ("Guizhou Gas"). The Group recorded a gain on deemed partial disposal of approximately RMB5,212,000 in profit or loss.

The Judgment ordered, amongst others, that (1) the Sellers to repurchase from the Group the 34.5% equity interest in the Lvdong Shuiyun Company at the price of RMB34.5 million which is equal to the capital contribution with interest at the rate of 15% per annum from the date of payment of the capital contribution to the Lvdong Shuiyun Company by the Group; (2) each of the guarantors is jointly and severally liable for the repurchase and payment obligations of the Sellers in favour of the Group; and (3) the Sellers shall pay costs of the Civil Action incurred by the Group.

During the year ended 31 March 2020 and up to 31 March 2022, the Group has received an amount of RMB2,500,000 from one of the Sellers.

In the opinion of the directors of the Company, the Judgement from the Civil Action during the year ended 31 March 2020 effectively requires execution of the repurchase arrangement by the Sellers in relation to the Group's 34.5% equity interest in Lvdong Shuiyun Company and hence, accounted for as a forward contract ("Forward Contract"). The receipt of consideration upon the redemption of the 34.5% equity interest in Lvdong Shuiyun Company from the Sellers was considered as the forward price, The Forward Contract was measured at fair value initially and subsequently remeasured to the fair value at the end of the reporting period. The fair value of the Forward Contract represented the difference between the discounted forward price and the carrying amount of the 34.5% equity interest in Lydong Shhiyun Company.

The Put Option and Forward Contract were presented as derivative financial instrument in the consolidated statement of financial position and are measured at fair value subsequent to initial recognition with changes in fair value recognised in profit or loss.

Interest rate risk (Continued)

The Group's fair value interest rate risk relates primarily to its fixed rate pledged bank deposits, long-term receivable, fixed rate bank and other borrowings, guaranteed notes and lease liabilities. The Group currently does not have an interest rate hedging policy to hedge its exposure to interest rate risk. However, the management will consider hedging significant interest

#### Sensitivity analysis

For the variable rate bank balances at 31 March 2022 and 2021, the directors of the Company consider the Group's exposure to cash flow interest rate risk is minimal taking into account the minimal fluctuation on market interest rate. Accordingly, no sensitivity analysis on interest rate risk on bank balances is presented.

The sensitivity analysis below has been prepared based on the exposure to interest rates for variable rate borrowings at the end of each reporting period which was assumed to be outstanding for the whole year and the stipulated change taking place at the beginning of the financial year and held constant throughout the year in the case of instruments that have floating rates. A 50 basis points increase or decrease for variable rate bank borrowings is used when reporting interest rate risk internally to key management personnel and represent management's assessment of the reasonably possible change in interest rate.

If interest rates had been increased/decreased by 50 basis points in respect of borrowings and all other variables were held constant, the Group's post-tax profit would decrease/increase by approximately RMB544,000 (2021: RMB2,167,000) for the year.

#### 敏感度分折

就於二零二二年及二零二一年三 月三十一日的浮息銀行結餘而 言,本公司董事認為,考慮到市 場利率波動極小,本集團面臨的 現金流量利率風險極低。因此, 並無呈列有關銀行結餘的利率 風險敏感度分析。

以下敏感度分析乃根據各報告期 末之浮息借貸(假設於整個年度 未獲償還)利率風險及規定於財 政年度開始時改變並於整個年 度保持不變(若為浮息工具)而編 製。就浮息銀行借貸而言,內風編 製。就浮息銀行借貸而言專國 會以升跌50個基點為基準,為 管理層對利率可能合理變動之 評估。

### Credit risk and impairment assessment

As at 31 March 2022 and 2021, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position and the amount of financial guarantee provided by the Group as disclosed in note 39. The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets and financial guarantee contracts except that settlement of certain trade receivables are backed by bills issued by reputable banks.

In order to minimise the credit risk, the management of the Group has delegated a team responsible for assessing the potential customer's credit quality and determination of credit limits and credit approvals. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. In addition, the Group performs impairment assessment under ECL model on trade balances individually or based on provision matrix. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk on bank deposits and bank balances is limited as such amounts are placed in banks with high credit ratings.

The Group has concentration of credit risk as 60% (2021: 16%) and 92% (2021: 40%) of the total trade receivables was due from the Group's largest customer and the five largest customers respectively within the oil and gas transactions segment.

#### Notes:

(i) Trade receivables and contract assets

For trade receivables and contract assets, the Group has applied the simplified approach in HKFRS 9 to measure the loss allowance at lifetime ECL. Except for trade receivables and contract assets with significant outstanding balances or that are credit-impaired which are assessed individually, the Group determines the ECL on these items by using a provision matrix, grouped based on past due analysis.

Trade receivables with significant outstanding balances and that are credit-impaired with gross carrying amounts of RMB1,186,843,000 and RMB1,542,000 (2021: RMB1,326,834,000 and RMB3,301,000) respectively, as at 31 March 2022 were assessed individually and loss allowances of RMB7,022,000 and RMB1,542,000 (2021: RMB17,102,000 and RMB3,301,000) have been recognised respectively. Contract assets with carrying amounts of RMB4,283,000 (2021: RMB2,135,000) as at 31 March 2022 were assessed individually and no loss allowances (2021: nil) have been recognised as the lifetime ECL involved in insignificant. The estimated loss rates applied in each debtor with significant balances or that are credit impaired are estimated with reference to the external credit rating, historical default rates, past due status, current conditions at the report date and are adjusted for forward-looking information that is available without undue cost or effort. The contract assets have substantially the same risk characteristics as the trade receivables for the same type of contracts. The Group has therefore concluded that the loss rates for trade receivables are a reasonable approximation of the loss rates for contract

(i) 貿易應收賬款及合約資產 就貿易應收賬款及合約資產而言, 本集團已應用香港財務報告準則 第9號中的簡化方法計量全期預期 信貸虧損的虧損撥備。除有重大 未償還結餘或已信貸減值的別評估 外,本集團使用撥備矩陣釐定該 等項目的預期信貸虧損,並根據 逾期分析分類。

> 於二零二二年三月三十一日,具 有重大未償還結餘及出現信貸 減值的貿易應收賬款的總賬面值 分別為人民幣1,186,843,000元及 人民幣1,542,000元(二零二一年: 人民幣1,326,834,000元及人民幣 3,301,000元) 均 個 別 進 行 評 估, 並已確認虧損撥備分別為人民幣 7,022,000元及人民幣1,542,000元 (二零二一年:人民幣17,102,000元 及人民幣3,301,000元)。於二零二 二年三月三十一日,賬面值為人 民幣4,283,000元(二零二一年:人 民幣2,135,000元)的合約資產乃個 別評估,而並無確認虧損撥備(二 零二一年:無),因為涉及的全期 預期信貸虧損並不重大。適用於 具有重大結餘或出現信貸減值的 各債務人的估計虧損率乃參考外 部信用評級、歷史違約率、逾期 狀況、於報告日期的當前條件予 以估計,並就在無需耗用過多成 本或努力下即可獲得的前瞻性資 料作出調整。合約資產具有與同 類合約的貿易應收賬款大致相同 的風險特徵。因此,本集團得出 結論,貿易應收賬款的損失率與 合約資產的損失率合理相若。

Trade receivables of RMB8,420,000 (2021: RMB38,660,000) as at 31 March 2022 are backed by bills issued by reputable PRC banks and therefore the management of the Group consider the credit risk is insignificant and no loss allowances are recognised.

Trade receivables of RMB42,878,000 (2021: RMB80,257,000) are assessed based on provision matrix as at 31 March 2022 within lifetime ECL (not credit impaired) and loss allowance of RMB2,912,000 (2021: nil) has been recognised. The estimated loss rates applied in each category of debtors in the provision matrix are estimated based on historical default rates, past due status, current conditions at the report date of the debtors and are adjusted for forward-looking information that is available without undue cost or effort. The grouping is regularly reviewed by management to ensure relevant information about specific debtors is updated.

(ii) Other financial assets

The Group has assessed the financial position of the debtors of other financial assets at the end of the reporting period using the past due and historical loss information and concluded that there has been no significant increase in credit risk since initial recognition. The Group also considered that the credit risk on pledged bank deposits and bank balances is limited since they are placed with banks with high credit ratings. After assessment, the Group considered the prospect of recovery of the long term receivable is remote due to the severe financial difficulty of the counterparty and determined that a full impairment should be made and an impairment loss of RMB5,088,000 was recognised in profit or loss. During the years ended 31 March 2022 and 2021, no loss allowance is made for other financial assets.

For financial guarantee contracts, the maximum amount that the Group has guaranteed under the respective contracts was RMB19,500,000 as at 31 March 2022 (2021: nil). At the end of the reporting period, the Group has performed impairment assessment at the end of the reporting period and concluded that there has been no significant increase in credit risk since initial recognition of the financial guarantee contracts. Accordingly, the loss allowance for financial guarantee contracts issued by the Group is measured at an amount equal to 12-month ECL and no loss allowance was recognised in the profit or loss.

### Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and the flexibility through the use of borrowings. The management closely monitors the liquidity position of each company within the Group and expects to have adequate sources of funding to finance the Group's operations.

In the management of the liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Group's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilisation of bank borrowings and ensures compliance with loan covenants. The management also take remediate actions regarding to the default occurs during the year including the application of additional banking facilities and seeking other source of financing to minimise the impact to the Group.

The Group relies on guaranteed notes and bank and other borrowings as significant sources of liquidity.

The following tables detail the Group's contractual maturity for its non-derivative financial liabilities and lease liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities and lease liabilities based on the earliest date on which the Group can be required to pay. The maturity dates for other non-derivative financial liabilities and lease liabilities are based on the agreed repayment dates. The table includes both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate at the end of the reporting period.

Liquidity risk (Continued)

The amount included above for financial guarantee contract is the maximum amount the Group could be required to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that no amount will be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

The amounts included above for variable interest rate instruments for non-derivative financial liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of each reporting period.
