1. HIGHLIGHTS

- The Company and MinRes continued advancement of the Marillana Project in accordance with the agreed Indicative Development Proposal for the project.
- Studies and preparation (including miscellaneous licence application) for the haul road corridor from Marillana to the Roy Hill rail system are advancing.
- The Joint Operation commenced the pilot plant testwork and the hydrological studies.
- Updated environmental surveys and monitoring was completed for the Marillana project.

2. PROJECT ACTIVITIES

Exploration Activities

Marillana

Brockman Iron Pty Ltd ("Brockman Iron") and Polaris Metals Pty Ltd ("Polaris"), a wholly owned subsidiary of MinRes, entered into a farm-in and joint venture agreement ("FJV Agreement") pursuant to which subject to the terms and conditions therein, Polaris may farm-in by satisfying the farm-in obligations and earn a 50% interest in the Marillana Project. For details of the transaction please refer to the Company's announcement dated 26 July 2018.

On the 22 April 2021, Brockman Iron and Polaris signed an Amended and Restated FJV Agreement and Deed of Amendment and Restatement (collectively the "Agreement"). Both Brockman Iron and Polaris concluded that the Farm-in Obligations under the Agreement had been satisfied and the parties formed the Joint Venture on that date. As such, Polaris now holds a 50% interest in the Marillana Project ("the Farm-in interest").

MinRes has submitted indicative Development Proposals, which include the following:

1. Development of the Marillana and Ophthalmia Projects.
2. Following the establishment of the Joint Venture, MinRes (or its Related Party) agrees to provide the Joint Venturers with funding by way of a project loan sufficient to allow the Joint Venturers to fund the forecast project capital costs for each development.
3. A build own and operate arrangement between the Joint Venturers and MinRes for certain non-processing infrastructure at Marillana.
4. A build own and operate arrangement for the crushing plant at Ophthalmia.
5. A proposed logistics system to transport the ore from the mines to the port stockyard at Port Hedland. This logistics

system is to be constructed and operated by MinRes (or a subsidiary).

6. Construction of a berth at a dedicated location in Port Hedland (subject to the approval from the State Government of Western Australia).
7. A current market based estimate for project capital and operating costs, including the logistics services cost for transporting the ore from mine to ship.

Initial Development Works

During the quarter, work commenced on the pilot plant test work to support process review and flow sheet design. The test work will also provide samples of tailings to support co-disposal (dry-stacking) testwork and approvals. A new mine design and schedule, based on the preliminary process flowsheet assumptions, has been completed.

Initial work commenced on the hydrological studies which includes a major drilling program for installation of water bores. It is anticipated that the drill program will commence in the September 2022 quarter.

Flora and vegetation surveys to refresh baseline data were carried out during the period, as well as continued monitoring of ecological communities, weeds and regional hydrological baseline data.

Infrastructure

In November 2021 MinRes announced that they had entered into an agreement with Hancock Prospecting Pty Limited ("Hancock") and Roy Hill Holdings Pty Limited ("Roy Hill") in which MinRes and Hancock will jointly investigate the development of a new iron ore export facility at the port of Port Hedland's Stanley Point Berth 3 ("SP3") in South West Creek. Roy Hill will provide services to both MinRes and Hancock for development and operation of their projects, including rail haulage.

On 1 February 2022, the Government of Western Australia announced that it had granted a port capacity allocation to the MinRes – Hancock JV, at Stanley Point Berth

3 in South West Creek. MinRes has advised that based on this allocation the Marillana Project has available port capacity to meet the joint operation production requirements. The new iron ore export facility at SP3 remains subject to various approvals and agreements to develop and operate, along with a positive final investment decision by MinRes and Hancock.

Under the FJV Agreement, MinRes is to provide the infrastructure solution to transport the ore from the Marillana and Ophthalmia projects to a port stockyard at Port Hedland and loading on to ships for export. The MinRes-Hancock Joint Venture Agreement will facilitate this solution for the Marillana project.

MinRes is advancing studies and preparation (including miscellaneous licence application) for the haul road corridor from Marillana to the Roy Hill rail loading facility.

Ophthalmia

On 26 November 2021, Polaris earned a 50% interest in the Ophthalmia Iron Ore Project. In the period from November 2021 to March 2022, Polaris continued a programme of works including mine planning studies, transport corridor studies, environmental surveys and approvals. Polaris and Brockman have agreed to reduce the programme of works at the Ophthalmia Iron Ore Project whilst MinRes finalises arrangements for the new iron export facility at SP3 and to allow the parties to prioritise development of the Marillana Project.

Regional development

A helicopter supported field reconnaissance of Exploration Licences E47/3575 (Punda Springs), E47/3364 (Juna Downs and E47/3585 (Mindy) was carried out during the quarter, with eleven surface rock chip samples collected across all areas. Results from Punda Springs confirmed previous work with one sample indicating a possible southern extension to the known surface mineralisation.

Results from Juna Downs (6 samples, up to 62.6% Fe) and Mindy (two samples, maximum 55.3% Fe) confirmed zones of surface enrichment identified from aerial imagery, but further work is required to determine the potential significance of the mineralisation.

There was no field work carried out on the other regional exploration projects.

Mining Production and Development Activities

No mining production and development activities, including expenditure has been undertaken or recognised for the quarter.

3. CORPORATE REVIEW

The consolidated cash position of the Group as at 30 June 2022 was HK\$28.8 million.

Payments to related parties of the entity and their associates

The payment as disclosed in section 6.1 of the Appendix 5B relates to:
