MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is an established HVAC electrical and mechanical ("HVAC E&M") engineering services provider in Hong Kong with a long business history dating back to 1996. The Group generally focuses on serving new residential property developments projects as a first-tier or second-tier subcontractor in Hong Kong. The HVAC E&M engineering services typically involve installation of HVAC systems, which refers to heat, ventilation and air-conditioning systems.

The Group is registered as a Registered Electrical Contractor under the Electrical and Mechanical Services Departments of the Government, a minor works contractor (company) of Type A (Classes II and III), Type D (Classes II and III) and Type E (Classes II and III) under the Building Authority and a registered subcontractor under the Subcontractor Registration Scheme operated by the Construction Industry Council.

Looking forward, the Group will continue to strengthen the financial management and licensing qualifications, securing the positioning in the property development value chain and acquiring new business opportunities directly with property developers and/or their designated main contractors.

In the fifth wave of severe epidemic in early 2022, many engineering employees were diagnosed with the infection, the progress of the projects was seriously affected and delayed. The lockdown in China affected logistic transportation and led to delays in transporting raw materials to Hong Kong, which further severely affected the construction progress due to the shortage of raw materials. In addition, raw materials prices were close to high levels in the first half of the year, resulting in an increase in the cost of construction materials. Coupled with construction delays, increase in costs, economic slowdown and reduction in tendering for new development projects exerted pressure on the Group's operations and tendering for new projects. Accordingly, the revenue and gross profit of the Group was adversely affected.

Competition is expected to remain keen, with profit margin tightening due to rising labour cost, rising operating cost and strong competition in the market. Nevertheless, as construction activity remains resilient, our management's strong capabilities and track record are expected to enable us to be competitive in these potential tenders.
