The board of directors (the “**Board**”) of the Company wishes to inform the shareholders of the Company and potential investors that, based on the Company’s preliminary review of the unaudited consolidated management accounts of the Group for the nine months ended 30 September 2022, the unaudited consolidated profit attributable to shareholders of the Company for the nine months ended 30 September 2022 is expected to increase by approximately 130% as compared to the corresponding period in 2021.

The increase in profit is primarily attributable to the following factors:

- (i) With the implementation of various development strategies on the fresh and live foodstuffs business of the Group, in particular, the implementation of integrated industrial chain operation platform of “livestock and poultry breeding – slaughter and processing – cold chain distribution – fresh marketing”, the operating performance has greatly enhanced. Upon the commencement of production at the meat processing plant in Nanhai District, Foshan City in the second quarter this year, the amount of slaughter has been increased as compared to the same period last year, resulting from an increase in profit from the slaughtering business; and
- (ii) As for the tinsplate business, due to improvements of marketing mix and enhancement for the management of cost reductions, an increase in profit has been recorded during the period.

Furthermore, due to the gradual increase in swine prices in second half of the year, the performance of the two associates engaging in pig farming and pig sales has improved with reduced losses, which partially offset the increase in profit as abovementioned.

The information contained in this announcement is only based on the Company’s preliminary review of the unaudited consolidated management accounts of the Group for the nine months ended 30 September 2022 and such information have not been reviewed or audited by the auditor of the Company or reviewed by the Audit Committee of the Company.
