VOLUNTARY ANNOUNCEMENT

This announcement is made by Pujiang International Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis.

The board of directors of the Company is pleased to announce that the Group received a “**B**” score in the category of climate change in the 2022 scoring issued by CDP Worldwide (“**CDP**”). CDP is a not-for-profit charity based in London that operates a global disclosure system for investors, companies, cities, states and regions to manage their environmental impacts. A CDP score is a snapshot of a company’s environmental disclosure and performance comparing with other companies. Responding companies were assessed and ranked across four consecutive levels from A to D-. For this year, out of approximately 2,700 companies in the People’s Republic of China (the “**PRC**”) participated in the assessment, only four companies were awarded the highest score of A-, while the Group’s “**B**” score awarded placed us among the **TOP 40** companies evaluated in the PRC in the same category alongside other leading telecommunication and technology conglomerates in the PRC. Such rating shows that the Company has put an emphasis on the environmental impacts of its business and ensured good environmental management.

The Group recognises the importance of environment, social and governance (“ESG”) and sustainable development. It has allocated ample resources to integrate ESG standards and requirements and principles of long-term sustainable development into various aspects of its productions and operations. Over the years, the Group has focused on scientific and technological innovation and is committed to promoting green and low-carbon research and development. For example, the Group has developed 2,100MPa ultra-high strength cable, which could reduce the amount of steel used by approximately 12%, thereby reducing carbon emissions. The Group has also committed to the research and development of high temperature superconductor cables, which have wide application in the construction of large scale underground utility tunnel as they could reduce power loss in the transmission process and has a smaller footprint in underground installation.

The aforementioned rating is for information purposes only and such rating does not constitute recommendation to buy, sell or hold any securities of the Company. Investors and shareholders of the Company are advised not to place any reliance on the information disclosed herein but to exercise due caution when dealing in the securities of the Company.

By Order of the Board
Pujiang International Group Limited
Dr. Tang Liang
Chairman of the Board

Hong Kong, 19 December 2022
