(I) BUSINESS REVIEW

The principal business of Cherish Sunshine International Limited (the "**Company**") and its subsidiaries (collectively, the "**Group**") are provision of procurement services, trading business, provision of corporate IT solution, leasing of the Group's investment properties located in Wuhan, Hubei Province, the People's Republic of China (the "**PRC**") and provision of energy management contracting services in the PRC.

Although the impact brought by strict control measures against COVID-19 taken by the governments at all levels continued to disturb the normal economic activities in the PRC, the Group has more than tripled its total revenue in the six months ended 30 September 2022 (the "**Period**") compared with that of the first six months of the financial year of 2021 ended 30 June 2021. Except for the slight decrease of rental income from the segment of property leasing, the Group was pleased to see revenue increase in all other business segments during the Period as compared to the six months ended 30 June 2021. That was largely due to the expansion of our procurement services to the trading industry supported by the fund raised from the issue of convertible bonds that was completed in April 2022. We witnessed not only the revenue and profit growth in the procurement services business segment but also a big increase of revenue for the trading business segment. Encouraged by the experimental success in the non-governmental sector, the Group will further explore into the new energy industry as elabourated previously in the annual report of 2021/2022.

In addition to planning business expansion, the Group will also enhance its technological competence by increasing its input into its information technology research and development activities. Because of the continuously changing global economic environment, the central government of the PRC has escalated its campaign to promote the replacement of foreign-branded IT related software and hardware with domestic alternatives. The Group therefore plans to increase its training and recruitment of its IT staff and/or replace some of its equipments, so that our procurement related software could be upgraded with more functions and be able to cater for new needs arising out of such campaign, and hence maintaining and increasing the competitiveness of the Group. The Group is committed to striving for the position as a leading IT solution provider in relation to procurement services in the PRC and will continue its efforts in the current and upcoming financial years.

As the US government is increasing its interest rate to curb the fast rising inflation, the US dollar has been appreciating against all major currencies including Renminbi ("**RMB**"). Since the Hong Kong dollar ("**HKD**" or "**HK\$**") is pegged to the US dollar, the Hong Kong dollar has been appreciating against RMB and therefore has caused a large foreign exchange revaluation loss in our financial accounts which is denominated in Hong Kong dollars. Although the foreign exchange loss is an accounting loss and has no impact on the real cash flow of the Group, the management is keeping a close eye on the currency movement and will take actions to safeguard shareholders interests when necessary.

Provision of procurement services

During the Period, the Group made good progress in the development of the non-public sector business. For example, it has deepened its engagement with one of the largest national electricity grid companies to become one of its largest clients. It has also attracted clients from the trading industry who have used our procurement servicing software. As a result, the Group's revenue from the provision of procurement services for the Period nearly doubled to HK\$9.8 million as compared with the revenue of HK\$4.9 million for the six months ended 30 June 2021. Encouraged by the successful experiment of tapping into the trading industry, and given the fact that the new energy industry is one of the fastest growing industries currently in China thanks to strong support from the governments at all levels, the Group plans to expand further into the new energy industry because there are many business opportunities worth exploring and exploiting as the new energy generation farm development projects create many purchase orders from various vendors.

Trading business

The Group had planned to market its procurement servicing software to the trading industry and was pleased to see an encouraging business result, thanks to the funding from the issuance of the convertible bonds which had been completed in April 2022, the Group recorded a revenue of approximately HK\$41.7 million for its trading business during the Period whereas nil revenue was recorded for the six months ended 30 June 2021. The Group will continue its efforts in this newly entered market and is confident in the steady growth of its trading business, despite facing the risk that the very strict measures against the COVID-19 pandemic may still disturb the normal trade and logistical activities from time to time.

Provision of corporate IT solution services

The management regards IT services provision as one of its most competitive business segments and has taken various measures to enhance it. On one hand, the Group started to broaden its service scope and expanded its IT service portfolio by offering general IT maintenance service as well as bespoken software design and development services to a wider client base. On the other hand, the Group plans to increase its input into the IT staff training and hardware equipment replacement in the near future. That is partly in response to the requests from our public-sector clients to promote the replacement of foreign-branded IT related software and hardware with domestic alternatives. The revenue from the provision of corporate IT solution for the Period increased by approximately 21% to HK\$7.2 million as compared with HK\$5.9 million for the six months ended 30 June 2021. The increase was mainly attributable to the growth of new miscellaneous IT software maintenance or software development services that commenced from this financial year. The management believes that the wider recognition of our IT solutions by both the public and non-public clients provides a solid base of growth for the foreseeable future and will continue its inputs into its IT servicing business.

Rental income

During the Period, the rental income of the Group decreased by approximately 10% to HK\$8.4 million as compared with HK\$9.3 million for the six months ended 30 June 2021. The revenue dropped mainly because one of the largest tenants of the Group's own commercial building located in Donghu New Technology Development Zone, Wuhan City, Hubei Province, the PRC, terminated its leasing with the Group. It took time for the Group to secure new tenants to fill up the vacant space. Although the occupancy rate has climbed back to its normal level, the management was cautious about the leasing business since the overall property market in China kept cooling down due to general macro-economic factors.

Provision of energy management contracting services

The provision of the energy management contracting services provided a steady revenue stream for the Group as expected. During the Period, the Group provided such services to several polar generation farms owned by local governments and recorded a revenue of approximately HK\$2.9 million which accounted for approximately 4% of the total revenue of the Period. The management is satisfied with the business experimenting result and believes that the energy management contracting services segment has a great potential to become a new main contributor to the overall revenue growth of the Group and will explore further business opportunities, since more new energy generation farms, such as polar and wind farms, will be built in the coming years.

3. Litigation and contingent liabilities

In November 2019, Beijing Dongcheng District People's Court (北京市東城區 人民法院) ("Beijing Dongcheng District Court") published an announcement regarding a summons issued to Gongcai Network Technology Limited (公採 網絡科技有限公司) ("Gongcai Network"), a wholly-owned subsidiary of the Company, in respect of a civil case relating to a license fee income recognised as other income by the Group during 2012. Guocai South China Metal Exchange Service Limited (國採華南金屬市場服務有限公司) (the "Plaintiff") claimed that the relevant work and services mentioned in the services contracts and supplemental contracts entered into between the Plaintiff, Gongcai Network and other parties in 2012, were not performed by Gongcai Network. As a result, the Plaintiff claimed for a refund from Gongcai Network of RMB13,500,000 (equivalent to approximately of HK\$14,852,000) paid on 3 January 2013 together with accrued interests for the period from 4 January 2014 to 4 September 2019 of RMB7,506,000 (equivalent to approximately of HK\$8,258,000) (collectively the "Claimed Amounts"). Due to the outbreak of COVID-19 pandemic, the hearing that had been scheduled to be conducted on 17 February 2020 was postponed. and based on the judgement made by Beijing Dongcheng District Court on 29 December 2020, the claims from the Plaintiff was rejected.

On 11 February 2022, the Higher People's Court made the final judgement and rejected the retrial application from the Plaintiff.

On 6 September 2022, the Plaintiff filed a procuratorate application to No. 2 People's Procuratorate of Beijing Municipality and the application was accepted. Although the Plaintiff initiated the procuratorate process, the directors of the Company (the "**Directors**") considered that the probability of resuming the case is remote as advised by the Group's PRC legal advisers. The Directors considered the possibility of an outflow of resources embodying economic benefits is remote and therefore, the Group did not have any contingent liabilities at the end of the reporting period.

4. Foreign exchange exposure

For the Period, the Group mainly earned revenue in RMB and incurred costs in HKD and RMB. In the Group's operation, minimal exposure to fluctuation in exchange rates is expected. The exposure to fluctuation in exchange rates will mainly arise from the translation of the functional currency, being RMB, to the presentation currency, being HKD, of the Group. As the Group does not foresee any significant currency exposure in the near future, the Group did not resort to any currency hedging facilities for the Period. However, the management will enhance the monitoring on the Group's foreign currency exposure, should the need arise.

5. Staff and remuneration policy

The Group determines staff remuneration in accordance with market terms, individual qualifications and performances. Staff recruitment and promotion is based on individuals' merit and their development potential for the positions offered. During the Period, the Company adopted a new share option scheme and a new share award plan to replace its then existing share option scheme which was due to expire next year, with a view to attracting and retaining quality personnel and providing them with incentive to contribute to the business and operations of the Group. For further details, please refer to note 26 to the condensed consolidated financial statements for the Period and the section headed "General Information — Share Option Scheme" on pages 52 to 53 and 55 to 57 of this report, respectively.

(IV) BUSINESS PROSPECTS

The outlook for the international and domestic business environment is very challenging. Because of the military conflict between Ukraine and Russia, the world's energy supply was completely disrupted and has pushed up the inflation rate to a level that has not been seen for years in many countries. The International Monetary Fund (the "**IMF**") warned that the global economic prospects have worsened significantly since its forecast in January 2022. China's economy also faces unprecedented challenges and the continuation of the policy of dynamic clearing of coronavirus disease 2019 ("**COVID-19**") pandemic in the PRC means that the domestic enterprises still have to live up with the disturbance to the business caused by the abrupt and sudden lockdown measures taken by governments of different regions in China.

The management fully appreciates the challenges brought by the external adverse factors and is working hard to seek development opportunities for the Group. Encouraged by the rising revenues derived from the non-public sector business, the management believes that it is right for the Group to further explore the opportunities in a wider market in the non-public sector.

The Group published an announcement on 18 October 2022 proposing to raise more funds via Rights Issue and planned to apply the proceeds of the Rights Issue to, among others, expand its procurement and trading businesses. A portion of the funds raised will be applied to the EPC business (Engineering, Procurement and Construction) of the new energy generation development projects. Leveraging on the good relationships with the governments of different regions, the Group believes that it has a unique competitiveness of penetrating quickly into this niche but large market which is full of business opportunities thanks to the initiatives of Carbon Peak by 2030 and Carbon Neutrality by 2060 which have been strongly supported and promoted by the central government of the PRC. The reason for that is because the local governments and power companies of state-owned backgrounds are usually the major players and investors in the new energy development construction projects. As the Group has years' of experience dealing with governmental institutions, it can act as an effective conduit of communication between various project stakeholders as well as offer efficient, transparent and fair one-stop solutions for procurement services for new energy projects in different areas. Apart from that, the Group is also interested in securing long term business growth with large power companies via different means. For example, the Group could try forming joint ventures with large power companies to align the business interests with those large and credible players to seek more sustainable businesses whilst reducing the business risks at the same time.

All in all, the management of the Group holds an optimistic view of its business development in the foreseeable future and is alert to the uncertainties caused by the challenging external factors, such as rising inflation, COVID-19 pandemic and so on. The management will be abreast of its responsibilities for its stakeholders and do what it can to grow the business sustainably.

1. GENERAL INFORMATION

The Company was incorporated in Bermuda with limited liability. The address of its registered office is Clarendon House, 2 Church Street, Hamilton HM 11, Bermuda. The address of its head office and principal place of business in the People's Republic of China (the **"PRC**") is Unit 109-14, Block 1, No. 1818-2 Wenyi West Road, Yuhang Street, Yuhang District, Hangzhou, Zhejiang Province, the PRC. The principal place of business in Hong Kong is Unit 705, 7/F., Nam Wo Hong Building, 148 Wing Lok Street, Sheung Wan, Hong Kong. The Company's shares are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the **"Stock Exchange**").

During the six months ended 30 September 2022, the Company changed its name from "China Public Procurement Limited" to "Cherish Sunshine International Limited" and adopted the Chinese name of "承輝國際有限公司" as the secondary name to replace "中國公共採購有限公司". The change of name was approved by the shareholders of the Company by way of special resolution at the annual general meeting held on 3 August 2022 and has become effective from 23 August 2022.

The Company is an investment holding company. The principal activities of its subsidiaries are provision of procurement services, trading business, provision of corporate IT solution, energy management contracting business and leasing of the Group's investment properties located in Wuhan, Hubei Province, the PRC.

2. CHANGE OF FINANCIAL YEAR END DATE

Pursuant to the resolution of the board of directors (the "**Board**") of the Company dated 30 November 2021, the financial year end date of the Company has been changed from 31 December to 31 March. Accordingly, the financial period for fiscal period 2022 covered a fifteen months period from 1 January 2021 to 31 March 2022. These unaudited condensed consolidated financial statements cover a six month period from 1 April 2022 to 30 September 2022 (the "**Period**") and the comparative figures cover a six month period from 1 January 2021 to 30 June 2021.

3. BASIS OF PREPARATION

These condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard ("**HKAS**") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**") and the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange (the "**Listing Rules**").

The Group incurred a net loss of approximately HK\$11,179,000 during the Period, and as at that date, the Group had net current liabilities of approximately HK\$59,531,000. At the same date, the Group's bank and cash balances were approximately HK\$6,672,000, and the Group had current bank borrowing and current tax liabilities of approximately HK\$4,401,000 and HK\$30,996,000, respectively. These conditions indicate the existence of a material uncertainty which may cast significant doubt on the Group's ability to continue as a going concern. Therefore, the Group may be unable to realise its assets and discharge its liabilities in normal course of business.

FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2022

3. BASIS OF PREPARATION (Continued)

The Directors are of the opinion that the Group will have sufficient working capital to meet its financial obligations as and when they fall due for the next twelve months from 30 September 2022 after taking into consideration of the following:

- (a) The Group has been taking stringent cost controls;
- (b) As at 30 September 2022, the Group had a bank borrowing of RMB19,000,000 (equivalent to approximately HK\$20,904,000) from a bank in the PRC by pledging the Group's building, investment properties, certain right-of-use assets, certain trade receivables, certain bank balances and rental income of which RMB15,000,000 (equivalent to approximately HK\$16,503,000) was classified as non-current liabilities. As at 30 September 2022, the fair value of the Group's investment properties amounted to approximately HK\$259,759,000. The Group will also negotiate with its banks for additional banking facilities when necessary; and
- (c) The Company will continue to adopt the equity financing approach to strengthen the financial position of the Group and to raise additional funds for the Group to replenish its working capital.

Accordingly, the Directors are of the opinion that it is appropriate to prepare the condensed consolidated financial statements on a going concern basis. If adequate financing is not available, the Group may be unable to meet its obligations as and when they fall due in the foreseeable future. Should the Group be unable to continue to operate as a going concern, adjustments would have to be made to write down the value of assets to their estimated recoverable amounts, to provide for further liabilities which may arise and to reclassify non-current assets and liabilities as current assets and liabilities respectively. The effects of these adjustments have not been reflected in the condensed consolidated financial statements.

4. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis except for investment properties and financial assets at FVTPL, which are measured at fair values.

The condensed consolidated financial statements have been prepared in accordance with the same accounting policies adopted in the 2022 financial statements for the 15 months period ended 31 March 2022, except for the accounting policy changes that are expected to be reflected in the 2023 annual financial statements due to the amendments to Hong Kong Financial Reporting Standards ("**HKFRSs**") issued by the HKICPA which came into effect during the Period and application of the following accounting policies which became effective to the Group upon issuance of convertible bonds during the Period. Details of any changes in accounting policies and the amendments to the HKFRSs which came into effect during the Period are set out below.

FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2022

4. PRINCIPAL ACCOUNTING POLICIES (Continued)

The preparation of condensed consolidated financial statements in conformity with HKAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

The condensed consolidated financial statements contain unaudited condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2022 financial statements for the 15 months period ended 31 March 2022. The condensed consolidated financial statements and notes thereon do not include all of the information required for a full set of financial statements prepared in accordance with HKFRSs.

The condensed consolidated financial statements for the six months ended 30 September 2022 have not been audited but have been reviewed by the Company's audit committee.

Application of amendments to HKFRSs

In the current interim period, the Group has applied the following amendments to HKFRSs issued by the HKICPA, for the first time, which are mandatorily effective for the annual periods beginning on or after 1 April 2022 for the preparation of the Group's condensed consolidated financial statements:

Amendments to HKFRS 3	Reference to the Conceptual Framework
Amendments to HKAS 16	Property, Plant and Equipment – Proceeds before Intended Use
Amendments to HKAS 37	Onerous Contracts – Cost of Fulfilling a Contract
Amendments to HKFRSs	Annual Improvements to HKFRSs 2018-2020

The application of the amendments to HKFRSs in the current interim period has had no material impact on the Group's financial positions and performance for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

Application of new accounting policies

Convertible bonds which do not contain an equity component

At initial recognition the derivative component of the convertible bonds is measured at fair value and presented as part of derivative financial instruments. Any excess of proceeds over the amount initially recognised as the derivative component is recognised as the host liability component. Transaction costs that relate to the issue of the convertible bonds are allocated to the host liability and derivative components in proportion to the allocation of proceeds. The portion of the transaction costs relating to the host liability component is recognised initially as part of the liability. The portion relating to the derivative component is recognised immediately in profit or loss.

FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2022

4. **PRINCIPAL ACCOUNTING POLICIES** (Continued)

Application of new accounting policies (Continued)

Convertible bonds which do not contain an equity component (Continued)

The derivative component is subsequently remeasured. The host liability component is subsequently carried at amortised cost. Interest expense recognised in profit or loss on the host liability component is calculated using the effective interest method.

If the bonds are converted, the shares issued are measured at fair value and any difference between the fair value of shares issued and the carrying amounts of the derivative and liability components are recognised in profit or loss. If the bonds are redeemed, any difference between the amount paid and the carrying amounts of both components is recognised in profit or loss.

Derivative financial instruments

Derivative financial instruments are recognised at fair value. At the end of each reporting period, the fair value is remeasured. The gain or loss on remeasurement to fair value is recognised immediately in profit or loss, except where the derivatives qualify for cash flow hedge accounting or hedges of net investment in a foreign operation, in which case recognition of any resultant gain or loss depends on the nature of the item being hedged.

5. FAIR VALUE MEASUREMENTS

The carrying amounts of the Group's investment properties, financial assets and financial liabilities as reflected in the condensed consolidated statement of financial position approximate their respective fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.

Level 3 valuations: Fair value measured using significant unobservable inputs.

During the Period, there are no transfers between Level 1 and Level 2, or transfers into or out of Level 3 (six months ended 30 June 2021: Nil). The Group's policy is to recognise transfers into and transfers out of any of the three levels as to the date of the event or change in circumstances that caused the transfer.

FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2022

5. FAIR VALUE MEASUREMENTS (Continued)

The following table shows the carrying amounts and fair value of investment properties, financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets/financial liabilities not measured at fair value, as the carrying amount is a reasonable approximation of fair value.

The fair value measurement is positively correlated to the expected volatility. As at 30 September 2022, it is estimated that with all other variables held constant, an increase/decrease in the expected volatility by 5% would have decreased the Group's loss by approximately HK\$2,000 and HK\$7,000 (31 March 2022: Nil and Nil (audited)) respectively.

Placee A and Placee B have the right to convert the whole or any part (in the minimum amount of or in multiple of HK\$1,000,000) of the outstanding principal amount of convertible bonds into such number of ordinary shares of the Company as will be determined by dividing the principal amount of convertible bonds to be converted by the conversion price in effect on the date of conversion. In addition, the Company has the right to redeem the whole outstanding principal amount of CB 2029 by giving not less than 30 nor more than 60 days' notice (the "**Early Redemption Notice**") to Placee A and Placee B, on the date specified in the Early Redemption Notice at 100% of the outstanding principal amount held by Placee A and Placee B together with interest accrued but unpaid to such date (if any).

The day-one gain of approximately HK\$685,000, which represented the difference between the nominal value and the fair value of CB 2029 at the issue date, is not recognised in the condensed consolidated statement of profit or loss and other comprehensive income immediately but is deferred.

Upon issuance of CB 2029, amounts of approximately HK\$22,419,000, HK\$16,267,000 and HK\$11,871,000 were recognised as liability component, derivative component embedded in CB 2029 (liability) and derivative component embedded in CB 2029 (asset), respectively. Guocai South China Metal Exchange Service Limited (the "Plaintiff") claimed that the relevant work and services mentioned in the services contracts and supplemental contracts entered into between the Plaintiff Gongcai Network and other parties in 2012, were not performed by Gongcai Network. As a result, the Plaintiff claimed for a refund from Gongcai Network of RMB13,500,000 (equivalent to approximately HK\$14,852,000) paid on 3 January 2013 together with accrued interests for the period from 4 January 2014 to 4 September 2019 of RMB7,506,000 (equivalent to approximately HK\$8,258,000) (collectively the "Claimed Amounts"). According to code provision C.2.1 of the CG Code, the roles of chairman and chief executive should be separate and should not be performed by the same individual. Being aware of the said deviation from code provision C.2.1 of the CG Code, but in view of the current rapid development of the Group, the Board believes that with the support of the management, vesting the roles of both chairman and chief executive in the same person allows the Company to have consistent leadership and ensures effective implementation and promotion of the overall strategy of the Company. At the same time, since all major decisions of the Company are discussed by the Board, the Board committees and the senior management of the Company, the Board is of the view that the appointment of Ms. Wu as both the chief executive and the chairman of the Board would not compromise the balance of power and authority and is in the interest of the shareholders of the Company as a whole. The Board will review the effectiveness of this arrangement from time to time and may recruit and/or appoint a new chief executive if and when the Board considers necessary.
