### **LATEST BUSINESS UPDATE**

## **BAGUIO WINS EPD CONTRACT TO PROVIDE SMART RECYCLING MACHINES WITH A BIG DATA ANALYTICS PLATFORM**

This announcement is voluntarily made by Baguio Green Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**” or “**Baguio**”) to keep the shareholders of the Company (the “**Shareholders**”) and potential investors informed of the Group’s latest developments.

The Board of Directors (the “**Directors**” and the “**Board**” respectively) of the Company would like to inform the Shareholders and potential investors that the Group has been awarded a 2-year service contract, by the Environmental Protection Department (“**EPD**”) of the Hong Kong Government (“**the Government**”) for the provision of Smart Recycling Machines (“**SRMs**”), each with two compartments, and a Big Data Analytics Platform (“**the Platform**”) to drive the smart city development in Hong Kong.

The SRMs are connected with the EPD’s GREEN\$ Electronic Participation Incentive Scheme to incentivize people with GREEN\$ points for recycling. They are equipped with Internet of Things as well as wireless technologies. Transaction data are transmitted back to the back-end system in real time. This improves the efficiency of the recycling operation providing a better service for the community. Fill-level sensors are installed so that the recyclable collection party could arrive just in time to collect the recyclables. The Platform will also analyze transaction data to help the Government strategically deploy recycling resources at the right time and place to maximize effectiveness.

SRMs will begin to be deployed in the first quarter of 2023. They will be placed in various locations, including but not limited to government premises, public and private housing estates, rural villages, shopping malls, and schools. SRMs can collect a variety of recyclables such as plastics, paper, metal, and glass containers. After the 2-year pilot period, the Government will review the program and may expand it to significantly increase the number of SRMs in Hong Kong.

Smart and green technology business is expected to be the one of the growth engines for Baguio. It is also an essential pillar to complete its one-stop solution that includes delivery of people service, smart technology and ESG data to help the Government build a sustainable and greener smart city and to assist our commercial clients to significantly advance their ESG performance. Baguio will continue to develop more innovative products to fully capture the market potential and to grow its green technology business.

The appended press release contains further details.

By order of the Board of  
**Baguio Green Group Limited**  
**Ng Wing Hong**  
*Chairman*

Hong Kong, 20 February 2023

*As at the date of this announcement, the Board comprises Mr. Ng Wing Hong, Ms. Ng Yuk Kwan Phyllis, Mr. Ng Wing Chuen, Ms. Leung Shuk Ping and Ms. Cheung Siu Chun as executive directors of the Company and Mr. Sin Ho Chiu, Dr. Law Ka Hung and Mr. Lau Chi Yin Thomas as independent non-executive directors of the Company.*

【For Immediate Release】

## Baguio wins EPD contract to provide Smart Recycling Machines with a Big Data Analytics Platform

(20 February 2023 — Hong Kong) Baguio Green Group Limited (“**Baguio**” or the “**Company**”, Stock Code: 01397.HK) is pleased to announce that it has been awarded a 2-year service contract (“**Contract**”), by the Environmental Protection Department (“**EPD**”) of the HKSAR Government (“the **Government**”) for the provision of Smart Recycling Machines (“**SRMs**”), each with two compartments, and a Big Data Analytics Platform (“**the Platform**”) to drive the smart city development in Hong Kong.

This Contract marks a significant milestone for Baguio in its development of smart technology solutions for green initiatives. Throughout the years, Baguio has been managing EPD’s traditional 3-colour bins in thousands of locations in Hong Kong. The Company draws upon its invaluable collection experience in designing the SRM to help bring recycling in Hong Kong to the next stage.

The SRMs are connected with the EPD’s GREEN\$ Electronic Participation Incentive Scheme to incentivize people with GREEN\$ points for recycling. They are equipped with Internet of Things as well as wireless technologies. Transaction data are transmitted back to the back-end system in real time. This improves the efficiency of the recycling operation providing a better service for the community. Fill-level sensors are installed so that the recyclable collection party could arrive just in time to collect the recyclables. Not too early to waste logistics costs and create unnecessary carbon emission. Not too late to create any environmental nuisances. The Platform will also analyze transaction data to help the Government strategically deploy recycling resources at the right time and place to maximize effectiveness.

SRMs will begin to be deployed in the first quarter of 2023. They will be placed in various locations, including but not limited to government premises, public and private housing estates, rural villages, shopping malls, and schools. SRMs can collect a variety of recyclables such as plastics, paper, metal, and glass containers. After the 2-year pilot period, the Government will review the program and may expand it to significantly increase the number of SRMs in Hong Kong.

According to the Government's Waste Blueprint for Hong Kong 2035, the city has set a target of zero landfill by 2035. To make this happen, it is crucial to see immediate and significant improvements in recycling. The Government's Hong Kong Innovation and Technology Development Blueprint recently published aims to use smart and green technologies to create a low-carbon and sustainable environment. Baguio envisions significant business opportunities for the Company.

Smart and green technology business is expected to be the one of the growth engines for Baguio. It is also an essential pillar to complete its one-stop solution that includes delivery of people service, smart technology and ESG data to help the Government build a sustainable and greener smart city and to assist our commercial clients to significantly advance their ESG performance. Baguio will continue to develop more innovative products to fully capture the market potential and to grow its green technology business.
