Adjustments to the
Conversion Price:

The Conversion Price of the Convertible Notes shall from time to time be adjusted in accordance with the following provisions:

- (a) If and whenever the Shares by reason of any consolidation or sub-division become of a different nominal amount, the Conversion Price in force immediately prior thereto shall be adjusted by multiplying it by the following fraction:

$$\frac{A}{B}$$

where:–

A = the revised nominal amount; and

B = the former nominal amount.

- (b) If and whenever the Company shall issue (other than in lieu of a cash dividend) any Shares credited as fully paid by way of capitalization of profits or reserves (including any share premium account or capital redemption reserve fund), the Conversion Price in force immediately prior to such issue shall be adjusted by multiplying it by the following fraction:

$$\frac{C}{C+D}$$

where:

C = the aggregate nominal amount of the issued Shares immediately before such issue; and

D = the aggregate nominal amount of the Shares issued in such capitalization.

- (c) If and whenever the Company shall make any capital distribution (except where, and to the extent that, the Conversion Price falls to be adjusted under paragraph (b) above) to the holders (in their capacity as such) of Shares (whether on a reduction of capital or otherwise) or shall grant to such holders rights to acquire for cash assets of the Company or any of its subsidiaries, the Conversion Price in force immediately prior to such distribution or grant shall be adjusted by multiplying it by the following fraction:

$$\frac{E - F}{E}$$

where:

E = the market price (as defined in the instrument) on the date on which the capital distribution or, as the case may be, the grant is publicly announced or (failing any such announcement) next preceding the date of the capital distribution or, as the case may be, of the grant; and

$$\frac{G + \frac{H \times I}{J}}{G + H}$$

where:

G = the number of Shares in issue immediately before the date of such announcement;

H = the aggregate number of Shares so offered for subscription or so granted for subscription or purchase;

I = the amount (if any) payable for the rights, options or warrants or other rights to subscribe for or purchase each new Share, plus the subscription or purchase price payable for each new Share; and

J = the market price (as defined in the instrument) per Share on the trading day immediately prior to such announcement.

- (e) (i) If and whenever the Company shall issue wholly for cash any securities which by their terms are convertible into or exchangeable for or carry rights of subscription for new Shares, and the total effective consideration (as defined in the instrument) per Share initially receivable for such securities is less than the market price (as defined in the instrument) per Share as at the date of the announcement of the terms of issue of such securities (for the purposes of this section (i), the “Applicable Price”), the Conversion Price shall be adjusted by multiplying the Conversion Price in force immediately prior to the issue by a fraction of which the numerator is the number of Shares in issue immediately before the date of the issue plus the number of Shares which the total effective consideration receivable for the securities issued would purchase at the Applicable Price and the denominator is the number of Shares in issue immediately before the date of the issue plus the number of Shares to be issued upon conversion or exchange of, or the exercise of the subscription rights conferred by, such securities, at the initial conversion or exchange rate or subscription price.

(ii) If and whenever the rights of conversion or exchange or subscription attached to any such securities as are mentioned in section (i) of this sub-paragraph (e) are modified so that the total effective consideration (as defined in the instrument) per Share initially receivable for such securities shall be less than the market price (as defined in the instrument) per Share as at the date of announcement of the proposal to modify such rights of conversion or exchange or subscription (for the purposes of this section (ii), the “Applicable Price”), the Conversion Price shall be adjusted by multiplying the Conversion Price in force immediately prior to such modification by a fraction of which the numerator is the number of Shares in issue immediately before the date of such modification plus the number of Shares which the total effective consideration receivable for the securities issued at the modified conversion or exchange rate or subscription price would purchase at the Applicable Price and of which the denominator is the number of Shares in issue immediately before such date of modification plus the number of Shares to be issued upon conversion or exchange of or the exercise of the subscription rights conferred by such securities at the modified conversion or exchange rate or subscription price, such adjustment shall take effect as at the date upon which such modification takes effect. A right of conversion, exchange or subscription shall not be treated as modified for the foregoing purposes where it is adjusted to take account of rights or capitalization issues and other events normally giving rise to adjustment of conversion or exchange terms.

- (f) If and whenever the Company shall issue wholly for cash any Shares (other than Shares issued pursuant to an employee share option scheme of the Company) at a price per Share which is less than the market price (as defined in the instrument) per Share as at the date of the announcement of the terms of such issue (for the purposes of this sub-paragraph (f), the “Applicable Price”), the Conversion Price shall be adjusted by multiplying the Conversion Price in force immediately before the date of such announcement by a fraction of which the numerator is the number of Shares in issue immediately before the date of such announcement plus the number of Shares which the aggregate amount payable for the issue would purchase at the Applicable Price and the denominator is the number of Shares in issue immediately before the date of such announcement plus the number of Shares so issued.
- (g) If and whenever the Company shall issue Shares for the acquisition of assets at a total effective consideration per Share (as defined in the instrument) which is less than the market price (as defined in the instrument) per Share as at the date of the announcement of the terms of such issue (for the purposes of this sub-paragraph (g), the “Applicable Price”), the Conversion Price shall be adjusted by multiplying the Conversion Price in force immediately before the date of such announcement by the following fraction:

$$\frac{K + L}{K + M}$$

where:

K = the number of Shares in issue immediately before the date of such announcement;

L = the number of Shares which the total effective consideration would purchase at the Applicable Price; and

M = the number of Shares so issued.

Transferability: The Convertible Notes or any part(s) thereof may be assigned or transferred to any person at the discretion of the Noteholder(s), save for any company or any person which is a connected person of the Company or an associate of such connected person unless the necessary approvals from the independent Shareholders as may be required under the Listing Rules have been obtained.
