

綠色動力環保集團股份有限公司

Dynagreen Environmental Protection Group Co., Ltd.

(A joint stock limited liability company incorporated in the People's Republic of China) Stock Code: 1330.HK & 601330.SH

Important Notice

- I. The board of directors (the "Board"), the supervisory committee and the directors (the "Directors"), supervisors (the "Supervisors") and senior management of the Company hereby warrant the truthfulness, accuracy and completeness of the contents of the annual report, guarantee that there are no false representations, misleading statements or material omissions contained in this annual report, and are jointly and severally responsible for the liabilities of the Company.
- II. Directors who were not present at the Board meeting

Title of absent Director	Name of absent Director	Reason of absence	Name of proxy
Director	Li Lei	Business engagements	Hu Shengyong

- III. PricewaterhouseCoopers Zhong Tian LLP issued a standard unqualified audit report for the Company.
- IV. Qiao Dewei, an officer of the Company; Yi Zhiyong, the Chief Financial Officer; and Zhao Linbin, the Chief Accountant, declare that they warrant the truthfulness, accuracy and completeness of the financial statements in the annual report.
- V. Proposal of profit distribution or capitalisation of capital reserve during the Reporting Period approved by the Board

It is proposed to distribute a cash dividend of RMB0.12 (before tax) for every share to all shareholders based on the aggregate share capital on the share-based equity registration date. The remaining undistributed profits will be carried forward to the next year. In 2022, the Company did not convert capital reserve into share capital and did not issue bonus shares. This proposal needs to be submitted to the Company's shareholders' general meeting for consideration.

Chairman's Statement Ш.

Dear Shareholders.

I am pleased to present to the shareholders of Dynagreen Environmental Protection Group Co., Ltd. (the "Company", together with its subsidiaries, the "Group") with the Company's business review for the year 2022 and its business prospects for the year 2023.

In 2022, the Chinese economic development was hit by multiple unexpected factors at home and abroad, resulting in considerable downward pressure on the economy. However, all staff of the Group worked together to overcome difficulties and exerted efforts to reduce the impact of adverse factors. As a result, new achievements were made in the Group's development. It successfully completed the issuance of A share convertible corporate bonds with a total par value of RMB2.36 billion, setting a record for the Group's single financing scale. Throughout the year, the Group treated a total of 11,397,800 tons of municipal waste, representing a year-on-year increase of 8.16%, generated 3,481,000,000 kWh of on-grid electricity, representing a year-on-year increase of 4.56%, hitting a new high; and supplied 301,800 tons of steam, representing a year-on-year increase of 116.34%. Initial success was achieved in terms of income diversification of projects. In respect of technology research and development, the Group made great achievements again. In particular, the multiple drive expeller grate waste incinerator and dioxin online warning and control technology won the first prize of scientific and technological progress and the second prize of scientific and technological application of China Association of Urban Environmental Sanitation in 2022, respectively. In 2022, the Group maintained growth of operating income and saw a decline in both quantity and scale of waste-to-energy projects under construction, leading to a sharp decrease in construction revenue. Throughout the year, the Group recorded RMB4,567 million in operating income, representing a yearon-year decrease of 9.69% as compared to the same period last year, and RMB745 million in net profit attributable to the shareholders of the Company, representing an increase of 6.73% as compared to the same period last year.

As a state-controlled company with its A shares and H shares listed in the mainland China and Hong Kong, respectively, the Group attaches great importance to corporate governance and compliance operations and constantly improves the corporate governance structure and internal control system, in order to standardize compliance management and make further improvements in a steady way; in terms of information disclosure, the Group performed its information disclosure obligations in strict accordance with relevant laws and regulations and the requirements of the stock exchanges of the mainland China and Hong Kong, and has been awarded the A-level rating of information disclosure of listed companies by the Shanghai Stock Exchange for three consecutive years; the Group has always stressed the maintenance of investor relations, and strengthened communication with investors and potential investors through various channels and ways including results briefings, investor exchange meetings, telephone and online interactive platforms, to establish a good image in the capital market.

After more than two decades of development, the waste-to-energy industry in the PRC has transformed from high-speed development to high-quality development, and companies in the industry are generally confronted with the problem of slowing growth. At present, there are two strategic tasks in the construction of ecological civilization, i.e. realization of the fundamental improvement of ecological environment and peak carbon dioxide emission and carbon neutrality. The requirements on governance with multiple objectives of ecological environment have become more prominent. Coordinated promotion of pollution and carbon reduction has become an inevitable trend for comprehensive green transformation in economic and social development. The new era will breed new development opportunities. As one of the earliest enterprises engaged in the waste-to-energy industry in China, the Group has always adhered to the corporate mission of "creating a better living environment". While refining, optimizing and strengthening the main waste-to-energy business, the Group focus on the national "14th Five-Year Plan" and the dual-carbon strategy. Based on its own advantages, it will proactively cultivate new business growth drivers, to create returns to all shareholders with better results and contribute to the construction of ecological civilization of the PRC.

Last, I, on behalf of the Board, would like to express my gratitude to all shareholders for their trust and support for the Group and to all staff of the Group for their perseverance and hard work in the last year.

Qiao Dewei

Chairman

Shenzhen, the PRC 30 March 2023

IV. Management Discussion and Analysis

I. DISCUSSION AND ANALYSIS OF OPERATIONS

(I) Industry overview

In recent years, the ecological and environmental protection in the PRC has undergone historic, transformational and global changes, and historic achievements have been made in the construction of ecological civilization. The "14th Five-Year Plan" period will be a critical period for the construction of ecological civilization of the PRC, in which the key strategy will be on carbon reduction and efforts will be exerted on promoting the synergies of pollution and carbon reduction, boosting the comprehensive green transformation of economic and social development, and realizing the shift from quantitative improvement to qualitative improvement of ecological environment. There is a long way to go for the industrial restructuring and energy structure transformation of the PRC with arduous task of ecological and environmental protection.

In 2022, the second year of the implementation of the 14th Five-Year Plan for the Development of Urban Domestic Waste Classification and Treatment Facilities, the waste-to-energy industry has become mature, the release of new projects has further slowed down, and policies on environmental protection, taxation, subsidies for renewable energy, etc. have generally remained stable. In 2022, the settlement of national subsidies for renewable energy was better than that in previous years, which helped improve the cash flows and balance sheets in the industry. On-grid competitive bidding has been implemented for projects put into operation after 2021. In view of the trend of declining subsidies for renewable energy, it will be an important issue for the sustainable development of the industry to increase revenue, reduce expenditure, improve quality and increase efficiency for waste-to-energy projects.

(II) Business review

For details of the principal businesses of the Group, please refer to "III. Operations of the Company during the Reporting Period" in this section. During the Reporting Period, the principal businesses of the Group have no major change. The business review, the discussion and analysis of significant factors relating to results and financial position, the major risks and the future business development of the Group are set out in Section III and this section of this annual report, respectively. The above discussion is part of the Report of Directors.

In 2022, the Chinese economic development was hit by multiple unexpected factors at home and abroad, resulting in considerable downward pressure on the economy. However, all staff of the Group worked together to overcome difficulties and exerted efforts to reduce the impact of adverse factors. As a result, the Group's development reached a new high. The Group recorded operating income of RMB4,567,117,900, representing a decrease of 9.69% as compared to the corresponding period last year, and net profit attributable to shareholders of the Company of RMB744,767,300, representing an increase of 6.73% as compared to the corresponding period last year. As at 31 December 2022, the total assets of the Group amounted to RMB22,677,440,200, representing an increase of 12.18% over the beginning of the year. In 2022, the Company successfully completed the issuance of convertible bonds, and the waste treatment volume and on-grid electricity increased steadily. The construction of the projects under construction was carried out in an orderly manner and the preparatory projects have been steadily promoted. Details are as follows:

Successful completion of the issuance of A share convertible corporate bonds

The Group officially launched the application for issuance of A share convertible bonds in June 2021 and submitted the application documents to the CSRC in late August. The Group received feedback from the CSRC in mid-September, and submitted the feedback report to the CSRC at the end of September. In January 2022, the Group's application for the issuance of A share convertible bonds passed the review by the Issuance Review Committee of the CSRC. As approved by the CSRC, the Company issued 23.6 million convertible corporate bonds on 25 February 2022, and the convertible corporate bonds were listed for trading on the Shanghai Stock Exchange on 23 March 2022. The abbreviation and code of the bonds issued are "Dynagreen Convertible Bonds" and "113054", respectively.

The target subscribers of the A share convertible corporate bonds are natural persons, legal persons, securities investment funds and other eligible investors pursuant to legal requirements who have maintained securities accounts with the China Securities Depository and Clearing Corporation Limited Shanghai Branch (excluding those prohibited by the PRC laws and regulations). The total amount of proceeds from the issuance of A share convertible bonds is RMB2.36 billion and the net amount of proceeds is RMB2.345 billion. The issuance will help strengthen the Company's strength, improve the Company's financial structure, and provide financial guarantee for sustainable development.

2. Steady operation of projects under operation and solid growth of waste treatment volume and on-grid electricity

In 2022, the Group treated 11.3978 million tons of municipal waste, representing a year-on-year increase of 8.16%, and generated on-grid electricity of 3,480.8782 million kWh, representing a year-on-year increase of 4.56%. The steam supply business made remarkable achievements. The total amount of steam supplied was 301,800 tons throughout the year, representing a year-on-year increase of 116.34%. The Company constantly attaches great importance to operation management. In 2022, the Company conducted its operation under the concepts of being "safe, environmental friendly, civilized and effective", firmly established the awareness of safety and environmental protection red lines, and continuously optimized supervision and management of safety and environmental protection to ensure the safe and stable operation of all projects under operation. Tongzhou Project passed the appraisal of the highest-level AAA project for the harmlessness domestic waste treatment facilities in the country. So far, five projects of the Group have been rated as AAA-level domestic waste incineration plants.

Major operating data of the Group in each region in 2022

Region	Item	2022	
East China	Waste input volume ('0,000 tons)	460.02	
	Electricity generation volume ('0,000 kWh)	174,289.42	
	On-grid electricity volume ('0,000 kWh)	142,362.37	
North China	Waste input volume ('0,000 tons)	160.24	
	Electricity generation volume ('0,000 kWh)	56,872.93	
	On-grid electricity volume ('0,000 kWh)	45,952.84	
South China	Waste input volume ('0,000 tons)	287.15	
	Electricity generation volume ('0,000 kWh)	112,097.86	
	On-grid electricity volume ('0,000 kWh)	94,546.22	
Central China	Waste input volume ('0,000 tons)	107.45	
	Electricity generation volume ('0,000 kWh)	41,333.20	
	On-grid electricity volume ('0,000 kWh)	33,881.28	
Southwest China	Waste input volume ('0,000 tons)	77.68	
	Electricity generation volume ('0,000 kWh)	27,928.44	
	On-grid electricity volume ('0,000 kWh)	22,814.92	
Northeast China	Waste input volume ('0,000 tons)	47.23	
	Electricity generation volume ('0,000 kWh)	11,333.70	
	On-grid electricity volume ('0,000 kWh)	8,530.19	

3. Project construction carried out in an orderly manner

In 2022, the construction of the Company's projects under construction was carried out in an orderly manner. Enshi Project was successfully completed and put into production, with an increase in production capacity of 1,200 tons per day. Huizhou Three-in-one Project, Jizhou and Ninghe Kitchen Waste Project were put into production in the year. As of the end of 2022, 97.9%, 99.97%, 55%, 52.94% and 44.09% of construction works were completed in Huludao Waste-to-energy Project, Shuozhou Project, Jingxi Project, Wuhan Phase II Project and Zhangqiu Phase II Project. The preparation work for Tongzhou Phase II Project was advanced steadily.

Major projects and works under construction in 2022

No.	Project	Design treatment capacity (tons/day)	Status
1	Enshi Project	1,200	Put into production in 2022
2	Shuozhou Project	800	In construction
3	Huludao Waste-to-energy Project	1,000	In construction
4	Jingxi Project	800	In construction
5	Wuhan Phase II Project	1,200	In construction
6	Zhangqiu Phase II Project	1,600	In construction

4. New breakthroughs in technology research and development and further improvement in core competitiveness

In 2022, great achievements were made in the Company's technology research and development again. In particular, the multiple drive expeller grate waste incinerator and dioxin online warning and control technology won the first prize of scientific and technological progress and the second prize of scientific and technological application of China Association of Urban Environmental Sanitation in 2022, respectively. The cold test run of the final assembly was completed for the 900-ton (1,000-ton) large-scale incinerator and the installation of the incinerator in Zhangqiu Phase II Project commenced in mid-August; the domestic first online warning and control system of dioxin in waste incineration was continuously optimized and was applied in Pingyang Phase II Project with good results; the polymer denitration system in incinerator and low-temperature synthesis retarder of dioxin were applied in Jurong Project, Taizhou Project, Huizhou Project and other projects with remarkable results; in respect of industry-university-research cooperation, the Company continued to carry out technical exchanges and cooperation with well-known universities and research units including the Institute of Urban Environment, Chinese Academy of Sciences, Southern University of Science and Technology, Huazhong University of Science and Technology, Tongji University and Shenzhen Academy of Environmental Sciences. As of the end of 2022, the Group has obtained a total of 68 patents (including 17 invention patents).

II. INDUSTRY SITUATION OF THE COMPANY DURING THE REPORTING PERIOD

With the continuous advancement of urbanization and economic development in the PRC, the volume of municipal waste generated in the PRC continues to rise, and the demand for treatment is growing. According to the Statistical Yearbook of China Urban Construction, from 2008 to 2021, the number of domestic waste harmless treatments in the PRC increased from 509 to 1,407, and the daily treatment capacity increased from 315,200 tons to 1,057,100 tons, with a compound growth rate of 9.71%. The daily treatment capacity, actual treatment volume and treatment rate of harmless treatment increased significantly. Detoxification waste treatment is mainly divided into three ways: incineration, landfill and composting. Incineration has the advantages of significant reduction in quantity, less space required and relatively small impact on the environment and is the fastest growing segment. From 2008 to 2021, the number of municipal waste-to-energy plants increased from 74 to 583 in the PRC, which increased by 687.84%. The daily processing capacity increased from 51,600 tons to 719,500 tons and the actual annual processing capacity increased from 15.697 million tons to 180 million tons, with a compound growth rate of both capacities of over 20%. Compared with the developed countries, the percentage of waste-to-energy processing capability in China is still relative low. According to the national "14th Five-Year" plan, by the end of 2025, the national urban domestic waste incineration capacity will reach about 800,000 tons per day, and the municipal solid waste incineration treatment capacity will account for about 65%, indicating that the waste-to-energy industry still has growth potential.

The municipal waste-to-energy industry is characterized by policy encouragement, regional monopoly, capital intensiveness, and insignificant seasonal and periodic fluctuations. Details are as follows:

- (1) In recent years, with the continuous advancement of China's industrialization and urbanization, the environmental problems facing our country have become increasingly serious. The State has raised the construction in relation to ecological civilization to an unprecedented level. Energy-saving and environmental protection industry, including waste treatment, is the top of the seven strategic emerging industries of the PRC. In the context of a small per capita land area in the PRC, waste-to-energy is an important means to achieve the "reduction, recycling, and harmless treatment" of waste and improve the ecological environment. Due to the large initial investment and high operating costs of waste-to-energy business, the State has introduced preferential policies in various aspects such as on-grid tariff and tax to promote the rapid development of the waste-to-energy industry, e.g. implementation of the national unified waste-to-energy benchmarking tariff of RMB0.65 per kWh for the part that does not exceed 280 kWh per ton of municipal waste; eligible waste-to-energy projects will be eligible for a tax exemption for the first year to the third year, and a 50% reduction in CIT for the fourth year to the sixth year starting from the year in which the projects first generate operating income; VAT on tariff revenue is subject to 100% refund and VAT on waste treatment fees is subject to 70% refund.
- (2) The waste-to-energy projects in the PRC usually adopt the concession model, and the concession period is generally from 25 to 30 years. Under this model, the relevant government departments grant concession rights to investors or operators of waste-to-energy plants, and the grantees of concession rights enjoy the exclusive right to treat municipal waste in a certain area during the concession period.
- (3) The waste-to-energy industry is capital intensive. The initial investment required for the waste-to-energy project is large. The capital investment for a waste-to-energy plant with a daily treatment capacity of 1,000 tons is generally RMB400 million to RMB600 million. At the same time, the payback period of waste-to energy projects is relatively long, generally 8-12 years.
- (4) The raw materials of waste-to-energy plants are municipal waste, which is directly related to the local population, and the production volume is relatively stable and subject to insignificant seasonal and periodic fluctuations.

III. OPERATIONS OF THE COMPANY DURING THE REPORTING PERIOD

Principal operations of the Company

The Company is one of the earliest enterprises to conduct municipal waste-to-energy business in the PRC, and is mainly engaged in the investment, construction, operation, maintenance and technical consulting business of municipal waste-to-energy plants under BOT and other concessions. Focusing on the vast market space of the economically developed Yangtze River Delta, Pearl River Delta and Bohai Economic Rim, the Company has extended its business network to the central and western regions such as Anhui, Hubei, Guizhou, Shanxi, Guangxi, Jiangxi, Hunan, Shaanxi, Henan and Sichuan, preliminarily forming a market layout based in the Yangtze River Delta, Pearl River Delta and Bohai Rim and spanning across the country. As at 31 December 2022, in respect of the municipal waste-to-energy sector, the Company had 32 projects under operation and 5 projects under construction. The waste treatment capacity of the projects under operation reached 35,000 tons/ day and the installed capacity was 724.5MW, placing the Company in a leading position in the industry in terms of the number of projects and waste treatment capacity.

2. Major business model

The Company mainly adopts the BOT model to operate its municipal waste-to-energy business as follows: the government department responsible for waste disposal selects a service provider to construct and operate the waste-to-energy plant under the BOT model through tenders or other means. After the Company is awarded the project, the Company enters into a concession agreement with the relevant local government department and establishes a project company to conduct business. According to the concession agreement entered into with the relevant local government department, the project company is responsible for raising funds to construct and operate the entire waste-to-energy plant. The concession period is usually from 25 to 30 years. The relevant government department pays the project company a waste treatment fee at the agreed price, and the project company sells the electricity, steam or hot water generated during the waste incineration process. Upon the expiration of the concession, the Company has to transfer the relevant infrastructure to the concession grantor.

The upstream industries of the Company include construction enterprises, installation companies, waste treatment and power generation equipment (such as incinerators, smog and gas treatment systems, turbine generators and waste heat boilers) suppliers, and the Company selects suppliers through tenders. The downstream industries mainly include local government departments and power grid companies. The Company provides waste incineration treatment services to local governments to receive waste treatment fees and provides electricity to power grid companies to receive electricity tariffs.

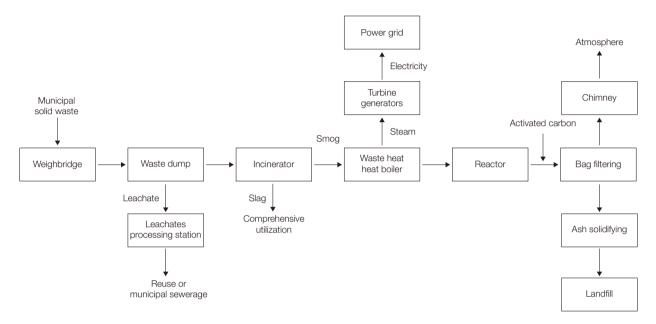

3. Main processes and technologies

The specific process of waste incineration power plant is illustrated in the following diagram:

The core equipment of the waste incineration power generation system is incinerator. The Company mainly uses the self-developed three-drive expeller grate waste incinerator. The incinerator has a unique integrated three-stage design. Its drying and burning configuration are equipped with independent driving mechanism. It can flexibly adjust the running speed of each section according to the combustion condition, which can better control the distribution of the fire bed and achieve lower clinker ignition loss.

IV. ANALYSIS OF CORE COMPETITIVENESS DURING THE REPORTING PERIOD

✓ Applicable □ Not applicable

During the Reporting Period, there was no material change in the core competitiveness of the Company.

1. Focused market layout spanning across the whole country

Since its establishment, the Company has adopted a proactive strategy in market development and strives to develop various regional markets. Its projects are distributed in an extensive geographical area, with a market network covering 20 provinces/municipalities/autonomous regions. Focusing on the vast market space of the economically developed Yangtze River Delta, Pearl River Delta and Bohai Economic Rim, the Company has extended its business network to the central and western regions such as Anhui, Hubei, Guizhou, Shanxi, Guangxi, Jiangxi, Hunan, Shaanxi, Henan and Sichuan, preliminarily forming a market layout based in the Yangtze River Delta, Pearl River Delta and Bohai Rim and spanning across the country.

2. Extensive industry experience

The Company is among the first companies to explore industrial applications for waste treatment in the PRC, and is also one of the earliest enterprises to focus on upgrading and further developing advanced international waste-to-energy technologies in the PRC. Since its establishment in 2000, the Company has accumulated extensive experience in project investment, construction and operation management. It has been recognised as the "Top 10 Most Influential Solid Waste Enterprises" for thirteen consecutive years. More than two decades of industry experience builds up the brand of the Company and will help the Company seize the development opportunities in the industry and achieve its strategic development goals.

3. Leading expertise

The "multiple drive expeller grate waste incinerator" technology independently developed by the Company is a leading incineration technology in the industry and was granted an invention patent by the state. The technology is compatible with the characteristics of the municipal waste in the PRC with an edge in performance, was selected by the Ministry of Housing and Urban-Rural Development (住建部) as a core technology to promote for use during the "11th Five-Year Plan" period, and was successfully listed in the 2019 Directory of Key Environmental Protection Practical Technologies and Demonstration Projects (《2019年重點環境保護實用技術及示範工程 名錄》) by China Association of Environmental Protection Industry (中國環境保護產業協會). The Changzhou Project was recognised by China Association of Environmental Protection Industry (中國環境保護產業協會) as a "National Model Project for Use of Environmental Protection Technologies" (使用環保技術的國家模範項目) in 2013. Huizhou Project and Haining Expansion Project were successively awarded the "Quality Chinese Project for Electricity Engineering Award" (中國電力優質工程獎) and the "National Quality Project Award" (國家優質工 程獎). Tongzhou Project was awarded the "Quality Chinese Project for Electricity Engineering Award" (中國電力 優質工程獎) and "Luban Prize" (魯班獎) in 2020. "A multiple drive expeller grate waste incinerator with an online warning and control system of dioxin" independently developed by the Company was awarded the second prize for technical progress for 2019 by China Environmental Protection Industry Association. The multiple drive expeller grate waste incinerator and dioxin online warning and control technology won the first prize of scientific and technological progress and the second prize of scientific and technological application of China Association of Urban Environmental Sanitation in 2022, respectively. With its professional technologies, the Company is able to provide more premium environmental services for its customers and enhance its market position.

4. Experienced management team

The management team of the Company has been engaged in business management, market development, technology development and construction and operation of waste-to-energy plants over the years. The Chairman of the Company, Mr. Qiao Dewei, was recognised as one of the "Top 100 Industry Leaders in Shenzhen" in 2020, proving his social influence and charisma, and the management team under his leadership has nearly 20 years of experience in cooperation and in-depth understanding of the industry. Under the guidance of the management team, the project construction and operation team can adopt targeted strategies for the changes in the waste treatment technology and management and operation of waste-to-energy plants in a timely manner, while the marketing team can actively develop potential regional markets according to the future development planning of the Company. Such an experienced team of the Company helps to enhance the operating efficiency and warrants the quality of the projects.

V. MAJOR OPERATIONAL PARTICULARS DURING THE REPORTING PERIOD

In 2022, the Group achieved an operating income of RMB4,567,117,851.39 and net profit of RMB784,458,040.01. As at 31 December 2022, the Group's total assets and total liabilities amounted to RMB22,677,440,152.69 and RMB14,864,161,291.15 respectively. The total equity amounted to RMB7,813,278,861.54 and the gearing ratio (calculated as total liabilities over total assets) was 65.55%, and the net asset value per share attributable to the shareholders of the parent company was RMB5.26.

(I) Analysis of main businesses

1. Analysis of changes in relevant items in income statement and cash flow statement

Unit: RMB

		Amount for	
	Amount for	the corresponding	
Item	the current period	period last year	Change (%)
Operating income	4,567,117,851.39	5,056,889,425.65	-9.69
Operating cost	2,997,119,359.53	3,325,173,180.51	-9.87
Administrative expenses	196,908,977.78	181,440,756.77	8.53

Net cash flow generated from			
investing activities	-1,110,698,445.81	-1,619,392,165.00	N/A
Net cash flow generated from			
financing activities	811,189,272.32	466,574,265.58	73.86

Explanation on changes in operating income:

Mainly due to that the number and scale of projects under construction in the period decreased, resulting in a decrease in the construction revenue by RMB680 million as compared with the same period last year.

Explanation on changes in operating cost:

The reason is the same as that for the changes in operating income. The construction cost decreased by RMB632 million as compared with the same period last year.

Explanation on changes in selling expenses:

N/A

Explanation on changes in administrative expenses:

Mainly due to the commencement of operation of Laizhou Project, Enshi Project and Huludao Hazardous Waste Project, the inclusion of Fengcheng Company in the scope of consolidation and the operation of Dengfeng Project, Jinsha Projects, etc. put into operation in 2021 throughout 2022, resulting in a year-on-year increase in the expenses

Explanation on changes in finance costs:

Mainly due to the issuance of convertible corporate bonds in the period and the transfer of new operation projects from the construction period to the operation period, resulting in an increase in expensed interests.

Explanation on changes in research and development expenditure:

An increase in research and development activities.

Explanation on changes in net cash flow generated from operating activities:

Mainly due to an increase in National Subsidies by RMB515 million received during the period as compared with the same period last year, an increase in cash received from sale of goods or rendering of services, and a decrease in construction expenditure of ppp projects included in cash outflow from operating activities as a result of a decrease in the number and scale of projects under construction during the period.

Explanation on changes in net cash flow generated from investing activities:

Mainly due to a decrease in the number and scale of projects under construction in the period, a decrease in cash paid for purchase and construction of fixed assets, intangible assets and other long-term assets, and the collection of most of the compensation arising from the disposal of Haining Project.

Explanation on changes in net cash flow generated from financing activities:

Mainly due to the receipt of proceeds from the issuance of convertible corporate bonds in the period amounting to RMB1.247 billion and a decrease in cash received from borrowings in the period by RMB1.502 billion as compared with the same period last year, and a decrease in cash paid for repayment of debts during the period as compared with the same period last year.

Detailed explanation on material changes in the business type, profit composition or profit source of the Company in the period

2. Analysis of the revenue and costs

✓ Applicable □ Not Applicable

During the Reporting Period, the Group achieved an operating income of RMB4,567,117,851.39 (corresponding period in 2021: RMB5,056,889,425.65), representing a decrease of 9.69% as compared to the corresponding period in 2021. In particular, operating income amounted to RMB2,436,075,082.17 (corresponding period in 2021: RMB2,277,415,258.35), representing an increase of 6.97% as compared to the corresponding period in 2021. Construction revenue was recognized for BOT projects in an amount of RMB1,747,440,929.97 (corresponding period in 2021: RMB2,427,432,006.22), representing a decrease of 28.01% as compared to the corresponding period in 2021 during the construction period in accordance with the Accounting Standards for Business Enterprises No. 14 and other relevant regulations. Interest income amounted to RMB383,601,839.25 (corresponding period in 2021: RMB352,042,161.08), representing an increase of 8.96% as compared to the corresponding period in 2021.

Gross profit and gross profit margin

During the Reporting Period, the gross profit of the Group decreased by 9.34% to RMB1,569,998,491.86 (corresponding period in 2021: RMB1,731,716,245.14) and the gross profit margin was 34.38% (corresponding period in 2021: 34.24%). The increase in gross profit margin was mainly due to the low gross profit margin of construction revenue, resulting in a decrease in the proportion of construction revenue to the total revenue in the period by 9.74% as compared to the corresponding period of last year, and an increase in the proportion of operating income to the total revenue as compared with the same period last year.

Total profit

During the Reporting Period, the total profit of the Group amounted to RMB891,642,875.84, representing an increase of RMB1,515,816.52 as compared to corresponding period in 2021, which was basically flat with that of the last year.

Description of other situations of cost analysis Nil

- (5) Changes in the scope of consolidation due to changes in the equity of major subsidiaries during the Reporting Period
 - ✓ Applicable □ Not Applicable

During the Reporting Period, the Company obtained control over Fengcheng Company. Fengcheng Company has changed from a joint venture to a subsidiary of the Company from 23 June 2022. Therefore, Fengcheng Company was included in the scope of consolidation.

(6)	Significant changes in or adjustments to the Company's business, products or services during the Reporting Period ☐ Applicable ✓ Not Applicable
(7)	 Major customers and suppliers of the Company A. Major customers of the Company ✓ Applicable □ Not Applicable
	The customers of the Group mainly comprise the municipal administrative authorities of the local governments and power grid companies. Pursuant to the "Concession Agreement" entered into between the Group and the municipal administrative authorities of the local

local governments and power grid companies. Pursuant to the "Concession Agreement" entered into between the Group and the municipal administrative authorities of the local governments, the Group provides waste treatment service to the municipal administrative authorities and receives waste treatment fee. The amount of processed waste is measured with the equipment monitored by both parties, and the waste treatment standards are in line with the relevant technical and emission standards. The "Concession Agreement" stipulates the waste treatment fee, which will be reviewed and adjusted on a regular basis, and settled monthly or every several months. The Group is dedicated to provide quality and professional waste treatment service to municipal administrative authorities of the local governments, so as to improve urban environment and establish a brand image.

Pursuant to the "Electricity Sale and Purchase Agreement" entered into by the Group and the power grid companies, the Group sells the electricity it generated (net of those for self-consumption) to the power grid companies and receives sales revenue. The unit price of electricity is based on the unified price issued by the National Development and Reform Commission. The on-grid electricity is measured by electric meters approved by both parties and the fee will be settled monthly or every several months.

Sales to the Group's largest customer amounted to RMB267,948,200, accounting for 9.50% of the total sales for the year.

Sales to the Group's five largest customers amounted to RMB881,770,100, accounting for 31.27% of the total sales for the year, in which sales to related parties was nil, accounting for nil% of the total sales for the year.

Circumstances in which the proportion of sales to a single customer exceeded 50% of the total sales, there were new customers among the top 5 customers, or the Company was heavily dependent on a small number of customers

☐ Applicable ✓ Not Applicable

В.	Major suppliers of the Company
	✓Applicable ☐ Not Applicable

The Group mainly procures various kinds of equipment, construction and installation services and consumables. The Group maintains a database of suppliers and, in accordance with the procurement procedures and policies it established, selects suppliers publicly based on their merits through bidding and other procedures as permitted by laws. The Group will enter into procurement contracts with the selected suppliers and make payment according to the time the suppliers provide products or services. The Group values the relationship with suppliers and has established long term cooperation with them based on the principles of "fairness and mutual benefits".

Purchases from the largest supplier amounted to RMB334,880,000, accounting for 13.81% of the total purchases for the year.

Purchases from the Group's five largest suppliers amounted to RMB616,054,400, accounting for 25.41% of the total purchases for the year, in which purchases from related parties was RMB0, accounting for 0% of the total purchases for the year.

Circumstances in which the proportion of procurement from a single supplier exceeded 50% of the total sales, there were new suppliers among the top 5 suppliers, or the Company was heavily dependent on a small number of suppliers

☐ Applicable ✓ Not Applicable

Other Explanation

None of the Directors or any of their close associates or any substantial shareholders of the Company (which, to the best knowledge of the Directors, own 5% or above of the Company's issued share capital) had any beneficial interest in the Group's five largest customers and five largest suppliers.

3. **Expenses**

✓ Applicable □ Not Applicable

Administrative expenses

During the Reporting Period, the administrative expenses of the Group amounted to approximately RMB196,908,977.78 (corresponding period in 2021: RMB181,440,756.77), representing a year-onyear increase of 8.53%, which accounted for approximately 4.31% (corresponding period in 2021: 3.59%) of the operating income of Group.

Finance costs

During the Reporting Period, the finance costs for the Group amounted to RMB463,741,531.91, representing an increase of approximately RMB16,107,393.69 or 3.60% over the previous year.

(3)Income tax expenses

During the Reporting Period, the income tax expenses of the Group amounted to approximately RMB107,184,835.83 (2021: RMB148,283,994.85), accounting for approximately 12.02% (2021: 16.66%) of total profit of the Group. The decrease in the proportion of income tax expenses and total profits is mainly due to a decrease in the income tax expenses for the period as a result of the tax rebates received by certain project companies in the period arising from the offset of corporate income tax by special environmental protection equipment; and a decrease in gross profit in the period, resulting in a decrease in recognized deferred income tax liabilities and a decrease in deferred income tax expenses.

Financial resources and liquidity

The Group adopts prudent principles in cash and financial management to ensure proper risk management and reduction in costs of fund. It finances its operations primarily from cash flow generated internally and loans from principal banks. As at 31 December 2022, the Group had cash and cash equivalents of approximately RMB1,864,783,293.59, representing an increase of RMB909,993,338.24 as compared to RMB954,789,955.35 at the end of 2021. The cash balance increased as compared with last year mainly due to the issuance of convertible corporate bonds and an increase in National Subsidies received during the year. As at 31 December 2022, the Group's gearing ratio decreased from 65.78% at the end of 2021 to 65.55%.

Capital management

The Group's primary objective when managing capital is to safeguard the Group's ability to continue as a going concern, so that it can provide returns for its shareholders while maintaining reasonable capital structure to reduce capital costs. The Group makes use of its gearing ratio for the management of capital structure. The ratio is defined as total liabilities divided by total assets. In 2022, the Group's strategy remained unchanged from 2021. As at 31 December 2022 and 31 December 2021, the gearing ratios of the Group were 65.55% and 65.78%, respectively.

Loans and pledge of assets

As at 31 December 2022, the Group had total outstanding borrowings of approximately RMB10,148,722,282.77, representing a decrease of RMB569,509,956.74 as compared to RMB10,718,232,239.51 at the end of 2021. The borrowings included pledged loans of RMB6,156,061,331.18 and unpledged loans of RMB3,992,660,951.59. The Group's borrowings were denominated in Renminbi and Hong Kong dollars. Most of the Group's borrowings were at floating rates. As at 31 December 2022, the Group had composite banking credit facilities in the amount of RMB17,716,055,000.00, of which RMB5,441,263,958.43 had not been utilised. The composite banking credit facilities had terms ranging from 1 year to 15 years. The Group currently does not have any interest rate hedging policies. However, the management team keeps monitoring the Group's interest rate risks and would consider other necessary actions when significant interest rate risks are anticipated to occur. Certain receivables and operating rights in connection with the Group's service concession arrangements (including intangible assets, other non-current assets, contract assets and accounts receivable) were pledged under the banking credit facilities. The book value of the pledged receivables and operating rights amounted to approximately RMB10,471,334,174.01 as at 31 December 2022.

Contingent liabilities

The Company has issued financial guarantees to banks in respect of the banking credit facilities granted to certain subsidiaries. The Board of the Company does not consider it probable that a claim will be made against the Company under the guarantees. The maximum liability of the Company as at 31 December 2022 and 31 December 2021 under the guarantees was the credit facility drawn down by the subsidiaries of RMB7,132,550,080.82 and RMB7,280,072,374.12, respectively.

Commitments

As at 31 December 2022 and 31 December 2021, the Group's outstanding purchase commitments in relation to the construction contracts which had not been provided for in the Group's financial statements were RMB946,778,596.90 and RMB2,367,683,664.66, respectively.

Project name	Place	Type of solid waste	Total investment	Designed capacity	Capacity utilization rate	Date of operation commencement	Project stat	Term of concession tus rights	Criteria for waste treatment fees
Tongzhou Project	Tongzhou, Beijing	Municipal waste	1,240,000,000	2,250 tons/day	95.48%	August 2018	Completed	27 years	RMB152/ton
Shantou Project	Shantou, Guangdong	Municipal waste	1,040,000,000	2,250 tons/day	86.46%	March 2019 for phase I and September 2020 for phase II	Completed	30 years	RMB90/ton
Huizhou Phase II Project	Huizhou, Gangdong	Municipal waste	1,790,000,000	3,400 tons/day	92.11%	May 2020 for phase I and August 2021 for phase II	Completed	29 years	RMB74.3/ton

Note: Unless otherwise specified, the term of the concession rights includes the construction period, the same applies below.

(2) Power generation business

✓ Applicable □ Not applicable

Project name	Electricity generation efficiency	Electricity generation volume ('0,000 kWh)	On-grid tariff (RMB/kWh)	Subsidy policy	Term of concession rights
Tongzhou Project	67.49%	29,555.70	0.65	Note	27 years
Shantou Project	53.90%	28,328.26	0.65	Note	30 years
Huizhou Phase II Project	58.24%	43,365.26	0.65	Note	29 years

Note: According to the Notice on Improving the Pricing Policy of Waste Incineration Power Generation from the NDRC (Fa Gai Jia Ge [2012] No. 801) (《國家發展改革委關於完善垃圾焚燒發電價格政策的通知》(發改價格[2012]801號)), for waste-to-energy projects using municipal waste as raw materials, the portion not exceeding on-grid electricity of 280 kWh per ton of municipal waste implements a national waste-to-energy benchmark on-grid price of RMB0.65 per kWh (inclusive of tax). The portion of waste-to-energy benchmark price exceeding on-grid benchmark tariff of local desulfurization coal-fired electricity generation units is subject to two-tier sharing. Of which, the local provincial power grid bears at a rate of RMB0.1 per kWh, being the "provincial subsidies"; while the remaining portion is included in the nationally collected additional subsidies for renewable energy tariff, being the "national subsidies".

(3) Equipment

Project name	Incineration equipment	Power equipment	Flue gas treatment system
Tongzhou Project	3X750 expeller grate waste incinerator	2X25MW Turbine generators	Denitration, semi-dry lime deacidification, dry deacidification, activated carbon injection device, bag filter and SCR denitration in SNCR furnace
Shantou Project	3X750 expeller grate waste incinerator	1X35MW+1X25MW Turbine generators	Denitration, semi-dry lime deacidification, dry deacidification, activated carbon injection device and bag filter in SNCR furnace
Huizhou Phase II Project	4X850 expeller grate waste incinerator	1X40MW+1X45MW Turbine generators	Denitration, semi-dry lime deacidification, dry deacidification, activated carbon injection device, bag filter and SCR + wet denitration in SNCR furnace

(4) Main processes and technologies

For details, please refer to "III. Operations of the Company during the Reporting Period" in this section.

(5) Market share

According to the latest information disclosed in the China Statistical Yearbook, the waste incineration capacity in 2021 was 180,000,000 tons in China. In 2021, the Company's waste incineration treatment was 10,537,600 tons, accounting for 5.85% of the total treatment amount.

VI. DISCUSSION AND ANALYSIS OF THE COMPANY'S FUTURE DEVELOPMENT

(I) Industry pattern and trends

✓ Applicable □ Not Applicable

After more than two decades of development, the penetration rate of waste incineration in the PRC is uneven geographically, and the proportion of incineration in urban areas is relatively high, with relatively low proportion in urban and rural areas. In November 2022, five departments including the National Development and Reform Commission, the Ministry of Housing and Urban-Rural Development, the Ministry of Ecology and Environment, the Ministry of Finance, and the People's Bank of China jointly issued the Guiding Opinions on Strengthening the Construction of Municipal Waste Incineration Treatment Facilities in County-level Areas, which proposed specific guiding opinions on deployment and strengthening of the construction of municipal waste incineration treatment facilities in county-level areas (including county-level cities) and speeding up the tackling of shortcomings. The goal is that by 2025, a domestic waste classification and treatment system that is compatible with economic and social development will be basically formed in county-level areas across the country, and qualified countylevel areas in the Beijing-Tianjin-Hebei region, the Yangtze River Delta, and the Guangdong-Hong Kong-Macao Greater Bay Area will basically realize full coverage of incineration treatment capacity. Domestic waste incineration treatment facilities will be built as much as possible in qualified county-level areas in the Yangtze River Economic Belt, the Yellow River Basin, key cities for domestic waste classification, etc. and landfilling is still allowed in the county-level areas which do not meet the conditions to build incineration treatment facilities; and that by 2030, except for a few special areas that do not have the conditions, the nationwide county-level incineration capacity will basically meet the treatment needs. The penetration of the waste-to-energy industry into county markets will bring new opportunities and challenges to the industry.

Under the constraints of the goals of peak carbon dioxide emission and carbon neutrality, the development of the energy industry in the PRC will enter a new stage. In March 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the "14th Five-Year" Plan on Modern Energy System which proposed adherence to ecological priority and green development to strengthen the clean energy industry. Renewable energy substitution actions will be implemented to accelerate development of wind power and solar power generation, promote the diversified utilization of biomass energy, and steadily develop urban domestic waste-to-energy business. Further efforts will be exerted to promote the construction of new power systems and accelerate the large-scale application of new energy storage technologies. The goals of peak carbon dioxide emission and carbon neutrality will be realized in a scientific and orderly way, and a roadmap will be formulated for the development of the new energy industry.

The establishment of a market-based mechanism for carbon emissions is also an important measure to achieve the goals of peak carbon dioxide emission and carbon neutrality. The national carbon emissions permit trading has been officially launched on the Shanghai Environment and Energy Exchange in 2021. The Ministry of Ecology and Environment will first carry out national carbon emission permit trading in the power generation industry. On the basis of the stable operation of the carbon market in the power generation industry, the coverage will be gradually expanded and the trading varieties and trading methods will be enriched, to achieve stable and effective operation and healthy and sustainable development of the national carbon market. The effective market mechanism will play an important role in achieving the goals of peak carbon dioxide emission and carbon neutrality. The carbon reduction effect of waste incineration is significant, and enterprises in the industry may obtain additional income by trading Chinese certified emission reduction (CCER) in the future.

The above plans and policies will bring new development opportunities for enterprises engaged in waste-toenergy business.

(II) Company development strategy

✓ Applicable □ Not Applicable

With "creating a better living environment" as the corporate mission, the Company properly responds to the changes in the national macro environment and industry policies, focuses on the main business, and strengthens the market development of waste-to-energy projects. It takes advantage of the capital market to strengthen mergers and acquisitions, improve the operation and management of completed projects, and make the waste-to-energy business more refined, better and stronger. New growth drivers will be proactively cultivated in the relevant industries, to promote the enterprise to shift from high-speed development to a high-quality and healthy development, striving to build Dynagreen into a domestic first-class and internationally renowned comprehensive environmental protection industrial group.

(III) Business plan

✓ Applicable □ Not Applicable

The year 2023 is an important year for the Group's strategic plan for the "14th Five-Year Plan" period to connect the past and the future and promote its implementation. Dynagreen Group will keep up with the changes in industry situation and macro policies. Following the working idea of "continued enhancement of market development, continuous efforts on quality and efficiency improvement of projects under operation and further refinement, optimization and strengthening of main businesses", it will strengthen the refined management of projects, increase revenue and reduce expenditure, to improve quality and efficiency. Meanwhile, it will expand heat and steam supply and engage in other solid waste businesses simultaneously, and improve project operation efficiency and benefits. Safety and environmental protection management will be strengthened to eliminate major safety accidents in production and ensure that environmental protection emission standards are met. It will ensure that Shuozhou Project, Huludao Waste-to-energy Project, Wuhan Phase II Project, Jingxi Project and Zhangqiu Phase II Project will be put into production as scheduled in the year; and the construction of Tongzhou Phase II Project and Shantou Kitchen Waste Project will commence in the fourth quarter. The Group will proactively cultivate new businesses and promote the implementation of projects.

(IV) Potential risks

✓ Applicable □ Not Applicable

1. Risk of industry policies

The waste-to-energy industry is greatly affected by industry policies. Pursuant to the Renewable Energy Law of the PRC (《中華人民共和國可再生能源法》) (as amended in 2009), the government implements a full coverage purchase system for renewable energy power generation. Pursuant to the Notice on Improving the Pricing Policy of Waste Incineration Power Generation from the NDRC (Fa Gai Jia Ge [2012] No. 801) (《國家發展改革委關於完善垃圾焚燒發電價格政策的通知》) (發改價格[2012] 801號) issued by the NDRC on 28 March 2012, the waste-to-energy projects are converted into on-grid electricity based on the volume of waste treatment received in the plants with a conversion ratio of 280 kWh per ton of municipal waste. The part that does not exceed the above-mentioned amount of electricity implements a national waste-to-energy benchmark price of RMB0.65 per kWh (inclusive of tax). The part that exceeds the abovementioned amount of electricity implements the on-grid tariff for the local coal-fired generating units. All the waste-to-energy projects approved after 2006 shall follow such regulation. In September 2020, the Ministry of Finance, the National Development and Reform Commission, and the National Energy Administration jointly issued the supplementary notice on relevant matters of the Several Opinions on Promoting the Healthy Development of Non-Hydro Renewable Energy Power Generation (《關於促進非 水可再生能源發電健康發展的若干意見》), noting that subsidies for biomass power generation projects by the National Renewable Energy Fund will cover only the first 82,500 hours or 15 years after the project is put into operation. In September of the same year, the Ministry of Finance, the National Development

and Reform Commission, and the National Energy Administration jointly issued the Implementation Plan for Improving the Construction and Operation of Biomass Power Generation Projects (《完善生物質發電 項目建設運行 的實施方案》). Since 1 January 2021, the on-grid tariff of all the biomass power generation projects that have been approved but not started and newly approved in the planning will be allocated and determined through competition. In August 2021, the NDRC, the Ministry of Finance, and the National Energy Administration jointly issued the Notice on Printing and Distributing the Work Plan for the Construction of Biomass Power Generation Projects in 2021 (Fa Gai Neng Yuan [2021] No. 1190) (《關於 印發<2021年生物質發電項目建設工作方案>的通知》(發改能源[2021]1190號)), proposing to divide the biomass power generation projects subsidized by the central government in 2021 into non-competitive allocation projects and competitive allocation projects. The projects for which all units were completed and connected to the grid in the current year after 20 January 2020 (inclusive) but which were not included in the subsidy scope of 2020 and the projects for which the construction was commenced by the end of 2020 and all units were completed and connected to the grid by the end of 2021 are non-competitive configuration projects; the projects for which the construction was commenced in the current year after 1 January 2021 (inclusive) are competitive configuration projects. The change of national renewable energy tariff subsidy policy may have adverse effects on the Company's profitability and cash flow.

The Company will pay close attention to policy developments and convey our desire to maintain policy stability through industry organizations. The Company will develop heating business according to local conditions and expand the source of income. When negotiating a franchise agreement, the Company will supplement corresponding terms, through which, if there is a major change in the external policy, the loss can be compensated by raising the garbage disposal fees.

2. Risk of environmental protection policies

The waste-to-energy business conducted by the Company is strictly regulated by the environmental protection departments at all levels in the country. In recent years, the environmental pollution problems have become increasingly prominent in the PRC. On the one hand, the government has introduced favourable policies to support the rapid development of the environmental protection industry, and on the other hand, it has also strengthened the supervision on the environmental protection industry. The Company operates in strict compliance with the relevant requirements of the environmental protection departments. As the government has been raising the environmental protection standards, the Company's investment in environmental protection will correspondingly increase, which may adversely affect the operations, profitability and cash flows of the Company.

The Company will increase power generation through technology research and development, facility renovation and improvement of operation management to offset the adverse impact of rising costs in environmental protection.

3. Risk of tax policies

The Company and its subsidiaries rely on the government's policies in respect of the environmental protection industries to enjoy tax incentives for certain taxes such as corporate income tax and value-added tax. From 2021 to 2022, the Company enjoyed total tax incentives of RMB205,270,400 and RMB176,987,500 respectively, accounting for 23.06% and 19.88% of the total profit of the Company for the year. If the country reduces the tax incentives for the environmental protection industries in the future, the operations, profitability and cash flows of the Company may be adversely affected.

The Company will pay close attention to policy developments and convey our desire to maintain policy stability through industry organizations. When negotiating a concession agreement, the Company will supplement corresponding terms that if there is a major change in the external policy, the loss can be compensated by raising the garbage disposal fees.

4. Risk of negative public perceptions on waste-to-energy business

The public may have a negative perception on waste-to-energy business. The public may be worried that the construction and operation of the projects may cause secondary pollution to the surrounding environment. With regards to this, the NDRC added a social stability risk assessment procedure in the project approval procedures, and the Ministry of Ecology and Environment also strengthened the requirements for environmental impact assessment and further regulated the environmental impact assessment hearings and public investigation procedures. The "Not in My Back Yard" effect and the strict regulatory policies of the government intensify the difficulty of project site selection, leading to an increase in project preparation time and costs. If the negative public perceptions on waste-to-energy business are further aggravated in the future, the profitability of the Company may be adversely affected as a result of increased difficulty of operation.

The Company will discharge pollutants strictly according to environmental protection standards and will publish emission data to public. The Group will organize community residents to visit the waste-to-energy plants operated by the Group to provide the public with a deeper understanding of waste-to-energy business.

5. Risk of unstable supply and calorific value of municipal solid waste

The operating efficiency of a waste-to-energy plant depends on the supply and calorific value of municipal solid waste. Municipal solid waste is mainly transported by the local government to the waste-to-energy plant of the Company by land transportation. The supply is mainly affected by the local waste collection system and the size of local population. If the local government lacks or fails to establish a complete waste collection and delivery system on time, it will not be able to supply the Company with consistent and stable supply of municipal solid waste, which may result in insufficient capacity utilisation of the Company. The waste classification being promoted will also affect the waste supply. In addition, the calorific value of waste will also affect the amount of electricity generated by waste-to-energy plants. If the calorific value of municipal solid waste is low, the amount of electricity generated cannot be guaranteed. Therefore, the instability of the supply and calorific value of municipal solid waste may affect the operational efficiency of the waste-to-energy plants of the Company, which will adversely affect the operations and profitability of the Company.

Before signing concession agreements, the Group conducts a full evaluation and analysis of the quantity and calorific value of the wastes provided by the government to ensure that wastes are provided in accordance with the quantity and quality reasonably agreed in the concession agreement. In the case of insufficient quantity of garbage and insufficient calorific value, the Group will actively search for domestic garbage and pollution-free combustion material in the garbage supply area and surrounding areas. In addition, as agreed in the concession agreement, if the amount of garbage is lower than the guaranteed value, the government will pay the fee at the guaranteed value to the Group.

6. Risk of cost overruns and delays in the construction of the BOT projects of the Company

The cost and progress of the project construction are affected by a number of unfavourable factors, including price fluctuations in construction materials, equipment and components, shortages in the supply of equipment, materials or manpower, strikes and labour disputes, unexpected engineering, design, environmental or geological issues, impact of supporting infrastructure facilities, unexpected increase in costs, the "Not in My Back Yard" effect and others. These factors may be beyond the control of the Company, which may lead to cost overruns and delays in the construction of the BOT projects of the Company, which may in turn result in the Company's failure to achieve the expected returns and adversely affect the operations and financial conditions of the Company.

The Group pays attention to the establishment of a harmonious relationship with the government agencies related to the project and urges the government to complete all legal procedures and ancillary infrastructure facilities of the project. The Group clearly stipulated in the concession agreement that if the project construction conditions are not reached, or the project is suspended, the construction period is delayed, and the cost is increased due to the reasons caused by the government, then the government should compensate the project investors accordingly. In addition, the Group selects suppliers meticulously, demands the construction units to keep a high level of attention to project construction, increases investment in personnel and equipment, and forms a strong project management team.

7. Risk of substandard performance in environmental protection

In the course of project construction and operation, the Company may be subject to environmental pollution risks such as air pollution, noise pollution, harmful substances, sewage and solid waste discharge. Although the Company has adopted measures such as waste gas purification, waste water and solid waste treatment and noise prevention to avoid or minimize the potential adverse impact of its projects on the environment, environmental pollution risks may still exist due to equipment failures or human errors in the actual production and operation processes of the project companies, which may adversely affect the operations, brand reputation and profitability of the Company.

The Group attaches great importance to environmental protection compliance, starting with corporate culture, management system, financial budget as well as supervision and assessment to ensure that the Group's emissions meet the standards.

8. Risk of high gearing ratio

Municipal waste-to-energy is a capital-intensive industry, and project construction funds are generally raised by 30% of capital and 70% of bank loans. As of the end of December 2022, the Company's gearing ratio was 65.55%, which is still higher than the industry average. If the domestic monetary policy tightens and the lending channels become drained, the operations, financial conditions and cash flow of the Company may be affected adversely.

The Company prepares an investment and financing plan according to its financial budget each year to plan on cash inflows and outflows. The Company, on the one hand, maintains sufficient credit line with banks and seeks financial support from the controlling shareholder when necessary and, on the other hand, reduces the gearing ratio through equity financing.

(V) Others

☐ Applicable ✓ Not Applicable

VII. DESCRIPTION ABOUT THE SITUATION AND THE CAUSE FOR THE COMPANY'S NOT DISCLOSING PURSUANT TO RELEVANT RULES DUE TO NON-APPLICABLE RULES, NATIONAL SECRETS OR SPECIAL REASONS

☐ Applicable ✓ Not Applicable

VIII. OTHER DISCLOSURE (DISCLOSURE PURSUANT TO THE REQUIREMENTS OF THE STOCK EXCHANGE LISTING RULES)

(I) Total comprehensive income attributable to the shareholders of the Company

During the Reporting Period, the Group's total comprehensive income attributable to the shareholders of the Company was RMB722,293,217.33 (corresponding period in 2021: RMB711,866,475.14). The increase was mainly due to an increase in net profit.

(II) Foreign exchange risks and exchange gains and losses

The functional currency of the Group is Renminbi while a portion of funds is in the form of bank deposits denominated in Hong Kong dollars. Therefore, it may be subject to the risks of exchange rate fluctuations of the Renminbi and Hong Kong dollars. Apart from the above, most of the assets and transactions of the Group are denominated in Renminbi, and the Group mainly settles its operating expenses in the PRC with income generated in Renminbi, thus the Group is not exposed to any significant foreign exchange risks. The Group currently has no hedging policy with respect to the foreign exchange risks.

(III) Use of proceeds

In order to ensure the capital demand for project construction, optimize the debt structure and reduce financing costs, on 25 February 2022, the Company issued a total of 23.6 million A share convertible corporate bonds at par with a nominal value of RMB100 each. The total nominal value of the public issuance was RMB2.360 billion, the total amount of proceeds amounted to RMB2.360 billion, and the net proceeds amounted to RMB2.345 billion. On the date on which the terms of the issuance of A share convertible corporate bonds were fixed, i.e. 22 February 2022, the price of A shares of the Company was RMB9.73 per share.

As of 31 December 2022, the Company has used approximately RMB1.718 billion of proceeds to replace those funds previously invested for investment projects with the proceeds, repay bank loans, and construct proceeds funded projects. In particular, RMB150 million, RMB301 million, RMB225 million, RMB318 million and RMB169 million of proceeds had been accumulatively invested in Dengfeng Project, Enshi Project, Shuozhou Project, Wuhan Phase II Project and Huludao Waste-to-energy Project, respectively, and RMB555 million of proceeds had been used to repay bank loans. The remaining proceeds will be put into successively according to the use plan of proceeds and the construction progress of proceeds funded projects. Affected by factors such as the unfavorable factors such as personnel flow and poor material transportation, the construction progress of the peripheral supporting facilities of Shuozhou Project and Huludao Waste-to-energy Project lagged behind, resulting in the failure of the project to be put into operation as expected. After the prudent research by the Company based on the current actual construction and subsequent plan, the time for putting Shuozhou Project into production is extended to the end of March 2023, and the time for putting Huludao Waste-to-energy Project into production is extended to the end of June 2023. For details, please refer to the Announcement on the Delay of Certain Projects Funded by Proceeds from Convertible Bonds as disclosed by the Company on 2 February 2023 (Announcement No.: Lin 2023-005) on the Shanghai Stock Exchange. The use of proceeds was in line with the Offering Document of the Public Issuance of Convertible Corporate Bonds by Dynagreen Environmental Protection Group Co., Ltd., and there was no disguised change in the use of proceeds.

(IV) Final dividend

The Board proposed to pay a dividend of RMB0.12 (before tax) per share for the year ended 31 December 2022 ("2022 Final Dividend"), totaling approximately RMB167,213,900. According to the Articles of Association of the Company, the dividend shall be denominated and declared in Renminbi. The proposed Final Dividend is subject to approval by shareholders at the forthcoming annual general meeting ("AGM"). Dividend on domestic shares of the Company will be paid in Renminbi while dividend on H shares will be paid in Hong Kong dollars. The exchange rate shall be the average central parity rate of the applicable foreign exchange rate announced by the People's Bank of China for the seven days before and including the date of the AGM. The payment of 2022 Final Dividend is subject to the consideration and approval by shareholders at the AGM, which is expected to be paid by 26 July 2023.

Pursuant to the PRC Individual Income Tax Law (《中華人民共和國個人所得稅法》), the Implementation Regulations of the PRC Individual Income Tax Law (《中華人民共和國個人所得稅法實施條例》), the Notice of the State Administration of Taxation in relation to the Administrative Measures on Preferential Treatment Entitled by Non-residents under Tax Treaties (Tentative) (Guo Shui Fa [2009] No. 124) (《國家税務總局關於印發〈非居 民享受税收協定待遇管理辦法(試行)〉的通知》(國税發[2009]124號)), the Notice of the State Administration of Taxation on the Questions Concerning the Levy and Administration of Individual Income Tax After the Repeal of Guo Shui Fa [1993] No. 045 (Guo Shui Han [2011] No. 348)(《國家税務總局關於國税發[1993]045號文件 廢止後 有關個人所得税徵管問題的通知》(國税函[2011]348號)), other relevant laws and regulations and other regulatory documents, the Company shall, as a withholding agent, withhold and pay individual income tax for the individual holders of H shares in respect of the dividend to be distributed to them. However, the individual holders of H shares may be entitled to certain tax preferential treatments pursuant to the tax treaties between the PRC and the countries (regions) in which the individual holders of H shares are domiciled and the tax arrangements between Mainland China and Hong Kong (or Macau). For the individual holders of H shares in general, the Company will withhold and pay individual income tax at the rate of 10% on behalf of the individual holders of H shares in the distribution of the dividend. However, the tax rates applicable to individual holders of H shares overseas may vary depending on the tax treaties between the PRC and the countries (regions) in which the individual holders of H shares are domiciled, and the Company will withhold and pay individual income tax on behalf of the individual holders of H shares in the distribution of the dividend accordingly.

For non-resident enterprise holders of H shares, i.e., any shareholders who hold the Company's shares in the name of non-individual shareholders, including but not limited to HKSCC Nominee Limited, other nominees, trustees, or holders of H shares registered in the name of other groups and organisations, the Company will withhold and pay the enterprise income tax at the tax rate of 10% for such holders of H shares pursuant to the Notice of the State Administration of Taxation on the Issues Concerning Withholding the Enterprises Income Tax on the Dividends Paid by Chinese Resident Enterprises to H Share Holders Who Are Overseas Non-resident Enterprises (Guo Shui Han [2008] No. 897)(《國家稅務總局關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得稅有關問題的通知》(國稅函[2008]897號)). Should the holders of H shares of the Company have any doubt in relation to the aforesaid arrangements, they are recommended to consult their tax advisors for relevant tax impact in Mainland China, Hong Kong and other countries (regions) on the possession and disposal of the H shares of the Company.

The Company assumes no responsibility and disclaims all liabilities whatsoever in relation to the tax status or tax treatment of the individual holders of H shares and for any claims arising from any delay in or inaccurate determination of the tax status or tax treatment of the individual holders of H shares or any disputes over the withholding mechanism or arrangements.

(V) AGM

The notice of the AGM will be published and dispatched to shareholders of the Company in the manner as stipulated on the Articles of Association and the Stock Exchange Listing Rules when appropriate.

(VI) Closure of register of members

In order to determine the shareholders entitled to the 2022 Final Dividend, the register of holders of H shares of the Company will be closed from 30 June 2023 (Friday) to 5 July 2023 (Wednesday), both days inclusive, during which no transfer of shares will be registered. In order to qualify for the entitlement to the 2022 Final Dividend (subject to approval by shareholders at the AGM), all properly completed transfer documents accompanied with relevant share certificates must be lodged with the Company's H Share registrar, Tricor Investor Services Limited at 17/F, Far East Finance Centre, 16 Harcourt Road, Hong Kong no later than 4:30 p.m. (Hong Kong time) on 29 June 2023, being the last share registration date.

(VII) Professional tax advice recommended

If the shareholders of the Company have any doubt about the taxation implications of purchasing, holding, disposing of, dealing in, or the exercise of any rights in relation to the shares of the Company, they are advised to consult an expert.

(VIII) Pre-emptive rights

There are no provisions for pre-emptive rights under the Company's Articles of Association or the laws of the PRC (the jurisdiction in which the Company was established) which would oblige the Company to offer new shares on a pro rata basis to the existing shareholders.

(IX) Fixed assets

Details of movements in the fixed assets of the Group during the Reporting Period are set out in Note IV (11) to the financial statements.

(X) Reserve

Details of movements in the reserve of the Group during the Reporting Period are set out in the consolidated statement of changes in equity in the financial statements of this report.

(XI) Distributable reserve

During the Reporting Period, the Company's reserve available for distribution as dividends, calculated in accordance with the relevant rules and regulations, amounted to RMB3,063,822,504.78. In addition, none of the Company's share premium account is available for distribution as dividends by way of capitalization issues.

(XII) Permitted indemnity provision

The Company did not have any arrangement with a term providing for indemnity against liability incurred by the Director during their tenure as such. During the Reporting Period, the Company has taken out liability insurance for the Directors, Supervisors and senior management.

(XIII) Charitable donation

During the Reporting Period, the Group did not make any charitable donation.

(XIV) Management contracts

No contracts concerning the management and administration of the whole or any substantial part of the business of the Company were entered into or existed during the Reporting Period.

(XV) Equity-linked agreement

During the Reporting Period, the Group did not enter into any equity-linked agreements.

(XVI) Competing business

During the Reporting Period, none of the Directors, Supervisors, chief executive or the shareholders of the Company or their respective associates engage in or are considered to have interests in a business which competes or is likely to compete, either directly or indirectly, with the businesses of the Group.

(XVII) Remuneration for Directors and five highest paid employees

Details of the emoluments for Directors and five highest paid employees are set out in notes VII (6) and (7).

During the Reporting Period, no Director waived or agreed to waive any emoluments.

(XVIII) Significant events after the Reporting Period

The Company plans to amend its current articles of association. For details, please refer to the Company's subsequent announcements and circulars.

Chairman: Qiao Dewei

30 March 2023

V. Supervisory Committee's Report

To all shareholders of Dynagreen Environmental Protection Group Co., Ltd. (the "Company"),

During the year, the supervisory committee of the Company (the "Supervisory Committee") duly carried out its supervisory duties in a stringent manner to effectively protect the interests of the Company and its shareholders (the "Shareholder(s)") in accordance with the relevant provisions of the PRC Company Law and the requirement of the relevant laws and regulations of Hong Kong, the listing rules of the Shanghai Stock Exchange and articles of association of the Company (the "Articles").

On 30 March 2023, the Supervisory Committee convened a meeting, at which the 2022 financial statements of the Group and the auditor's report were reviewed and approved. The Supervisory Committee was of the opinion that the preparation and consideration procedures of the annual report were in line with the requirements under laws and regulations and the relevant provisions of the Stock Exchange and the Shanghai Stock Exchange and the annual report reflected the financial position and results of operations of the Group in a true, accurate, complete and fair manner.

The Supervisory Committee concluded that, during the year, all members of the Board and the senior management of the Group had, under the principles of diligence, fairness and honesty, duly performed the responsibilities stipulated in the Articles, and carefully implemented all resolutions of the general meetings and the Board, and did not identify any breach of law, regulations and the Articles. In the coming year, the Supervisory Committee shall continue to carry out its duties in accordance with the relevant provisions of the Articles, the Listing Rules of the Stock Exchange and the listing rules of the Shanghai Stock Exchange, and commit to perform supervisory duties honestly and diligently, with the aim of protecting the interests of the Company and its shareholders.

By Order of the Supervisory Committee **Dynagreen Environmental Protection Group Co., Ltd.**Chairman of the Supervisory Committee

LUO Zhaoguo

Shenzhen, the PRC 30 March 2023

VI. Corporate Governance

I. CORPORATE GOVERNANCE

✓ Applicable □ Not applicable

The Company complied with requirements under the Company Law, the Securities Law, the Code of Corporate Governance for Listed Companies and other laws, regulations, rules and regulatory documents and the Articles of Association, set up an established governance structure comprising of shareholders' meeting, the Board, the Supervisory Committee and senior manage, and formulated rules of procedures of general meeting, the Board and the Supervisory Committee, the Working System for Independent Directors, the Working Rules of General Manager; the Working Rules of Secretary to the Board, as well as formed the Strategy Committee, the Audit and Risk Management Committee, the Nomination Committee and the Remuneration and Appraisal Committee under the Board. During the Reporting Period, the shareholders' meeting, the Board and the Supervisory Committee were all operated according to laws and members performed their roles and responsibilities diligently. During the Reporting Period, the was not aware of any insider trading of the shares of the Company by taking advantage of inside information by the persons with insider information, and no investigation was conducted by regulatory authorities against insider trading of shares by the persons with insider information.

Does corporate governance significantly deviate from laws, administrative regulations and relevant CSRC provisions on governance of listed companies? If so, please explain the reason.

☐ Applicable ✓ Not applicable

II. SPECIFIC MEASURES TAKEN BY THE CONTROLLING SHAREHOLDER AND BENEFICIAL CONTROLLER OF THE COMPANY TO ENSURE THE INDEPENDENCE OF THE COMPANY'S ASSETS, PERSONNEL, FINANCE, ORGANIZATION, BUSINESS, ETC., AND THE SOLUTIONS, WORK PROGRESS AND FOLLOW-UP WORK PLANS THAT AFFECT THE COMPANY'S INDEPENDENCE

☐ Applicable ✓ Not applic	ahle

Engagement in the business which is the same or similar to that of the Company by the controlling shareholder, beneficial controller or other units under their control, the impact of horizontal competition or major changes in horizontal competition on the Company, the resolution measures that have been taken, the progress of the resolution and the follow-up resolution plan

☐ Applicable ✓ Not applicable

III. COMPLIANCE WITH CORPORATE GOVERNANCE CODE

The Group is committed to achieving high corporate governance standards in order to safeguard the interests of shareholders and enhance corporate value and accountability of the Company. The Company has adopted the Code Provisions set out in the Corporate Governance Code (the "CG Code") in Appendix 14 of the Listing Rules of the Stock Exchange as its own code of corporate governance. During the year ended 31 December 2022, the Company has complied with the applicable code provisions as set out in Part 2 of the CG Code. Since the Company has not adopted or implemented an equity incentive plan, it is temporarily considered not to include the reviewing and/or approval of the matters in relation to share scheme as described in Chapter 17 of the Stock Exchange Listing Rules in the terms of reference of the Remuneration and Appraisal Committee in the working rules of the Remuneration and Appraisal Committee. The Company will continue to review and enhance its corporate governance practices to ensure compliance with the CG Code.

VII. SHAREHOLDERS' RIGHTS

To safeguard shareholder interests and rights, a separate resolution is proposed for each substantially separate issue at general meetings, including the election of individual Directors. All resolutions put forward at general meetings will be voted on by poll pursuant to the Listing Rules of the Stock Exchange and poll results will be posted on the websites of the Company and the Stock Exchange after each general meeting.

(I) Convening an Extraordinary General Meeting

Shareholders holding 10% or more Shares (individually or together with others) shall be entitled to request for an extraordinary general meeting or class meeting.

The aforesaid shareholders may sign one or several written requests stating the subject of the meeting to request the Board to convene an extraordinary general meeting or class meeting. Shares held by the above shareholders shall be calculated as at the date of submitting the written request.

(II) Putting Forward Proposals at Extraordinary General Meeting

When a general meeting is held by the Company, the Board, Supervisory Committee or shareholders who individually or together holding more than 3% of the Shares of the Company may propose resolutions to the Company.

Shareholders who individually or together holding more than 3% of the Shares of the Company may submit ad hoc proposals in writing to the convener of the general meeting at least 10 days before the holding of the general meeting.

The contents of the proposals to be raised shall be within the scope of duties of the general meetings. It shall have a clear topic and specific matters to be resolved on, and shall be in compliance with relevant requirements of the laws, administrative regulations and the Company's Articles of Association.

(III) Putting Forward Enquiries to the Board

For putting forward any enquiries to the Board of the Company, shareholders may send written enquiries to the Company. The Company will not normally deal with verbal or anonymous enquiries.

(IV) Contact Details

Shareholders may send their enquiries or requests as mentioned above to the following address:

Tricor Investor Services Limited 17/F, Far East Finance Centre, 16 Harcourt Road, Hong Kong (For the attention of Mr. ZHU Shuguang)

For the avoidance of doubt, shareholder(s) must deposit and send the original duly signed written requisition, notice or statement, or enquiry (as the case may be) to the above address and provide their full name, contact details and identification in order to give effect thereto. Shareholders' information may be disclosed as required by law.

VIII. BOARD OF DIRECTORS

(I) The Board

1. Composition of the Board

During the Reporting Period, the Board of Directors of the Company consisted of the following Directors:

Non-executive Directors
CHENG Suning
LIU Shuguang
LI Lei

Executive Directors
QIAO Dewei (Chairman)
ZHONG Xia (General Manager)
HU Shengyong

Independent Non-executive Directors FU Jie XIE Lanjun ZHOU Beihai

During the Reporting Period, the Board consisted of nine members, including three non-executive Directors, three executive Directors and three independent non-executive Directors. Biographic information of Directors is set out in the section headed "Information on the Positions of Current Directors, Supervisors and Senior Management and of Directors, Supervisors and Senior Management Resigned during the Reporting Period" of the annual report for the year ended 31 December 2022.

None of the members of the Board is related to each other.

2. Directors' Re-election

Code provision B.2.2 of the CG Code stipulates that every director, including those appointed for a specific term, shall be subject to retirement by rotation at least once every three years. Each of the Directors of the Company has been appointed for a term ending on the expiration of the term of the session of the Board (i.e. not more than three years), subject to re-election by shareholders.

(II) The Board and management

1. Responsibilities, Accountabilities and Contributions of the Board and Management

The Board is responsible for the leadership and control of the Company and oversees the Group's business, strategic decisions and performance and is collectively responsible for promoting the success of the Company by directing and supervising its affairs. Directors of the Board take decisions objectively in the interests of the Company.

All Directors, including independent non-executive Directors, have brought a wide spectrum of valuable business experience, knowledge and professionalism to the Board for its efficient and effective functioning.

All Directors have full and timely access to all the information of the Company as well as the services and advice from the company secretary and senior management. The Directors may, upon request, seek independent professional advice in appropriate circumstances, at the Company's expenses for discharging their duties to the Company.

The Directors shall disclose to the Company details of other offices held by them and the Board regularly reviews the contribution required from each Director to perform his/her responsibilities to the Company.

The Company has formulated relevant mechanism in accordance with the Corporate Governance Code to ensure that the Board of Directors can obtain independent views and opinions. The Board of Directors reviews the implementation and effectiveness of this mechanism every year.

The Board reserves for its decision all major matters relating to policy matters, strategies and budgets, internal control and risk management, material transactions (in particular those that may involve conflict of interests), financial information, appointment of Directors and other significant operational matters of the Company. Responsibilities relating to implementing decisions of the Board, directing and coordinating the daily operation and management of the Company are delegated to the management.

2. Board Committees

The Board has established four committees, namely, the Audit and Risk Management Committee, Remuneration and Appraisal Committee, Nomination Committee and Strategy Committee, for overseeing particular aspects of the Company's affairs. All Board committees of the Company are established with defined written terms of reference. The terms of reference of the Board committees are posted on the Company's website and the Stock Exchange's website and are available to shareholders upon request.

1. **Training of Directors**

Directors keep abreast of responsibilities as a Director of the Company and of the conduct, business activities and development of the Company.

Every newly appointed Director will receive formal, comprehensive and tailor-made induction on the first occasion of his/her appointment to ensure appropriate understanding of the business and operations of the Company and full awareness of Director's responsibilities and obligations under the Stock Exchange Listing Rules and relevant statutory requirements. Such induction shall be supplemented by visits to the Company's key plant sites and meetings with senior management of the Company.

Directors should participate in appropriate continuous professional development to develop and refresh their knowledge and skills to ensure that their contribution to the Board remains informed and relevant. Internally-facilitated briefings for Directors would be arranged and reading material on relevant topics would be issued to Directors where appropriate. All Directors are encouraged to attend relevant training courses at the Company's expenses.

All the Directors have actively participated in the continuous professional development by way of attending seminars and/or conferences and/or forums and/or reading materials.

During the year ended 31 December 2022, the following Directors attended seminars/training sessions/inhouse briefing/reading materials:

2. Corporate Governance Functions

The Board is responsible for performing the functions set out in the code provision A.2.1 of the CG Code.

The Board reviewed the Company's corporate governance policies and practices, training and continuous professional development of Directors and senior management, the Company's policies and practices on compliance with legal and regulatory requirements, the compliance of the Management Measures and Written Employee Guidance, and the Company's compliance with the CG Code and disclosure in this Corporate Governance Report.

3. Independent non-executive Directors

During the Reporting Period, the Board complied with (1) the requirement that the Board of a listed issuer must include at least three independent non-executive Directors under Rule 3.10(1) of the Listing Rules of the Stock Exchange; (2) the requirement that at least one of the independent non-executive Directors must have appropriate professional qualifications or accounting or related financial management expertise under Rule 3.10(2) of the Listing Rules of the Stock Exchange; and (3) the requirement that the number of independent non-executive Directors must represent at least one-third of the Board under Rule 3.10A of the Listing Rules of the Stock Exchange.

The Company has received written annual confirmation from each of the independent non-executive Directors in respect of his independence in accordance with the independence guidelines as set out in Rule 3.13 of the Listing Rules. The Company considers all independent non-executive Directors to be independent.

X. CHAIRMAN AND GENERAL MANAGER

The positions of the chairman and the general manager are held by Mr. QIAO Dewei and Ms. ZHONG Xia respectively. The chairman provides leadership for the Board and is responsible for formulating corporate and business strategies and making major corporations and operations decisions. The general manager focuses on the business development and is responsible for the daily operation and management. He is also taking part in formulating and implementing the overall corporate and business strategy. Their respective responsibilities are clearly defined and set out in writing.

XI. SPECIAL COMMITTEES UNDER THE BOARD

✓ Applicable □ Not applicable

(1) Members of the special committees under the Board

Special committees	Members
Audit and Risk Management Committee Nomination Committee Remuneration and Appraisal Committee Strategy Committee	FU Jie (Chairman), CHENG Suning, XIE Lanjun XIE Lanjun (Chairman), ZHOU Beihai, CHENG Suning ZHOU Beihai (Chairman), FU Jie, LIU Shuguang Qiao Dewei (Chairman), LIU Shuguang, ZHONG Xia, HU Shengyong, ZHOU Beihai

Audit and Risk Management Committee

The Company has established an audit and risk management committee (the "Audit and Risk Management Committee") in compliance with the Listing Rules of the Stock Exchange.

The primary responsibilities of the Audit and Risk Management Committee include but are not limited to: (i) proposing appointment, reappointment or removal of external auditors; (ii) reviewing and monitoring external auditors' independence and objectivity and the effectiveness of the audit process in accordance with applicable standards; (iii) reviewing the financial information of the Company; (iv) overseeing the financial reporting system of the Company; (v) enhancing communication channels which the Group's employees can use, in confidence, to raise concerns about possible improprieties in financial reporting, internal control or other matters; and (vi) reviewing the risk management and internal control systems, effectiveness of the internal audit function.

The Audit and Risk Management Committee reviewed the financial results of the Group for the year ended 31 December 2022, considered the appointment of PricewaterhouseCoopers Zhong Tian LLP as the Company's external auditors in 2022 and held two meetings with the external auditors in the absence of the executive Directors.

Nomination Committee

The Company has established a nomination committee (the "Nomination Committee") in compliance with the Listing Rules of the Stock Exchange.

The primary responsibilities of the Nomination Committee include but are not limited to: (i) making recommendations to the Board on the appointment or re-appointment of Directors and the succession planning for Directors; (ii) reviewing the structure, size and composition of the Board annually and making recommendations on any proposed changes to the Board to complement the Company's corporate strategy; and (iii) identifying individuals suitably qualified to become Directors, selecting or recommending to the Board on the selection of individuals nominated for directorships or providing advice to the Board in respect thereof.

As to nomination of suitable director candidates, the Board of the Company adopted the Nomination Policy for Directorship to clarify the nomination criteria for Directors. The Nominating Committee will refer to the following factors when evaluating candidates:

- Compliance with the qualifications for appointment required under the Company Law and the Listing Rules
 of the Stock Exchange
- Reputation
- Knowledge and experience in corporate management, legal, financial or environmental industries
- Commitment in respect of available time and relevant interest
- Diversity of the Board in the aspects, amongst others, of gender, age (aged 18 or above), cultural and educational background, professional experience, skills, knowledge and length of service.

The above factors are for reference only and are not intended to cover all factors and are not decisive. The Nominating Committee may decide to nominate any person it deems appropriate.

In addition, according to the Nomination Policy for Directorship, candidates shall submit the required personal data in the agreed format and his/her written consent to be appointed as a Director and agree to the public disclosure of his/her personal data on any documents or the relevant websites for the purpose of or in relation to his/her appointment as a Director. The Nomination Committee may request the candidate to provide additional information and documents, if considered necessary.

As to assessment of the composition of the Board, according to Rule 7 of the Terms of Reference of the Nominating Committee, the Nomination Committee focuses on developing Board diversity in the member selection process. Factors to consider include but are not limited to gender, age, culture, education background, and previous experience. In addition, the Nomination Committee would discuss and agree on measurable objectives for achieving diversity on the Board, where necessary, and recommend them to the Board for adoption. The Nominating Committee believes that the diversity of Board is properly balanced.

Number of individuals

VI. Corporate Governance (Continued)

Remuneration and Appraisal Committee

The Company has established a remuneration and appraisal committee (the "Remuneration and Appraisal Committee") in compliance with the Listing Rules of the Stock Exchange.

The primary responsibilities of the Remuneration Committee include but are not limited to: (i) researching and recommending to the Board on the Company's remuneration structure and policy for all Directors and senior management of the Company; (ii) determining, with delegated responsibilities from the Board, or recommending to the Board the remuneration packages of individual executive Directors and members of the senior management; (iii) recommending to the Board on the remuneration of non-executive Directors; (iv) reviewing and approving compensation arrangements relating to dismissal or removal of Directors for misconduct; and (v) monitoring the implementation of remuneration policies of Directors and senior management. Since the Company has not adopted or implemented an equity incentive plan, it is temporarily considered not to include the reviewing and/or approval of the matters in relation to share scheme as described in Chapter 17 of the Stock Exchange Listing Rules in the terms of reference of the Remuneration and Appraisal Committee in the working rules of the Remuneration and Appraisal Committee.

Pursuant to Code Provision E.1.5 of the CG Code, the annual remuneration of the members of the senior management by band for the year ended 31 December 2022 is set out below:

HK\$1,000,001 to 1,500,000	2
HK\$1,500,001 to 2,000,000	5
HK\$2,000,001 to 2,500,000	1

Details of remuneration of all Directors, Supervisors and certain members of the senior management for the year ended 31 December 2022 are set out in note VII (6) to the Financial Statements contained in the annual report.

Strategy Committee

Remuneration band(s) (HK\$)

The Company has also established a strategy committee (the "Strategy Committee").

The primary responsibilities of the Strategy Committee include but are not limited to: (i) researching and recommending on the medium to long term strategic and development plans of the Company; (ii) researching and recommending on the significant capital expenditure, investment and financing projects of the Company; and (iii) researching and recommending on the significant matters relating to the development of the Company.

XII. BOARD DIVERSITY POLICY

The Board Diversity Policy has been considered and approved at the twenty-sixth meeting of the first session of the Board, which aims to set out the Company's position on the Board diversity and the policy it will continue to adopt in the process of realization. The Board has established this policy in accordance with the following principles:

- (I) Board diversity is an important factor to maintain the Company's sound corporate governance, achieve sustainable development and achieve strategic goals.
- (II) When setting the composition of the Board, the Company considers the Board diversity from various aspects, including but not limited to Directors' gender, age, cultural and educational background, region, professional experience, skills, knowledge and service term and other regulatory requirements etc.
- (III) The appointment of Board members is based on the skills and experience required for the overall good operation of the Board and on merit basis with full consideration of the abovementioned goals and requirements of Board diversity.

The Nomination Committee of the Board of the Company is responsible for reviewing the number, composition and organizational structure of the Board, and makes recommendations to the Board on the size and composition of the Board based on the Company's strategic planning, business activities, asset size and equity structure; study and review the selection criteria, nomination and appointment procedures of directors, and making recommendation to the Board for consideration and approval.

The Nomination Committee of the Board is required to follow this policy when making recommendations on candidates for directors and when the Board nominates candidates for directors.

The Nomination Committee of the Board is responsible for overseeing the implementation of this policy and reviewing this policy when appropriate, discussing any amendments that need to be made and making recommendations to the Board for implementation upon approval by the Board.

At present, the Company has achieved gender diversity of Board members and all employees (including senior management). The composition of the Board and senior management has been disclosed in detail in "V. Directors, Supervisors and Senior Management" in this section. Female employees account for 22.25% of all employees of the Company.

(II) Remuneration Policy

✓ Applicable □ Not applicable

The Company provides remuneration with "competitiveness in the industry" to employees. The Company has established a compensation management system based on "management by objectives and performance appraisal". The remuneration of employees is linked to their completion of tasks assigned by the Company and performances. The remuneration management of the Company follows the "model differentiation principle". According to work needs, the Company implements two different compensation modes of "annual salary system" and "performance-based salary system" for different positions.

The Company will maintain the stability of the remuneration system, and will continue to improve on the basis of the implementation of current remuneration system in accordance with the actual situation of the Company. The Company will make timely adjustments to the salary level of employees according to the operation situation, price index and industry salary level, so that the income level of employees will continue to be competitive. For details of remuneration of employees, please refer to Note IV. 19 Employee benefits payable to the financial statements.

(III) Training Program

✓ Applicable □ Not applicable

The Group regards employee development and training as an important way to achieve business goals, improve performance and implement sustainable development. The Group has established a training mechanism to help employees develop in multiple dimensions, and has set up five special training programs, i.e. new employee induction training, reserve cadre training, organizational personnel training, safety production training, and college student training, as well as two types of general-purpose training courses, i.e. green mobile classroom and green lecture hall. The training courses are provided online and offline simultaneously to improve the learning awareness and work efficiency of employees. Meanwhile, for the subordinate project companies, the Group has carried out targeted professional skills training and held experience sharing meetings to strengthen the professional skills of employees at all levels and improve the business quality of the Group. The Group vigorously promotes the spirit of model workers and craftsmen. The project companies under the Group carry out various labor skills competitions and other activities in combination with the actual situation of the enterprise, so as to promote learning and training through competitions, forming a good atmosphere in which all staff in the Group compare with, learn from, catch up with and surpass others.

(IV) Labour Outsourcing

☐ Applicable ✓ Not applicable

(V) Post-employment Benefits – Defined Contribution Plans

Pursuant to the relevant laws and regulations of the PRC, the Group participated in a defined contribution basic pension insurance plan in the social insurance system established and managed by government authorities. The Group makes contributions to basic pension insurance plans based on the applicable benchmarks and rates stipulated by the government.

The relevant plan is the defined contribution plan, and the Group cannot use the forfeited contribution (i.e. the contribution by the employer on behalf of employees who leave the plan prior to vesting fully in such contributions) to reduce the existing contribution level.

For the year ended 31 December 2022, the Group had no forfeited contribution or forfeited contribution available for deduction of the Group's contribution as at 31 December 2022.

XV. PROPOSAL OF PROFIT DISTRIBUTION OR CONVERSION OF CAPITAL RESERVE

Formulation, implementation or adjustment of the cash dividend policy		
✓ Applicable □ Not applicable		
The Resolution on Shareholders' Return Plan for the Next Three Years (2020-2022) had been considered and passed at the 21st meeting of the third session of the Board and the first Extraordinary General Meeting for the year 2020, and the Resolution on Shareholders' Return Plan for the Next Three Years (2021-2023) had been considered and passed at the 33rd meeting of the third session of the Board and the first Extraordinary General Meeting for the year 2021. The above profit distribution plans proposed that: while the Company may declare profit distribution by cash, stock or a combination of both, the distribution will be made primarily by cash. Profit distribution shall not exceed the accumulated profit distributable or adversely affect the sustainable operating ability of the Company. The Company may distribute interim dividends according to profit and capital needs of the Company. The Company shall give priority to the payment of cash dividends. If no cash dividends are available, no scrip dividends shall be issued for the same year. Any cash dividends proposed shall satisfy the following criteria: the current profit and accumulated retained earnings of the Company shall be positive and its cash flow shall be sufficient to support the continuous operation and long-term development of the Company the profit to be distributed in cash shall not be less than 10% of the distributable profits of the year, and the cumulative profit distributed in cash in the previous three consecutive financial years shall not be less than 30% of the average distributable profit of the Company for such three years.		
The dividend proposal for the year 2020, the dividend proposal for the year 2021 and the dividend proposal for the year 2022 of the Company were made according to the above plan and relevant provisions of the Articles of Association.		
Special explanation on cash dividend policy		
✓ Applicable □ Not applicable		
Whether it is consistent with the requirements of the Articles of Association or the requirements under the resolution of the general meeting Whether the criteria and proportions of dividends are definite and clear Whether the relevant decision-making procedures and mechanisms are complete Whether independent directors have fulfilled their responsibilities and duties Whether the minority shareholders have the opportunity to fully express their views and demands and their legitimate rights and interests are fully protected	✓ Yes □ No	

(III) If the Company is profitable and the parent company's profit available for distribution to shareholders is positive, but no cash profit distribution plan has been proposed during the Reporting Period, the Company shall disclose the reasons in detail and the purpose and use plan of the retained earnings

☐ Applicable ✓ Not applicable

(IV) Profit distribution and conversion of capital reserve during the Reporting Period

✓ Applicable □ Not applicable

Unit: RMB'0,000

Number of shares to be distributed for every ten shares (share)	0
Amount to be distributed for every ten shares (RMB) (tax inclusive)	1.2
Number of shares to be converted into share capital for every ten shares (share)	0
Amount of cash dividend (tax inclusive)	16,721.39
Net profit attributable to ordinary shareholders of the Company	
in the consolidated financial statements in the year of distribution	74,476.73
Percentage to the net profit attributable to ordinary shareholders	
of the Company in the consolidated financial statements (%)	22.45
Amount of repurchase of shares in cash included in cash dividend	0
Total dividends (tax inclusive)	16,721.39
Percentage of the total dividends to the net profit attributable to ordinary	
shareholders of the Company in the consolidated financial statements (%)	22.45

On 30 March 2023, the Board proposed to distribute cash dividends for 2022 to ordinary shareholders of the Company. It is proposed to distribute a cash dividend of RMB0.12 (before tax) for every share to all shareholders based on the aggregate share capital on the share-based equity registration date. A total of RMB167,213,900 in dividends is expected to be distributed. This proposal is subject to the approval at the general meeting.

MANAGEMENT AND CONTROL OF SUBSIDIARIES DURING THE

XVIII. REPORTING PERIOD

✓ Applicable	☐ Not applicable
--------------	------------------

The company has formulated the Controlled Subsidiaries Management System and other systems to standardize the management of subsidiaries. The Company mainly controls its subsidiaries from the following aspects:

- for the control of the organization and personnel of subsidiaries, exercising the power of investor by appointing directors, supervisors, managers, financial officers and other important senior management;
- The decision-making authority of subsidiaries' management is clearly stipulated in the articles of association (2)and relevant systems of subsidiaries, and subsidiaries' management shall not engage in transactions or matters beyond the decision-making authority. For transactions or matters beyond the decision-making authority, subsidiaries' management shall submit them to the Company's centralized management department, and such transactions or matters can only be implemented after performance of relevant decision-making procedures;
- (3) Assigning annual assessment indicators, and determining the remuneration of subsidiaries' management according to the completion of assessment indicators;
- For consolidated financial statements and the control thereof, clarifying the preparation and submission process (4)and approval system of consolidated financial statements, to ensure the authenticity and reliability of the consolidated financial statements of parent company and subsidiaries.

XIX. AUDITORS' REPORT ON INTERNAL CONTROL

✓ Applicable □ Not applicable

The Auditors' Report on Internal Control was issued by PricewaterhouseCoopers Zhong Tian LLP

Whether to disclose the internal control audit report: Yes Opinion type of internal control audit report: standard unqualified

XX. RECTIFICATION OF PROBLEMS FOUND IN THE SPECIAL SELF-**EXAMINATION OF GOVERNANCE OF LISTED COMPANY**

Affected by multiple unexpected factors, the Company has independent directors whose on-site working time is less than 10 working days.

During the Reporting Period, the independent directors of the Company proactively performed their duties and attended all Board meetings and general meetings at which they had an earnest and meticulous understanding of the daily operations, financial position, internal control operation, information disclosure and other relevant matters of the Company and proposed professional suggestions and opinions to enhance the scientificity and objectivity of the decisions of the Board. Subsequently, while maintaining close daily communication with independent directors, the Company will provide necessary conditions for the on-site work of independent directors and proactively cooperate with the discharge of duties by independent directors to continuously increase the on-site working hours of independent directors.

XXI. OTHERS

✓ Applicable □ Not applicable

Trading of Shares by Directors, Supervisors and Employees

The Company has adopted Management Measures on Securities Transactions by Directors, Supervisors and Senior Management Personnel (the "Management Measures") on terms no less exacting than the required standard set out in the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") contained in Appendix 10 to the Listing Rules of the Stock Exchange. The Company had made specific inquiries to all of the Directors and Supervisors on whether they had complied with the Management Measures during the Reporting Period, and all of the Directors and supervisors had confirmed that they had all complied with the Management Measures. The Company has established the Employees Written Guidance (the "Employees Written Guidance") for its employees who may hold unpublished internal information of the Company in relation to dealing in securities, with terms no less favourable than the Model Code. The Company was not aware of any matters in relation to breaches of the Employees Written Guidance by any employee.

(II) Directors' responsibility in respect of the Financial Statements

The Directors acknowledge their responsibility for preparing the financial statements of the Company for the year ended 31 December 2022.

The Directors are not aware of any material uncertainties relating to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

The statement of the independent auditors of the Company about their reporting responsibilities on the financial statements is set out in the independent auditor's report.

(III) Auditors' Remuneration

The remuneration paid to the Company's external auditors (including PricewaterhouseCoopers Zhong Tian LLP and other PRC auditors) in respect of audit services for the year ended 31 December 2022 amounted to RMB3.2 million, of which RMB2.8 million is for audit services conducted under CASBE and RMB0.4 million is for audit services relating to the internal control for financial reporting rendered by PricewaterhouseCoopers Zhong Tian LLP. For the year ended 31 December 2022, the Company incurred a total of RMB98,800 of fees for non-audit services by its external auditors relating to the production of the environmental, social and governance report of the Company.

(IV) Risk Management and Internal Controls

The Board acknowledge its responsibility for the risk management and internal control systems and reviewing their effectiveness. Such systems are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board has the overall responsibility for evaluating and determining the nature and extent of the risks it is willing to take in achieving the Company's strategic objectives, and establishing and maintaining appropriate and effective risk management and internal control systems.

The Audit and Risk Management Committee assists the Board in leading the management and overseeing their design, implementation and monitoring of the risk management and internal control systems.

The Board, through the Audit and Risk Management Committee, has conducted annual review for the effectiveness of the risk management and internal control systems of the Company and its subsidiaries for the year ended 31 December 2022.

The management monitors the assessment of the risk management and internal controls and has confirmed to the Board and the Audit and Risk Management Committee on the effectiveness of the risk management and internal control systems for the year ended 31 December 2022.

The Company has developed and adopted different risk management procedures and guidelines with defined authority. Self-evaluation has been conducted annually to confirm that control policies are properly complied with by each department.

All departments conducted internal control assessment regularly to identify risks that potentially impact the business of the Group and various aspects including key operational and financial processes, regulatory compliance and information security. The management, in coordination with department heads, assessed the likelihood of risk occurrence, provide treatment plans, and monitor the risk management progress. The Internal Audit Department is responsible for providing the internal audit function and performing independent review of the adequacy and effectiveness of the risk management and internal control systems. The Internal Audit examined key issues in relation to the accounting practices and all material controls and provided its findings and recommendations for improvement to the Audit and Risk Management Committee.

The Group adopts the following procedures and internal control measures to handle and release inside information:

- 1. When handling affairs, the Company will fully consider the disclosure requirements under the Listing Rules and the Guidelines on Disclosure of Inside Information issued by the Securities and Futures Commission
- 2. The "Administrative Procedures on the Information Disclosures" of the Group govern the Company's communications with third parties, especially the procedures for responding to outside inquiries about the Group's affairs, enabling specific personnel to obtain relevant authorizations
- 3. The Company widely and non-exclusively discloses information to the public through financial reports, announcements and the Company's website, etc., to implement and disclose the Company's fair disclosure policy
- 4. Unauthorized use of confidential or inside information is strictly prohibited in the Company's "Compliance Management Manual".

The Board, as supported by the Audit and Risk Management Committee, assessed the effectiveness of the risk management and internal control systems by reviewing the management report and the internal audit report and considered that, for the year ended 31 December 2022, the risk management and internal control systems of the Company are effective and adequate.

(V) Joint Company Secretaries

Mr. ZHU Shuguang, the secretary of the Board of the Company, and Ms. YUEN Wing Yan, Winnie of Tricor Services Limited, a service provider, act as the company secretaries of the Company. The primary contact person of Ms. YUEN at the Company is Mr. ZHU Shuguang.

Mr. ZHU Shuguang and Ms. YUEN Wing Yan, Winnie have complied with Rule 3.29 of the Listing Rules of the Stock Exchange by taking more than 15 hours of the relevant professional training during the year.

(VI) Communication with Shareholders and Investors/Investor Relations

The Company considers that effective communication with shareholders is essential for enhancing investor relations and investor understanding of the Group's business performance and strategies. The Company has reviewed the implementation and effectiveness of the shareholder communication policy during the year. After review of the implementation and effectiveness of the shareholder communication policy, the Company is of the view that the policy is effective in providing a channel for shareholders to communicate their views on various matters affecting the Company, as well as in soliciting and understanding the views of shareholders and stakeholders. The Company tries its best to maintain a dialogue with its shareholders and has established multiple communication channels between itself and its shareholders, investors and other stakeholders, including annual general meetings, annual and interim reports, notices, announcements and circulars, especially through annual general meetings and other general meetings. At the annual general meeting, Directors (or their delegates as appropriate) are available to meet shareholders and answer their enquiries.

(VII) Interests in securities held by Directors, Supervisors and senior management (disclosure pursuant to the requirements of the Stock Exchange)

As at the end of the Reporting Period, none of the Directors, Supervisors and chief executives of the Company had any interests or short positions in the shares, underlying shares and debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO) which were required (a) to be notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and short positions which they were taken or deemed to have under such provisions of the SFO); or (b) pursuant to section 352 of Part XV of the SFO, to be entered in the register referred to therein; or (c) pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix 10 to the Stock Exchange Listing Rules, to be notified to the Company and the Stock Exchange.

(VIII) Directors' and Supervisors' Service Contracts

Neither the Company nor other members of the Group has entered into or intended to enter into any service contract with the Directors proposed for re-election at the AGM, which is not determinable by the Group within one year without payment of compensation (other than statutory compensation).

(IX) Directors', Supervisors' or Controlling Shareholders' Interests in Transactions, Arrangements or Contracts of Significance

No transactions, arrangements or contracts of significance to which the Company or any of its subsidiaries was a party and in which a Director or a supervisor or their respective connected entities had a material interest, whether directly or indirectly, subsisted at the end of the Reporting Period or at any time during the Reporting Period.

Save as disclosed, no contracts, transactions or arrangements of significance were entered into during the Reporting Period between the Company or any of its subsidiaries and the controlling shareholder or any of its subsidiaries.

(X) Relations with Employees

The Group attaches importance to maintaining good relationship with employees. The Group is of the view that employees are the most important assets of the Group, and the basis for sustainable development. To establish good relationship with employees and retain talents, the Group has offered employees with competitive remuneration package, excellent working environment and welfare. The remuneration policy of the Group is determined based on the performance of employees, and will be reviewed regularly. The Group will distribute discretionary bonuses to employees for their contributions to the Group based on its profitability and the performance of the employees, and promote employees with excellent performance. The Group will also provide trainings for new and existing staff so as to enhance their skills and knowledge. For frontline production staff, the Group will also provide firefighting and safety production trainings. These measures can improve the production capacity and efficiency of the Group.

(XI) Compliance with Relevant Laws and Regulations of Significant Influence

Compliance procedures are in place to ensure adherence to applicable laws, rules and regulations (particularly), those that have significant impact on the Group such as the Listing Rules of the Stock Exchange and the Chinese Financial Reporting Standards. The Board is responsible for monitoring the Group's policies and practices on compliance with legal and regulatory requirements and such policies are regularly reviewed. Any changes in the applicable laws, rules and regulations are brought to the attention of relevant employees and relevant operation units from time to time.

To the knowledge of the Company, it has complied in all material aspects with relevant laws and regulations which have significant impact on its business and operation.

Yes

VII. Environmental and Social Responsibility

I. Environmental information

Whether relevant mechanisms for environmental protection have been established Investment in environmental protection during the Reporting Period (Unit: RMB'0,000)

- (I) Explanation on environmental protection of the Company and its major subsidiaries falling into the category of major pollutant-emission units designated by the environmental protection authorities
 - ✓ Applicable □ Not applicable

1. Information on pollutant emission

✓ Applicable □ Not applicable

Huizhou Phase II Company, Haining Expansion Company, Tongzhou Company and Shantou Company, which are subsidiaries of the Company, are the major pollutant-emission units designated by the environmental protection authorities. These companies are all the operating entities of municipal waste-to-energy plants.

The main pollutants generated by the major pollutant-emission units of the Company are sulfur dioxide, smog, oxynitride and COD. Sulfur dioxide, smog and oxynitride are emitted from smog. The above pollutants are treated by the smog treatment system according to standard and then emitted through the chimney. COD is discharged from waste water. After the sewage is treated according to standard for connecting with the pipeline network, it is carried to the urban sewage treatment plant for centralised treatment through the sewage pipe network. Generally, an inlet is provided for the sewage pipe network. There is no discharge outlet for reuse, and certain major subsidiaries have achieved zero emission of COD.

The concentration of major pollutants discharged from projects of the above companies during the Reporting Period as stated in the latest commissioned test report is summarised as follows:

		Name of		Number and date of			
No.	Name of unit	Name of unit pollutants Testing institution the testing report	the testing report	Emission concentration		Emission limit

Note: "ND" refers to no detect; the unit of sulfur dioxide, oxynitride, smog is mg/m³, and the unit of dioxin is ngTEQ/m³. The above emission limits of pollutants are based on the Municipal Solid Waste Incineration Pollution Control Standards (《生活垃圾焚燒污染控制標準》) (GB18485-2014). The regular commissioned test reports issued with respect to the major pollutant-emission units during the Reporting Period indicated that the emissions of pollutant met the prescribed standards and there was no excessive emission.

The estimated total emissions and the approved total annual emissions of major pollutants of the above companies during the Reporting Period are summarised as follows:

Name of pollutant	Actual emissions (ton)	Emission indicators (ton/year)
Sulfur dioxide Oxynitride Smog	206.20 896.74 21.45	796.37 1,899.86 143.63
COD	4.57	16.54

2. Construction and operation of facilities for pollution prevention and control

✓ Applicable □ Not applicable

The pollution prevention facilities constructed for the projects of the Company mainly include smog, waste water and solid waste treatment facilities. For smog, a combination of "in-furnace SNCR denitrification + semi-dry deacidification + outfurnace SCR denitrification + dry deacidification + activated carbon adsorption + bag filter" is mainly adopted for smog purification techniques and the smog is emitted through the chimney after being treated and meeting the emission requirements. For waste water, the processing techniques of "pretreatment + anaerobic + nitrification denitrification + MBR membrane treatment + nanofiltration + reverse osmosis" are mainly adopted, and the waste water is reused for production or enters the urban sewage plant through pipeline network after being treated and meeting the emission requirements. For solid waste, ash is solidified before sending to the landfill. During the Reporting Period, the pollution prevention facilities of each project were operating normally.

3. Environmental impact assessment of construction projects and other environmental protection administrative licensing

✓ Applicable □ Not applicable

No.	Name of project	Date of approval to environmental impact assessment	Authority for approval
1	Huizhou Phase II Project	14 August 2020	Ecological Environment
0			Bureau of Huizhou City
2	Haining Expansion Project	26 November 2018	Environmental Protection Bureau of Jiaxing City
3	Tongzhou Project	25 December 2015	Environmental Protection
			Bureau of Beijing
4	Shantou Project	28 March 2017	Environmental Protection
			Bureau of Shantou City

4. Emergency plan for emergency environmental incidents

✓ Applicable □ Not applicable

In respect of each project, the Company has formulated emergency plans for emergency environmental incidents, and filed the plans with the local environmental protection administrative departments of the local people's government at or above the county level, and organised emergency drills every year according to the plans.

	5.	Environmental self-monitoring programme
		✓ Applicable ☐ Not applicable
		The Company formulates self-monitoring programme for every year according to the national or local pollutant emission standards, environmental impact assessment reports and their approval and environmental monitoring technical specifications, in order to keep abreast of its pollutant emission status and its impact on the surrounding environmental quality. The results of self-monitoring will be disclosed to the public.
	6.	Administrative penalties due to environmental problems during the Reporting Period
		☐ Applicable ✓ Not applicable
	7.	Other environmental information to be disclosed
		☐ Applicable ✓ Not applicable
(II)	Env	vironmental information of companies other than major pollutant-emission units
	√ Ap	oplicable
	1.	Administrative penalties due to environmental problems
		✓ Applicable □ Not applicable
		On 31 March 2022, Zhaoqing Boneng Renewable Energy Power Generation Co., Ltd., a controlled subsidiary of the Company, received an environmental protection fine from Zhaoqing Ecological Environment Bureau, pursuant to which since Sihui Domestic Waste Harmless Landfill under its entrusted operation discharged air pollutants exceeding standards, Zhaoqing Ecological Environment Bureau imposed a fine of RMB120,000 on it according to Article 99 of the Law of the People's Republic of China on the Prevention and Control of Air Pollution and the Applicable Rules on Discretion over Administrative Penalty in respect of Environment of Zhaoqing City (Revised in 2018 Edition).
		On 7 December 2022, Yongjia Dynagreen Renewable Energy Co., Ltd., a controlled subsidiary of the Company, received a notice of administrative penalty from Yongjia Ecological Environment Bureau. As Yongjia Company failed to record hazardous wastes generated in 2021 faithfully, according to paragraph 13 in clause I under Article 112 of the Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Waste and the Standard Regulations on Discretion over Administrative Penalty in respect of Ecological Environment of Zhejiang Province, Yongjia Company was fined RMB100,000.
		The above administrative penalties had no material impact on the production and operation of the Company and its controlled subsidiaries.
	2.	Disclosure of other environmental information with reference to major pollutant- emission units
		☐ Applicable ✓ Not applicable
	3.	Reasons for not disclosure of other environmental information
		☐ Applicable ✓ Not applicable

(III) Relevant information that is conducive to protecting ecology, preventing pollution and fulfilling environmental responsibilities

✓ Applicable □ Not applicable

The Company's municipal waste-to-energy business is dedicated to the harmlessness treatment, reduction and resource utilization of domestic waste and is an important part of the battle of pure land defense in the fight against environmental pollution. Adhering to the policy of "prevention first and combination of prevention and control" in environmental protection management, the Company implements "three simultaneous" of environmental protection facilities and has formulated and strictly implemented the Environmental Protection Management System of Dynagreen Group and other systems to supervise the entire process of environmental protection in engineering construction and production and strictly abided by national laws and regulations and relevant emission standards.

(IV) Measures taken to reduce carbon emissions during the Reporting Period and effects thereof

Whether carbon reduction measures are taken Reduction of carbon dioxide equivalent emissions (Unit: ton)

Type of carbon reduction measures (such as using clean energy to generate electricity, using carbon reduction technologies in the production process, developing and producing new products that help reduce carbon emissions, etc.)

Specific explanations

☐ Applicable ✓ Not applicable

Yes 3,995,192

The municipal waste-to-energy projects of the Company, on the one hand, replace the landfills and reduce the emission of methane and other greenhouse gases produced by the landfills. On the other hand, the projects contribute energy and replace thermal power to a certain extent, which makes direct contributions to carbon emission reduction and is a field for which it is allowed to apply for Chinese Certified Emission Reduction.

Continuing connected transaction

On 31 May 2021, the Company and Shenzhen Crystal Digital Technology Co., Ltd. (深圳水晶石數字科技有限公司) ("Shenzhen CDT") entered into a Service Framework Contract, pursuant to which publicity display design and construction were proposed to be carried out for thirteen municipal waste-to-energy projects of the Company in 2021 to 2022 and the Company will from time to time hold tenders for the publicity display design and construction services of its municipal waste-to-energy projects in which Shenzhen CDT shall participate. As the project service contract is awarded through public tender, the pricing and payment terms for the project services will be determined based on normal commercial terms through tender and bid procedures. If Shenzhen CDT successfully wins a tender for the project services, the Company will further enter into a specific project service contract with Shenzhen CDT according to the contents of the relevant letter of acceptance to specify fees and payment methods. In 2021 and 2022, the estimated caps of the day-to-day related party transactions with Shenzhen CDT are RMB29 million and RMB11 million, respectively.

In 2022, the actual amount of transaction between the Company and Shenzhen CDT was RMB7,112,000 which did not exceed the annual cap for the year.

Shenzhen Crystal Digital Technology Co., Ltd. (深圳水晶石數字科技有限公司) is an indirect wholly owned subsidiary of BSAM (a controlling shareholder of the Company) and therefore a connected person of the Company. Accordingly, the entering into of the Service Framework Contract constitutes a connected transaction of the Company.

For details of the transaction, please refer to the announcement of the Company dated 1 June 2021. The value and terms of the continuing connected transactions between the Company and Shenzhen CDT in 2022 are in line with the pricing terms disclosed in the announcement and the Guidance Letter 73-14.

The independent non-executive Directors have reviewed the Group's continuing connected transactions mentioned above, and confirmed that the transactions carried out during the year ended 31 December 2022:

- 1. were carried out in the ordinary and usual course of business of the Group;
- were conducted on normal commercial terms or better, or if there were insufficient number of comparable transactions to determine whether or not they can be determined as on normal commercial terms or better, then as far as the Group is concerned, the conditions of such transactions were no less favourable than those received from, or offered to, an independent third party; and
- 3. were conducted according to the terms of agreement of the relevant transactions, where the terms of agreement were fair and reasonable, and in the interests of the Company and the shareholders as a whole.

The Company's auditors have confirmed that the respective counterparties to the aforementioned continuing connected transactions had allowed them sufficient access to their records for the purpose of reporting on the transactions as set out in this report, and the aforementioned continuing connected transactions carried out during the year ended 31 December 2022:

- 1. had been approved by the Board;
- 2. were, in all material respects, in accordance with the requirements of pricing policies of the Company;
- 3. had been entered into in accordance with the relevant agreements governing the transactions; and
- 4. had not exceeded the estimated annual caps.

The abovementioned continuing connected transaction constitutes a continuing connected transaction under Chapter 14A of the Listing Rules and meets the relevant requirements.

Explanations on guarantees

Guarantee to banks in respect of banking credit facilities granted to certain subsidiaries

In order to ensure the smooth completion of operating targets of the Company, to support the development of the subsidiary project companies, and to meet financing needs of the project companies, the Company sought shareholders' approval on the provision of guarantee in respect of banking facilities granted to its project companies at the 2021 annual general meeting. As contained in the relevant circular to shareholders, it is expected that the amount of guarantee to be provided in respect of new banking facilities granted to the project companies in 2022 would not exceed RMB2,630 million. As at 31 December 2022, guarantee provided by the Company in respect of new banking facilities granted to its project companies amounted to RMB938 million.

(VI) Other description of convertible bonds

✓ Applicable □ Not applicable

As of 17 August 2022, the Share price of the Company has triggered the term on downward adjustment to the conversion price of "Dynagreen Convertible Bonds". In view of the relatively short period after the issuance and listing and the relatively long remaining term of "Dynagreen Convertible Bonds", taking into account the Company's basic situation, market environment and other factors as well as the confidence in the Company's long-term stable development and intrinsic value, in order to safeguard the interests of all Shareholders and clarify investors' expectations, as considered at the eighth meeting of the fourth session of the Board, the Board of the Company determined that no downward adjustment would be made to the conversion price this time and that it would not make any proposal on downward adjustment within twelve months from the date of consideration and approval by the Board this time (i.e. from 17 August 2022 to 16 August 2023) even if the price of the Company's A Shares triggers the term on downward adjustment to the conversion price of "Dynagreen Convertible Bonds" again. Starting from 17 August 2023, if the term on downward adjustment to the conversion price of the "Dynagreen Convertible Bonds" is triggered again, the Board will hold a meeting to decide whether to make a proposal on downward adjustment to the conversion price of the "Dynagreen Convertible Bonds".

XII. Financial Report

Auditor's Report

PwC ZT Shen Zi (2023) No. 10029 (Page 1 of 9)

To all Shareholders of Dynagreen Environmental Protection Group Co., Ltd.:

I. OPINION

(I) What we have audited

We have audited the accompanying financial statements of Dynagreen Environmental Protection Group Co., Ltd. (hereinafter "Dynagreen"), which comprise:

- the consolidated and company balance sheets as at 31 December 2022;
- the consolidated and company income statements for the year then ended;
- the consolidated and company cash flow statements for the year then ended;
- the consolidated and company statements of changes in shareholders' equity for the year then ended; and
- notes to the financial statements.

(II) Our opinion

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company's financial position of Dynagreen as at 31 December 2022, and their financial performance and cash flows for the year then ended in accordance with the requirements of Accounting Standards for Business Enterprises ("CASs").

II. BASIS FOR OPINION

We conducted our audit in accordance with China Standards on Auditing ("CSAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of Dynagreen in accordance with the Code of Ethics for Professional Accountants of the Chinese Institute of Certified Public Accountants ("CICPA Code"), and we have fulfilled our other ethical responsibilities in accordance with the CICPA Code.

III. KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 2 of 9)

III. KEY AUDIT MATTERS (Continued)

Key audit matters identified in our audit are summarised as follows:

- (I) Recognition of revenue from construction services
- (II) Provision for impairment of intangible assets concession rights

Key Audit Matter

How our audit addressed the Key Audit Matter

(I) Recognition of revenue from construction services

Refer to the accounting policies and accounting estimates as described in Note II(20) and (27), and Note IV(34) to the financial statements.

In 2022, the revenue from construction services of Dynagreen amounted to approximately RMB1,747 million, representing approximately 38% of revenue.

For the construction services provided for waste-toenergy plants etc. Dynagreen recognizes revenue from construction services over a period of time according to the performance progress. The performance progress is determined by the input method according to the proportion of the actual construction service costs incurred during the construction process to the estimated total construction costs; the stand-alone selling price of construction services is based on construction costs and is determined using the cost-plus method with reference to the gross profit margins of comparable businesses. The management is required to make a reasonable estimate of the total revenue from construction services and total construction cost at the beginning of the construction service, and make continuous evaluation and revision of total construction cost during the project construction process, and then adjust the performance progress and the amount of recognized revenue according to the revision result.

We performed the following procedures to address the key audit matter:

- (1) Understood the management's relevant internal control process over the recognition of revenue from construction services and assessed the inherent risk of material misstatement by considering the degree of estimation uncertainty and level of other inherent risk factors such as complexity, subjectivity, changes and susceptibility to management bias; evaluated and validated the effectiveness of the key internal controls in relation to the estimation of the gross profit margin of construction services and total construction cost;
- (2) For the projects completed during the Year, assessed the reliability of this accounting estimation made by the management by comparing the actual total construction cost with the estimated total construction cost before completion;
 - For the new projects under construction during the Year, obtained and checked the evaluation report on the gross profit margin of construction services issued by the external valuer engaged by the management, and at the same time involved our internal valuation experts to assist the management in evaluating whether the method adopted for estimation of the gross profit margin of construction services was appropriate and whether the gross profit margin of the selected comparable businesses was reasonable, and reviewed the professional competence, independence and objectivity of the external valuer;

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 3 of 9)

III. KEY AUDIT MATTERS (Continued)

Key Audit Matter

How our audit addressed the Key Audit Matter

(I) Recognition of revenue from construction services (Continued)

Since the amount of revenue from construction services is significant, and the management needs to use significant accounting estimates and judgments when determining the gross profit margin and total construction cost of construction services, we regard the recognition of revenue from construction services as a key audit matter.

- (4) For the projects under construction during the Year, the following tests were performed:
 - a) Checked the relevant concession agreements to assess whether the recognition of revenue from construction services under each concession agreement complies with the relevant provisions of the CASs;
 - b) Assessed the completeness and reasonableness of the management's estimates of the total construction costs of the relevant projects by comparing the estimated total construction cost of the relevant project with its project budget and feasibility analysis report, and at the same time checking the estimated total construction cost against the subsequent major procurement contracts, etc., to see whether there were major differences and analyzing the reasons for the differences;
 - c) Obtained the contract completion schedule confirmed by the construction unit, Dynagreen and the supervisory unit, and discussed with the above-mentioned three parties on the completion progress of the relevant project to assess the rationality of the management's evaluation of the progress of the contract;

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 4 of 9)

III. KEY AUDIT MATTERS (Continued)

	Key Audit Matter		How our audit addressed the Key Audit Matter
(I)	Recognition of revenue from construction services (Continued)		
		d)	Performed on-site observation procedures and interviews with the on-site construction personnel and project management personnel of the construction unit to understand the completion progress of relevant projects;

f) Obtained the calculation sheet of revenue from construction services, and recalculated the performance progress and the revenue from construction services that should be recognized during the Year based on the gross profit margin of revenue from construction services and the estimated total construction cost determined by the management and the actual construction cost, to check the calculation

vouchers, and supervision reports;

Carried out sampling tests on the actual construction costs incurred during the Year, and checked against the supporting documents such as procurement contracts, payment

Based on the audit performed by us, the significant accounting estimates and judgments used by the management in recognition of revenue from construction services can be supported by the audit evidence obtained by us.

accuracy.

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 5 of 9)

III. KEY AUDIT MATTERS (Continued)

Key Audit Matter

How our audit addressed the Key Audit Matter

(II) Provision for impairment of intangible assets – concession rights

Refer to the accounting policies and accounting estimates as described in Note II(14), (16) and (27), and Note IV(12) to the financial statements.

As at 31 December 2022, the book value of the intangible assets – concession rights amounted to approximately RMB10,902 million, representing approximately 48% of the total assets.

According to the relevant provisions of the CASs, intangible assets with any indication that the assets may be impaired at the balance sheet date and intangible assets that are not yet available for their intended use or with indefinite useful lives should be tested for impairment irrespective of whether there is any indication of impairment. Therefore, on 31 December 2022, the management performed impairment test for the concession rights of wasteto-energy projects that had not yet started operation, the concession rights of waste-to-energy projects with indication of impairment, and the concession rights of hazardous waste projects accounted for as intangible assets with indefinite useful lives as no concession period was specified to assess the recoverable amount of the concession rights of these projects. According to the assessment results, as at 31 December 2022, the balance of provision made by Dynagreen for impairment of concession rights was approximately RMB281 million, and there was no further provision for impairment during the Year.

We performed the following procedures to address the key audit matter:

- (1) Understood the relevant internal control process over the provision for impairment of concession rights and assessed the inherent risk of material misstatement by considering the degree of estimation uncertainty and level of other inherent risk factors such as complexity, subjectivity, changes and susceptibility to management bias; evaluated and validated the effectiveness of the key internal controls in relation to the provision for impairment of concession rights;
- (2) Understood the management's judgment on indications of impairment of concession rights and assess its rationality;
- (3) Compared and analyzed the actual operating results of relevant projects during the Year with the corresponding forecast data of the previous year to assess the reliability of the management's forecast of future cash flows;

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 6 of 9)

III. KEY AUDIT MATTERS (Continued)

Key Audit Matter

How our audit addressed the Key Audit Matter

(II) Provision for impairment of intangible assets – concession rights (Continued)

The management evaluated the recoverable amount based on the higher of the present value of the future cash flows expected to be derived from the asset and an asset's fair value less costs to sell. The evaluation process involved the management's significant accounting estimates and judgments, including the use of appropriate impairment test methods and models and the use of key assumptions (mainly revenue growth rates, EBIT margin and pretax discount rates) in the forecast of the present value of future cash flows.

As the amount of the concession rights is significant and the management is required to use significant accounting estimates and judgments in assessing the recoverable amount of the concession rights, we identified it as a key audit matter.

- Obtained relevant information on the impairment test conducted by the management on the concession rights of projects as described on the left. With the assistance of our internal valuation experts:
 - With reference to industry practices, evaluated the appropriateness of the impairment test methods and models adopted by the management in the tests;
 - b) With reference to analysis on trends of comparable industries, risk factors of comparable companies, etc., evaluated the reasonableness of the key assumptions adopted by the management in assessment of the recoverable amount, including revenue growth rate, EBIT margin and pre-tax discount rate during the operating period, based on the industry development and the historical operating conditions, future operating plans, and actual operating conditions after the balance sheet date of Dynagreen;
 - Reviewed the sensitivity analysis performed by the management on key assumptions, and assessed the potential impact on the recoverable amount when the relevant key assumptions changed reasonably;
 - Checked the accuracy of the calculation related to the present value of future cash flows.

Based on the audit performed by us, the significant accounting estimates and judgments used by the management in evaluation of the recoverable amount of the concession rights as described on the left can be supported by the audit evidence obtained by us.

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 7 of 9)

IV. OTHER INFORMATION

Management of Dynagreen is responsible for the other information. The other information comprises all of the information included in 2022 annual report of Dynagreen other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

V. RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH **GOVERNANCE FOR THE FINANCIAL STATEMENTS**

Management of Dynagreen is responsible for the preparation and fair presentation of these financial statements in accordance with the CASs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these financial statements, management is responsible for assessing Dynagreen's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Dynagreen or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Dynagreen's financial reporting process.

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 8 of 9)

VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether these financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- (I) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (II) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- (III) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- (IV) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Dynagreen's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in these financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Dynagreen to cease to continue as a going concern.
- (V) Evaluate the overall presentation (including the disclosures), structure and content of the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- (VI) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Dynagreen to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

Auditor's Report (Continued)

PwC ZT Shen Zi (2023) No. 10029 (Page 9 of 9)

VI. AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS (Continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to financial statements

(Expressed in Renminbi unless otherwise indicated)

1. GENERAL INFORMATION

Dynagreen Environmental Protection Group Co., Ltd. (the "Company") is a joint-stock limited liability company established based on the reorganisation of Shenzhen Dynagreen Environmental Engineering Co., Ltd. on 23 April 2012. Its registered address is 2nd Floor, Northeastern Wing, Jiuzhou Electronic Building, 007 Keji South 12th Street, Nanshan District, Shenzhen, Guangdong Province, the People's Republic of China (the "PRC"). Its head office is located in Shenzhen, Guangdong Province, the PRC. The parent company and the ultimate holding company of the Company is Beijing State-Owned Assets Management Co., Ltd. ("BSAM").

On 19 June 2014, the Company was listed on the Stock Exchange of Hong Kong Limited ("SEHK"). On 29 June 2014, the underwriter of the Company of the public offering project on the SEHK exercised all of the over-allotment options stated in the Company's prospectus dated 9 June 2014. Upon the public offering, the share capital of the Company amounted to RMB1,045,000,000.00 comprising a total of 1,045,000,000.00 shares.

As approved by the *Approval in Relation to the Initial Public Offering of Dynagreen Environmental Protection Group Co., Ltd.* (Zheng Jian Xu Ke [2018] No. 746) issued by the China Securities Regulatory Commission (the "CSRC"), the Company issued not more than 116,200,000 ordinary shares (A shares) under the non-public offering on the Shanghai Stock Exchange on 23 April 2018. Under the offering, the actual size of the public offering was 116,200,000.00 RMB ordinary shares with a par value of RMB1 per share, increasing the share capital by RMB116,200,000.00. Upon the public offering of A shares, the share capital of the Company amounted to RMB1,161,200,000.00 comprising a total of 1,161,200,000.00 shares.

Approved by the *Approval on the Non-Public Issuance of Shares of Dynagreen Environmental Protection Group Co., Ltd.* (Zheng Jiang Xu Ke [2020] No. 2493) on 9 October 2020, the Company issued no more than 232,240,000.00 shares under non-public issuance of A shares. According to the issuance result, the actual non-public issuance of 232,240,000.00 RMB ordinary shares with a par value of RMB1.00 each to six specific targets will increase the share capital by RMB232,240,000.00. After this non-public issuance of A shares, the Company's share capital is RMB1,393,440,000.00, and the total number of shares is 1,393,440,000.00.

In 2022, as the holders of convertible bonds started to exercise the conversion rights (see Note 4(24) for details), the share capital of the Company increased to RMB1,393,447,763.00, and the total number of shares was 1,393,447,763.00.

1. **GENERAL INFORMATION (Continued)**

Acting as a social capital party, the Company and its subsidiaries (together "the Group") are mainly engaged in the investment, construction, operation, maintenance and technical consulting business of public infrastructure in the environmental protection industry such as domestic waste incineration power plants, through the conclusion of public-private partnership ("PPP") project contracts with the government and by means of build-operate-transfer ("BOT", related projects referred to as "BOT" projects).

Subsidiaries included in the scope of consolidation for the year ended 31 December 2022 ("the current year") are listed in Note 6. With the exception of Fengcheng Dynagreen Environmental Protection Co., Ltd. which is newly included in the scope of consolidation this year (see Note 5(1) for details), there is no other change in the scope of consolidation of the Group this year.

These financial statements were authorised for issue by the Company's Board of Directors on 30 March 2023.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES

The Group determines the specific accounting policies and estimates based on its features of production and operation, primarily comprising the measurement of expected credit loss ("ECL") on receivables and contract assets (Note 2(9)), amortisation of intangible assets (Note 2(14)), recognition and measurement of revenue (Note 2(20)), etc.

Details of the Group's critical judgements, critical accounting estimates and key assumptions used in determining significant accounting policies are set forth in Note 2(27).

(1) Basis of preparation

The financial statements are prepared in accordance with the Accounting Standards for Business Enterprises – Basic Standard, and the specific accounting standards and other relevant regulations issued by the Ministry of Finance on 15 February 2006 and in subsequent periods (hereinafter collectively referred to as "the Accounting Standards for Business Enterprises" or "CASs") and the disclosure requirements in the *Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No.15 – General Rules on Financial Reporting* issued by the China Securities Regulatory Commission.

The financial statements are prepared on a going concern basis.

In addition, these financial statements also included the relevant disclosure in accordance with the disclosure requirements of the Hong Kong Companies Ordinance and the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited.

(2) Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the year ended 31 December 2022 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the Group's and the Company's financial position as at 31 December 2022 and their financial performance, cash flows and other information for the year then ended.

Financial Report (Continued) XII.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(3) Accounting year

The Company's accounting year starts on 1 January and ends on 31 December.

Recording currency

The Company's recording currency is Renminbi (RMB). The recording currency of the Company's subsidiaries is determined based on the primary economic environment in which they operate. The financial statements are presented in RMB.

Business combinations

Business combinations involving enterprises under common control

The consideration paid and net assets obtained by the Group in a business combination are measured at the carrying amount. If the combined party is acquired from a third party by the ultimate controlling party in a prior year, the consideration paid and net assets obtained by the combining party are measured based on the carrying amounts of the combined party's assets and liabilities (including the goodwill arising from the acquisition of the combined party by the ultimate controlling party) presented in the consolidated financial statements of the ultimate controlling party. The difference between the carrying amount of the net assets obtained from the combination and the carrying amount of the consideration paid for the combination is treated as an adjustment to capital surplus (share premium). If the capital surplus (share premium) is not sufficient to absorb the difference, the remaining balance is adjusted against retained earnings. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

Business combinations involving enterprises not under common control

The cost of combination and identifiable net assets obtained by the Group in a business combination are measured at fair value at the acquisition date. Where the cost of the combination exceeds the Group's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill; where the cost of combination is lower than the Group's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised in profit or loss for the current period. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(6) Preparation of consolidated financial statements

The consolidated financial statements comprise the financial statements of the Company and all of its subsidiaries.

Subsidiaries are consolidated from the date on which the Group obtains control and are de-consolidated from the date that such control ceases. For a subsidiary that is acquired in a business combination involving enterprises under common control, it is included in the consolidated financial statements from the date when it, together with the Company, comes under common control of the ultimate controlling party. The portion of the net profit realised before the combination date is presented separately in the consolidated income statement.

In preparing the consolidated financial statements, where the accounting policies and the accounting periods of the Company and subsidiaries are inconsistent, the financial statements of the subsidiaries are adjusted in accordance with the accounting policies and the accounting period of the Company. For subsidiaries acquired from business combinations involving enterprises not under common control, the individual financial statements of the subsidiaries are adjusted based on the fair value of the identifiable net assets at the acquisition date.

All significant intra-group balances, transactions and unrealised profits are eliminated in the consolidated financial statements. The portion of subsidiaries' shareholders' equity and the portion of subsidiaries' net profits and losses and comprehensive incomes for the period not attributable to the Company are recognised as minority interests, net profit or loss attributable to minority interests and total comprehensive income attributable to minority interests, and presented separately in the consolidated financial statements under shareholders' equity, net profit and total comprehensive income respectively. When the amount of loss for the current period attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the opening balance of owners' equity of the subsidiary, the excess is allocated against the balance of minority interests. Unrealised profits and losses resulting from the sale of assets by the Company to its subsidiaries are fully eliminated against net profit attributable to owners of the parent. Unrealised profits and losses resulting from the sale of assets by a subsidiary to the Company are eliminated and allocated between net profit attributable to owners of the parent and net profit attributable to minority interests in accordance with the allocation proportion of the parent in the subsidiary. Unrealised profits and losses resulting from the sale of assets by one subsidiary to another are eliminated and allocated between net profit attributable to owners of the parent and net profit attributable to minority interests in accordance with the parent in the subsidiary.

If the accounting treatment of a transaction is inconsistent in the financial statements at the Group level and at the Company or its subsidiary level, adjustment will be made from the perspective of the Group.

(7) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily drawn on demand, and short-term and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(8) Foreign currency translation

(a) Foreign currency transactions

Foreign currency transactions are translated into recording currency using the exchange rates prevailing at the dates of the transactions.

At the balance sheet date, monetary items denominated in foreign currencies are translated into recording currency using the spot exchange rates on the balance sheet date. Exchange differences arising from these translations are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for acquisition or construction of qualifying assets, which are capitalised as part of the cost of those assets. Non-monetary items denominated in foreign currencies that are measured at historical costs are translated at the balance sheet date using the spot exchange rates at the date of the transactions. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

(b) Translation of foreign currency financial statements

The asset and liability items in the balance sheets for overseas operations are translated at the spot exchange rates on the balance sheet date. Among the shareholders' equity items, the items other than "undistributed profits" are translated at the spot exchange rates of the transaction dates. The income and expense items in the income statements for overseas operations are translated at the approximate exchange rates of the spot exchange rate at the dates of the transactions. The differences arising from the above translation are presented in other comprehensive income. The cash flows of overseas operations are translated at the approximate exchange rates of the spot exchange rate on the dates of the cash flows. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

(9) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. A financial asset or a financial liability is recognised when the Group becomes a party to the contractual provisions of the instrument.

(a) Financial assets

Classification and measurement

Based on the Group's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets, financial assets are classified as: (1) financial assets at amortised cost; (2) financial assets at fair value through other comprehensive income; (3) financial assets at fair value through profit or loss.

At initial recognition, the financial assets are measured at fair value. Transaction costs that are incremental and directly attributable to the acquisition of the financial assets are included in the initially recognised amounts, except for the financial assets at fair value through profit or loss, the related transaction costs of which are expensed in profit or loss for the current period. Accounts receivables or notes receivables arising from sale of products or rendering of services (excluding or without regard to significant financing components) are initially recognised at the consideration that is entitled to be received by the Group as expected.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(9) Financial instruments (Continued)

(a) Financial assets (Continued)

(i) Classification and measurement (Continued)
Debt instruments

The debt instruments held by the Group refer to the instruments that meet the definition of financial liabilities from the perspective of the issuer, and are measured in the following two categories:

Measured at amortised cost:

The objective of the Group's business model is to hold the financial assets to collect the contractual cash flows, and the contractual cash flow characteristics are consistent with a basic lending arrangement, which gives rise on specified dates to the contractual cash flows that are solely payments of principal and interest on the principal amount outstanding. The interest income of such financial assets is recognised using the effective interest method. Such financial assets mainly comprise cash at bank and on hand, notes receivables, accounts receivables, other receivables, long-term receivables, etc. Long-term receivables that are due within one year (inclusive) as from the balance sheet date are included in the current portion of non-current assets.

Measured at fair value through other comprehensive income:

The objective of the Group's business model is to hold the financial assets for both collection of the contractual cash flows and selling such financial assets, and the contractual cash flow characteristics are consistent with a basic lending arrangement. Such financial assets are measured at fair value through other comprehensive income, except for the impairment gains or losses, foreign exchange gains and losses, and interest income calculated using the effective interest method which are recognised in profit or loss for the current period. Such financial assets are mainly receivables financing, etc.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(9) Financial instruments (Continued)

(a) Financial assets (Continued)

Impairment

The Group confirms the loss provision based on ECL for financial assets and contract assets measured at amortised cost.

Giving consideration to reasonable and supportable information that is available without undue cost or effort at the balance sheet date on past events, current conditions and forecasts of future economic conditions weighted by the probability of default, the Group recognises the ECL as the probability-weighted amount of the present value of the difference between the cash flows receivable from the contract and the cash flows expected to collect.

For notes receivables, accounts receivables, contract assets and long-term receivables arising from sale of goods and rendering of services in the ordinary course of operating activities, the Group recognises the lifetime ECL regardless of whether there exists a significant financing component.

At each balance sheet date, in addition to the notes receivables, accounts receivables, receivables financing, contract assets and lease receivables mentioned above, the ECL of financial instruments at different stages is measured respectively. 12-month ECL is recognised for financial instruments in Stage 1 which don't have a significant increase in credit risk since initial recognition; lifetime ECL is recognised for financial instruments in Stage 2 which have had a significant increase in credit risk since initial recognition but are not deemed to be credit-impaired; and lifetime ECL is recognised for financial instruments in Stage 3 that are credit-impaired.

For the financial instruments with low credit risk as at the balance sheet date, the Group assumes there is no significant increase in credit risk since initial recognition. The Group determines them as the financial instruments in Stage 1 and recognises the 12-month ECL.

For the financial instruments in Stage 1 and Stage 2, the interest income is calculated by applying the effective interest rate to the book balance (before net of ECL provision). For the financial instrument in Stage 3, the interest income is calculated by applying the effective interest rate to the amortised cost (net of ECL provision).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(9) Financial instruments (Continued)

(a) Financial assets (Continued)

(ii) Impairment (Continued)

In case the ECL of an individually assessed financial asset cannot be evaluated with reasonable cost, the Group classifies the receivables into certain groups on the basis of shared risk characteristics, and calculates the ECL for each group respectively. Basis for determining groups and method for provision are as follows:

Group 1 of notes receivables
Group 2 of notes receivables
Group 1 of accounts receivables
Group 2 of accounts receivables
Group 2 of accounts receivables
Group 1 of contract assets
Group 2 of contract assets
Group 2 of contract assets (Comprising contract assets included in other non-

current assets)

Group 1 of other receivables

Group 2 of other receivables

Group 3 of other receivables

Group 1 of long-term receivables

VAT refunds receivable and other tax refunds receivable

Receivables from related parties

Others

Receivables from BT projects (Note)

Group 2 of long-term receivables Performance bond

Note: BT projects refer to the Group's investment and construction business of public infrastructure in the environmental protection industry such as domestic waste incineration power plants on a "build-transfer" basis.

For accounts receivables, notes receivables and contract assets (including contract assets included in other non-current assets), long-term receivables (receivables from BT projects) arising from sale of goods and rendering of services in the ordinary course of operating activities which are classified into groups, the Group calculates the ECL with reference to historical credit loss experience, current conditions and forecasts of future economic conditions, and based on the exposure at default and the lifetime ECL rates. For long-term receivables (performance bond) and other receivables that are classified into groups, the Group calculates the ECL with reference to historical credit loss experience, current conditions and forecasts of future economic conditions, and based on the exposure at default and the 12-month or lifetime ECL rates.

The Group recognises the loss provision made or reversed into profit or loss for the current period.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

Financial instruments (Continued)

Financial assets (Continued)

Derecognition

A financial asset is derecognised when: (i) the contractual rights to the cash flows from the financial asset expire, (ii) the financial asset has been transferred and the Group transfers substantially all the risks and rewards of ownership of the financial asset to the transferee, or (iii) the financial asset has been transferred and the Group has not retained control of the financial asset, although the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received and the cumulative changes in fair value that had been recognised directly in other comprehensive income, is recognised in profit or loss for the current period.

(b) Financial liabilities

Financial liabilities are classified as financial liabilities at amortised cost and financial liabilities at fair value through profit or loss at initial recognition.

Financial liabilities of the Group mainly comprise financial liabilities at amortised cost, including the liability portion of convertible corporate debentures and other financial liabilities.

Convertible corporate debentures

Convertible corporate debentures comprise liability portion and equity portion. The liability portion is classified as liabilities (included in the debentures payable), which reflects the obligation to pay fixed principal and interest, and its fair value is calculated by the market interest rate of similar debentures without embedded convertible option at initial recognition, and is subsequently measured at amortised cost using the effective interest method. The equity portion of the convertible debentures reflects the embedded option that converts liabilities into ordinary shares, which can only be settled by the exchange of a fixed number of the Group's own equity instruments for a fixed amount of cash or another financial asset. The equity portion of the Group is recognised as equity by the difference between the overall proceeds of issuance of convertible corporate debentures and the liability portion. Direct transaction costs are allocated based on the shares of the liability portion and the equity portion in issuance proceeds.

When convertible corporate debentures are converted into stock shares, the amount calculated by the number of shares converted and the par value per share is recognised as share capital, and the difference between the balance of relevant portion of convertible corporate debentures and the above share capital is recognised as share premium in capital reserve.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(9) Financial instruments (Continued)

(b) Financial liabilities (Continued)

Other financial liabilities

Other financial liabilities at amortised cost mainly include notes payables, accounts payables, other payables, borrowings, etc. Such financial liabilities are initially recognised at fair value, net of transaction costs incurred, and subsequently measured using the effective interest method. Financial liabilities with maturities of no more than one year (inclusive) are presented as current liabilities, and those with maturities of over one year but due within one year (inclusive) as from the balance sheet date are presented as current portion of non-current liabilities; and others are presented as non-current liabilities.

Other financial liabilities are derecognised or partly derecognised when the underlying present obligation is discharged or partly discharged. The difference between the carrying amount of the derecognised part of the financial liability and the consideration paid is recognised in profit or loss for the current period.

(c) Equity instruments

An equity instrument is a contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

(10) Inventories

(a) Classification

Inventories mainly include turnover materials, etc., and are measured at the lower of cost and net realisable value.

(b) Measurement method of cost of inventories

Cost of inventories recognised is calculated using the weighted average method on a monthly basis. Turnover materials are amortised when they are used. The amortisation charge is included in the cost of the related assets or recognised in profit or loss for the current period.

(c) Basis for determining net realisable value of inventories and method for making provision for inventories

Provision for decline in the value of inventories is determined at the excess amount of the carrying amount of the inventories over their net realisable value. Net realisable value is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes.

(d) The Group adopts the perpetual inventory system and on-site inventory system.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(11) Long-term equity investments

Long-term equity investments comprise the Company's long-term equity investments in its subsidiaries, and the Group's long-term equity investments in its joint ventures.

Subsidiaries are the investees over which the Company is able to exercise control. A joint venture is a joint arrangement which is structured through a separate vehicle over which the Group has joint control together with other parties and only has rights to the net assets of the arrangement based on legal forms, contractual terms and other facts and circumstances.

Investments in subsidiaries are presented in the Company's financial statements using the cost method, and are adjusted to the equity method when preparing the consolidated financial statements, and investments in joint ventures are accounted for using the equity method.

Determination of investment cost (a)

For long-term equity investments acquired through a business combination involving enterprises under common control, the investment cost shall be the share of the carrying amount of the acquiree's owners' equity in the consolidated financial statements of the ultimate controlling party at the combination date; for long-term equity investments acquired through a business combination involving enterprises not under common control, the investment cost shall be the combination cost.

For long-term equity investments acquired not through a business combination: for long-term equity investments acquired by payment in cash, the initial investment cost shall be the purchase price actually paid; for long-term equity investments acquired by issuing equity securities, the initial investment cost shall be the fair value of the equity securities issued.

Subsequent measurement and recognition of profit or loss

Long-term equity investments accounted for using the cost method are measured at initial investment cost. Cash dividend or profit distribution declared by the investees is recognised as investment income in profit or loss for the current period.

For long-term equity investments that are accounted for using the equity method, where the initial investment cost exceeds the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the investment is initially measured at that cost. Where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the difference is included in profit or loss for the current period and the cost of the long-term equity investment is adjusted upwards accordingly.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(11) Long-term equity investments (Continued)

(b) Subsequent measurement and recognition of profit or loss (Continued)

For long-term equity investments accounted for using the equity method, the Group recognises the investment income according to its share of net profit or loss of the investee. The Group does not recognise further losses when the carrying amount of the long-term equity investment together with any long-term interests that, in substance, form part of the Group's net investment in the investee is reduced to zero. However, if the Group has obligations for additional losses and the criteria with respect to recognition of provisions are satisfied, the Group continues recognising the investment losses and the provisions at the amount it expects to undertake. The Group's share of changes in the investee's owners' equity other than those arising from the net profit or loss, other comprehensive income and profit distribution is recognised in capital surplus with a corresponding adjustment to the carrying amount of the long-term equity investment. The carrying amount of the investment is reduced by the Group's share of the profit distribution or cash dividends declared by the investee. Unrealised gains or losses on transactions between the Group and its investees are eliminated to the extent of the Group's equity interest in the investees, based on which the investment income or losses are recognised. Any losses resulting from transactions between the Group and its investees, which are attributable to asset impairment losses are not eliminated.

(c) Basis for determining existence of control, joint control over investees

Control is the power to govern an investee, so as to obtain variable returns from its involvement with the investee, and has the ability to use its power over the investee to affect the amount of the investor's returns.

Joint control is the contractually agreed sharing of control over an arrangement, and the activities related to such arrangement can be decided only with the unanimous consent of the Group and other parties sharing control.

(d) Impairment of long-term equity investments

For the long-term equity investment in the subsidiary and joint ventures, when its recoverable amount is less than its carrying amount, the carrying amount is reduced to the recoverable amount (Note 2(16)).

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(12) Fixed assets

(a) Recognition and initial measurement of fixed assets

Fixed assets comprise buildings, machinery and equipment, motor vehicles and others.

Fixed assets are recognised when it is probable that the related economic benefits will flow to the Group and the cost can be reliably measured. Fixed assets purchased or constructed by the Group are initially measured at cost at the time of acquisition.

Subsequent expenditures incurred for a fixed asset are included in the cost of the fixed asset when it is probable that the associated economic benefits will flow to the Group and the related cost can be reliably measured. The carrying amount of the replaced part is derecognised. All the other subsequent expenditures are recognised in profit or loss for the period in which they are incurred.

(b) Depreciation of fixed assets

Except the subsidiary of the Group, Lvyi (Huludao) Environmental Services Limited (defined as "Huludao Hazardous Waste Company", whose fixed asset is depreciated using the unit-of-production method, and fixed assets purchased with safety production expenses (Note 2(26)), other fixed assets of the Group are depreciated using the straight-line method to allocate the cost of the assets to their estimated net residual values over their estimated useful lives. For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated net residual values expressed as a percentage of cost and the annual depreciation rates of fixed assets are as follows:

	Estimated useful lives	Estimated net residual values	Annual depreciation rates
Buildings	20 to 50 years	5%	1.90% to 4.75%
Machinery and equipment	3 to 15 years	0% to 5%	6.33% to 33.33%
Motor vehicles	3 to 10 years	0% to 10%	9.00% to 33.33%
Others	3 to 20 years	0% to 10%	4.50% to 33.33%

The estimated useful life and the estimated net residual value of a fixed asset and the depreciation method applied to the asset are reviewed, and adjusted as appropriate at each year-end.

The carrying amount of a fixed asset is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(16)).

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(12) Fixed assets (Continued)

(d) Disposals of fixed assets

A fixed asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposals on sale, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

(13) Borrowing costs

The borrowing costs that are directly attributable to acquisition and construction of an asset that needs a substantially long period of time for its intended use commence to be capitalised and recorded as part of the cost of the asset when expenditures for the asset and borrowing costs have been incurred, and the activities relating to the acquisition and construction that are necessary to prepare the asset for its intended use have commenced. The capitalisation of borrowing costs ceases when the asset under acquisition or construction becomes ready for its intended use and the borrowing costs incurred thereafter are recognised in profit or loss for the current period. Capitalisation of borrowing costs is suspended during periods in which the acquisition or construction of an asset is interrupted abnormally and the interruption lasts for more than 3 months, until the acquisition or construction is resumed.

The capitalised amount of specific borrowings intended to be used for the acquisition and construction of qualifying assets is determined by the interest expenses incurred in the period less interest income of the unused borrowings deposited at bank or investment income from temporary investments.

The capitalised amount of general borrowings intended to be used for the acquisition and construction of qualifying assets is determined by the weighted average of the excess of accumulated capital expenditure over capital expenditure of the special borrowings multiplied by the weighted average effective interest rate of the utilised general borrowings. The effective interest rate is the interest rate at which the future cash flows of the borrowings over the estimated life or a shorter applicable period are discounted into the initial recognised amount of the borrowings.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(14) Intangible assets

Intangible assets include land use rights, concession rights and software, and are measured at cost.

(a) Land use rights

Land use rights are amortised on the straight-line basis over their approved use period of 50 years. If the acquisition costs of the land use rights and the buildings located thereon cannot be reasonably allocated between the land use rights and the buildings, all of the acquisition costs are recognised as fixed assets.

(b) Software

Software is amortised on the straight-line basis over its useful lives of 10 years.

(c) Concession rights

Concession rights of PPP projects

According to the PPP project contracts entered into by the Group and different local governments, the Group obtains concession rights for public infrastructure such as domestic waste incineration power plants. During the operation of the project, the Group is entitled to collect fees from those who receive public goods and services, including waste treatment fees and electricity tariffs. Under the PPP project contracts, the Group builds domestic waste incineration power plants and operates them for a concession period of 23 to 30 years. Upon the expiry of the concession period, the Group would transfer these domestic waste incineration power plants to respective local governments without consideration.

During the operation period of the project, if the Group has the right to receive variable cash flow from the party which receives the public goods and services and the right does not constitute an unconditional right to receive cash, the Group recognises the difference between the consideration for the relevant PPP projects assets or the amount of revenue recognised in respect of the construction project as an intangible asset - concession right when the PPP projects assets are ready for intended use according to the full amount or the difference after deducting the determinable amount of cash that the Group has the right to receive, and the intangible asset - concession right is amortised on a straight-line basis over the concession period.

Others

The concession rights of hazardous waste disposal projects acquired by the Group through the acquisition of Huludao Hazardous Waste Company is initially measured at fair value at the time of acquisition. Since the relevant concession agreement does not stipulate the concession period, the concession of the hazardous waste disposal project is regarded as an intangible asset with an indefinite useful life, and is not amortised.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(14) Intangible assets (Continued)

(d) Periodical review of useful life and amortisation method

For an intangible asset with a finite useful life, review of its useful life and amortisation method is performed at each year-end, with adjustment made as appropriate.

The useful lives of intangible assets with indefinite useful lives are reviewed during every accounting period. If there is any evidence to support that the useful lives are definite, the useful life of intangible assets shall be estimated and treated in accordance with the provisions of the aforementioned provision.

(e) Research and development

The expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase based on its nature and whether there is material uncertainty that the research and development activities can form an intangible asset at the end of the project.

Expenditure on the research phase is recognised in profit or loss in the period in which it is incurred. Expenditure on the development phase is capitalised only if all of the following conditions are satisfied:

- the development of manufacturing technique has been fully demonstrated by technical team;
- management has approved the budget for the technique development and intends to complete the intangible asset, and use or sell it;
- the research and analysis of preliminary market survey indicate that products manufactured with such technique are marketable;
- adequate technical and financial supports are available for development of manufacturing techniques and subsequent mass production; and
- expenditure on development of manufacturing techniques can be reliably collected.

Other development expenditures that do not meet the conditions above are recognised in profit or loss in the period in which they are incurred. Development costs previously recognised as expenses are not recognised as an asset in a subsequent period. Capitalised expenditure on the development phase is presented as development costs in the balance sheet and transferred to intangible assets at the date that the asset is ready for its intended use.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(14) Intangible assets (Continued)

Impairment of intangible assets

The carrying amount of intangible assets is reduced to the recoverable amount when the recoverable amount is below the carrying amount (Note 2(16)).

(15) Long-term prepaid expenses

Long-term prepaid expenses include the expenditure for improvements to right-of-use assets, and other expenditures that have been incurred but should be recognised as expenses over more than one year in the current year and subsequent periods. Long-term prepaid expenses are amortised on the straight-line basis over the expected beneficial period and are presented at actual expenditure net of accumulated amortisation.

Long-term prepaid expenses are amortised on the straight-line basis over 2-5 years of the expected beneficial period.

(16) Impairment of long-term assets

Fixed assets, construction in progress, right-of-use assets, intangible assets with finite useful lives and long-term equity investments in subsidiaries and joint ventures are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date; intangible assets that are not yet available for their intended use are tested for impairment at least annually, irrespective of whether there is any indication of impairment; intangible assets with indefinite useful lives are tested for impairment at least annually, irrespective of whether there is any indication of impairment. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount of an asset is the higher of the fair value less costs to sell and the present value of the future cash flows expected to be derived from it. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Goodwill that is separately presented in the financial statements is tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. In conducting the test, the carrying amount of goodwill is allocated to the related asset groups or groups of asset groups which are expected to benefit from the synergies of the business combination. If the result of the test indicates that the recoverable amount of an asset group or a group of asset groups, including the allocated goodwill, is lower than its carrying amount, the corresponding impairment loss is recognised. The impairment loss is first deducted from the carrying amount of goodwill that is allocated to the asset group or group of asset groups, and then deducted from the carrying amounts of other assets within the asset group or group of asset groups in proportion to the carrying amounts of assets other than goodwill.

Once the above asset impairment loss is recognised, it will not be reversed for the value recovered in the subsequent periods.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(17) Employee benefits

Employee benefits refer to all forms of consideration or compensation given by the Group in exchange for service rendered by employees or for termination of employment relationship, which include short-term employee benefits, post-employment benefits, termination benefits and other long-term employee benefits.

(a) Short-term employee benefits

Short-term employee benefits include wages or salaries, bonus, allowances and subsidies, staff welfare, premiums or contributions on medical insurance, work injury insurance and maternity insurance, housing funds, union running costs and employee education costs, short-term paid absences, etc. The short-term employee benefits actually occurred are recognised as a liability in the accounting period in which the service is rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets. Non-monetary benefits are measured at fair value.

(b) Post-employment benefits

The Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Group's post-employment benefits mainly include the premiums or contributions on basic pensions and unemployment insurance, both of which belong to defined contribution plans.

Basic pensions

The Group's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on the basic pensions are calculated according to the bases and percentage prescribed by the relevant local authorities. When employees retire, the relevant local authorities are obliged to pay the basic pensions to them. The amounts based on the above calculations are recognised as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets.

(c) Termination benefits

The Group provides compensation for terminating the employment relationship with employees before the end of the employment contracts or as an offer to encourage employees to accept voluntary redundancy before the end of the employment contracts. The Group recognises a liability arising from compensation for termination of the employment relationship with employees, with a corresponding charge to profit or loss for the current period at the earlier of the following dates: 1) when the Group cannot unilaterally withdraw an employment termination plan or a curtailment proposal; 2) when the Group recognises costs or expenses for a restructuring that involves the payment of termination benefits.

The termination benefits expected to be settled within one year since the balance sheet date are classified as employee benefits payable.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(18) Profit distributions

Proposed profit distributions are recognised as a liability in the period in which the dividends are approved by the shareholders' meeting or similar entities.

(19) Provisions

Provisions are recognised when the Group has a present obligation under the regulations on withdrawal of decommissioning costs of hazardous waste landfill, the contracts of PPP projects, etc., it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Factors surrounding a contingency, such as the risks, uncertainties and the time value of money, are taken into account as a whole in reaching the best estimate of a provision. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows. The increase in the discounted amount of the provision arising from passage of time is recognised as interest expense.

The carrying amount of provisions is reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The provisions expected to be settled within one year since the balance sheet date are classified as current liabilities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(20) Revenue

The Group recognises revenue at the amount of the consideration which the Group expects to be entitled to receive when the customer obtains control over relevant goods or services.

(a) Revenue from construction services

PPP project contract refers to the contract concluded between the private party and the government party on PPP project cooperation in accordance with laws and regulations, and the contract meets both the conditions of "dual characteristics" and "dual controls. Among them, "dual characteristics" means that the private party uses the PPP project assets to provide public goods and services on behalf of the government during the operation period stipulated in the contract, and receives compensation for the public goods and services it provides; "dual controls" means that the government party controls or regulates the type, object and price of public goods and services that the private party provides when using the PPP project assets, and when the PPP project contract is terminated, the government party controls the material residual interests of the PPP project assets through ownership, income rights or other forms.

If the Group provides multiple services in accordance with the PPP project contract, it identifies the individual performance obligations in the contract and apportions the transaction price to each performance obligation in proportion to the individual selling price of each performance obligation.

The Group participates in public infrastructure construction business in the form of BOT and other forms based on PPP project contracts concluded with the government party. For the construction services provided by the Group to the government party as the primary responsible person, revenue is recognised over a period of time based on the progress of performance, and contract assets are recognised at the same time. The progress of performance is determined using the input method, which is determined according to the proportion of the cumulative actual construction service costs incurred during the construction process to the estimated total construction costs; the separate selling price of the construction services is based on the cost of construction, with reference to the gross margin of comparable businesses, calculated using the cost plus method.

For the portion of revenue recognised as intangible assets of the infrastructure construction, contract assets recognised during the relevant construction period are presented "intangible assets" in the balance sheet; other contract assets recognised during construction are presented "contract assets" or "other non-current assets" in the balance sheet, depending on whether they are expected to be converted into cash within one year from the balance sheet date.

If the Group meets the conditions for receiving cash (or other financial assets) of an identifiable amount from the contract assets recognised during PPP project construction services during the operation of the project, it shall be recognised as receivables when the Group has the unconditional right to receive such consideration (the right only depends on the factor of time passing). Subsequently, the interest income of relevant PPP projects is recognised on the basis of amortised cost according to the effective interest rate method.

Contract costs include contract performance costs and contract acquisition costs. The cost incurred by the Group in providing the above services is recognised as the contract performance costs. Contract performance costs are carried forward to the cost of sale of main operations based on the progress of performance when recognising revenue.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(20) Revenue (Continued)

(b) Electricity tariff

Revenue is recognised by the Group when the electricity is supplied to and controlled by the local grid company. The Group recognises the electricity tariff according to the actual volume of electricity supplied and the unit price and on-grid electricity as agreed in the electricity purchase and sale contracts.

(c) Waste treatment fees

Revenue is recognised by the Group during the course of providing waste treatment services. The Group recognises the waste treatment fees according to the actual volume of waste treated and the unit price as agreed in the agreements, deducting the portion recognised as financial assets.

(21) Government grants

Government grants refer to the monetary or non-monetary assets obtained by the Group from the government, including tax return, financial subsidy, etc.

Government grants are recognised when the grants can be received and the Group can comply with all attached conditions. If a government grant is a monetary asset, it will be measured at the amount received or receivable. If a government grant is a non-monetary asset, it will be measured at its fair value. If it is unable to obtain its fair value reliably, it will be measured at its nominal amount.

Government grants related to assets refer to government grants which are obtained by the Group for the purposes of purchase, construction or acquisition of the long-term assets. Government grants related to income refer to the government grants other than those related to assets.

Government grants related to assets are recorded as deferred income and recognised in profit or loss on a systemic basis over the useful lives of the assets. Government grants related to income that compensate the future costs, expenses or losses are recorded as deferred income and recognised in profit or loss, expenses or losses in reporting the related profit or loss; government grants related to income that compensate the incurred costs, expenses or losses are recognised in profit or loss, expenses or losses directly in current period. The Group applies the presentation method consistently to the similar government grants in the financial statements.

Government grants that are related to ordinary activities are included in operating profit, otherwise, they are recorded in non-operating income or expenses.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(22) Deferred tax assets and deferred tax liabilities

Deferred tax assets and deferred tax liabilities are calculated and recognised based on the differences arising between the tax bases of assets and liabilities and their carrying amounts (temporary differences). Deferred tax asset is recognised for the deductible losses that can be carried forward to subsequent years for deduction of the taxable profit in accordance with the tax laws. No deferred tax liability is recognised for a temporary difference arising from the initial recognition of goodwill. No deferred tax asset or deferred tax liability is recognised for a temporary difference arising from the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred tax assets are only recognised for deductible temporary differences, deductible losses and tax credits to the extent that it is probable that taxable profit will be available in the future against which the deductible temporary differences, deductible losses and tax credits can be utilised.

Deferred tax liabilities are recognised for temporary differences arising from investments in subsidiaries and joint ventures, except where the Group is able to control the timing of reversal of the temporary differences, and it is probable that the temporary differences will not be reversed in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries and joint ventures will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred tax assets are recognised.

Deferred tax assets and deferred tax liabilities are offset when:

- the deferred tax assets and deferred tax liabilities are related to the same tax payer within the Group and the same taxation authority; and,
- that tax payer within the Group has a legally enforceable right to offset current tax assets against current tax liabilities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(23) Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as the lessee

At the lease commencement date, the Group recognises the right-of-use asset and measures the lease liability at the present value of the lease payments that are not paid at that date. Lease payments include fixed payments, the exercise price of a purchase option or termination penalty if the lessee is reasonably certain to exercise that option etc. Variable lease payments in proportion to sales are excluded from lease payments and recognised in profit or loss as incurred. Lease liabilities that are due within one year (inclusive) as from the balance sheet date are included in the current portion of non-current liabilities.

Right-of-use assets of the Group comprise leased buildings, machinery and equipment, motor vehicles, etc. Right-of-use assets are measured initially at cost which comprises the amount of the initial measurement of lease liabilities, any lease payments made at or before the commencement date and any initial direct costs, less any lease incentives received. If there is reasonable certainty that the Group will obtain ownership of the underlying asset by the end of the lease term, the asset is depreciated over its remaining useful life; otherwise, the asset is depreciated over the shorter of the lease term and its remaining useful life. The carrying amount of the right-of-use asset is reduced to the recoverable amount when the recoverable amount is below the carrying amount.

For short-term leases with a term of 12 months or less and leases of an individual asset (when new) of low value, the Group chooses to include the lease payments in the cost of the underlying assets or in the profit or loss for the current period on a straight-line basis over the lease term, instead of recognising right-of-use assets and lease liabilities.

The Group accounts for a lease modification as a separate lease if both: (1) the modification increases the scope of the lease by adding the right to use one or more underlying assets; (2) the consideration for the lease increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the contract.

For a lease modification that is not accounted for as a separate lease, the Group redetermines the lease term at the effective date of the lease modification, and remeasures the lease liability by discounting the revised lease payments using a revised discount rate, except that the contract changes are accounted for by applying the practical expedient under the provisions of the Ministry of Finance. For a lease modification which decreases the scope of the lease or shortens the lease term, the Group decreases the carrying amount of the right-of-use asset, and recognises in profit or loss any gain or loss relating to the partial or full termination of the lease. For other lease modifications which lead to the remeasurement of lease liabilities, the Group correspondingly adjusts the carrying amount of the right-of-use asset.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(23) Leases (Continued)

The Group as the lessee (Continued)

For the rent concessions on the existing lease contract subject to the practical expedient under the provisions of the Ministry of Finance prior to 30 June 2022, the Group applies the practical expedient and records the undiscounted concessions in profit or loss for the current period when the agreement is reached to discharge the original payment obligation with corresponding adjustment of lease liabilities.

(24) Held for sale and discontinued operations

A non-current asset or a disposal group is classified as held for sale when all of the following conditions are satisfied: (1) the non-current asset or the disposal group is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such non-current asset or disposal group; (2) the Group has entered into a legally enforceable sale agreement with other party and obtained relevant approval, and the sale transaction is expected to be completed within one year.

Non-current assets (except for financial assets, investment properties measured at fair value and deferred tax assets) that meet the recognition criteria for held for sale are recognised at the amount equal to the lower of the fair value less costs to sell and the carrying amount, and the excess of the original carrying amount over the fair value less costs to sell is recognised as asset impairment loss.

Such non-current assets and assets and liabilities included in disposal groups classified as held for sale are classified as current assets and current liabilities respectively, and are separately presented in the balance sheet.

A discontinued operation is a component of the Group that either has been disposed of or is classified as held for sale, and is separately identifiable and satisfies one of the following conditions: (1) it represents a separate major line of business or geographical area of operations; (2) it is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; and (3) it is a subsidiary acquired exclusively with a view to resale.

The net profit from discontinued operations in the income statement includes operating profit or loss and disposal gains or losses of discontinued operations.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING **ESTIMATES (Continued)**

(25) Segment information

The Group identifies operating segments based on the internal organisation structure, management requirements and internal reporting system, and discloses segment information of reportable segments which is determined on the basis of operating segments.

An operating segment is a component of the Group that satisfies all of the following conditions: (1) the component is able to earn revenue and incur expenses from its ordinary activities; (2) whose operating results are regularly reviewed by the Group's management to make decisions about resources to be allocated to the segment and to assess its performance, and (3) for which the information on financial position, operating results and cash flows is available to the Group. Two or more operating segments that have similar economic characteristics and satisfy certain conditions can be aggregated into one single operating segment.

The Group is under overall operation. It has centralised internal organisation structure, management requirements and internal reporting system. The Group's financial information is regularly reviewed by the Group's management to make decisions about resources to be allocated to the segment and to assess its performance. The Group has no individually managed operating segment, therefore, the Group has one single operating segment.

(26) Safety production expenses

The Group makes provision for safety production expenses in accordance with the provisions under the Notice on Printing and Issuing the Administrative Measures for Appropriation and Usage of Safety Production Expenses of Enterprises (Cai Zi [2022] No. 136) issued by the Ministry of Finance and the Ministry of Emergency Management. The safety production expenses are specially used to enhance and improve the safety production conditions of enterprises or projects.

The provision for safety production expenses for the current year is based on the actual operating income in last year, which is extracted monthly by taking excess regressive manner. The Group's provision for safety production expenses is included in the cost of related products or charged to profit or loss when incurred, and special reserve is increased accordingly. When the Company uses safety production expenses, expensed items directly reduces the special reserves, while capitalized items are collected in construction in progress and recognized as fixed asset when the safety project is completed reaches the conditions for intended use. Meanwhile, the special reserve is reduced by the capitalized amount of safety production expenses and depreciation is recognized in the same amount. The fixed asset will not be depreciated in future periods.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(27) Critical accounting estimates and judgements

The Group continually evaluates the critical accounting estimates and key judgements applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Critical accounting estimates and key assumptions

(i) Determination of income from construction services

The Group recognises the income from construction services over a period of time in accordance with the progress of performance. The progress of performance is determined using the input method, which is determined according to the proportion of the cumulative actual construction service costs incurred during the construction process to the estimated total construction costs; the separate selling price of the construction services is based on the cost of construction, with reference to the gross margin of comparable businesses, calculated using the cost plus method. Management needs to make a reasonable assessment of the gross margin and total construction cost of construction services at the beginning of the construction services, continuously evaluate the total construction cost during the construction of the project, review and revise the total income from construction services and total construction costs based on the estimated budgeted costs and construction period, and then adjust the progress of performance and the amount of revenue from construction services recognised according to the results of the amendments, which will be reflected in the current financial statements of the Group.

(ii) Measurement of ECL

The Group calculates ECL through exposure at default and ECL rates, and determines the ECL rates based on probability of default and loss given default. In determining the ECL rates, the Group uses data such as internal historical credit loss experience, and adjusts historical data based on current conditions and forward-looking information.

When considering forward-looking information, the Group takes different economic scenarios into consideration to assess of the assumptions and parameters related to ECL, including the risk of economic downturn, external market environment, changes in customer conditions, Gross Domestic Product ("GDP"), Consumer Price Index ("CPI"), etc. The Group regularly monitors and reviews assumptions and parameters related to the calculation of ECL. Where there is a difference between the actual bad debts and the original estimate, such difference will affect the Group's provision for bad debts of the above assets in the future period.

(iii) Intangible assets – impairment provision for concession rights

The intangible assets of the Group are mainly concession rights for waste-to-energy projects and hazardous waste projects. At the balance sheet date, management assesses the recoverable amount of concession rights of each project for waste-to-energy treatment projects that have not yet commenced operations, for waste-to-energy treatment projects that have shown indication of impairment and hazardous waste projects accounted for as intangible assets with indefinite useful lives as no concession period was specified to assess the recoverable amount of the concession rights of these projects.

The recoverable amount of concession rights is determined based on the higher of the present value of the expected future cash flows and an asset's fair value less costs to sell. The evaluation process involves the use of appropriate impairment test methods and models and the use of key assumptions (mainly revenue growth rates, EBIT margin and pre-tax discount rates) in the forecast of the present value of future cash flows.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (Continued)

(27) Critical accounting estimates and judgements (Continued)

(a) Critical accounting estimates and key assumptions (Continued)

(iv) Income taxes and deferred income taxes

The Group is subject to income taxes in numerous jurisdictions. There are some transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgement is required from the Group in determining the provision for income tax in each of these jurisdictions. Where the final tax outcomes of these matters are different from the amounts that were initially recorded, such differences will impact the income tax and deferred income tax provisions in the period in which such determination is made.

A deferred tax asset is recognised for the carryforward of unused deductible losses to the extent that it is probable that future taxable profits will be available against which the deductible losses can be utilised. Future taxable profits include taxable profits that can be achieved through normal operations and the increase in taxable profits due to the reversal of taxable temporary differences arising from previous period in future period. The Group needs to apply estimates and judgements in determining the timing and amount of future taxable profits. If there is any difference between the actual and the estimates, adjustment may be made to the carrying amount of deferred tax assets.

(28) Changes in accounting policies

The Ministry of Finance released the Notice on Printing and Issuing the *Interpretation No. 15 of Accounting Standards for Business Enterprises* (hereinafter "Interpretation No. 15"), the Notice on Printing and Issuing the Interpretation No. 16 of Accounting Standards for Business Enterprises (Cai Kuai [2022] No. 31) and Q&A *on Implementation of Accounting Standards for Business Enterprises* in 2021. The financial statements for the year ended 31 December 2022 have been prepared in accordance with the above circulars and Q&A, and the impacts of the above amendment on the financial statements of the Group and the Company are not significant.

3. TAXATION

The main categories and rates of taxes applicable to the Group are set out below:

Category	Tax base	Tax rate
Enterprise income tax (a)	Taxable income	25%, 16.5% and 15%
Value-added tax ("VAT") (b)	Taxable value-added amount (Tax payable is calculated using the taxable sale amount multiplied by the applicable tax rate less deductible input VAT of the current period)	3%, 6%, 9% and 13%
Property tax	Levied on the residual value of the property or rental income	12% and 1.2%
City maintenance and construction tax	Payment amount of VAT	5% and 7%
Educational surcharge	Based on VAT effectively paid	3%
Local educational surcharge	Based on VAT effectively paid	2%
PRC withholding income tax (c)	Based on dividends declared to foreign investors	10%

(a) EIT preferential benefits and approvals

(i) Pursuant to the provisions including the Circular on Enterprise Income Tax Policy Concerning Deductions for Equipment and Appliances (Cai Shui [2018] No. 54) and the Announcement on Extending the Implementation Period of Certain Preferential Tax Policies (Cai Shui [2021] No. 6) issued by the State Taxation Administration, during the period from 1 January 2018 to 31 December 2023, the cost of newly purchased equipment with the original cost less than RMB5 million can be fully deducted against taxable profit in the next month after the asset is put into use, instead of being depreciated annually for tax filing.

3. TAXATION (Continued)

(a) EIT preferential benefits and approvals (Continued)

- Subsidiaries of the Company, Tianjin Dynagreen Renewable Energy Co., Ltd. ("Jizhou Company"), Anshun Dynagreen Renewable Energy Co., Ltd. ("Anshun Company"), Jurong Dynagreen Renewable Energy Co., Ltd. ("Jurong Company"), Guangyuan Boneng Renewable Energy Co., Ltd. ("Guangyuan Company"), Bengbu Dynagreen Renewable Energy Co., Ltd. ("Bengbu Company"), Tianjin Dynagreen Environmental Energy Co., Ltd. ("Ninghe Company"), Beijing Dynagreen Environment Co., Ltd. ("Tongzhou Company"), Jiamusi Bohai Environmental Protection and Electricity Company Limited ("Jiamusi Company"), Shantou Dynagreen Renewable Energy Co., Ltd. ("Shantou Company"), Zhaoqing Boneng Renewable Energy Power Generation Co., Ltd. ("Zhaoqing Company"), Beijing Dynagreen Renewable Energy Co., Ltd. ("Miyun Company"), Zhangqiu Dynagreen Renewable Energy Co., Ltd. ("Zhangqiu Company"), Bobai Dynagreen Renewable Energy Co., Ltd. ("Bobai Company"), Yichun Dynagreen Renewable Energy Co., Ltd. ("Yichun Company"), Hong'an Dynagreen Renewable Energy Co., Ltd. ("Hong'an Company"), Huizhou Dynagreen Renewable Energy Co., Ltd. ("Huizhou Phase II Company"), Haining Dynagreen Haiyun Environmental Protection Energy Co., Ltd. ("Haining Expansion Project Company"), Pingyang Dynagreen Environmental Energy Co., Ltd. ("Pingyang Phase II Project Company"), Wenzhou Dynagreen Environmental Energy Co., Ltd. ("Yongjia Phase II Project Company"), Guizhou Jinsha Green Energy Co., Ltd. ("Jinsha Company"), Dengfeng Dynagreen Renewable Energy Co., Ltd. ("Dengfeng Company"), Fengcheng Company, Laizhou Haikang Environmental Protection Energy Co., Ltd. ("Laizhou Company"), Shishou Dynagreen Renewable Energy Co., Ltd. ("Shishou Company") and Enshi Green Power Renewable Energy Co., Ltd. ("Enshi Company"), were qualified for the earnings from environmental protection, water and energy conservation as stipulated under the Enterprise Income Tax Law, and were eligible for a tax exemption for the first year to the third year, and a 50% reduction in EIT for the fourth year to the sixth year starting from the year in which the entities first generate operating income (the "3+3 tax holiday"). The details are as follows:
 - The phase II project of Anshun Company is entitled to the 3+3 tax holiday from 2020 to 2025; the phase I project of Anshun Company is an encouraged industry established in the Northwest region and completed its filing in 2018. The taxable income of phase I project of Anshun Company is subject to enterprise income tax at a preferential tax rate of 15%;
 - The Jurong Company, Guangyuan Company and Bengbu Company completed the "EIT preferential benefits and approvals" in 2017 and were entitled to the 3+3 tax holiday from 2017 to 2022;
 - Ninghe Company Biomass Power Generation Project, Tongzhou Company, Miyun Company and the phase I project of Jiamusi Company completed the "EIT preferential benefits and approvals" in 2018 and were entitled to the 3+3 tax holiday from 2018 to 2023;
 - The phase I project of Shantou Company, the phase I project of Zhaoqing Company, Zhangqiu Company and Bobai Company completed the "EIT preferential benefits and approvals" in 2019 and were entitled to the 3+3 tax holiday from 2019 to 2024;

3. TAXATION (Continued)

(a) EIT preferential benefits and approvals (Continued)

- (ii) (Cont'd)
 - Yichun Company, Hong'an Company, Huizhou Phase II Company, Haining Expansion Project Company, the phase II project of Jizhou Company, Fengcheng Company and phase II project of Shantou Company were entitled to the 3+3 tax holiday from 2020 to 2025;
 - Pingyang Phase II Project Company, Yongjia Phase II Project Company, Shishou Company, waste incineration project of Jinsha Company, Dengfeng Company, the phase II project of Jiamusi Company and Zhaoqing Company were entitled to the 3+3 tax holiday from 2021 to 2026.
 - Laizhou Company and Enshi Company were entitled to the 3+3 tax holiday from 2022 to 2027.

Before obtaining the notification of EIT, the subsidiaries made income tax provisions and payment based on a tax rate of 25% and income tax expenses.

(iii) Pursuant to the Announcement on the Matters Concerning the Implementation of Preferential Income Tax Policies for the Development of Small and Micro Enterprises and Individual Industrial and Commercial Households (STA Announcement [2021] No. 12) jointly issued by the Ministry of Finance and the State Taxation Administration, for the proportion of taxable income up to RMB1 million of a small and low-profit enterprise, the enterprise income tax shall be further half reduced on the basis of the existing preferential policy as specified in the article 2 of the Notice of the Ministry of Finance and the State Taxation Administration on Implementing the Inclusive Tax Deduction and Exemption Policies for Small and Micro Enterprises (Cai Shui [2019] No. 13).

Pingyao Dynagreen Renewable Energy Co., Ltd. ("Pingyao Company") and Longhui Dynagreen Renewable Energy Co., Ltd. ("Longhui Company"), being subsidiaries of the Company, meet the conditions of a small and low-profit enterprise and the part of their annual taxable income below RMB1 million is entitled to a preferential tax treatment of 12.5% exemption of taxable income and application of EIT rate as 20%; the part of their annual taxable income exceeding RMB1 million but below RMB3 million is entitled to a preferential tax treatment of 50% exemption of taxable income and application of EIT rate as 20%. The execution period of the announcement is from 1 January 2021 to 31 December 2022.

- (iv) In 2022, the Company obtained the High-Tech Enterprise Certificate (Certificate No.: GR202244206993) issued by the Shenzhen Science and Technology Innovation Commission, Shenzhen Finance Bureau, and Shenzhen Tax Bureau of the State Administration of Taxation. The certificate is valid for 3 years. In accordance with the relevant provision of Article 28 of the Enterprise Income Tax Law of the People's Republic of China, the enterprise income tax rate for the Company in 2022 was 15% (2021: 25%).
- (v) An income tax rate of 16.5% as stipulated by the Hong Kong tax laws was applicable to Dynagreen Investment Holding Company Limited ("Hong Kong Dynagreen"), a company incorporated in Hong Kong.

TAXATION (Continued)

(b) VAT preferential benefits and approvals

According to the Notice on Publishing the VAT Catalogue for Products Generated from Comprehensive Utilisation of Resources and Services (Cai Shui [2015] No. 78) issued by the Ministry of Finance and the State Taxation Administration, 70% refund of VAT in respect of the waste treatment services and 100% refund of VAT in respect of the sale of power or heat produced from waste or methane from waste fermentation.

According to the Announcement on Improving the VAT Policy for Comprehensive Utilization of Resources (Cai Shui [2021] No. 40) issued by the Ministry of Finance and the State Taxation Administration, the VAT paid for waste treatment and sewage processing and disposal services shall be subject to the VAT refund policy, or the VAT exemption policy. Once selected, it shall not be changed within 36 months.

Qingdao Dynagreen Renewable Energy Co., Ltd. ("Qingdao Company"), the Company's subsidiary, is a smallscale VAT taxpayer and its applicable tax rate is 3%.

(c) According to the Enterprise Income Tax Law, a 10% withholding tax will be levied on the dividends declared to foreign investors from the foreign investment enterprises established in Mainland China.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(1) Cash at bank and on hand

	31 December 2022	31 December 2021
Cash on hand	740.00	2,372.96
Cash at bank	1,864,782,553.59	954,787,582.39
Other cash balances (i)	2,196,700.00	11,951,353.50

(2) Accounts receivables

	31 December 2022	31 December 2021
Receivables from third parties	1,550,277,760.60	1,623,839,657.64
Receivables from related parties (Note 7(5))	182,292.00	10,000,000.00
	1,550,460,052.60	1,633,839,657.64
Less: Provision for bad debts	(36,123,330.31)	(103,753,122.44)
	1,514,336,722.29	1,530,086,535.20

(a) The ageing of accounts receivables based on their recording dates is analysed as follows:

	31 December 2022	31 December 2021
Within 1 year	1,035,851,139.14	1,267,243,247.77
1 to 2 years	443,163,740.13	316,451,163.03
2 to 3 years	58,029,434.42	45,386,814.37
3 to 4 years	8,925,929.24	4,498,449.07
4 to 5 years	4,489,809.67	259,983.40
	1,550,460,052.60	1,633,839,657.64

(b) As at 31 December 2022, the five largest accounts receivables aggregated by debtors were summarised and analysed as follows:

	Balance	Provision for bad debts	% of total balance
Total amounts of the five largest accounts receivables	622,926,534.67	(9,206,080.72)	40.18%

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Accounts receivables (Continued)

(c) Provision for bad debts

For accounts receivables, the Group recognises the lifetime ECL regardless of whether there exists a significant financing component.

- Accounts receivables for which the related provision for bad debts is provided on the individual basis are analysed as follows:
 - As at 31 December 2022, there was no accounts receivables for which the related provision for bad debts was provided on the individual basis (31 December 2021: RMB10,000,000.00).
- Provision for bad debts made on a collective basis for accounts receivables is analysed as follows:

	Book balance	31 December 2022 Provision for	· bad debts
	Amount	Lifetime ECL rates	Amount
Descinding form was a relative			
Receivables from renewable energy subsidies and tariff Receivables from waste treatment	973,524,879.54	1.54%	(14,983,476.19)
fee	576,935,173.06	3.66%	(21,139,854.12)
	1,550,460,052.60		(36,123,330.31)
		31 December 2021	
	Book balance	Provision for	bad debts
-	Amount	Lifetime ECL rates	Amount
Receivables from renewable energy			
subsidies and tariff	1,287,911,833.06	4.97%	(64,022,476.00)
Receivables from waste treatment fee	335,927,824.58	11.23%	(37,730,646.44)
	1,623,839,657.64		(101,753,122.44)

In 2022, the Group's provision for bad debts amounted to RMB23,018,839.94 (2021: nil) was reversed. Changes in provision for bad debts are set out in Note 4(16).

In 2022 and 2021, no accounts receivables were written off.

4. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Accounts receivables (Continued)

(d) As at 31 December 2022, the Group's accounts receivables with a carrying amount of RMB1,223,222,513.63 (31 December 2021: RMB1,032,888,291.47) are restricted by the Group's pledge of the concession rights and collection rights (including rights to charge for electricity or waste treatment) under relevant PPP project contracts for bank borrowings (Note 4(23)(a)).

(3) Advances to suppliers

(a) The ageing of advances to suppliers is analysed as follows:

	31 Decembe	31 December 2022		r 2021
	% of total Amount balance		Amount	% of total balance
Within 1 year	50,946,124.08	97.42%	26,417,264.13	100.00%
1 to 2 years	1,347,268.66	2.58%	_	0.00%
	52,293,392.74		26,417,264.13	

As at 31 December 2022, advances to suppliers with ageing over 1 year was mainly the prepaid royalties of emission right by Pingyang Phase II Company, a subsidiary of the Company.

(b) As at 31 December 2022, the five largest advances to suppliers aggregated by debtors were analysed as follows:

	Amount	% of total balance
Total balances of advances to the top five debtors	15,117,584.11	28.91%

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(4) Other receivables

	31 December 2022	31 December 2021
Compensation receivable for assets (i)	23,399,118.20	12,550,215.00
Receivable current accounts of former shareholders (ii)	12,961,261.85	12,961,261.85
VAT refunds receivable and other tax refunds receivable	8,253,811.53	5,584,855.58

(5) Inventories

(a) Inventories are summarised by categories as follows:

	3	31 December 2022 Provision for		3	1 December 202 Provision for	1
		decline in			decline in	
	Book	the value of	Carrying	Book	the value of	Carrying
	balance	inventories	amount	balance	inventories	amount
				· ·		
Turnover materials	50,455,726.71	-	50,455,726.71	43,491,074.67	-	43,491,074.67

As at 31 December 2022 and 31 December 2021, the Group's balance of inventories neither included capitalised borrowing costs nor was pledged as security.

As at 31 December 2022 and 31 December 2021, the Group made no provision for decline in the value of inventories.

(6) Contract assets

	31 December 2022	31 December 2021
	0.505.000.001.40	0.004.400.400.00
PPP project construction services	6,505,623,201.49	6,064,166,428.63
Contract assets generated by electricity sales contract (i)	165,728,407.23	130,141,153.83
	6,671,351,608.72	6,194,307,582.46
Less: Provision for impairment of contract assets	(86,359,256.85)	(10,486,126.37)
	6,584,992,351.87	6,183,821,456.09
Less: Contract assets included in other		
non-current assets (Note 4(15))	(6,294,426,365.72)	(5,956,188,897.73)
	290,565,986.15	227,632,558.36

- The contract assets are receivables from renewable energy subsidies in the electricity sales contract between the Group and the grid company, items of which are not included in the National Renewable Energy Subsidy Catalogue. When they are included or the Group obtains the right to receive the unconditional consideration, the contract assets will be recognised as accounts receivables.
- For contract assets, the Group recognises the lifetime ECL regardless of whether there exists a significant financing component. As at 31 December 2022 and 31 December 2021, the Group's contract assets were not overdue, and the provision for impairment was made on a collective basis.

As at 31 December 2022, contract assets for which the provision for bad debts was provided on the collective basis were analysed as follows:

	Book balance	Lifetime ECL rates	Provision for impairment
PPP project construction services Contract assets generated by electricity	6,505,623,201.49	1.31%	(85,095,313.26)
sales contract	165,728,407.23	0.76%	(1,263,943.59)
	6,671,351,608.72		(86,359,256.85)

4. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(6) Contract assets (Continued)

(ii) (Continued)

As at 31 December 2021, contract assets for which the provision for bad debts was provided on the collective basis were analysed as follows:

	Book balance	Lifetime ECL rates	Provision for impairment
PPP project construction services Contract assets generated by electricity	6,064,166,428.63	0.00%	-
sales contract	130,141,153.83	8.06%	(10,486,126.37)
	6,194,307,582.46		(10,486,126.37)

Changes in provision for impairment of contract assets are set out in Note 4(16).

(iii) As at 31 December 2022, the Group's contract assets with a carrying amount of RMB209,947,636.84 (31 December 2021: RMB84,556,379.37) were restricted by the Group's pledge of the concession rights and collection rights (including rights to charge for electricity or processing of waste) under relevant PPP project contracts for bank borrowings (Note 4(23)(a)).

(7) Current portion of non-current assets

	31 December 2022	31 December 2021
Receivables from BT projects (Note 4(8)) Less: Provision for impairment	72,934,962.63 (9,693,253.46)	56,482,689.86 (15,135,570.82)

	50,205,976.51	(586,885.54)	49,619,090.97

It is the amounts due from the Group's BT projects for construction revenue. (i)

As at 31 December 2022 and 31 December 2021, discount rates of long-term receivables of BT projects were 5.29%.

Performance bond represents the performance bond for PPP projects contracts receivable by the Group.

4. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) Long-term receivables (Continued)

(a) Long-term receivables for which provision for bad debts was made on the collective basis are analysed as follows:

	Book balance	31 December 2022 Provision for	bad debts	
	Amount	ECL rate	Amount	
Receivables from BT projects	72,934,962.63	13.29%	(9,693,253.46)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(11) Fixed assets (Continued)

- As at 31 December 2022, the fixed assets with pending certificates of ownership were as follows: (Continued)
 - The land occupied by Dongguan Company's aforementioned buildings, was owned and provided free of charge by the Chang'an Town People's Government and the Yongtou Community Residents Committee of Chang'an Town, Dongguan City. Thus, it is impossible for Dongguan Company to obtain a House Title Certificate. However, management believes that the Group can effectively use the above fixed assets, and it will not have a significant impact on its operation.

In 2022, the amortisation of intangible assets amounted to RMB388,967,175.69 (2021: RMB318,301,913.14).

As at 31 December 2022, the Group's intangible assets with a carrying amount of RMB5,326,458,140.64 (31 December 2021: RMB6,419,824,246.07) were restricted by the Group's pledge of the concession rights and collection rights (including rights to charge for electricity or processing of waste) under relevant PPP project contracts for bank borrowings (Note 4(23)(a)).

4. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(12) Intangible assets (Continued)

When conducting impairment tests on intangible assets, the Group compares the book value of relevant assets with its recoverable amount. If the recoverable amount is lower than the book value, the relevant difference is included in the current profit and loss. The recoverable amount of assets is calculated using the forecasting method of predicting the present value of future cash flows. The recoverable amount of intangible assets shall be determined as the higher of the present value of the estimated future cash flow and the fair value of the assets less the disposal expenses.

The Group determines the income growth rate and EBIT margin based on historical experience and market development forecasts. The Group adopts the pre-tax interest rate that can reflect the specific risks of related assets as the discount rate.

In 2022, the Group applies a pre-tax discount rate of 8.98% to 10.60% in its forecast of the present value of future cash flows.

(13) Goodwill

	31 December 2021	Additions for the year	31 December 2022
Goodwill – Huludao Hazardous Waste Company Less: Provision for impairment – Huludao	43,910,821.67	-	43,910,821.67
Hazardous Waste Company	_	(10,185,838.26)	(10,185,838.26)
	43,910,821.67	(10,185,838.26)	33,724,983.41

On 5 January 2018, the Group acquired 80% of interests in Huludao Hazardous Waste Company at the consideration of RMB90,000,000.00. The consideration exceeded the difference of RMB43,910,821.67 between the identified asset and liabilities at fair value of Huludao Hazardous Waste Company on a pro rata basis, and was recognised as the goodwill relating to Huludao Hazardous Waste Company. In 2022, the Group conducted an impairment test on goodwill, and made provision for impairment of goodwill in an amount of RMB10,185,838.26, which was mainly caused by the delay in the process of application for qualifications of individual business.

(24) Debentures payable (Continued)

(a) The Company publicly issued convertible debentures totalling RMB2.36 billion on 25 February 2022 under the Regulatory Permission [2022] No. 132 as issued by the CSRC. The convertible debentures have a term of six years, that is, from 25 February 2022 to 24 February 2028, with a nominal interest rate of 0.20% for the first year, and thereafter it will be gradually increased to 2.00% over the remaining years. Holders of the convertible debentures can exercise the right to convert the convertible debentures into stocks of the Company at the current conversion price during the period from the first trading day after six months following the end of the issuance of convertible debentures to the maturity date (hereinafter "the conversion period") (from 5 September 2022 to 24 February 2028). Within five trading days after the expiration of the conversion period, the Company will redeem all the convertible debentures that have not been converted at 109% of the par value of such convertible debentures (including the final instalment of interest).

During the conversion period, if the closing price of the Company's stocks is not less than 130% (inclusive) of the current conversion price for at least 15 out of 30 consecutive trading days, the Company shall have the right to redeem all or part of the outstanding convertible debentures at par value of the convertible debentures plus the current accrued interest. During the last two interest bearing years of the convertible debentures issued, where the closing price of the Company's shares is lower than 70% (excluding 70%) of the current conversion price in any 30 consecutive trading days, holders of the convertible debentures shall have the right to sell all or part of the convertible debentures back to the Company at par value plus the current accrued interest.

In addition, the Company shall have the right to redeem all or part of the outstanding convertible debentures at par value of the debentures plus the current accrued interest if the balance of the outstanding convertible debentures is less than RMB30 million.

Such convertible debentures were issued at the initial conversion price of RMB9.82 per share, which should be not less than the average trading price of the Company's stocks in the first twenty trading days before the announcement date of the prospectus (the average trading price on the trading day before adjustment shall be adjusted accordingly in case of stock price adjustment arising from ex-right and ex-dividend within such twenty trading days), and the average trading price on the previous trading day. After the issuance, the Company will adjust the conversion price accordingly in the event of bonus shares distribution, transfer to share capital, issuance of new shares (excluding share capital increased due to issuance of convertible debentures into shares), allotment of shares and distribution of cash dividends. During the duration of the convertible debentures issued, where the closing price of the Company's shares is lower than 85% of the current conversion price in at least 15 of 30 consecutive trading days, the Board of Directors of the Company shall have the right to propose a plan for conversion price reduction and submit it to the shareholders' meeting of the Company for deliberation and voting.

On 21 July 2022. due to the distribution of cash dividends for 2021, the Company adjusted the conversion price to RMB9.72.

(b) As at 31 December 2022, convertible bonds with a total par value of RMB76,000.00 have been converted into shares. As a result, the Group's share capital increased by RMB7,763.00 and the capital reserve increased by RMB69,467.08.

8. Operating and capital expenditure commitments

	31 December 2022	31 December 2021
Infrastructure construction contract contracted for and being or		
to be performed	607,003,984.03	1,549,218,839.06
Infrastructure construction contract authorised but not contracted for	339,774,612.87	818,464,825.60
	946,778,596.90	2,367,683,664.66

The above construction contracts include relevant construction expenses recognised as construction income from PPP projects.

9. Events after the balance sheet date

(1) Explanation on profit distribution

According to the resolution of the Board on 30 March 2023, the Board proposed that the Company distribute a cash dividend of RMB0.12 for every share to all shareholders based on the aggregate share capital on the share-based equity registration date. Calculated based on the approximately 1,393,450,000 issued shares of the Company as at 31 December 2022, it is proposed to distribute cash dividends of approximately RMB167,210,000. The above proposal is still subject to the approval at the general meeting and has not been recognised as liabilities in the financial statements.

10. Business combinations

Refer to Note 5(1).

11. Financial instruments and risks

The Group's activities expose it to a variety of financial risks: market risk (primarily including foreign exchange risk, interest rate risk), credit risk and liquidity risk. The above financial risks and the Group's risk management policies to mitigate the risks are as follows:

The Group aims to seek the appropriate balance between the risks and benefits from its use of financial instruments and to mitigate the adverse effects that the risks of financial instruments have on the Group's financial performance. Based on such objectives, the Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and the relevant internal control systems are reviewed regularly to reflect changes in market conditions and the Group's operating activities. The internal audit department of the Group undertakes both regular and random inspection of the internal control system for its compliance with risk management policies.

(1) Market risk

(a) Foreign exchange risk

The Group's major operational activities are carried out in Mainland China and a majority of the transactions are denominated in RMB. The Group is exposed to foreign exchange risk arising from the recognised assets and liabilities, and future business denominated in foreign currencies, primarily with respect to US dollars ("USD") and HK Dollars ("HKD"). The Group is responsible for monitoring the amount of assets and liabilities, and transactions denominated in foreign currencies, to reduce foreign exchange risk to the greatest extent.

As at 31 December 2022 and 31 December 2021, the Group's exposure to currency risk arising from recognised assets or liabilities denominated in foreign currencies was less.

(b) Interest rate risk

The Group's interest rate risk mainly arises from long-term interest-bearing borrowings including long-term borrowings and convertible debentures. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 31 December 2022, the Group's long-term interest-bearing borrowings are mainly long-term borrowings at floating rates amounting to RMB7,798,445,790.20 (31 December 2021: RMB7,653,310,473.77), long-term borrowings at fixed rates amounting to RMB1,721,452,963.16 (31 December 2021: RMB1,834,263,654.38) and convertible debentures at fixed rates amounting to RMB2,195,494,717.04 (31 December 2021: Nil).

As at 31 December 2022, if interest rates on borrowings had risen/fallen by 50 basis points while all other variables had been held constant, the Group's net profit would have been approximately RMB29,244,171.71 (31 December 2021: approximately RMB28,700,000.00) lower/higher respectively.

11. Financial instruments and risks (Continued)

(2) Credit risk

Credit risk mainly arises from cash at bank and on hand, notes receivables, accounts receivables, receivables financing, other receivables, long-term receivables, contract assets, etc. The carrying amount of the Group's financial assets reflects its maximum credit exposure on the balance sheet date.

The Group expects that there is no significant credit risk associated with cash at bank and on hand since they are deposited at state-owned banks and other medium or large size listed banks with good reputation and high credit rating. The Group does not expect that there will be any significant losses from non-performance by these banks.

In addition, the Group has policies to limit the credit exposure on notes receivables, accounts receivables, contract assets, receivables financing, other receivables and long-term receivables. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. The credit history of the customers is regularly monitored by the Group. In respect of customers with a poor credit history, the Group will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

As at 31 December 2022, the Group had no significant collateral or other credit enhancements held as a result of the debtor's mortgage (31 December 2021: Nil).

(3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department in its headquarters. The Group monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash and securities that are readily convertible to cash to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements.

11. Financial instruments and risks (Continued)

(3) Liquidity risk (Continued)

The financial liabilities of the Group at the balance sheet date are analysed by their maturity date below at their undiscounted contractual cash flows:

			31 December 2022

12. Fair value estimates

The level in which fair value measurement is categorised is determined by the level of the fair value hierarchy of the lowest level input that is significant to the entire fair value measurement:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Inputs other than quoted prices included within Level 1 that are observable for the asset or

Level 2: liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

(1) Assets and liabilities measured at fair value on a recurring basis

As at 31 December 2022 and 31 December 2021, the Group had no assets and liabilities measured at fair value except for receivables financing.

(2) Assets and liabilities not measured at fair value but for which the fair value is disclosed

As at 31 December 2022 and 31 December 2021, financial assets and financial liabilities measured at amortised cost mainly include cash at bank and on hand, notes receivables, accounts receivables, other receivables, contract assets (including contract assets included in other non-current assets), long-term receivables, short-term borrowings, notes payables, payables, lease liabilities, long-term borrowings, debentures payable and long-term payables. Their carrying amount is a reasonable approximation of their fair value.

13. Capital management

The Group's capital management policies aim to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, refund capital to shareholders, issue new shares or sell assets to reduce debts.

The Group's total capital is calculated as 'shareholders' equity' as shown in the consolidated balance sheet. The Group is not subject to external mandatory capital requirements, and monitors capital on the basis of gearing ratio.

As at 31 December 2022 and 31 December 2021, the Group's gearing ratio was as follows:

	31 December 2022	31 December 2021
Gearing ratio	66%	66%

14. Notes to the Company's financial statements

(1) Accounts receivables

	31 December 2022	31 December 2021
Accounts receivables Less: Provision for bad debts	265,762,596.46	146,776,114.44 (2,000,000.00)
	265,762,596.46	144,776,114.44

(a) The ageing of accounts receivables is analysed as follows:

	31 December 2022	31 December 2021
Within 1 year	138,356,042.41	72,098,464.44
1 to 2 years	60,553,904.05	20,876,650.00
2 to 3 years	20,876,650.00	53,801,000.00
3 to 4 years	45,976,000.00	
	265,762,596.46	146,776,114.44

(b) As at 31 December 2022, the five largest accounts receivables aggregated by debtors were summarised and analysed as follows:

		Provision for	
	Balance	bad debts	total balance
Total amounts of the five largest accounts			
receivables	208,163,350.00	-	78.33%

14. Notes to the Company's financial statements (Continued)

(1) Accounts receivables (Continued)

(c) Provision for bad debts

(i) Accounts receivables for which the related provision for bad debts is provided on the individual basis are analysed as follows:

As at 31 December 2022, there were no accounts receivables for which the related provision for bad debts was provided on the individual basis (31 December 2021: RMB10,000,000.00).

(ii) Provision for bad debts made on a collective basis for accounts receivables is analysed as follows:

	Book balance	31 December 2022 Provision for bad debts		
	Amount	Lifetime ECL rates	Amount	
Total outsourcing service fees and				
royalties receivable	265,762,596.46	0.00%
