In June 2023, the main reasons for the year-on-year increase in shipping volume and shipment turnover were that the demand of coal transportation grew, and the shipping volume of foreign trade coal increased due to new international routes; the main reasons for the year-on-year increase in gross power generation and total power output dispatch were that thermal power generation of the Company increased due to factors such as high temperature weather and poor hydropower output, the new power generator units brought the growth of power generation, and some power generator units were under maintenance leading to a relatively low base in the same period last year.

The major operational data above were calculated based on the internal statistics of the Company. Operational data may show major differences from month to month. The factors giving rise to such differences include, among others, changes in weather, equipment overhaul, seasonal factors and safety inspection. The major operational data may somewhat differ from the data disclosed in the relative periodic reports. Investors are hereby reminded of the risks which may result from inappropriate reliance upon or utilization of the information given above.
