In September 2023, the year-on-year increase in the sales volume of the coal of the Company was mainly due to the increase in commercial coal production and sales volume of the purchased coal. The year-on-year increase in the loading volume at Huanghua Port was mainly due to the increase in arrival resources as a result of the increase in coal sales.

From January to September 2023, the year-on-year increase in shipment turnover of the Company was mainly due to the increase in foreign trade cargo transportation service and the volume of long-haul transportation.

The major operational data above was calculated based on the internal statistics of the Company. Operational data may show major differences from month to month. The factors giving rise to such differences include, among others, changes in weather, equipment overhaul, seasonal factors and safety inspection. The major operational data may somewhat differ from the data disclosed in the relative periodic reports. Investors are hereby reminded of the risks that may result from inappropriate reliance upon or utilization of the information given above.
