**VOLUNTARY ANNOUNCEMENT**  
**PATIENT ENROLLMENT COMPLETED IN THE PHASE III**  
**CLINICAL TRIAL OF OT-502 IN CHINA**

This announcement is made by Ocumention Therapeutics (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to keep the shareholders of the Company and potential investors informed of the latest business updates of the Group.

The board (the “**Board**”) of directors of the Company is pleased to announce that OT-502 (dexamethasone implant), a new drug for the treatment of postoperative inflammation indication, has completed the enrollment of a total of 300 patients for the phase III clinical trial in China on November 29, 2023.

OT-502 (dexamethasone implant) is a single-dose, sustained-release solution of dexamethasone, a corticosteroid, for the treatment of postoperative inflammation. To date, OT-502 is the first and only single-dose, sustained-release intracameral steroid for the treatment of postoperative inflammation that was approved by the United States Food and Drug Administration. The Group is developing OT-502 as a potential first-in-class treatment for postoperative inflammation associated with cataract surgery in China. The phase III clinical trial of OT-502 is designed to be a randomized, double-masked, placebo-controlled, parallel-group, multi-center clinical and pharmacokinetic study to evaluate the efficacy and safety of 9% dexamethasone implant in the treatment of post-cataract surgery inflammation.

**Cautionary Statement:** The Company cannot guarantee that it will ultimately commercialize OT-502 (dexamethasone implant) successfully. Shareholders of the Company and potential investors are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
