Shanghai Fosun Pharmaceutical (Group) Co., Ltd.* Announcement in Relation to the Approval of Drug Clinical Trial of a Subsidiary

The board of directors of the Company and all directors warrant that this announcement does not contain any false information, misleading statement or material omission, and accept legal liability for the truthfulness, accuracy and completeness of the contents herein contained.

I. Overview

Shanghai Fosun Pharmaceutical Industry Development Co., Ltd.* (上海復星醫藥產業發展有限公司) ("Fosun Pharmaceutical Industry"), a subsidiary of Shanghai Fosun Pharmaceutical (Group) Co., Ltd.* (上海復星醫藥（集團）股份有限公司) (the "Company" and, together with its subsidiaries/units, the "Group" , the same applies below), recently received the approval from the National Medical Products Administration of the People's Republic of China for clinical trial of FCN-338 tablets (the "Investigational New Drug") in combination with dexamethasone for the treatment of systemic light chain amyloidosis. Fosun Pharmaceutical Industry intends to commence the Phase II clinical trial of the Investigational New Drug in China (excluding Hong Kong, Macau and Taiwan regions for the purpose of this announcement, the same applies below) when the conditions are fulfilled.

II. Basic Information and Research Progress of the Investigational New Drug

The Investigational New Drug is a Bcl-2 selective small molecule inhibitor independently developed by the Group, which is intended to be used for the treatment of hematological malignancies. As at the date of this announcement, the Phase I clinical trials of the Investigational New Drug are conducted in China and the United States, respectively, for the treatment of hematological malignancies and relapsed or refractory B-cell lymphoma; and the Phase II clinical trial of the Investigational New Drug in combination with azacitidine or chemotherapy for the treatment of myeloid blood malignancies is

conducted in China.

As of December 2023, the Group has invested approximately RMB174.31 million (unaudited) in total in the research and development (the "**R&D**") of the Investigational New Drug at current stage.

As at the date of this announcement, small molecule inhibitor targeting Bcl-2 that has been approved for marketing worldwide include venetoclax tablets (trade name in China: WEIKELAI (唯可来®)) from AbbVie Inc. According to the latest information from IQVIA MIDAS™[1], the sales of small molecule inhibitor targeting Bcl-2 amounted to approximately US$2,030 million worldwide in 2022.

III. Risk Warning

As required by the relevant laws and regulations in China, the Investigational New Drug is subject to undergo a series of clinical studies and be approved by the national drug review authority before it can be marketed. There are certain risks in the R&D of new drugs based on our experience. For example, clinical trials may be terminated due to issues such as safety and/or efficacy.

The R&D and launch of new drugs is a long-term task involving many uncertainties. Investors should take note of the investment risks.

Announcement is hereby made.

Board of Directors of Shanghai Fosun Pharmaceutical (Group) Co., Ltd.*
