Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands. The principal place of business is located at Unit B, 17/F., United Centre, 95 Queensway, Admiralty, Hong Kong.

The Company is an investment holding company. During the year, the Company's subsidiaries were involved in the following principal activities:

- Pre-delivery and consulting services
- Property engineering services

The ultimate holding company of the Company is Xinyuan Real Estate Co., Ltd. (the "**Ultimate Holding Company**"), a company established in the Cayman Islands and its shares are listed on the New York Stock Exchange.

Suspension of trading of shares of the Company

Since 16 November 2022, the trading of the Company's shares on the Stock Exchange was suspended. According to the announcement dated 15 November 2022, the directors of the Company discovered certain bank balances of the Group were pledged (the "**Pledges**") to secure loan facilities of Xinyuan (China) Real Estate Co., Ltd.* (鑫苑(中國)置業有限公司) ("**Xinyuan (China)**"), a subsidiary of the Ultimate Holding Company, and certain companies which are not part of the Group (the "**Incident Transaction I**"). The Incident Transactions I involved four bank time deposits ("**Time Deposits**") which were pledged as at 31 December 2021 and 2022 of approximately RMB267,330,000 and RMB135,050,000 respectively.

On 18 November 2022, the Company announced the formation of an independent investigation committee (the "**IIC**") comprising of two executive directors, namely Mr. Shen Yuan-Ching and Mr. Wang Yong, and all independent non-executive directors of the Company.

Investigation

Deloitte Consulting (Hong Kong) Limited ("**Deloitte Consulting**") was appointed on 10 January 2023 by the IIC as an independent forensic investigation advisor to conduct the investigation ("**Investigation**") and an independent internal control reviewer on the internal control review ("**Internal Control Review**") to meet its resumption requirements from the Stock Exchange.

The Investigation found that the Incident Transaction I were made without the knowledge or consent of current executive directors of the Company. Based on the written confirmation by Xinyuan (China), the Pledges were entered into by the Group with Zhengzhou Yusheng Garden Design Company Limited (a subsidiary of the Ultimate Holding Company of the Company), and it's two business partners (collectively, the "**Borrowers I**"). As the bank loans were not repaid upon their respective maturity dates of during and subsequent to the year ended 31 December 2022, so that the Group's bank deposits have been enforced by the relevant banks under the unauthorised financial guarantee arrangements.

Except for the deposits relating to Incident Transaction I, twenty-eight deposits were historic in nature (having taken place in the period from late September 2019 to August 2022) and have matured before 31 December 2022, Out of these, twenty deposits were pledged ("**Additional Pledges**") and were not subject to any appropriation and enforcement by the relevant banks. In other words, total twenty-eight of the thirty-two deposits identified were safely returned to the Company and its relevant subsidiaries before 31 December 2022.

The execution of the Additional Pledges ("**Incident Transaction II**") involved certain former employees and directors of the Group and former employees of Xinyuan (China) and third parties outside the Group (collectively, the "**Involved Parties**"). The arrangements were made without the knowledge or consent of current executive directors. Up to the date of this announcement, all the Additional Pledges had matured and have not been enforced by the banks.

During the course of the preparation of the consolidated financial statements of the Company for the year ended 31 December 2022, the board of directors considered the relevant information and supporting evidence available and used their best effort to estimate the relevant financial impact of the matters identified in the Investigation. The consequential effect, as disclosed in "Financial impact of the Incident Transaction I and Incident Transaction II" following the Investigation, was reflected in the consolidated statement of financial position as at 31 December 2022 and the consolidation profit or loss and cash flow for the year then ended.

Financial impact of the Incident Transactions I and Incident Transaction II

The Time Deposits under Incident Transaction I of approximately RMB267,330,000 as at 31 December 2021 were included in the published consolidated statement of financial position as at 31 December 2021, as "Time deposits". No adjustment or additional disclosures were made to the relevant comparative figures of the year.

The enforcement of the Time Deposits under Incident Transaction I by the banks in November 2022 and subsequent to the year ended 31 December 2022 resulting in the "Loss on Pledges" of approximately RMB398,847,000 was recorded under "Loss related to Pledges" (Note 6) in the profit or loss for the year ended 31 December 2022.

Meanwhile, Xinyuan (China) has confirmed the use of banking facilities related to Incident Transaction I for its own operation and committed to compensate the Group with their assets, including but not limited to cash, at their written response to the Company on 30 November 2022. The directors of the Company, taking into consideration of this written response, recognised the "recovery from the loss on the Pledges" under "Loss related to Pledges" (Note 6) in the profit or loss and "Other receivables – receivables related to Pledges" (Note 9) accordingly.

At 31 December 2022, the provision for impairment on such balances amounting to approximately RMB200,565,000 was made under "Loss related to Pledges" (Note 6).

2.1 BASIS OF PREPARATION

The interim condensed consolidated financial statements for the six months ended 30 June 2023 has been prepared in accordance with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange, and the International Accounting Standard ("**IAS**") 34 Interim Financial Reporting, issued by the International Accounting Standards Board ("**IASB**").

The preparation of the interim condensed consolidated financial statements in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates. The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those described in the annual financial statements for the year ended 31 December 2022.

The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Group's annual consolidated financial statements for the year ended 31 December 2022 which have been prepared in accordance with International Financial Reporting Standards ("**IFRSs**") issued by IASB, and any public announcements made by the Company during the interim reporting period.

The interim condensed consolidated financial statements have been prepared on historical cost basis except for certain financial instruments which are measured at fair values. As the Group mainly operates in the People's Republic of China (the "**PRC**"), Renminbi ("**RMB**") is used as the presentation currency of the interim condensed consolidated financial information and all values are rounded to the nearest thousand *(RMB'000)* except when otherwise indicated.

2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies and method of computation adopted in the preparation of these interim condensed consolidated financial statements were consistent with those adopted in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2022 other than changes in accounting policies resulting from adoption of the new or amendments to IFRSs for the first time for the current period's financial information.

IFRS17	Insurance Contracts
Amendments to IAS 1, Presentation of financial statements and IFRS Practice Statement 2	Making materiality judgements: disclosure of accounting policies
Amendments to IAS 8	Accounting policies, changes in accounting estimates and errors – Definitions of Accounting Estimates
Amendments to IAS 12	Income Taxes – Deferred Tax related Assets and Liabilities arising from a single Transaction
Amendments to IAS 12	International tax reform – Pillar Two Model Rules

The adoption of these new or amendments to IFRSs has had no significant financial effect on the Group's interim condensed consolidated financial statements and/or the disclosures set out in condensed consolidated financial statements.

2.3 ISSUED BUT NOT YET EFFECTIVE IFRSs

Except for the above, the Group has not adopted any other new or amendments to IFRSs which are issued but not yet effective for the current interim period. The Group is in the process of making an assessment of what the impact of these developments is expected to be in the period of initial adoption. So far the directors of the Company have concluded that the adoption of them is unlikely to have a significant financial effect on the interim condensed consolidated financial statements.

3. OPERATING SEGMENT INFORMATION

Management has determined the operating segments based on the reports reviewed by the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segment, has been identified as the chief executive of the Company.

During the period, the Group is principally engaged in the provision of property management services, value-added services and pre-delivery and consulting services to customers in the PRC. Management reviews the operating results of the business as one segment to make decisions about resources to be allocated. Therefore, the chief operating decision maker of the Company regards that there is only one segment which is used to make strategic decisions.

The major operating entities of the Group are domiciled in the PRC. Accordingly, all of the Group's revenue was derived in the PRC during the periods. As at 30 June 2023, all of the non-current assets were located in the PRC.

4. REVENUE

Revenue mainly represents consideration to which the Group expects to be entitled for the property management services, value-added services, pre-delivery and consulting services and property engineering services rendered to customers, net of value added tax and surcharges, and allowances for discounts. An analysis of the Group's revenue by category is as follows:

Performance obligations

For property management services, pre-delivery and consulting services and property engineering services, the Group recognises revenue in the amount that equals to the right to invoice which corresponds directly with the value to the customer of the Group's performance to date.

The majority of the property management service contracts do not have a fixed term. The terms of the contracts for pre-delivery and consulting services (except for construction services) are generally set to expire when the counterparties notify the Group that the services are no longer required.

The Group has elected the practical expedient in paragraph 121 of IFRS 15 for the value-added services and property engineering services contracts that regarding the performance obligation that has an original expected duration of one year or less, the Group does not make disclosure in accordance with paragraph 120 of IFRS 15, that is the aggregate amount of the transaction price allocated to the performance obligations that are unsatisfied (or partially unsatisfied) as of the end of the reporting period and an explanation of when the Group expects to recognise as revenue.

During the first half of 2023, the Group implemented a comprehensive upgrade of strategy and organisation. We devoted efforts to focus on driving growth through three lines of management services, scenario services and scenario technology.

In terms of management services, the focus during the first half of the year was on quality of basic business development of property services. The Group implemented stringent risk control over projects, optimised business type structure, maintained deep cultivation in focus regions, and strengthened our position of projects across regions and business types. For the first half of 2023, the Group's contracted GFA increased by 2.56 million sq.m., and GFA under management increased by 1.36 million sq.m. Our work on scenario services was to build on traditional community value-added businesses such as spatial resource management, lifestyle services and asset operations, and focus on the development of high-frequency, robust-demand businesses spanning the entire term of ownership and all lifestyle scenarios of the community, thereby creating a new operating model with a gradual transformation from being driven by traditional businesses to being data-driven in order to drive business growth. New models developed by the Group include 車位寶 for asset operations and 純多億 distilled water delivery business for lifestyle services, together forming a 千萬寶貝 project focused on offering services right to the doorstep. The development of such models facilitates the change from traditional operating models to becoming data-driven, and creates a strong foundation for the rapid growth of various businesses.

In terms of scenario technology, the Group is working on empowering internal operations, and at the same time, devoting efforts to develop external output and industrial service capabilities. Internally, the Group further optimised our HR system infrastructure with a systematic risk alert mechanism to mitigate human resource management risks, and upgraded our property management ERP system by upgrading underlying architecture to achieve integration of different systems, improve operational speed and maintain system stability. Externally, the Group developed broad-spectrum products and services including real estate ERP, real estate marketing, real estate digitalisation services and smart elderly care services, as well as the IoT platform 雲燕 for smart community services. We completed upgrading and remodeling of both software and hardware in 84 of our car parks, and conducted a comprehensive upgrade of our 鑫物雲 management platform to establish a systematic smart IoT system. Meanwhile, the Group developed an innovative zero-code community metaverse platform, which provides small and medium-sized property enterprises and government community administration with metaverse technology support for community management.

In the first half of 2023, the Group completed an organisational upgrade from a singular centralised management model to a multi-centred self-driven model with the establishment of three major business divisions of property management, diversified businesses and technology and four major functional systems to better support the Group in our drive for growth through three lines of management services, scenario services and scenario technology.

In the first half of 2023, the Group remained driven by party-building and continued to optimise the red property construction model with a focus building together, managing together and sharing together. The Group devoted efforts to create a party-building brand 鑫火 based on six major red heartwarming projects to strengthen cohesion, unity and dedication among everyone involved in community governance. Despite facing strong downward pressure on community value-added services due to the general market environment, the Group developed innovative business models to strengthen the foundation for future development, including 純多億 which supplies purified water and facilitates a transformation from resource tendering to joint or self operations and 車位寶 which enables effective interaction between sales of car park spaces, stock and rental. PROSPECTS

The Group is committed to offering a pleasant lifestyle as a metaverse-augmented service provider within the larger property management sector. In developing our businesses, we will continue to focus on the larger property management sector. Data driven operations will enable deep integration of technology and business, while the use of digital twins will allow the creation of new scenarios for digitally empowered properties. We will continue to focus on growth and upgrade through three lines of management services, scenario services and scenario technology, enhance features that we have developed, in order to achieve sustained growth in both operation efficiency and business scale.

I. Management services

Our management services are grounded in scalability. In terms of property services, we aim to extend from residential types to non-residential types and urban services, gradually expanding from property services to commercial management and asset management services, thus systematically building a comprehensive property management service system.

In terms of basic services, we will focus on the real needs of our customers to strengthen services as our foundation. We will continue to improve service experience and strengthen service and brand recognition. At the same time, we will enrich and expand our service offerings, optimise service standards across a broad spectrum of business types and sectors, strengthen and refine management and service capabilities, in order to improve operational and management efficiency.

Regarding scalability and expansion capabilities, we will optimise our expansion model and strengthen our expansion team. Building on our existing comprehensive engagement expansion model, we will innovate a wide range of cooperations, expanding from new projects to stock management, from residential types to non-residential types, and from partnerships with developers to cooperations for urban redevelopment, state-owned enterprise stock management, public institution projects and industrial parks. By expanding our cooperative channels, we will be able to develop a multi-engine driven model of expansion.

II. Scenario services

For scenario services, we will progressively build a community services ecosystem. Our focus will be on empowerment based on community lifestyle services scenarios. We will develop a comprehensive strategy to offer a vertical chain of community services based on three aspects of “assets + space + people”. The transformation from being driven by traditional business models to being data-driven, particularly for lifestyle services, will facilitate a transformation from the classical “customers searching for products they need” to “products being offered to customers who need them”.

In terms of asset management, our focus will be on managing stock assets and destocking capabilities. We will innovate business models to consolidate internal and external resources to allow assets to maintain their premium and realise their value.

In terms of space management, we will leverage digital technology empowerment to strengthen spatial asset revitalisation, consolidation and utilisation efficiency. Further, we will continue to build on traditional space management and innovate business models, so as to raise resource utilisation efficiency.

In terms of services for people, we will focus on the demand for community services spanning the entire term of ownership to offer private customised services targeted at different customer groups. We will focus on areas such as community elderly care, household services, lifestyle services, retail, dining, and vehicle charging with a goal to establish an ecosystem of community services.

III. Scenario technology

We will expand from internal empowerment to external empowerment as we look to explore a new tech + larger property management business integration model. As we conduct empowerment of internal businesses, we will rapidly build our industry empowerment capabilities and transition from an internal solution provider to an industry solution provider.

Building on the traditional task of cost reduction and efficiency improvement, we will focus on combining specific community scenarios with technology and leveraging technology empowerment to desensitise and refine complex data for analysis to uncover new demand and scenarios. Further, technology empowerment will enable us to satisfy the diverse demands of owners and enhance both basic services and community lifestyle services.

In the process of conducting empowerment, we will also develop our own unique approach to industrial development. We will develop a comprehensive business strategy focusing on a broad spectrum of real estate products, a metaverse for the community services industry, IoT equipment, urban services and industrial services. As we consolidate our own resources and capabilities, we will also actively collaborate with leading companies in segmented fields to expand into new business markets together.
