ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF PALASINO HOLDINGS LIMITED AND GUOTAI JUNAN CAPITAL LIMITED

Introduction

We report on the historical financial information of Palasino Holdings Limited (the "**Company**") and its subsidiaries (together, the "**Group**") set out on pages I-4 to I-67, which comprise the combined statements of financial position of the Group as at 31 March 2021, 2022, 2023 and 30 September 2023, the statement of financial position of the Company as at 30 September 2023, the combined statements of profit or loss and other comprehensive income, the combined statements of changes in equity and the combined statements of cash flows of the Group for each of the three years ended 31 March 2023 and six months ended 30 September 2023 (the "**Track Record Period**") and material accounting policy information and other explanatory information (together, the "**Historical Financial Information**"). The Historical Financial Information set out on pages I-4 to I-67 forms an integral part of this report, which has been prepared for inclusion in the document of the Company dated 18 March 2024 (the "**Document**") in connection with the initial [REDACTED] of shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the "**Stock Exchange**").

Directors' responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation and presentation set out in note 1 to the Historical Financial Information, and for such internal control as the directors of the Company determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 "Accountants' Reports on Historical Financial Information in Investment Circulars" issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

APPENDIX I

ACCOUNTANTS' REPORT

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation and presentation set out in note 1 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors of the Company, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the Group's financial position as at 31 March 2021, 2022, 2023 and 30 September 2023, of the Company's financial position as at 30 September 2023 and of the Group's financial performance and cash flows for the Track Record Period in accordance with the basis of preparation and presentation set out in note 1 to the Historical Financial Information.

Review of stub period comparative financial information

We have reviewed the stub period comparative financial information of the Group which comprises the combined statement of profit or loss and other comprehensive income, the combined statement of changes in equity and the combined statement of cash flows for the six months ended 30 September 2022 and other explanatory information (the "**Stub Period Comparative Financial Information**"). The directors of the Company are responsible for the preparation and presentation of the Stub Period Comparative Financial Information in accordance with the basis of preparation and presentation set out in note 1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Stub Period Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Stub Period Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation and presentation set out in note 1 to the Historical Financial Information.

APPENDIX I

ACCOUNTANTS' REPORT

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

The Historical Financial Information is stated after making such adjustments to the Underlying Financial Statements as defined on page I-4 as were considered necessary.

Dividends

We refer to note 12 to the Historical Financial Information which contains information about dividend declared or paid by group entities comprising the Group in respect of the Track Record Period and states that no dividend has been declared or paid by the Company since its incorporation.

No historical financial statements for the Company

No financial statements have been prepared for the Company since its date of incorporation.

HISTORICAL FINANCIAL INFORMATION OF THE GROUP

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The Historical Financial Information in this report was prepared based on the consolidated financial statements of Palasino Group, a.s. (formerly known as Trans World Hotels & Entertainment, a.s.) ("**Palasino Group**") and its subsidiaries for the Track Record Period, the management account of the Company from 6 July 2023 (date of incorporation) to 30 September 2023 and the management account of Palasino (BVI) Limited ("**Palasino BVI**") from 25 July 2023 (date of incorporation) to 30 September 2023 (together, the "**Underlying Financial Statements**"). The consolidated financial statements of Palasino Group have been prepared in accordance with Hong Kong Financial Reporting Standards ("**HKFRSs**") issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**") and were audited by us in accordance with Hong Kong Standards on Auditing issued by the HKICPA.

The Historical Financial Information is presented in Hong Kong dollars ("**HK\$**") and all values are rounded to the nearest thousand (HK\$'000) except when otherwise indicated.

Notes:

- On 1 April 2020, the then holding companies of Palasino Group amalgamated with Palasino Group and they ceased to exist as separate entities after completion of the amalgamation ("Amalgamation"). Palasino Group became the surviving amalgamated company with HK\$77,981,000 recognised as a deemed distribution for net liabilities assumed from the holding companies.
- Pursuant to the Reorganisation as defined and set out in Note 1, 10% equity interest of Turbo Century Limited ("Turbo"), a company indirectly owned by Far East Consortium International Limited ("FEC") and indirectly owned 100% equity interest of Palasino Group, is acquired by Dateplum Harvest Limited ("Dateplum"), an independent third party, on 20 March 2023. Dateplum is accounted as the non-controlling interests of the Company and accordingly, 10% of net assets of the Group is attributable to non-controlling interests since 20 March 2023.
- The amount represents the portion of [REDACTED] and issue costs in excess of those relating to sales of shares by FEC, which is treated as deemed contribution.

NOTES TO THE HISTORICAL FINANCIAL INFORMATION OF PALASINO HOLDINGS LIMITED

1. GENERAL, GROUP REORGANISATION AND BASIS OF PREPARATION AND PRESENTATION OF HISTORICAL FINANCIAL INFORMATION

The Company was incorporated and registered as an exempted company with limited liability in the Cayman Islands under the Companies Act (As Revised) of the Cayman Islands on 6 July 2023. The addresses of the Company's registered office and the principal place of business are disclosed in the paragraph headed "Corporate Information" to the Document. The ultimate controlling shareholder of the Company is Tan Sri Dato' David CHIU, who controls the Company through the investment holding company incorporated in the Cayman Islands, namely FEC, which shares are listed on the Stock Exchange.

The Company acts as an investment holding company and the operating subsidiaries, as disclosed in Note 35, are principally engaged in the hospitality and gaming business in Germany, Austria and the Czech Republic (the "**Business**").

The Company's functional currency is Czech Koruna ("**CZK**"). The combined financial statements are presented in Hong Kong dollars ("**HK\$**") as the directors of the Company consider that the Hong Kong dollar is the most appropriate presentation currency in view of the Company's place of proposed [REDACTED].

The Historical Financial Information has been prepared based on the accounting policies which conform with HKFRSs issued by the HKICPA.

Prior to incorporation of the Company and the completion of the reorganisation as described below (the "**Reorganisation**"), the Business was mainly carried out by Palasino Group, a limited liability company incorporated in the Czech Republic and its subsidiaries (the "**Operating Entities**").

In preparation of the [REDACTED] of the Company's shares on the Stock Exchange (the "[REDACTED]"), the companies comprising the Group underwent Reorganisation to incorporate the Company as the holding Company of the companies which now comprise the Group to conduct the Business as described below.

- (a) On 6 July 2023, the Company was incorporated under the laws of the Cayman Islands as an exempted company with limited liability. Upon incorporation, one share was allotted and issued to the initial subscriber, who transferred the one share to Ample Bonus Limited ("**Ample**"), a company directly wholly-owned by FEC. Upon completion of such allotment, the Company was wholly-owned by Ample.
- (b) On 25 July 2023, Palasino BVI was incorporated in the British Virgin Islands (the "**BVI**") with limited liability and one share was allotted and issued as fully paid to the Company on 27 July 2023.
- (c) On 18 December 2023, Palasino (Cayman) Limited ("**Cayman Holdco**") was incorporated in the Cayman Islands with limited liability and one share was allotted and issued as fully paid to the initial subscriber, who transferred the one share to the Company on the same date.
- (d) On 22 January 2024, the entire equity interest of Trans World Hotels Germany GmbH ("**Trans World Germany**") was transferred to the Company by Palasino Group in consideration of EURO ("**EUR**")11,869,000 (equivalent to approximately HK\$101,480,000).
- (e) On 2 February 2024, FEC Overseas Investment (UK) Limited ("**FEC UK**") and Cayman Holdco entered into a share contribution agreement whereby FEC UK contributes 100% of the equity interest in Palasino Group for 99 newly issued shares in Cayman Holdco, representing 99% of Cayman Holdco's issued shares upon completion of the allotment and issuance of shares (the "**Share Contribution**"). Upon completion of the Share Contribution, Palasino Group was wholly-owned by Cayman Holdco.
- (f) On 21 February 2024, the 99% shareholding interest in Cayman Holdco held by FEC UK was transferred to Ample by FEC UK in consideration of approximately United States dollars ("**USD**") 42,000,000 (equivalent to approximately HK\$327,600,000). Upon completion of the share transfer, Cayman Holdco was owned as to 99% by Ample and 1% by the Company.

APPENDIX I

ACCOUNTANTS' REPORT

- (g) On 21 February 2024, the 10% shareholding interest in Cayman Holdco held by Ample was transferred to Dateplum, an independent party not connected to FEC, by Ample in consideration of Dateplum transferring the 10% shareholding interest in Turbo held by Dateplum to Ample. Upon completion of the share transfers, Cayman Holdco was owned as to 89% by Ample, 1% by the Company and 10% by Dateplum.
- (h) On 1 March 2024, the 89% shareholding interest in Cayman Holdco held by Ample was transferred to the Company by Ample, in consideration of the Company issuing 89 Shares to Ample, representing 89% of the Company's total share capital upon completion of the allotment and issuance of shares. On the same day, the 10% shareholding interest in Cayman Holdco held by Dateplum was transferred to the Company by Dateplum, in consideration of the Company issuing 10 Shares to Dateplum, representing 10% of the Company's total share capital upon completion of the allotment and issuance of shares. After such issuances, the Company was owned as to 90% by Ample and 10% by Dateplum.

Except for step (d) which constituted an internal reorganisation within the Group, upon the completion of the above steps, the Company became the holding company of the companies now comprising the Group. The Group comprising the Company and its subsidiaries resulting from the Reorganisation have always been under the control of Ample and is regarded as a continuing entity. Accordingly, the combined statements of profit or loss and other comprehensive income, combined statements of changes in equity and combined statements of cash flows for the years ended 31 March 2021, 31 March 2022 and 31 March 2023 and six months ended 30 September 2023 have been prepared to include the results, changes in equity and cash flows of the companies now comprising the Group as if the group structure upon the completion of the Reorganisation (except for the non-controlling interest held by Dateplum) had been in existence throughout the years ended 31 March 2021, 31 March 2022 and 31 March 2023 and six months ended 30 September 2023, or since their respective dates of incorporation where this is a shorter period.

The combined statements of financial position as at 31 March 2021, 2022, 2023 and 30 September 2023 have been prepared to present the carrying amounts of the assets and liabilities of the companies now comprising the Group as if the group structure upon the completion of the Reorganisation (except for the non-controlling interest held by Dateplum) had been in existence at those dates taking into account the respective dates of the incorporation, where applicable.

No statutory financial statements of the Company have been prepared since its date of incorporation as it is incorporated in the jurisdiction where there are no statutory audit requirements.

2. APPLICATION OF HKFRSs

For the purpose of preparing and presenting the Historical Financial Information for the Track Record Period, the Group has consistently applied the accounting policies which conform with HKFRSs issued by the HKICPA that are effective for the Group's financial year beginning 1 April 2023 and throughout the Track Record Period.

The Group has not early applied the following amendments to HKFRSs in issue which are not yet effective.

Amendments to HKFRS 10 and HKAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture ¹
Amendments to HKFRS 16	Lease Liability in a Sale and Leaseback ²
Amendments to HKAS 1	Classification of Liabilities as Current or Non-current and related amendments to Hong Kong Interpretation 5 (2020) ²
Amendments to HKAS 1	Non-current Liabilities with Covenants ²
Amendments to HKAS 7 and HKFRS 7	Supplier Finance Arrangements ²
Amendments to HKAS 21	Lack of Exchangeability ³

¹ Effective for the Group's annual periods beginning on or after a date to be determined

² Effective for the Group's annual periods beginning on or after 1 April 2024

³ Effective for the Group's annual periods beginning on or after 1 April 2025

The management of the Group anticipate that the application of all amendments to HKFRSs will have no material impact on the Group's financial position and financial performance in the foreseeable future.

APPENDIX I

ACCOUNTANTS' REPORT

3. MATERIAL ACCOUNTING POLICY INFORMATION

The Historical Financial Information has been prepared on the historical cost basis except for certain financial instruments that are measured at fair value at the end of each reporting period (as explained in the accounting policies below) and in accordance with the following accounting policies which conform with HKFRSs issued by the HKICPA. In addition, the Historical Financial Information includes the applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in this Historical Financial Information is determined on such a basis, except for leasing transactions that are within the scope of HKFRS 16 "Leases", and measurements that have some similarities to fair value but are not fair value, such as value in use in HKAS 36 "Impairment of assets".

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies adopted are set out below.

Basis of consolidation

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

Changes in the Group's interests in existing subsidiaries

Changes in the Group's interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's relevant components of equity and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries, including re-attribution of relevant reserves between the Group and the non-controlling interests according to the Group's and the non-controlling interests' proportionate interests.

Any difference between the amount by which the non-controlling interests are adjusted, and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

Revenue from contracts with customers

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

APPENDIX I

ACCOUNTANTS' REPORT

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred overtime and revenue is recognised overtime by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

A receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

Contracts with multiple performance obligations (including allocation of transaction price)

For contracts that contain more than one performance obligations including obligation to provide goods or services to patrons on complementary basis and patron's options to acquire additional goods or services for free or at a discount in future granted under customer relationship programs, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

The stand-alone selling price of the distinct good or service underlying each performance obligation is determined at contract inception. It represents the price at which the Group would sell a promised good or service separately to a customer. If a stand-alone selling price is not directly observable, the Group estimates it using appropriate techniques such that the transaction price ultimately allocated to any performance obligation reflects the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods or services to the customer.

Revenue recognition

The Group's revenue contracts with customers consist of gaming, hotel rooms, food and beverage and other transactions.

Gaming revenue is the aggregate net difference between gaming wins and losses. The Group accounts for gaming revenue on a portfolio basis given the similar characteristics of wagers by recognising net win per gaming day.

For gaming operations that the Group provides award points to customers under loyalty programs, the Group allocates a portion of the gaming revenue to the loyalty programs liabilities based on its relative stand-alone selling price of such award points (less estimated breakage). Such allocated amount is deferred revenue and recognised as loyalty programs liabilities until customers redeem the award points for free goods and services. Upon redemption, the deferred consideration of each good and service is allocated to the respective type of revenue.

The transaction price of hotel rooms, food and beverage, and other transactions is the net amount collected from the customer for such goods and services. The transaction price for such transactions is recorded as revenue when the good or service is transferred or rendered to the customer during their stay at the hotel or when the delivery is made for the food and beverage and other services.

Foreign currencies

In preparing the financial statements of the each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recognised at the rates of exchanges

APPENDIX I

ACCOUNTANTS' REPORT

prevailing on the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. When a fair value gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is also recognised in profit or loss. When a fair value gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is also recognised in other comprehensive income.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purposes of presenting the combined financial statements, the assets and liabilities of the Group's operations are translated into the presentation currency of the Group (i.e. HK\$) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of foreign exchange reserve (attributed to non-controlling interests as appropriate).

Exchange differences relating to the retranslation of the Group's net assets in CZK to the Group's presentation currency (i.e. HK\$) are recognised directly in other comprehensive income and accumulated in foreign exchange reserve. Such exchange differences accumulated in the foreign exchange reserve are not reclassified to profit or loss subsequently.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the combined statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants related to income that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable. Such grants are represented under "other income".

Short-term employee benefits

Short-term employee benefits are recognised at the undiscounted amount of the benefits expected to be paid as and when employees rendered the services. All short-term employee benefits are recognised as an expense unless another HKFRS requires or permits the inclusion of the benefit in the cost of an asset.

A liability is recognised for benefits accruing to employees (such as wages and salaries and annual leave) after deducting any amount already paid.

Cash and cash equivalents

Cash and cash equivalents presented on the combined statements of financial position include cash, which comprises of cash on hand and demand deposits.

APPENDIX I

ACCOUNTANTS' REPORT

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year/period. Taxable profit differs from 'profit before taxation' as reported in the combined statements of profit or loss and other comprehensive income because of income or expense that are taxable or deductible in other years/periods and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of each reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit and at the time of the transaction does not give rise to equal taxable and deductible temporary difference.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies HKAS 12 requirements to the lease liabilities and the related assets separately. The Group recognises a deferred tax asset related to lease liabilities to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised and a deferred tax liability for all taxable temporary differences.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of each reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of each reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied to the same taxable entity by the same taxation authority.

Current and deferred tax are recognised in profit or loss.

Property and equipment

Property and equipment are tangible assets that are held for use in the production or supply of goods or services, or for administrative purposes (other than freehold lands as described below). Property and equipment are stated in the combined statements of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

Freehold lands are not depreciated and are measured at cost less subsequent accumulated impairment losses.

APPENDIX I

ACCOUNTANTS' REPORT

When the Group makes payments for ownership interests of properties which includes both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition. To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land is presented as "right-of-use assets" in the combined statements of financial position. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold land, the entire properties are classified as property and equipment.

Depreciation is recognised so as to write off the cost of assets less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for a prospective basis.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Intangible asset

Intangible asset not yet available for use with finite useful life that is acquired separately is carried at cost less any accumulated impairment losses. Amortisation for intangible asset with finite useful life commences when the asset is available for use and is recognised on a straight line basis over its estimated useful life. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains and losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Leases

Definition of a lease

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group assesses whether a contract is or contains a lease at inception, modification date or business acquisition date. Such contract will not be reassessed unless the terms and conditions of the contract are subsequently changed.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to leases of gaming equipment that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the recognition exemption for lease of low-value assets. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis or another systematic basis over the lease term.

The Group as lessee

Right-of-use assets

The Group recognises right-of-use asset at the commencement date of the lease (i.e. the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

The cost of right-of-use asset includes:

- the amount of the initial measurement of the lease liability;

APPENDIX I

ACCOUNTANTS' REPORT

- any lease payments made at or before the commencement date, less any lease incentives received; and
- any initial direct costs incurred by the Group.

The Group presents right-of-use assets as a separate line item on the combined statements of financial position.

Refundable rental deposits

Refundable rental deposits paid are accounted under HKFRS 9 and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease liabilities

At the commencement date of a lease, the Group recognises and measures the lease liability at the present value of lease payments that are unpaid at that date. In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable.

The lease payments include:

- fixed payments (including in-substance fixed payments) less any lease incentives receivable; and
- variable lease payments that depend on an index or a rate.

After the commencement date, lease liabilities are adjusted by interest accretion and lease payments.

The Group remeasures lease liabilities (and makes a corresponding adjustment to the related right-of-use assets) whenever the lease payments change due to changes in an index or a rate, in which case the related lease liability is remeasured by discounting the revised lease payments using the initial discount rate.

The Group presents lease liabilities as a separate line item on the combined statements of financial position.

Impairment losses on property and equipment, intangible assets and right-of-use assets

At the end of each reporting period, the Group reviews the carrying amounts of its property and equipment, intangible assets and right-of-use assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss, if any. Intangible asset not yet available for use are tested for impairment at least annually, and whenever there is an indication that they may be impaired.

The recoverable amount of property and equipment, intangible assets and right-of-use assets, are estimated individually. When it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

In testing a cash-generating unit for impairment, corporate assets are allocated to the relevant cash-generating unit when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of cash generating units for which a reasonable and consistent allocation basis can be established. The recoverable amount is determined for the cash-generating unit or group of cash-generating units to which the corporate asset belongs, and is compared with the carrying amount of the relevant cash-generating unit or group of cash-generating units.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate

APPENDIX I

ACCOUNTANTS' REPORT

that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a cash-generating unit, the Group compares the carrying amount of a group of cash-generating units, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of cash-generating units, with the recoverable amount of the group of cash-generating units. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of cash-generating units. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit or the group of cash-generating units. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit or a group of cash-generating units) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit or a group of cash-generating units) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers which are initially measured in accordance with HKFRS 15. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets or financial liabilities at fair value through profit or loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

APPENDIX I

ACCOUNTANTS' REPORT

Amortised cost and interest income

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit-impaired.

Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or fair value through other comprehensive income ("FVTOCI") designated as FVTOCI are measured at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains and losses" line item.

Impairment of financial assets subject to impairment assessment under HKFRS 9

The Group performs impairment assessment under expected credit loss ("ECL") model on financial assets (including trade receivables, other receivables and deposits, deposits for gaming licence, amount due from a fellow subsidiary, loan to a related party, pledged bank deposits and bank balances) which are subject to impairment assessment under HKFRS 9. The amount of ECL is updated at the end of each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessment are done based on the Group's historical credit loss experience, and factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Group always assesses lifetime ECL for trade receivables.

For all other financial instruments, the Group assesses the loss allowance equal to 12-month ECL, unless when there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

(i) Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the end of each reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether the credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk. e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;

APPENDIX I

ACCOUNTANTS' REPORT

- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor; and
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if (i) it has a low risk of default; (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

(ii) Definition of default

For internal credit risk management, the Group considers an event of default occurs when information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider; or
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

APPENDIX I

ACCOUNTANTS' REPORT

(iv) Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, for example, when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of accounts receivable, when the amounts are over one year past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any subsequent recoveries are recognised in profit or loss.

(v) Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data and forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

Lifetime ECL for trade receivables are considered on a collective basis taking into consideration past due information and relevant credit information such as forward looking macroeconomic information.

For collective assessment, the Group takes into consideration the following characteristics when formulating the grouping:

- Nature of financial instruments;
- Past-due status; and
- Nature, size and industry of debtors.

The grouping is regularly reviewed by the management of the Group to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on amortised cost of the financial asset.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount with the exception of trade receivables where the correspondence adjustment is recognised through a loss allowance account.

Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

APPENDIX I

ACCOUNTANTS' REPORT

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of a group entity after deducting all of its liabilities. Equity instruments issued by the group entities are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

Financial liabilities at amortised cost

Financial liabilities (including trade payables, other payables, amount due to a subsidiary of the Company, and bank and other borrowings) are subsequently measured at amortised cost, using the effective interest method.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3, the management of the Group is required to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revision to accounting estimate is recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of each reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next twelve months.

Impairment assessment of the property and equipment and right-of-use assets related to Trans World Hotels Austria GmbH ("Trans World Austria")

In determining whether impairment loss of property and equipment and right-of-use assets related to Trans World Austria should be recognised or reversed, the management of the Group has to make estimation on the recoverable amounts of the property and equipment and right-of-use assets related to Trans World Austria. Changes in the key assumptions, including the pre-tax discount rate, terminal growth rate and expected changes in revenues and costs in the discounted cash flow projections, could materially affect the recoverable amounts.

APPENDIX I

ACCOUNTANTS' REPORT

The management of the Group considered there was indication (i.e. operating loss) for impairment for these property and equipment and right-of-use assets for the years ended 31 March 2021, 2022, 2023 and six months ended 30 September 2023 and prepared discounted cash flow projections for Trans World Austria based on the financial budget approved by the management of the Group and engaged an independent professional valuer to conduct impairment assessment on these property and equipment and right-of-use assets by estimating their recoverable amounts. At 31 March 2021, 2022, 2023 and 30 September 2023, the carrying amounts of the property and equipment and right-of-use assets related to Trans World Austria were approximately HK\$32,848,000 and HK\$11,475,000, HK\$28,068,000 and HK\$11,507,000, HK\$24,405,000 and HK\$16,808,000 and HK\$21,516,000 and HK\$15,665,000, respectively, after taking into account the accumulated impairment of HK\$53,186,000 and HK\$16,087,796, HK\$54,706,000 and HK\$16,547,000, HK\$54,706,000 and HK\$16,547,000 and HK\$51,660,000 and HK\$15,556,000 respectively. The Group estimated the recoverable amount of the property and equipment and right-of-use assets related to Trans World Austria based on value in use and concluded that the carrying amount of these assets does not materially differ from their recoverable amount. Accordingly, no impairment loss or reversal was recognised during the Track Record Period.

Deferred tax assets

As at 31 March 2021, 2022, 2023 and 30 September 2023, no deferred tax asset has been recognised on the tax losses of HK\$121,759,000, HK\$129,787,000, HK\$134,708,000 and HK\$125,750,000 and deductible temporary difference of HK\$88,622,000, HK\$88,703,000, HK\$85,225,000 and HK\$79,568,000 due to the unpredictability of future profit streams. The realisability of the deferred tax asset mainly depends on whether sufficient future profits will be available in the future, which is a key source of estimation uncertainty especially the uncertainty on how the economic condition in Europe. In cases where the actual future taxable profits generated are more than expected, or change in facts and circumstances which result in revision of future taxable profits estimation, a material recognition of deferred tax assets may arise, which would be recognised in profit or loss for the period in which such a recognition takes place.

5. SEGMENT INFORMATION

The Group is currently organised into two reportable segments – gaming operations, and hotel and catering operations. Principal activities of these two reportable segments are as follows:

- (i) Gaming operations – operation of casinos
- (ii) Hotel and catering operations – operation of hotel, catering and related services

Reportable segments are reported in a manner consistent with the internal reporting provided to the executive director of the Company, being the chief operating decision maker (the "CODM"). CODM, who is responsible for allocating resources and assessing performance of the reportable segments, has been identified as a group of senior management that makes strategic decisions.

The CODM regularly analyses gaming operations in terms of table gaming operations and slot machine gaming operations for each casino, and the relevant revenues and operating results are reviewed as a whole for resources allocation and performance assessment. For hotel and catering operations, the CODM regularly reviews the performance on the basis of the individual hotel. For segment reporting under HKFRS 8 Operating Segments, financial information of the Group's hotels with similar economic characteristics has been aggregated into a single reportable segment named "hotel and catering operations".

APPENDIX I

ACCOUNTANTS' REPORT

For hotel and catering transactions, the Group generally grants credit terms ranging from 30 to 60 days to its corporate customers from the date of invoices. Other than that, transactions with patrons and individual customers are settled by cash or credit cards through payment gateways, which will generally settle the amounts with the Group within 2 days after the date of transactions. As at 31 March 2021, 2022, 2023 and 30 September 2023, all outstanding sales contracts are expected to be fulfilled within 12 months after the end of each reporting period. As permitted under HKFRS 15, the transaction price allocated to these unsatisfied contract is not disclosed.

The Group is not subject to any income tax in the Cayman Islands pursuant to the rules and regulations in the jurisdiction.

During the Track Record Period, the Czech Republic Corporation Tax is calculated at a rate of 19% on the estimated assessable profits.

No provision for Hong Kong profits tax was made as the Group had no estimated assessable profit that was subject to Hong Kong profits tax during the Track Record Period.

No provision for Germany corporation tax for the Track Record Period as the Group either incurred tax loss or utilised tax loss for offsetting the income tax payable.

No provision for Austria Corporation Tax during the Track Record Period as the Group incurred tax loss, however, there is a minimum Corporation Tax of EUR 437.5 for each quarter during the Track Record Period for entities in a tax loss position.

Withholding tax of 15% is imposed on dividends declared in respect of profits earned by the subsidiary incorporated in the Czech Republic. At 31 March 2021, 2022, 2023 and 30 September 2023, the amount of distributable earnings for the Group's subsidiary incorporated in the Czech Republic in respect of which the Group has not provided for dividend withholding tax amounted to HK\$472,054,000, HK\$517,097,000, HK\$576,433,000 and HK\$521,675,000, respectively. No deferred tax liability has been recognised in respect of these amounts because the Group is in a position in control of the timing of the reversal of the temporary differences and it is probable that such differences will not reverse in the foreseeable future.

The Group leases office premises and pieces of land of hotel buildings during the Track Record Period. Lease contracts for office premises and leasehold land are entered into for fixed term of 4 years and 42 to 66 years, without any extension nor termination options, respectively. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. In determining the lease term and assessing the length of the non-cancellable period, the Group applies the definition of a contract and determines the period for which the contract is enforceable.

During the year ended 31 March 2022, the Group entered into new lease agreements for the use of office premises for 4.5 years. On the lease commencement, the Group recognised HK\$2,000,000 of right-of-use assets and HK\$2,000,000 of lease liabilities respectively.

The lease payment of the leasehold land in Austria is charged at fixed amount on a monthly basis. During the year ended 31 March 2023, lease reassessment of HK\$5,742,000 has been recognised as right-of-use assets and lease liabilities using the initial discount rate. The lease payment for the remaining years will be adjusted by the inflation rate at the end of each calendar year provided that the inflation rate of Austria exceeds 5% per annum.

Restrictions or covenants on leases

In addition, lease liabilities of HK\$57,449,000, HK\$60,196,000, HK\$64,866,000 and HK\$60,588,000 are recognised with related right-of-use assets of HK\$19,022,000, HK\$21,149,000, HK\$25,853,000 and HK\$23,944,000 as at 31 March 2021, 2022, 2023 and 30 September 2023, respectively. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

(a) Amounts due from fellow subsidiaries

The amounts represent (i) amount due from Singford amounting to HK\$35,013,000, which is non-trade in nature, unsecured, interest bearing at 4.5% per annum and recoverable on demand as at 31 March 2023 and (ii) amount due from Far East Consortium Limited ("FECL") amounting to HK\$1,443,000, which is non-trade in nature, unsecured, interest-free and recoverable on demand as at 30 September 2023.

As disclosed in Note 38, the obligation and interest of the entire balance due from Singford have been novated to FEC UK and the entire balance was then offset by dividend payables during the six months ended 30 September 2023.

As represented by the management of the Group, the outstanding amount due from FECL would be settled prior to the [REDACTED].

(b) Loan to a related party

The balance represents loan to BC Mortgage Service Asia Limited ("**BC Mortgage**"), which is non-trade in nature, interest bearing at 5.95% plus Sterling Overnight Index Average, secured by the property of the borrower and with maturity on 30 June 2025. As the amount will not be realised within 12 months from the end of each reporting period, the amount is classified as non-current asset as at 31 March 2023.

BC Mortgage is a joint venture of FEC.

As disclosed in Note 38, the right and obligation of the entire balance have been novated to FECL and HK\$12,911,000 was settled in cash whereas the right and obligation of remaining balance amounting to HK\$26,254,000 was further novated by FECL to FEC UK and then offset by dividend payables during the six months ended 30 September 2023.

(c) Amount due from an intermediate holding company

The amount is non-trade in nature, unsecured, interest-free and recoverable on demand as at 30 September 2023.

As represented by the management of the Group, the outstanding amount due from an intermediate holding company would be settled prior to the [REDACTED].

(d) Amounts due from (to) subsidiaries

The amounts are non-trade in nature, interest-free and recoverable/repayable on demand as at 30 September 2023.

Details of impairment assessment of amounts due from fellow subsidiaries and an intermediate holding company and a loan to a related party are set out in Note 33.

22. CASH AND CASH EQUIVALENTS/PLEDGED BANK DEPOSITS

Cash and cash equivalents comprise cash held by the Group, bank balances and short-term bank deposits for the purpose of meeting the Group's short term cash commitments.

Bank balances carry variable interest at average market rates of 0.5% per annum, 3.5% per annum, 6% per annum and 0.5% per annum as at 31 March 2021, 2022, 2023 and 30 September 2023, respectively.

APPENDIX I

ACCOUNTANTS' REPORT

Pledged bank deposits carry fixed interest rate of 0.5%, 0.5%, 0.5% and 0.5% as at 31 March 2021, 2022, 2023 and 30 September 2023, respectively and represent deposits pledged to banks to secure long-term bank borrowings granted to the Group, and are therefore classified as non-current assets. The pledged bank deposits will be released upon the settlement of relevant bank borrowings.

Details of impairment assessment of bank balances and pledged bank deposits are set out in Note 33.

23. TRADE PAYABLES

The credit period granted by suppliers ranged from 0 to 90 days. The ageing analysis of the trade payables of the Group presented based on the invoice dates at the end of each reporting period is as follows:

	<u>300</u>	<u>1,642</u>	<u>1,955</u>	<u>2,355</u>

As at 1 April 2020, the contract liabilities amounted to HK\$1,134,000.

For the contract liabilities as at 1 April 2020, 31 March 2021, 2022, 2023 and 30 September 2023, approximate 90% of the balances were/will be recognised as revenue during the years ended/ending 31 March 2021, 2022, 2023 and 2024, respectively.

Advances received in relation to the service of hotel accommodation

Contract liabilities in relation to the service of hotel accommodation represent the advance payments received from the customers upon ordering and before provision of services, until the services are rendered and revenue are recognised.

APPENDIX I

ACCOUNTANTS' REPORT

Customer loyalty programme

The Group offers customer loyalty programme in the Group's gaming operations. Basically, the customers can earn points from slot machine gaming and table gaming. The customers can use the points as cashable credit on any slot machine gaming and table gaming or use to purchase non-gaming products by utilising the award points earned under the customer loyalty programme. All award points can be accumulated and will be expired in the following 6 months since the last gaming. The expiry date of the award points will be automatically extended if there is a gaming betted by the customers during the 6-month period. Contract liabilities in relation to customer loyalty programme represent the aggregate amount of the transaction price allocated to the performance obligations that are unsatisfied as of the end of the reporting period. The increase in contract liabilities from (i) year ended 31 March 2021 to 31 March 2022 was mainly due to more awards points granted after the release of the COVID-19 related operation restrictions and (ii) year ended 31 March 2023 to six months ended 30 September 2023 was mainly due to many award points granted have not yet been redeemed by the customers.

The Group expects the transaction price allocated to the unsatisfied performance obligations will be recognised as revenue when the award points are redeemed.

APPENDIX I

ACCOUNTANTS' REPORT

In respect of a bank loan with a carrying amount of HK\$24,989,000 as at 31 March 2023, Trans World Austria breached the term of a bank borrowing, which is primarily related to the debt service cover ratio of Trans World Austria. On discovery of the breach, the directors of Trans World Austria immediately informed the bank and commenced a renegotiation of the term of the borrowing with the relevant banker. A letter has been issued by the bank to Trans World Austria to waive its right as at 31 March 2023 to demand immediate payment after 31 March 2023. As such, the management of the Group reclassified the non-current portion of the bank borrowing as a current liability as at 31 March 2023. As a letter has been issued by the bank to Trans World Austria to waive its right as at 31 March 2023 during the six months ended 30 September 2023 and the bank will only examine the covenants at the end of each financial year end, the non-current portion of such bank borrowing has been reclassified as non-current liability as at 30 September 2023.

28. DEFERRED TAX LIABILITIES

The following is the analysis of the deferred tax balances for the financial reporting purposes:

	As at 31 March			As at 30 September

APPENDIX I

ACCOUNTANTS' REPORT

The Group's unrecognised tax losses are as follows:

	Year ended 31 March		Six months ended 30 September	
	2021	2022	2023	2023
	HK\$'000	HK\$'000	HK\$'000	HK\$'000
Tax losses carry forward	121,759	129,787	134,708	125,750

During the Track Record Period, all tax losses may be carried forward indefinitely. No deferred tax asset in respect of tax losses has been recognised because the amount of future taxable profit that will be available to realise such assets is uncertain.

As at 31 March 2021, 2022, 2023 and 30 September 2023, the Group has deductible temporary differences of HK\$88,622,000, HK\$88,703,000, HK\$85,225,000 and HK\$79,568,000, respectively. No deferred tax asset has been recognised in relation to such deductible temporary difference as it is not probable that taxable profit will be available against which the deductible temporary differences can be utilised.

31. RETIREMENT BENEFIT SCHEMES

The Group participates in the Pension insurance of Austria (the "Austria Pension") for all its qualifying employees in Austria. The assets of the schemes are held separately from those of the Group, in funds under the control of Austria Government.

For members of the Austria Pension, the Group contributes 1.53% of relevant monthly payroll costs per person during the Track Record Period.

The only obligation of the Group with respect to the Austria Pension is to make the specified contributions. During the Track Record Period, the total amounts contributed by the Group to such scheme and costs charged to the profit or loss represents contributions paid or payable to the scheme by the Group at rates specified in the rules of the scheme. The retirement benefits scheme contributions made by the Group amounted to HK\$77,000, HK\$97,000, HK\$83,000, HK\$44,000 (unaudited) and HK\$81,000 for the years ended 31 March 2021, 2022 and 2023 and six months ended 30 September 2022 and 2023, respectively.

There is no statutory requirement for the Group to participate any retirement benefit scheme for the employees in the Czech Republic and Germany during the Track Record Period.

The Group is not obligated for any payment to the retirement benefit schemes in Germany and the Czech Republic during the Track Record Period.

32. CAPITAL RISK MANAGEMENT

The Group manages its capital to ensure that the group companies will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The overall strategy remains unchanged throughout the Track Record Period.

The capital structure of the Group consists of net debt, which includes bank and other borrowings, net of cash and cash equivalents, and equity attributable to owners of the Company, comprising share capital and reserves.

The management of the Group reviews the capital structure regularly. As part of the review, the directors of the Company consider the cost and the risks associated with each class of the capital. Based on the recommendations of the management of the Group, the Group will balance its overall capital structure through issue of new shares, issue of new debt and redemption of existing debts.

Financial risk management objectives and policies

The Group's and the Company's financial instruments include trade receivables, other receivables and deposits, amounts due from fellow subsidiaries, amount due from a subsidiary, amount due from an intermediate holding company, loan to a related party, amount due to a subsidiary, financial assets at FVTPL, cash and cash equivalents, pledged bank deposits, trade payables, other payables, bank and other borrowings and lease liabilities.

Details of these financial instruments are disclosed in the respective notes. The risks associated with these financial instruments include market risks (currency risk and interest rate risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Currency risk

The Group has transactions denominated in foreign currencies for its casino and hotel operations, which expose the Group to foreign currency risk. All of the Group's receipt of its casino operations are denominated in EUR and some of the financial assets are denominated in USD and GBP, other than the functional currency of the group entity, during the Track Record Period.

The Group currently does not have a foreign currency hedging policy. However, management of the Group monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

APPENDIX I

ACCOUNTANTS' REPORT

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of each reporting period are as follows:

Sensitivity analysis

The following tables details the Group's sensitivity to a 5% weakening in the functional currencies of group entities against the relevant foreign currencies of respective group entities, while all other variables are held constant. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents the management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding monetary items denominated in foreign currencies at the year end/period end. For a 5% strengthening of the functional currencies of group entities against the relevant foreign currencies, these would be an equal and opposite impact on profit after tax.

Interest rate risk

The Group is exposed to fair value interest rate risk in relation to the Group's fixed-rate pledged bank deposits, lease liabilities, and bank and other borrowings as at 31 March 2021, 2022, 2023 and 30 September 2023 and amount due from a fellow subsidiary as at 31 March 2023.

The Group is exposed to cash flow interest rate risk due to the fluctuation of the prevailing market interest rate on bank deposits and variable-rate bank borrowing as at 31 March 2021, 2022, 2023 and 30 September 2023 and loan to a related party as at 31 March 2023.

The Group's cash flow interest rate risk is mainly concentrated on the fluctuations of the Czech Republic and Germany deposit rate arising from the Group's bank balances, the Sterling Overnight Index Average arising from the Group's loan to a related party and the 3-month EURIBOR rate arising from bank borrowings.

The Group currently does not have interest rate risk hedging policy. However, management of the Group closely monitors its exposure to future cashflow interest rate risk as a result of change on market interest rate and will consider hedging changes in market interest rates should the need arise.

APPENDIX I

ACCOUNTANTS' REPORT

Sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for loan to a related party, variable-rate bank deposits and bank borrowing for the Track Record Period. The analysis is prepared assuming the financial instruments outstanding at the end of the reporting period were outstanding for the whole year. A 50 basis points increase or decrease is used when reporting interest rate risk internally to key management personnel and represents directors' assessment of the reasonably possible change in interest rates. If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's post-tax profit for the years ended 31 March 2021, 2022 and 2023 and six months ended 30 September 2022 and 2023 would increase/decrease by HK\$89,000, HK\$294,000, HK\$424,000, HK\$407,000 (unaudited) and HK\$226,000 respectively as a result of the Group's exposure to interest rates on its loan to a related company and variable-rate bank deposits.

If interest rates had been increased/decreased by 50 basis points and all other variables were held constant, the Group's post-tax profit for the years ended 31 March 2021, 2022 and 2023 and six months ended 30 September 2022 and 2023 would decrease/increase by HK\$129,000, HK\$114,000, HK\$101,000, HK\$95,000 (unaudited) and HK\$97,000 respectively as a result of the Group's exposure to interest rate on its variable-rate bank borrowings.

Credit risk and impairment assessment

The Group's credit risk is primarily attributable to trade receivables, other receivables and deposits, amounts due from fellow subsidiaries, loan to a related party, amount due from an intermediate holding company, pledged bank deposits and bank balances.

The Company's credit risk is primarily attributable to amount due from a subsidiary, amount due from an intermediate holding company and amount due from a fellow subsidiary.

The Group's and the Company's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge the obligations by counterparties is arising from the carrying amounts of the respective recognised financial assets as stated in the combined statements of financial position at the end of each reporting period. Except for the loan from a related party, the Group and the Company do not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets.

Trade receivables

In order to minimise the credit risk on trade receivables, the management of the Group has delegated a team responsible for monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the management of the Group reviews the recoverable amount of each individual debt at the end of each reporting period to ensure that adequate provisions for impairment losses are made for irrecoverable amounts on trade receivable.

The Group always recognises lifetime ECL for trade receivables. To measure the ECL, the Group performs impairment assessment under the ECL model on trade receivables collectively based on shared credit risk characteristics by reference to the Group's internal credit rating.

As at 31 March 2021, 2022, 2023 and 30 September 2023, the Group fully provided HK\$90,000 and HK\$414,000 and HK\$83,000 and HK\$78,000 impairment allowance for credit-impaired trade receivables.

The Group's concentration of credit risk on the top five largest debtors accounted for 90%, 64%, 49% and 46%, respectively of the total trade receivables as at 31 March 2021, 2022, 2023 and 30 September 2023, respectively.

Other receivables and deposits (including deposits for gaming licence)

The management of the Group make periodic individual assessment on the recoverability of significant balances based on historical settlement records (if any), past experience, and also available reasonable and supportive forward-looking information. The management of the Group believe that there is no material credit risk inherent in the Group's outstanding balance of other receivables and deposits having

APPENDIX I

ACCOUNTANTS' REPORT

considered the historical settlement records, past experience, and also available reasonable and supportive forward-looking information. For the deposits for gaming licence, the amount is refundable by the Government of the Czech Republic. As at 31 March 2021, 2022, 2023 and 30 September 2023, the Group assessed that the ECL for other receivables and deposits and deposits for gaming licence was insignificant.

Loan to a related party/amounts due from fellow subsidiaries, a subsidiary and an intermediate holding company

The Group has concentration of credit risk on the loan to a related party and amount due from a fellow subsidiary as at 31 March 2023.

The Group and the Company performs impairment assessment under 12-month ECL model. The management of the Group continuously monitor the credit quality and financial position of the related company and the level of exposure to ensure that the follow-up action is taken to recover the debt. In the opinion of the management of the Group, the risk of default by the related company is not significant taking into consideration of the collateral value of the loan to a related party and the Group assessed that the ECL on the balance is insignificant as at 31 March 2023 and thus no impairment loss allowance was recognised.

For amounts due from fellow subsidiaries, in the opinion of the management of the Group, the probability of default is negligible as the fellow subsidiaries are financially supported by the ultimate holding company, and concluded that the credit risk is insignificant. Accordingly, the ECL on the balances is insignificant as at 31 March 2023 and 30 September 2023 and thus no impairment loss allowance was recognised.

For the amount due from a subsidiary, in the opinion of the management, the ECL on the balance is insignificant as at 30 September 2023 as the entire balance is not material and thus no impairment loss allowance was recognised.

Bank balances/pledged bank deposits

The credit risk for bank balances and pledged bank deposits are limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies. There has been no history of default in relation to these banks. The Group performs impairment assessment on the bank balances and pledged bank deposits under 12-month ECL model. The management of the Group considers the risk of default is regarded as low based on the average loss rate by reference to credit ratings assigned by international credit-rating agencies. As at 31 March 2021, 2022, 2023 and 30 September 2023, the Group assessed that the ECL for bank balances and pledged bank deposits were insignificant.

The Group's internal credit risk grading assessment comprises the following categories:

Internal credit rating	Description	Trade receivables	Other financial assets
Low risk	The counterparty has a low risk of default and does not have any past-due amounts	Lifetime ECL – not credit-impaired	12-month ECL
Watch list	Debtor frequently repays after due dates but usually settle in full	Lifetime ECL – not credit-impaired	12-month ECL
Doubtful	There have been significant increases in credit risk since initial recognition through information developed internally or external resources	Lifetime ECL – not credit-impaired	Lifetime ECL – not credit-impaired
Loss	There is evidence indicating the asset is credit impaired	Lifetime ECL – credit-impaired	Lifetime ECL – credit-impaired
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	Amount is written off	Amount is written off

Liquidity risk

In management of the liquidity risk, the Group and the Company monitor and maintain levels of cash and cash equivalents deemed adequate by the management to finance the Group's and the Company's operations and mitigate the effects of fluctuations in cash flows.

The following table details the Group's and the Company's remaining contractual maturity for its financial liabilities. The tables have been drawn up based on the undiscounted cashflows of financial liabilities based on the earliest date on which the Group and the Company can be required to pay.

The table includes both interest and principal cash flows. To the extent that interest rates are floating rate, the undiscounted amount is derived from interest rate at the end of each reporting period.

Fair value measurements of financial instruments

Some of the Group's financial instruments are measured at fair value for financial reporting purposes. The management and the Company's determines the appropriate valuation techniques and inputs for fair value measurements.

In determining the fair value of the investment fund, the management of the Group have made reference to the quotation from the counterparties and used market-observables data to the extent it is available.
