RENEWAL OF CONTINUING CONNECTED TRANSACTIONS IN RELATION TO THE 2024 FRAMEWORK AGREEMENTS

INTRODUCTION

The Company refers to the 2023 Announcement and the 2023 Circular in relation to the 2023 Framework Agreements.

As the 2023 Framework Agreements will expire on 31 May 2024 and it is currently expected that the transactions under the 2023 Framework Agreements will continue on a recurring basis, on 17 April 2024, the Group has entered into the following agreements with CNBMG and/or Shandong Quanxing, an affiliate of CNBMG, to renew the 2023 Framework Agreements and the annual caps:

- (a) the 2024 Mine Development Services Framework Agreement;
- (b) the 2024 Cement Production Equipment and Supplies Framework Agreement;
- (c) the 2024 Engineering and Technical Services Framework Agreement; and
- (d) the 2024 Clinker and Cement Transactions Framework Agreements.

LISTING RULES IMPLICATIONS IN RELATION TO THE 2024 FRAMEWORK AGREEMENTS

As at the date of this announcement, CNBMG is a substantial shareholder holding approximately 12.94% of the issued Shares and hence a connected person of the Company under Chapter 14A of the Listing Rules. In addition, Shandong Quanxing, which is 49% indirectly held by CNBMG, is a 30%-controlled company of CNBMG and hence a connected person of the Company under Chapter 14A of the Listing Rules. Therefore, the transactions contemplated under the 2024 Framework Agreements constitute continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

Since the 2024 Clinker and Cement Transactions Framework Agreements were entered into by the Group with parties who are connected with one another within a 12-month period, according to Rule 14A.81 of the Listing Rules, the transactions contemplated under the 2024 Clinker and Cement Transactions Framework Agreements are required to be aggregated as if they were one transaction.

As one or more of the applicable percentage ratios in respect of the proposed annual caps of the transactions contemplated under each of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements exceeds 5%, the transactions contemplated thereunder are subject to the reporting, announcement, independent shareholders' approval and annual review requirements under Chapter 14A of the Listing Rules.

As one or more of the applicable percentage ratios in respect of the proposed annual caps of the transactions contemplated under the 2024 Cement Production Equipment and Supplies Framework Agreement is more than 0.1% but less than 5%, the transactions contemplated thereunder will therefore be exempt from the independent shareholders' approval requirements but will be subject to the reporting, announcement and annual review requirements pursuant to Chapter 14A of the Listing Rules.

The Company intends to seek approval from its Independent Shareholders in respect of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements and the transactions contemplated thereunder at the Company's forthcoming annual general meeting.

A circular containing, among other things, (i) the details of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements, (ii) a letter of recommendation from the Independent Board Committee to the Independent Shareholders, and (iii) a letter of advice from the Independent Financial Adviser to the Independent Board Committee and the Independent Shareholders, is expected to be despatched to the Shareholders on Tuesday, 30 April 2024.

INTRODUCTION

The Company refers to the 2023 Announcement and the 2023 Circular in relation to the 2023 Framework Agreements.

As the 2023 Framework Agreements will expire on 31 May 2024 and it is currently expected that the transactions under the 2023 Framework Agreements will continue on a recurring basis, on 17 April 2024, the Group has entered into the following agreements with CNBMG and/or Shandong Quanxing, an affiliate of CNBMG, to renew the 2023 Framework Agreements and the annual caps:

- (a) the 2024 Mine Development Services Framework Agreement;
- (b) the 2024 Cement Production Equipment and Supplies Framework Agreement;
- (c) the 2024 Engineering and Technical Services Framework Agreement; and
- (d) the 2024 Clinker and Cement Transactions Framework Agreements.

PRINCIPAL TERMS OF THE 2024 FRAMEWORK AGREEMENTS

The principal terms of each of the 2024 Framework Agreements are summarised as follows:

(a) 2024 Mine Development Services Framework Agreement

Date:	17 April 2024
Parties:	(i) Shandong Shanshui (ii) CNBMG
Scope of transactions:	Provision of mine development, maintenance and related engineering services by CNBMG Group to the Group
Term:	From 1 June 2024 to 31 May 2025 (both days inclusive), subject to Independent Shareholders' approval at the Company's forthcoming annual general meeting

Basis of pricing:

The price of the services will be determined through a tender or quotation process, and will depend on the result of the tender or quotation (as the case may be) if CNBM wins the tender or quotation (as the case may be). The Group will use (i) the method of public tender for projects that are commoditised and/or standardised, (ii) the method of selective tender for projects that are non-standardised, relatively specific, require detailed communications with the suppliers on technological aspects of the project, with fewer potential bidders and/or the project timetable is rather urgent, and (iii) the method of request for quotation for projects in which the supply requested is of a smaller scale and/or of a unique quality and there is a lack of competition, the Group has already used public tender recently and/or the market prices for the raw materials involved are relatively stable.

The pricing procedures are as follows:

- **Public tender:** When using the method of public tender, a tender committee will be established by the procurement and supply management department at Group level, comprising relevant experts from the requesting entity, the corresponding operating region, the mining management office under the development and technology department at Group level, the legal department at Group level and the audit department at Group level. The tender committee will review the tender documents and technical requirements and publish a tender notice via an online platform (e.g., Alibaba). The public tender process will need to have at least three valid tenders. The tender committee will review each tender and provide its feedback based on a number of factors including the participant's quality, costs, timing and services. After the procurement and supply management department at Group level consolidates all relevant feedback, it will prepare a tender award request (including the relevant documents such as feedback on the tender, proposed tender participant to be awarded the tender, pricing comparison list and pricing quotation list) and submit it to the vice president of the procurement and supply department at Group level for approval.

- **Selective tender:** The method of selective tender is similar to public tender, with the key difference being that there is no public tender via an online platform, and participants shortlisted by the procurement and supply management department at Group level (on the recommendation of the tender committee) join the tender by way of invitation.
- **Request for quotation:** When using the method of request for quotation, the procurement and supply management department at Group level will shortlist suppliers, based on their quality, from the Group's supplier database and invite these suppliers to provide quotations. After the mining management office under the development and technology department at Group level and the legal department at Group level review the quotation and provide their feedback, the procurement and supply management department at Group level will prepare an award request (including the relevant documents such as feedback on the quotation, pricing comparison list and pricing quotation list) to be submitted to the vice president of the procurement and supply department at Group level for approval.

If CNBMG Group wins the tender or quotation (as the case may be), the exact price will be determined based on the specific work involved for the project, after the actual costs of CNBMG Group have been ascertained by the Group's technical personnel. The prices will be monitored, revised and adjusted in accordance with the changes in market prices from time to time so as to be in line with the markets.

(b) 2024 Cement Production Equipment and Supplies Framework Agreement

Date:	17 April 2024
Parties:	(i) Shandong Shanshui (ii) CNBMG
Scope of transactions:	Purchase of cement production equipment and supplies by the Group from CNBMG Group
Term:	From 1 June 2024 to 31 May 2025 (both days inclusive)
Basis of pricing:	The price of the Cement Production Equipment and Supplies will be determined based on the following: <ul style="list-style-type: none">• The Group will seek quotes from at least two comparable suppliers other than CNBMG Group through public tender or price inquiry. When using the method of public tender, the Group will issue the information in relation to the potential transactions, and obtain the bidding documents and details of their qualification and pricing from the suppliers.• For cement production equipment and supplies of unique services or products that cannot be provided by other companies, the Group will negotiate the price with CNBMG by reference to the prices of the Group's historical purchases and purchase price paid of other major industry participants.

(c) 2024 Engineering and Technical Services Framework Agreement

Date:	17 April 2024
Parties:	(i) Shandong Shanshui (ii) CNBMG
Scope of transactions:	Provision of engineering services (including design, construction and technical upgrade services) and technical services (including inspection and product specification comparison services) by CNBMG Group to the Group
Term:	From 1 June 2024 to 31 May 2025 (both days inclusive), subject to Independent Shareholders' approval at the Company's forthcoming annual general meeting
Basis of pricing:	The price of the services (other than inspection services) will be determined through a tender or quotation process, and will depend on the result of the tender or quotation (as the case may be) if CNBM wins the tender or quotation (as the case may be). The Group will use (i) the method of public tender for projects that are commoditised and/or standardised, (ii) the method of selective tender for projects that are non-standardised, relatively specific, require detailed communications with the suppliers as on technological aspects of the project, with fewer potential bidders and/or the project timetable is rather urgent, and (iii) the method of request for quotation for projects in which the supply requested is of a smaller scale and/or of a unique quality and there is a lack of competition, the Group has already used public tender recently and/or the market prices for the raw materials involved are relatively stable.

In ensuring that the pricing is on normal commercial terms, the Group follows the following grid in determining its internal department that will run the pricing process and approve the final result:

Monetary amount involved	Unit that will run tender/ quotation process	Unit that will approve the final result
Less than RMB1,000,000	Procurement and supply management department at subsidiary (or branch) level	General manager at subsidiary (or branch) level
RMB1,000,000 or above but below RMB2,000,000	Procurement and supply management office at operating region level	General manager at operating region level
RMB2,000,000 and above	Procurement and supply management department at Group level	Vice president of the procurement and supply management department at Group level

The pricing procedures are as follows:

- **Public tender:** When using the method of public tender, a tender committee will be established by the unit running the tender process (in accordance with the requisite levels as set out in the preceding sub-paragraph above), comprising experts from the production, technology, legal and audit departments at the corresponding corporate level. The tender committee will review the tender documents and technical requirements and publish a tender notice via an online platform (e.g., Alibaba). The public tender process will need to have at least three valid tenders. The tender committee will review each tender and provide its feedback based on a number of factors including the participant's quality, costs, timing and services. After the unit running the tender process (depending on the requisite levels as set out in the preceding sub-paragraph above) consolidates all relevant feedback, it will prepare a tender award request (including the relevant documents such as feedback on the tender, proposed tender participant to be awarded the tender, pricing comparison list and pricing quotation list) and submit it to the head of the corresponding unit for approval.
- **Selective tender:** The method of selective tender is similar to public tender, with the key difference being that there is no public tender via an online platform, and participants shortlisted by the unit running the quotation process (in accordance with the requisite levels as set out in the preceding sub-paragraph above) (on the recommendation of the tender committee) join the tender by way of invitation.

- **Request for quotation:** When using the method of request for quotation, the unit running the quotation process (in accordance with the requisite levels as set out in the preceding sub-paragraph above) will shortlist suppliers, based on their quality, from the Group's supplier database and invite these suppliers to provide quotations. After the production, technology and legal departments at the corresponding corporate level review the quotation and provide their feedback, the unit running the quotation process (in accordance with the requisite levels as set out above) will prepare an award request (including the relevant documents such as feedback on the quotation, pricing comparison list and pricing quotation list) to be submitted to the head of the corresponding unit for approval.

The price of the inspection services will be determined based on the prices prescribed by the National Quality Supervision and Testing Center for Cement from time to time.

(d) 2024 CNBMG Clinker and Cement Transactions Framework Agreement

Date:	17 April 2024
Parties:	(i) Shandong Shanshui (ii) CNBMG
Scope of transactions:	Sale and purchase of clinker and cement (including aggregate and commercial concrete) between the Group and CNBMG Group
Term:	From 1 June 2024 to 31 May 2025 (both days inclusive), subject to Independent Shareholders' approval at the Company's forthcoming annual general meeting
Basis of pricing:	The price of the clinker and cement (including aggregate and commercial concrete) purchased from and sold to CNBMG Group will be determined with reference to the quotation from other clinker and cement companies in the nearby area through price inquiry, and determine the price based on comparing the quotes obtained.

(e) 2024 Shandong Quanxing Clinker and Cement Transactions Framework Agreement

Date:	17 April 2024
Parties:	(i) Shandong Shanshui (ii) Shandong Quanxing
Scope of transactions:	Sale and purchase of clinker and cement (including aggregate and commercial concrete) between the Group and Shandong Quanxing's subsidiaries, Shandong Quanxing Cement Co., Ltd. and Shandong Shenfeng Cement Co., Ltd.
Term:	From 1 June 2024 to 31 May 2025 (both days inclusive), subject to Independent Shareholders' approval at the Company's forthcoming annual general meeting
Basis of pricing:	The price of the clinker and cement (including aggregate and commercial concrete) purchased from and sold to Shandong Quanxing's subsidiaries will be determined with reference to the quotation from other clinker and cement companies in the nearby area through price inquiry, and determine the price based on comparing the quotes obtained.

Each of the 2024 Framework Agreements was entered into in the ordinary and usual course of business of the Company. The terms of the 2024 Framework Agreements were negotiated on an arm's length basis and on normal commercial terms.

EXISTING ANNUAL CAPS

The table below summarises the existing annual caps in respect of the transactions under the 2023 Framework Agreements:

Existing annual cap	For the year ended 31 December 2023	For the five months ending 31 May 2024
	<i>(RMB'000)</i>	
Mine Development Services	748,370	270,020
Cement Production Equipment and Supplies	40,000	14,000
Engineering and Technical Services	788,807	527,830
Clinker and Cement Transactions	<u>300,000</u>	<u>125,000</u>

The Company will ensure that the transactions conducted under the 2023 Framework Agreements will not exceed the existing annual cap for the five months ending 31 May 2024.

HISTORICAL TRANSACTION AMOUNTS

The table below summarises the actual historical transaction amounts in respect of the transactions under the 2023 Framework Agreements:

Historical transaction amounts	For the year ended 31 December 2023	For the three months ended 31 March 2024
	<i>(RMB'000)</i>	
Mine Development Services	601,721	64,522
Cement Production Equipment and Supplies	15,998	1,607
Engineering and Technical Services	296,011	28,786
Clinker and Cement Transactions	<u>57,508</u>	<u>15,161</u>

PROPOSED ANNUAL CAPS

The proposed annual caps in respect of the transactions under the 2024 Framework Agreements are as follows:

	For the year ending 31 December 2024	For the five months ending 31 May 2025
	<i>(RMB'000)</i>	
Mine Development Services	649,310	251,480
Cement Production Equipment and Supplies	16,000	6,400
Engineering and Technical Services	392,640	138,090
Clinker and Cement Transactions	<u>155,711</u>	<u>62,280</u>

BASIS OF DETERMINATION OF PROPOSED ANNUAL CAPS

The proposed annual caps in respect of the transactions under the 2024 Framework Agreements have been determined by reference to the following factors:

(a) 2024 Mine Development Services Framework Agreement

The proposed annual caps in respect of the transactions contemplated under the 2024 Mine Development Services Framework Agreement have been determined based on:

- (i) the historical fees for the Mine Development Services paid by the Group to CNBMG Group since January 2023;
- (ii) the expected growth in the Group's corresponding demand for the Mine Development Services from CNBMG Group in 2024, in view of (x) the expected increase in mining and maintenance costs contributed by the two mining sites which have commenced operation upon the completion of infrastructure construction or the application of mining licenses and safety certificates and (y) the gradual increase in restoration and maintenance as a result of increasing requirements on mine management of enterprises imposed by the governmental authorities; and
- (iii) the prevailing market prices for the provision of similar mine development, maintenance and related engineering services, which are determined with reference to the geological conditions, the surrounding environment and the construction type of the mining area.

(b) 2024 Cement Production Equipment and Supplies Framework Agreement

The proposed annual caps in respect of the transactions contemplated under the 2024 Cement Production Equipment and Supplies Framework Agreement have been determined based on:

- (i) the historical expenditures for the Cement Production Equipment and Supplies paid by the Group to CNBMG Group since January 2023;
- (ii) an acceleration in equipment upgrading as a result of the ongoing improvement of national energy conservation, environmental protection and consumption reduction standards. In addition, as the service life of such production equipment is extended, the replacement for component equipment will increase. It is expected that the Group's demand for the Cement Production Equipment and Supplies from CNBMG Group will increase in 2024; and
- (iii) the ongoing increase in the cost of materials and prevailing market prices for the provision of similar Cement Production Equipment and Supplies.

(c) 2024 Engineering and Technical Services Framework Agreement

The proposed annual caps in respect of the transactions contemplated under the 2024 Engineering and Technical Services Framework Agreement have been determined based on:

- (i) the historical fees for the Engineering and Technical Services paid by the Group to CNBMG Group since January 2023;
- (ii) the expected growth in the Group's corresponding demand for the Engineering and Technical Services from CNBMG Group, in view of the construction, relocation and productivity replacement of around 3 significant infrastructure projects (such as clinker production lines and cement grinding production lines) by the Group in response to development in industry policies and the 14th Five Year Plan of the PRC, of which the construction period will be expanded to continue into 2024 and 2025, as well as the development pace of these significant technological transformation projects;
- (iii) the expected increase in corporate environmental costs and labour costs; and
- (iv) the prevailing market prices for the provision of similar engineering and technical services.

(d) 2024 Clinker and Cement Transactions Framework Agreements

The proposed annual caps in respect of the transactions contemplated under the 2024 Clinker and Cement Transactions Framework Agreements have been determined based on:

- (i) the historical expenditures for the Clinker and Cement Transactions paid by the Group to CNBMG Group and its affiliates and by CNBMG Group and its affiliates to the Group since January 2023;
- (ii) notwithstanding that the actual expenditures for the Clinker and Cement Transactions for the year ended 31 December 2023 were lower than expected due to the combined effects of multiple factors such as the macroeconomic downturn, weak investment in new infrastructure and a decline in real estate investment, the expected gradual increase in the Group's and CNBMG's demand for the Clinker and Cement Transactions in 2024 in view of current market conditions in the region in which the Group operates and a forecast of future market dynamics; and
- (iii) the cost of raw materials and prevailing market prices for the provision of similar clinker and cement.

APPROVAL BY THE BOARD

The Directors (including the independent non-executive Directors) are of the view that the terms of the 2024 Cement Production Equipment and Supplies Framework Agreement and the transactions contemplated thereunder (including the proposed annual caps) are (i) fair and reasonable; and (ii) are on normal commercial terms or better, in the ordinary course of business of the Group, and in the interests of the Company and the Shareholders as a whole.

The Directors (excluding the independent non-executive Directors, who will give their opinion after considering the advice from the Independent Financial Adviser) are of the view that the terms of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements, and the transactions contemplated thereunder (including the proposed annual caps) are (i) fair and reasonable; and (ii) are on normal commercial terms or better, in the ordinary course of business of the Group, and in the interests of the Company and the Shareholders as a whole.

Ms. Wu Ling-ling, an executive Director, abstained from voting on the 2024 Framework Agreements and the transactions contemplated thereunder in view of the fact that she was involved in an ongoing litigation with the Company (details of which have been set out in pages 96 to 99 of the annual report of the Company for the financial year ended 31 December 2023). Save for the above, none of the Directors has a material interest in the 2024 Framework Agreements and the transactions contemplated thereunder (including the proposed annual caps) nor is any of them required to abstain from voting on the relevant Board resolutions.

LISTING RULES IMPLICATIONS IN RELATION TO THE 2024 FRAMEWORK AGREEMENTS

As at the date of this announcement, CNBMG is a substantial shareholder holding approximately 12.94% of the issued Shares and hence a connected person of the Company under Chapter 14A of the Listing Rules. In addition, Shandong Quanxing, which is 49% indirectly held by CNBMG, is a 30%-controlled company of CNBMG and hence a connected person of the Company under Chapter 14A of the Listing Rules. Therefore, the transactions contemplated under the 2024 Framework Agreements constitute continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

Since the 2024 Clinker and Cement Transactions Framework Agreements were entered into by the Group with parties who are connected with one another within a 12-month period, according to Rule 14A.81 of the Listing Rules, the transactions contemplated under the 2024 Clinker and Cement Transactions Framework Agreements are required to be aggregated as if they were one transaction.

As one or more of the applicable percentage ratios in respect of the proposed annual caps of the transactions contemplated under each of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements exceeds 5%, the transactions contemplated thereunder are subject to the reporting, announcement, independent shareholders' approval and annual review requirements under Chapter 14A of the Listing Rules.

As one or more of the applicable percentage ratios in respect of the proposed annual caps of the transactions contemplated under the 2024 Cement Production Equipment and Supplies Framework Agreement is more than 0.1% but less than 5%, the transactions contemplated thereunder will therefore be exempt from the independent shareholders' approval requirements but will be subject to the reporting, announcement and annual review requirements pursuant to Chapter 14A of the Listing Rules.

The Company intends to seek approval from its Independent Shareholders in respect of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements and the transactions contemplated thereunder at the Company's forthcoming annual general meeting.

A circular containing, among other things, (i) the details of the 2024 Mine Development Services Framework Agreement, the 2024 Engineering and Technical Services Framework Agreement and the 2024 Clinker and Cement Transactions Framework Agreements, (ii) a letter of recommendation from the Independent Board Committee to the Independent Shareholders, and (iii) a letter of advice from the Independent Financial Adviser to the Independent Board Committee and the Independent Shareholders, is expected to be despatched to the Shareholders on Tuesday, 30 April 2024.

REASONS FOR AND BENEFITS OF ENTERING INTO THE 2024 FRAMEWORK AGREEMENTS

The Board considers that the 2024 Framework Agreements will bring the following benefits to the Company:

(a) 2024 Mine Development Services Framework Agreement

To support the Company's day-to-day operations, the Company will need to extract limestones to serve as raw materials for its cement production. To ensure safe and proper extraction of limestones, mine development, maintenance and related engineering services are necessary. Local environmental laws also require the land conditions of the extraction sites to be restored during the extraction process.

Compared to other companies the Company has previously cooperated with, CNBMG possesses competitive advantages on its mining technology, management standards and infrastructure construction qualities in terms of its (i) market profile, (ii) technological capabilities, (iii) compliance with state environmental laws and (iv) cost efficiency, as evidenced by the following qualities and achievements of its subsidiary and engineering services provider unit, CNBM:

- CNBM is a tier-one service provider in the mining construction in the Chinese mining industry measured by aggregate contracted project value, an industry standard established by the Ministry of Housing and Urban-Rural Development of the PRC. CNBM has been engaged in limestone development and extraction projects for (i) an overwhelming majority of the cement corporations in China and (ii) various other overseas cement corporations;
- CNBM has the technology and expertise in mining to utilise limestones of both superior and sub-par qualities, thereby maximising the utilisation rate of limestones extracted. In addition, CNBM meets the requirements of the local governments and authorities, thereby avoiding the risk of suspension and rectification in production as a result of non-compliant mining; and
- CNBM has established and implemented a strict policy and adheres to the concept of "Simultaneous Mining, Maintenance and Green-mining Construction" ("邊開採、邊治理、邊進行綠色礦山建設") to ensure the land conditions of the extraction sites are restored simultaneously during the extraction process, thereby reducing the risk of suspension and rectification in production as a result of non-compliant mining and reducing the need for investment in "green-mining" projects and minimising the overall restoration costs for extraction sites.

In light of the above, the Board believes that the Company can leverage on CNBMG's strengths to:

- enhance the mine development, maintenance and related engineering services quality of the Company;
- ensure (i) compliance with local environmental laws for simultaneous restoration of the land conditions of extraction sites and (ii) minimal restoration costs as a result of CNBM's strict policy for simultaneous restoration; and
- lower its overall production cost as a result of the mixed utilisation of limestones of both superior and sub-par qualities.

(b) 2024 Cement Production Equipment and Supplies Framework Agreement

The cement production equipment used by the Company are subject to wear and tear, and need to be replaced over time. Apart from equipment demand, the Company will also need to source supplies to support the cement production and packaging processes.

Compared to other suppliers, CNBMG possesses competitive advantages in the provision of cement production equipment and supplies in terms of its (i) scale, (ii) technological capabilities and (iii) cost-to-performance ratio of its manufactured equipment, as evidenced by the following qualities and achievements of CNBMG:

- CNBMG Group is the largest manufacturer for cement production equipment in the world;
- CNBMG Group has 26 national scientific research and design institutes, 38,000 scientific research and development and technical engineering employees, 55 national industrial quality inspection centres, more than 26,500 patents, three national key laboratories, 8 national engineering (technology) research centres and 19 national standardisation technical committees;
- CNBMG Group owns 7 first class State Science and Technology Progress Awards and 4 China Grand Awards for Industry (together with the preceding sub-paragraph, the "**Capabilities**"); and in light of the above, the Board believes that the Company can leverage on CNBMG's strength to increase the quality of its cement production equipment, and ensure stable operations and the longevity and quality of supplies purchased, thereby reducing the overall cement production costs.

(c) 2024 Engineering and Technical Services Framework Agreement

From time to time, the Company requires (i) design services when it establishes new production lines, (ii) technical upgrade services when it decides to improve the quality and scale of its cement production and (iii) technical services in compliance with environmental and safety regulations and for purposes of participating in routine specification comparison inspections conducted by state authorities in accordance with cement industry regulations.

Compared to other service providers, CNBMG possesses competitive advantages in the provision of engineering and technical services in terms of its (i) scale, (ii) technological capabilities and (iii) cost-to-performance ratio of its upgrade services, as evidenced by the following qualities and achievements of CNBMG:

- CNBMG is the largest and market-leading integrated building materials developer and service provider in the world in terms of scale;
- as mentioned above, CNBMG Group has 26 national scientific research and design institutes, 38,000 scientific research and development and technical engineering employees, 55 national industrial quality inspection centres, more than 26,500 patents, 3 national key laboratories, 8 national engineering (technology) research centres and 19 national standardisation technical committees;
- CNBMG Group owns 7 first class State Science and Technology Progress Awards and 4 China Grand Awards for Industry; and
- CNBMG is able to provide engineering services on at a higher cost-to-performance ratio compared with its competitors.

In light of the above, the Board believes that the Company can leverage on CNBMG's strength to ensure its engineering quality, increase production quality and volume, ensure stable operations, thereby increasing overall revenue for the Group.

(d) **2024 Clinker and Cement Transactions Framework Agreements**

Purchase of clinker and cement from CNBMG's group companies and its affiliates

From time to time, various clinker and cement companies in the Group in the Western Shandong Province, Southern Shandong Province and Northeastern China (collectively, the “**Deficit Regions**”) experienced deficit in clinker and cement supply. In addition, for some of the Group's operations, the closest clinker and cement production unit within the Group are still distant. This means for such operations, it will not be cost-efficient to rely on internal supply of clinker and cement, as this will result in higher transportation costs which may take up a significant portion of the overall cement production cost. Meanwhile, some of the CNBMG Group and its affiliates are geographically close to the clinker and cement companies in the Group within the Deficit Regions.

The Board believes that purchasing clinker and cement from such CNBMG Group and its affiliates can bring the following benefits to the Company:

- reducing the overall procurement and transportation costs for the Group in the Deficit Regions; and
- the clinker and cement produced by CNBMG Group and its affiliates are reliable and of high quality, as evidenced by CNBMG Group and its affiliates being consistently named as one of the designated clinker and cement suppliers for large scale projects in the cement industry and key national cement projects.

Sale of clinker and cement to CNBMG Group companies and its affiliates

CNBMG Group and its affiliates have similar transportation costs concerns due to the lack of geographical proximity among certain of their clinker and cement production units and clinker and cement companies, and therefore would need to purchase clinker and cement from suppliers in closer proximity from time to time.

The Group owns clinker and cement production units that are close to quite a few clinker and cement companies within CNBMG Group and by selling clinker and cement to CNBMG Group and its affiliates, the Board believes that the Company can increase its overall sales volume, thereby effectively generating higher revenue and profits.

Based on the abovementioned reasons, the Company believes that entering into such transactions with CNBMG Group and its affiliates will be beneficial to the Group.

INFORMATION ON THE RELEVANT PARTIES

The Company

The Company is a public limited company incorporated in Cayman Islands. It engages in the production of clinker, cement and concrete in the PRC.

Shandong Shanshui

Shandong Shanshui is a limited liability company incorporated in the PRC and is engaged in investment holding. It is the Company's main operating entity and indirect wholly-owned subsidiary.

CNBMG

CNBMG is a state-owned limited liability company incorporated in the PRC and is engaged in the business of building materials in the PRC. It is the controlling shareholder of CNBM.

CNBM

CNBM is a leading building materials company in the PRC with significant operations in the cement, new materials and engineering services businesses, with its shares listed on the Stock Exchange (stock code: 3323). It is a substantial shareholder of the Company. Its controlling shareholder and ultimate beneficial owner is CNBMG.

Shandong Quanxing

Shandong Quanxing is a limited liability company incorporated in the PRC, and is engaged in the business of the operations of cement, sandstone and aggregate products under the "Shenfeng" and "Quanxing" brands, the production and processing of cement products, and provision of cement technology services.
