What is this product?

The W.I.S.E. – CSI HK 100 Tracker™ (the “**Sub-Fund**”) is a fund constituted in the form of a unit trust and is a sub-fund under the World Index Shares ETFs, which is an umbrella unit trust established under the laws of Hong Kong. The Units of the Sub-Fund are listed on The Stock Exchange of Hong Kong Limited (“**SEHK**”). The Sub-Fund is a passively managed index tracking exchange traded fund falling under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds. These units are traded on the SEHK essentially like shares.

Objective and Investment Strategy

Objective

The Sub-Fund is an index-tracking exchange traded fund which seeks to track the performance of the CSI Hong Kong 100 Index (the “**Underlying Index**”).

Strategy

In order to achieve the investment objective of the Sub-Fund, the Manager will adopt a representative sampling strategy for the Sub-Fund and the Sub-Fund will invest in a representative sample of the index securities of the Underlying Index (“**Index Securities**”). The Sub-Fund may not from time to time hold all the Index Securities and the Sub-Fund may not invest in an Index Security in the same weighting as such Index Security has in the Underlying Index. The Manager may overweight certain constituent security relative to the relevant constituent securities’ respective weightings in the Underlying Index on the condition that the maximum extra weighting in any constituent security of the Underlying Index will not exceed four per cent (4%) under normal circumstances.

In addition, the Sub-Fund may have holding of Securities which are non-constituent stocks from time to time in circumstances which are independent of the Manager, including where trading in a constituent security has been suspended, such holding results from a corporate action of a constituent security, or the portfolio is being rebalanced in anticipation or response to a rebalance of the Underlying Index.

The Manager has no current intention to engage in any stock lending activities. The Sub-Fund may by giving to the Unitholders one (1) month’s prior notice engage in securities lending activities.

Underlying Index

The Underlying Index, launched on 7 May 2008, consists of 100 constituent securities listed on the SEHK. Please refer to Appendix I of the Prospectus on the detailed selection methodology of the Underlying Index. The Underlying Index is compiled and managed by China Securities Index Co., Ltd. (the “**Index Provider**”), which was established jointly by the Shenzhen Stock Exchange and Shanghai Stock Exchange to provide services relating to securities indices. The Underlying Index does not have A share constituent stocks.

The list of constituent stocks of the Underlying Index with their respective weightings are available on the website of the Index Provider^ (www.csindex.com.cn). Investors should note that the list of constituent stocks of the Underlying Index may be updated from time to time.

For further information relating to the Underlying Index, please refer to the website of the Index Provider^ (www.csindex.com.cn).

Use of derivatives / investment in derivatives

The Sub-Fund will not use derivatives for any purposes.

What are the key risks?

Investment involves risks. Please also refer to the Prospectus for details including the risk factors.

1. **General investment risk** – The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee in respect of repayment of principal.
2. **Concentration risk** – Exposure of the Sub-Fund is concentrated in securities of companies listed on the SEHK. Such companies may have substantial exposure to the risks in Hong Kong and/or the PRC. As a result, the value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Hong Kong and/or PRC market.
3. **Passive investment risk** – The Sub-Fund is passively managed. Due to the inherent nature of the Sub-Fund, the Manager will not have the discretion to adapt to market changes and may not take an active role in defending the position of the Sub-Fund in declining markets. Hence, any fall in the Underlying Index will result in a corresponding fall in the value of the Sub-Fund.
4. **Tracking error risk** – The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Underlying Index exactly. This tracking error may result from the investment strategy used, and fees and expenses. The Manager will monitor and seek to manage such risk in minimising tracking error. There can be no assurance of exact or identical replication at any time of the performance of the Underlying Index.
5. **Trading risk**
 - The trading price of the Units on the SEHK is driven not only by the Net Asset Value (“NAV”) of the Sub-Fund but also by other market factors such as the supply of and demand for the Units in the SEHK. Therefore, the Units may trade at a substantial premium or discount to the Sub-Fund’s NAV.
 - As investor will pay certain charges (e.g. trading fees and brokerage fees) to buy or sell Units on the SEHK, investors may pay more than the NAV per Unit when buying Units on the SEHK, and may receive less than the NAV per Unit when selling Units on the SEHK.
6. **Equity market risk** – The Sub-Fund’s investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
7. **Termination risk** –The Sub-Fund may be terminated under certain circumstances, for example, where the Underlying Index is no longer available for benchmarking or if at any time one year after the establishment of the Sub-Fund the size of the Sub-Fund falls below HK\$100,000,000. Investors may not be able to recover their investments and suffer a loss when the Sub-Fund is terminated.
8. **Reliance on market maker risks** – Although the Manager will ensure that at least one market maker will maintain a market for the Units and that at least one market maker gives not less than 3 months’ notice prior to terminating market making arrangement under the relevant market maker agreement, liquidity in the market for the units may be adversely affected if there is no or only one market maker for the Units. There is also no guarantee that any market making activity will be effective.
9. **Risk in relation to distribution** – Payment of distributions out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor’s original investment or from any capital gains attributable to that original investments. Any such distributions may result in an immediate reduction of the Net Asset Value per Unit.
