ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF EDA GROUP HOLDINGS LIMITED AND CMB INTERNATIONAL CAPITAL LIMITED

#### Introduction

We report on the historical financial information of EDA Group Holdings Limited (the "Company") and its subsidiaries (together, the "Group") set out on pages IA-4 to IA-96, which comprises the consolidated statements of profit or loss and other comprehensive income, the consolidated statements of changes in equity and the consolidated statements of cash flows of the Group for each of the years ended 31 December 2021, 2022 and 2023 (the "Relevant Periods"), the consolidated statements of financial position of the Group and the statements of financial position of the Company as at 31 December 2021, 2022 and 2023 and material accounting policy information and other explanatory information (together, the "Historical Financial Information"). The Historical Financial Information set out on pages IA-4 to IA-96 forms an integral part of this report, which has been prepared for inclusion in the prospectus of the Company dated 20 May 2024 (the "Prospectus") in connection with the initial listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

# Directors' responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

# Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 Accountants' Reports on Historical Financial Information in Investment Circulars issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# **Opinion**

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Group and the Company as at 31 December 2021, 2022 and 2023 and of the financial performance and cash flows of the Group for each of the Relevant Periods in accordance with the basis of presentation and the basis of preparation set out in notes 2.1 and 2.2 to the Historical Financial Information, respectively.

# APPENDIX IA

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

# Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page IA-4 have been made.

### Dividends

We refer to note 11 to the Historical Financial Information which contains information about the dividends paid by the Company in respect of the Relevant Periods.

# I HISTORICAL FINANCIAL INFORMATION

# **Preparation of Historical Financial Information**

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The financial statements of the Group for the Relevant Periods, on which the Historical Financial Information is based, were audited by Ernst & Young in accordance with Hong Kong Standards on Auditing issued by the HKICPA (the "Underlying Financial Statements").

The Historical Financial Information is presented in Renminbi ("RMB") and all values are rounded to the nearest thousand (RMB'000) except when otherwise indicated.

The English names of all group companies registered in the PRC represent the best efforts made by the directors of the Company to translate the Chinese names of these companies as they do not have official English names.

<sup>(1)</sup> The statutory financial statements of these entities for the years ended 31 December 2021 and 2022 (or since the date of incorporation, where later than the beginning of the Relevant Periods) prepared under Hong Kong Financial Reporting Standards ("HKFRSs") were audited by Ernst & Young, Hong Kong.

<sup>(2)</sup> The statutory financial statements of this entity for the years ended 31 December 2021 and 2022 prepared under PRC Generally Accepted Accounting Principles ("PRC GAAP") were audited by Won GGA Partners CPA Firm LLP ("Won GGA"), certified public accountants registered in the PRC.

<sup>(3)</sup> The statutory financial statements of this entity for the years ended 31 December 2021 and 2022 prepared under PRC GAAP were audited by Won GGA.

- (4) The statutory financial statements of this entity for the years ended 31 March 2021, the period ended 31 December 2021 and the year ended 31 December 2022 prepared in accordance with HKFRSs were audited by LEE CHI FAI & CO, certified public accountants registered in Hong Kong.
- (5) No audited financial statements have been prepared for these entities for each of the Relevant Periods (or since the date of incorporation, where later than the beginning of the Relevant Periods), as the entities were not subject to any statutory audit requirements under the relevant rules and regulations in their jurisdictions of incorporation.
- (6) No audited financial statements have been prepared for this entity for each of the Relevant Periods, as the entity was newly set up in December 2023.

#### 2. ACCOUNTING POLICIES

#### 2.1 BASIS OF PRESENTATION

Pursuant to the group restructuring as set out in the section headed "History and Corporate Structure" in the Prospectus, which was completed on 24 December 2021, the major steps which have been undertaken to effect the Company becoming the holding company of the subsidiaries now comprising the Group were as follows:

On 28 February 2020, EDA CLOUD Company Limited ("EDAHK"), whose interest was 51% ultimately held by the China Lesso Group Holding Limited (the "Lesso Group"), acquired a 20.83% equity interest in Shenzhen EDA from third parties.

On 17 September 2020, the Company was set up by Samanea China Holdings Limited, a wholly-owned subsidiary of the Lesso Group. On 24 December 2021, EDAHK with 20.83% equity interests in Shenzhen EDA was transferred to the Company and was consolidated in the Historical Financial Information by applying the principle of merger accounting, as both EDAHK and the Company are under the common control of the Lesso Group. Details of the accounting policy for business combinations under common control are set out in note 2.4 to the Historical Financial Information.

On 29 September 2020, the Company has also set up a wholly-owned subsidiary called Global Logistics Services Limited ("Global Logistics") in Hong Kong. In January 2021, the Company and Global Logistics entered into an investment agreement with Shenzhen EDA and the former shareholders of Shenzhen EDA, pursuant to which the Company acquired 100% equity interests of Shenzhen EDA, and the Acquisition was completed on 24 December 2021, which was determined as the date of acquisition. The Company accounted for the acquisition of Shenzhen EDA using the acquisition method in accordance with HKFRS 3 Business Combination. Details of the accounting policy of adoption of acquisition method are set out in note 2.4 to the Historical Financial Information and details of the Acquisition are set out in note 29 to the Historical Financial Information.

The consolidated statements of profit or loss and other comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows of the Group for the year ended 31 December 2021 include the results and cash flows of the Company, EDAHK and Global Logistics, as if the Company has been in place since EDAHK was set up before 1 January 2020. The Acquisition of Shenzhen EDA was considered to be completed on 24 December 2021 and its financial information was included in the Historical Financial Information since that date.

All intra-group transactions and balances have been eliminated on consolidation.

#### 2.2 BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with HKFRSs (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) issued by the HKICPA. All HKFRSs effective for the accounting period commencing from 1 January 2023, together with the relevant transitional provisions, have been early adopted by the Group in the preparation of the Historical Financial Information throughout the Relevant Periods.

The Historical Financial Information has been prepared under the historical cost convention, except for certain financial assets which have been measured at fair value.

#### Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the "Group") for the years ended 31 December 2021, 2022 and 2023. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

Generally, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and

(c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and the exchange fluctuation reserve; and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

# 2.3 ISSUED BUT NOT YET EFFECTIVE HKFRSS

The Group has not applied the following revised HKFRSs, that have been issued but are not yet effective, in the Historical Financial Information. The Group intends to apply these revised HKFRSs, if applicable, when they become effective.

Amendments to HKFRS 10 and Sale or Contribution of Assets between an Investor and its HKAS 28 Associate or Joint Venture<sup>3</sup> Amendments to HKFRS 16 Lease Liability in a Sale and Leaseback<sup>1</sup> Amendments to HKAS 1 Classification of Liabilities as Current or Non-current (the "2020 Amendments") 1, 4 Amendments to HKAS 1 Non-current Liabilities with Covenants (the "2022 Amendments") $^{1, 4}$ Amendments to HKAS 7 and Supplier Finance Arrangements<sup>1</sup> HKFRS 7 Amendments to HKAS 21 Lack of Exchangeability<sup>2</sup>

- Effective for annual periods beginning on or after 1 January 2024
- <sup>2</sup> Effective for annual periods beginning on or after 1 January 2025
- No mandatory effective date yet determined but available for adoption
- As a consequence of the 2020 Amendments and 2022 Amendments, Hong Kong Interpretation 5 Presentation of Financial Statements Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause was revised to align the corresponding wording with no change in conclusion

The Group is in the process of making an assessment of the impact of these revised HKFRSs upon initial application. So far, the Group considers that, these revised HKFRSs are unlikely to have a significant impact on the Group's results of operations and financial position.

#### 2.4 MATERIAL ACCOUNTING POLICIES

#### Investments in associates

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in associates are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

The Group's share of the post-acquisition results and other comprehensive income of associates is included in the consolidated statement of profit or loss and other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associates, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associate are eliminated to the extent of the Group's investments in associates, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates is included as part of the Group's investments in associates.

# Business combinations other than those under common control and goodwill

Business combinations not under common control are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in

exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree that are present ownership interests and entitle their holders to a proportionate share of net assets in the event of liquidation at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

The Group determines that it has acquired a business when the acquired set of activities and assets includes an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 December. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a cash-generating unit (or group of cash-generating units) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the cash-generating unit retained.

#### **Business combinations under common control**

Business combinations under common control are accounted for using the principle of merger accounting. Under the principle of merger accounting, the consolidated financial statements incorporate the financial statement items of the acquired entities or businesses in which the common control combination occurs from the date when the acquired entities or businesses first come under the control of the controlling party.

The net assets of the acquired entities or businesses are consolidated using the existing book values from the controlling party's perspective. No adjustments are made to reflect fair values, or recognise any new assets or liabilities as a result of the common control combination. No amount is recognised in respect of goodwill or excess of the acquirer's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination, to the extent of the contribution of the controlling party's interest. All differences between the cost of acquisition (fair value of consideration paid) and the amounts at which the assets and liabilities are recorded (net of any reserves of the acquired entities) have been recognised directly in equity as part of the merger reserve. Acquisition-related costs are expenses as incurred.

The consolidated profit or loss and the consolidated other comprehensive income include the results of each of the acquired entities or businesses from the earliest date presented or since the date when the acquired entities or businesses first come under common control, where this is a shorter period.

#### Fair value measurement

The Group measures its financial assets at fair value through profit or loss at fair value at the end of each of the Relevant Periods. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each of the Relevant Periods.

# Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for non-financial asset is required (other than contract assets and deferred tax assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs. In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the statement of profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each of the Relevant Periods as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to the statement of profit or loss in the period in which it arises.

### Related parties

A party is considered to be related to the Group if:

- (a) the party is a person or a close member of that person's family and that person
  - (i) has control or joint control over the Group;
  - (ii) has significant influence over the Group; or

# ACCOUNTANTS' REPORT OF THE GROUP

(iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

- (b) the party is an entity where any of the following conditions applies:
  - (i) the entity and the Group are members of the same group;
  - (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
  - (iii) the entity and the Group are joint ventures of the same third party;
  - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - (v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;
  - (vi) the entity is controlled or jointly controlled by a person identified in (a);
  - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
  - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

#### Property, plant and equipment and depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Leasehold improvements	Over the remaining lease terms of the leased buildings
Plant and machinery	10% to 32%
Motor vehicles	19% to 32%
Furniture and office equipment	19% to 32%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

# Intangible assets (other than goodwill)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is the fair value at the date of acquisition. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Technology and customer relationship are stated at cost less any impairment loss and are amortised on the straight-line basis over their estimated useful life of 10 years.

# Research and development expenses

All research expenses are charged to the statement of profit or loss as incurred.

Expenditure incurred on projects to develop new technologies is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Development expenditure which does not meet these criteria is expensed when incurred.

#### Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

# Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

# (a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Warehouses and offices

19 months to 10 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

### (b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

# (c) Short-term leases

The Group applies the short-term lease recognition exemption to its short-term leases of some warehousing units in a building (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option).

Lease payments on short-term leases are recognised as an expense on a straight-line basis over the lease term.

### Investments and other financial assets

#### Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income ("FVOCI"), and fair value through profit or loss ("FVPL").

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under HKFRS 15 Revenue from Contracts with Customers in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

### Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in the statement of profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition as at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model.

# Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

### Impairment of financial assets

The Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

# General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group considers a financial asset in default when contractual payments are 60 days past due based on the industry practice and the historical information, including the Group's credit risk control practices and the historical recovery rate of financial assets. However, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables and contract assets which apply the simplified approach as detailed below.

- Stage 1 Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
- Stage 2 Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

## Simplified approach

For trade receivables and contract assets that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

# Financial liabilities

#### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as loans and borrowings, and payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, and payables, net of directly attributable transaction costs.

# Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (trade and other payables, and borrowings)

After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

# Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

#### Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

#### Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and tax laws that have been enacted or substantively enacted by the end of each of the Relevant Periods, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of each of the Relevant Periods between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each of the Relevant Periods and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each of the Relevant Periods and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each of the Relevant Periods.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

# Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

# Revenue recognition

# Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. When the contract contains a financing component which provides the Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in HKFRS 15.

# (i) First-mile international freight services

Services included in the first-mile international freight services are mainly for transporting the customers' goods from designated domestic locations to overseas designated locations, which includes other value-added services, such as customs clearance and etc.. Revenue from the provision of first-mile international freight services is recognised over time, using an output method to measure progress towards complete satisfaction of the service, which is to recognise

revenue on the basis of direct measurements of the value of the services transferred to the customer to date relative to the remaining services promised under the contract, that best depicts the Group's performance in transferring control of services.

# (ii) Last-mile fulfillment services

Last-mile fulfillment services include providing one-stop logistic service from the overseas port to the overseas destination designated by the end consumers, which includes different steps such as overseas warehousing, other value-added services and deliveries. These services are requested by customers as needed and they are not dependent on other services that are provided by the Group. These services do not significantly affect each other and, therefore, are not highly interdependent or highly interrelated. Revenue generated from all these services would be measured and recognised with reference to the purchase order completion measurement, which are on the same basis as days consumed and over time.

For both types of services, the customers simultaneously receive and consume the benefits provided by the Group's performance as the Group performs.

#### Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

# **Contract assets**

If the Group performs by transferring services to a customer before being unconditionally entitled to the consideration under the contract terms, a contract asset is recognised for the earned consideration that is conditional. Contract assets are subject to impairment assessment, details of which are included in the accounting policy for impairment of financial assets. They are reclassified to trade receivables when the right to the consideration becomes unconditional.

### **Contract liabilities**

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related services to the customer).

# **Employee benefits**

#### Pension schemes

In accordance with the relevant laws and regulations, the Group's employees participate in various defined contribution plans and state-managed retirement benefit plans in the countries in which the Group operates. Payments to these plans, where the Group's obligations under such plans are equivalent to a defined contribution plan, are recognised as an expense based on certain percentages of the salaries of these employees on a monthly basis when employees have rendered services entitling them to the contributions.

### Housing benefits, medical insurances and other social insurances

PRC employees of the Group are entitled to participate in various government-supervised housing funds, medical insurances and other social insurance plans. The Group contributes to these funds based on certain percentages of the salaries of these employees on a monthly basis. The Group's liability in respect of these funds is limited to the contribution payable in each period. Contributions to the housing funds, medical insurances and other social insurances are expensed as incurred.

# Mandatory Provident Fund retirement benefit scheme (the "MPF Scheme")

The Group's employer contributions vest fully with the employees when contributed into the MPF Scheme. Contributions are made based on a percentage of the employees' basic salaries in accordance with the rules of the MPF Scheme.

# **Borrowing costs**

Borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

## **Dividends**

Dividends are recognised as a liability when they are approved by the shareholders in a general meeting.

#### Foreign currencies

These financial statements are presented in RMB, which is the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of each of the Relevant Periods. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

The functional currencies of certain overseas subsidiaries are currencies other than the RMB. As at the end of each of the Relevant Periods, the assets and liabilities of these entities are translated into RMB at the exchange rates prevailing at the end of each of the Relevant Periods and their statements of profit or loss are translated into RMB at the exchange rates that approximate to those prevailing at the dates of the transactions.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve, except to the extent that the differences are attributable to non-controlling interests. On disposal of a foreign operation, the cumulative amount in the reserve relating to that particular foreign operation is recognised in profit or loss.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into RMB at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into RMB at the weighted average exchange rates for the year.

#### 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Historical Financial Information requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

#### **Judgments**

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the Historical Financial Information:

#### Identifying performance obligations in provision of last-mile fulfillment services

The Group provides last-mile fulfillment services from the overseas port to the overseas destination designated by the end consumers, which includes different steps such as overseas warehousing, other value-added services and deliveries. The orders are placed separately by the customers, which means such promises by the Group are separately identifiable. These services are requested by customers as needed and they are not dependent on other services that are provided by the Group. These services do not significantly affect each other and, therefore, are not highly interdependent or highly interrelated, because the Group would need to fulfill its promise to these independent services separately. Consequently, these services which are included in last-mile fulfillment services are identified as separate performance obligations.

#### Deferred tax assets

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised. This requires significant judgement on the tax treatments of certain transactions and also assessment on the probability that adequate future taxable profits will be available for the deferred tax assets to be recovered.

#### Significant judgement in determining the acquisition date of business combination

The Company entered into investment agreements with Shenzhen EDA and Shenzhen EDA's shareholders, in order to acquire the 100% equity interest of Shenzhen EDA and to restructure the Company to be the holding company in 2021. According to the investment agreements, the acquisition would be completed through several steps, otherwise the agreements would be reversed and cancelled if the steps are not completed. Although the Company has obtained 100% equity interests in Shenzhen EDA on 21 December 2021, the above mentioned steps for completion had not yet fully completed until 24 December 2021. Management considered that these steps for completion are linked transactions and therefore considered the completion of Acquisition of Shenzhen EDA on 24 December 2021.

#### **Estimation uncertainty**

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of each of the Relevant Periods, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

#### Fair value measurement for the consideration under business combination

Significant judgements and estimates were involved in the fair value measurement of the capital reserve arising from acquisition and the pre-existing investment in an associate. These significant judgements and estimates include the adoption of appropriate valuation methodologies and the use of key assumptions, including recent transaction price, discount rate and discount for lack of control, in the valuation. See note 29 to the Historical Financial Information for more details.

# Fair value assessment of the identified intangible assets and the recognition of goodwill arising from business combination

Significant judgements and estimates were involved in the fair value assessment of the identified intangible assets, being technology and customer relationship and the recognition of goodwill arising from business combination. These significant judgements and estimates include the adoption of appropriate valuation methodologies and the use of key assumptions in the valuation (mainly annual revenue growth rates, gross profit margins, discount rates and expected useful lives of the technology and customer relationship). See notes 15 and 16 to the Historical Financial Information for more details.

#### Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating units and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill as at 31 December 2021, 2022 and 2023 was RMB76,443,000. Further details are given in note 15 to the Historical Financial Information.

#### Provision for expected credit losses on trade receivables

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on groupings of various customers/debtors segments that have similar loss patterns (i.e. by service type and customer type).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions are expected to deteriorate over the next year which can lead to an increased number of defaults in the cross-border e-commerce sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on the Group's trade receivables is disclosed in note 19 to the Historical Financial Information.

### Leases — estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the

lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

#### 4. OPERATING SEGMENT INFORMATION

The Group is principally engaged in the provision of first-mile international freight services and last-mile fulfillment services, including overseas warehousing, other value-added services and deliveries for the cross-border e-commerce participants based in Chinese Mainland.

HKFRS 8 Operating Segments requires operating segments to be identified on the basis of internal reporting about components of the Group that are regularly reviewed by the chief operating decision-maker in order to allocate resources to segments and to assess their performance. The information reported to the directors of the Company, who are the chief operating decision-makers, for the purpose of resource allocation and assessment of performance does not contain discrete operating segment financial information and the directors reviewed the financial results of the Group as a whole. Therefore, no further information about the operating segment is presented.

#### Geographical information

#### (a) Revenue from external customers

_	Year ended 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000

	248,026	224,324	171,765	

The above non-current asset information is based on the locations of the assets and excludes deferred tax assets and goodwill.

#### Information about major customers

For the years ended 31 December 2022 and 2023, revenue from a single customer, including sales to a group of entities which are known to be under common control with that customer, contributed 12.4% and 12.5% to the Group's revenue, respectively.

# 5. REVENUE, OTHER INCOME AND GAINS

#### Revenue

An analysis of revenue is as follows:

	Year ended 31 December			
	2021 2022		2023	
	RMB'000	RMB'000	RMB'000	
Revenue from contracts with customers	<u> </u>	708,665	1,209,304	

#### (a) Disaggregated revenue information

	Year ended 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Type of services				
First-mile international freight services		187,798	259,505	
Last-mile fulfillment services		520,867	949,799	
		708,665	1,209,304	
Timing of revenue recognition				
Services transferred over time		708,665	1,209,304	

The following table shows the amounts of revenue recognised in the Relevant Periods that were included in the contract liabilities at the beginning of the respective periods:

_	Year ended 31 December			
_	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Revenue recognised that was included in contract liabilities at the beginning of the				
year:				
First-mile international freight services	_	1,961	3,278	
Last-mile fulfillment services	<u> </u>	5,622	7,200	
_		7,583	10,478	

#### (b) Performance obligations

Information about the Group's performance obligations is summarised below:

For first-mile international freight services including provision of transportation from the designated locations in Chinese Mainland to the designated oversea locations, the performance obligation is satisfied over time and the completion progress of these services is therefore measured by the number of days from the date the Group receiving the goods from the customers to the report date over the estimated service period. Payment is generally due within 10 days from the date of billing, extending up to two months or is settled on an advance receipt basis depending on the relationships with the customers.

For last-mile fulfillment services including the provision of one-stop logistic services from the overseas port to the overseas destination designated by the end customers, which includes different steps such as overseas warehousing, other value-added services and local deliveries, the performance obligation is satisfied over time as progress towards the days consumed over the estimated service period. Payment is generally due within 10 days from the date of billing, extending up to two months or is settled on an advance receipt basis depending on the relationships with the customers.

The Group has elected the practical expedient for not to disclose the remaining performance obligations for these types of contracts because the performance obligation is part of a contract that has an original expected duration of one year or less.

### Other income and gains

	Year ended 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000

#### Notes:

There was no arrangement under which a director or the chief executive waived or agreed to waive any remuneration during the Relevant Periods.

<sup>\*</sup> Mr. Luo Jianfeng was appointed as a director of the Company on 17 September 2020.

<sup>\*\*</sup> Mr. Liu Yong was appointed as the chairman of the Board, a director and the chief executive officer of the Company on 11 October 2022.

<sup>\*\*\*</sup> Mr. Cheung Man Yu, Mr. Zuo Manlun and Ms. Li Qin were appointed as directors of the Company on 11 October 2022

#### 9. FIVE HIGHEST PAID EMPLOYEES

No employee received any fees or emoluments in respect of their services rendered to the Group during the year ended 31 December 2021. The five highest paid employees for the years ended 31 December 2022 and 2023 included 2 and 2 directors, respectively, details of whose remuneration are set out in note 8 above. Details of the remuneration for the years ended 31 December 2022 and 2023 of the remaining highest paid employees who are neither a director nor chief executive of the Company are as follows:

	Year ended 31 December					
	2021	2022	2023			
	RMB'000	RMB'000	RMB'000			
Salaries, allowances and benefits in kind	_	1,997	1,809			
Pension scheme contributions	_	216	296			
Performance related bonuses		830	1,080			
		3,043	3,185			

The number of non-director and non-chief executive highest paid employees whose remuneration fell within the following bands is as follows:

_	Number of employees							
_	Year ended 31 December							
_	2021	2022	2023					
Nil to HK\$1,000,000	_	_	_					
HK\$1,000,001 to HK\$1,500,000	<u> </u>	3	3					
_		3	3					

#### 10. INCOME TAX

The Group is subject to income tax on an entity basis on profits arising in or derived from the tax jurisdictions in which members of the Group are domiciled and operate.

#### Hong Kong profits tax

Hong Kong profits tax has been provided at the rate of 16.5% on the estimated assessable profits arising in Hong Kong for the Relevant Periods. No provision for Hong Kong profits tax was made as the Group had no assessable profits arising in Hong Kong during the year ended 31 December 2021. Since 2022, one Hong Kong subsidiary of the Group is a qualifying entity under the two-tiered profits tax rates regime. The first HK\$2,000,000 of assessable profits of this subsidiary are taxed at 8.25% and the remaining assessable profits are taxed at 16.5%.

#### PRC corporate income tax

The Group's income tax provision in respect of its operations in Chinese Mainland has been calculated at the statutory tax rate of 25% on the taxable profits for the Relevant Periods, based on the existing legislation, interpretations and practices in respect thereof.

One of the Group's PRC subsidiaries is qualified as High and New Technology Enterprises and is entitled to a preferential corporate income tax rate of 15% for the years ended 31 December 2021, 2022 and 2023. Another PRC subsidiary is entitled to a preferential corporate income tax rate of 15% in Qianhai Shenzhen-Hong Kong Modern Service Industry Cooperation Zone since 1 August 2023.

#### Income tax for other jurisdictions

During the Relevant Periods, income tax of other jurisdictions mainly arose from the United States, the United Kingdom, Canada and Australia.

The Company's subsidiaries incorporated in the United States for the Relevant Periods were subject to the federal tax at a rate of 21% and the state tax at the rates ranging from 8.8% to 11.5%. In addition, the United Kingdom profits taxes have been provided at a rate of 19%, Canada profits tax has been provided at a rate of 26.5% and Australia profits tax has been provided at a rate of 30% on the estimated assessable profits arising in the respective jurisdictions during the years ended 31 December 2022 and 2023.

#### Pillar Two income taxes

The Group has applied the mandatory exception to recognising and disclosing information about deferred tax assets and liabilities arising from Pillar Two income taxes, and will account for the Pillar Two income taxes as current tax when incurred. Pillar Two legislation has been enacted or substantively enacted in certain jurisdictions in which the Group operates, and the legislation will be effective for the Group's financial year beginning 1 January 2024. The Group is in the process of assessing the related exposure from Pillar Two income taxes. Based on the assessment, the Group does not expect a material exposure to Pillar Two income taxes.

The share of tax attributable to an associate for the year ended 31 December 2021 were RMB1,445,000, which is included in "Share of results of an associate" in the consolidated statements of profit or loss and other comprehensive income. There is no share of tax attributable to an associate for the years ended 31 December 2022 and 2023.

#### 11. DIVIDENDS

During the years ended 31 December 2021 and 2022, no dividends have been paid or declared by the Company.

During the year ended 31 December 2023, dividend of RMB23,000,000 has been declared and paid by the Company.

# 12. EARNINGS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

The calculation of the basic earnings per share amounts is based on the profit for the year attributable to ordinary equity holders of the Company, and the weighted average number of ordinary shares of 102,459, 228,210 and 228,210 in issue during each of the Relevant Periods, respectively.

The basic earnings per share is calculated by dividing the profit attributable to owners of the parent by the weighted average number of ordinary shares during the Relevant Periods.

The Company did not have any potential dilutive ordinary shares outstanding during the Relevant Periods. Diluted earnings per share is equal to basic earnings per share.

The calculation of basic and diluted earnings per share are based on:

_	Year	ended 31 December	
_	2021	2022	2023
Earnings			
Profit attributable to owners of the parent			
(RMB'000)	3,046	36,292	69,403

#### 14. LEASES

#### The Group as a lessee

The Group has lease contracts for some warehouses and offices used in its operations. Leases of some warehouses and an office generally have lease terms of 19 months to 10 years. Generally, the Group is restricted from assigning and subleasing the leased assets outside the Group.

# (a) Right-of-use assets

The carrying amounts of right-of-use assets and the movement during each of the Relevant Periods are as follows:

		As	s at 31 December	
	Note	2021	2022	2023
		RMB'000	RMB'000	RMB'000
At beginning of year			162,172	139,425
Additions as a result of acquisition of				
subsidiaries	29	162,172	_	_

Exchange realignment			10,412	2,289
At end of year		162,172	139,425	107,743

#### (b) Lease liabilities

The carrying amount of lease liabilities and the movements during each of the Relevant Periods are as follows:

			At 31 December	
	Notes	2021	2022	2023
		RMB'000	RMB'000	RMB'000
At beginning of year			171,023	153,791
Additions as a result of acquisition of				
subsidiaries	29	171,023	_	
Accretion of interest recognised				
during the year	6	_	10,193	8,820
Payment		_	(38,619)	(40,741)
Exchange realignment			11,194	2,529
At end of year		171,023	153,791	124,399
Analysed into:				
Within one year		27,586	31,351	34,724
In the second year		29,685	34,300	30,931
In the third to fifth years, inclusive		76,516	61,965	39,546
Beyond five years		37,236	26,175	19,198
		171,023	153,791	124,399

The maturity analysis of lease liabilities is disclosed in note 34 to the Historical Financial Information.

(c) The amounts recognised in profit or loss in relation to leases are as follows:

_	Year ended 31 December			
_	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Interest on lease liabilities	_	10,193	8,820	
Depreciation charge of right-of-use assets	_	33,159	33,971	
Expense relating to short-term leases	<u> </u>	1,121	2,571	
Total amount recognised in profit or loss		44,473	45,362	

(d) The total cash outflow for leases is disclosed in note 30 to the Historical Financial Information.

#### 15. GOODWILL

	As at 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
At the beginning of the year	_	76,443	76,443	
Acquisition of subsidiaries (note 29)	76,443			
At the end of the year	76,443	76,443	76,443	

#### Impairment testing of goodwill

Goodwill acquired through business combination is allocated to Shenzhen EDA which was regarded as a cash-generating unit (the "Shenzhen EDA CGU").

The recoverable amount of the Shenzhen EDA CGU has been determined based on a value in use calculation using cash flow projections based on financial budget covering a five-year period approved by senior management.

	Annual			
	revenue	Terminal	<b>Budgeted gross</b>	Pre-tax
	growth rate	growth rate	margins	discount rate
31 December 2021	6.8%	3.0%	15.5%-16.9%	21.1%
31 December 2022	8.0%	3.0%	15.5%-16.0%	21.0%
31 December 2023	6.3%	2.3%	15.0%-15.1%	21.7%

The above assumptions were used in the value in use calculation of the Shenzhen EDA CGU. The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill:

Annual revenue growth rate — The predicted annual revenue growth rate for the five years subsequent to the date of assessment is one of the assumptions used in the value in use calculations. The annual revenue growth rate is based on the historical performance and market outlook perceived by management.

Terminal growth rate — The terminal growth rate was estimated to be 3% as at 31 December 2021 and 2022 and 2.3% as at 31 December 2023, which has taken into consideration the prevailing industry practice.

Budgeted gross margins — The basis used to determine the value assigned to the budgeted gross margins is the average gross margins achieved in the year immediately before the budget year, increased for expected efficiency improvements, and expected market development.

Discount rate — The discount rate used is before tax and reflects specific risks relating to the relevant unit.

# Sensitivity analysis

Details of the headroom measured by the excess of the recoverable amount over the carrying amount are as follows:

	As at 31 December			
	2021 2022		2023	
	RMB'000	RMB'000	RMB'000	
Shenzhen EDA CGU	3,750	13,532	186,029	

Management has undertaken sensitivity analysis on the impairment test of goodwill. The assumptions used in the impairment review in the table below would have, in isolation, led to the Shenzhen EDA CGU's recoverable amount to be equal to its carrying value as at 31 December 2021, 2022 and 2023:

Change of key assumptions required for carrying value to
equal recoverable amount

_	equal recoverable amount			
_	2021	2022	2023	
Annual revenue growth rates (during the				
five-year period)	(5.4%)	(10.8%)	(51.1%)	
Gross profit margin	(5.1%)	(1.8%)	(12.3%)	
Pre-tax discount rate	1.2%	4.0%	19.9%	

At the end of each of the Relevant Periods, the management of the Group considered there was no reasonably possible change in the key assumptions mentioned above that would cause the carrying amount of the Shenzhen EDA CGU to exceed its recoverable amount. The management of the Company determined that there was no impairment of the Shenzhen EDA CGU.

#### 17. INVESTMENTS IN ASSOCIATES

Δc	af	31	December
AS	aı	31	December

_				
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Share of net assets	2,904	11,453	_	
Goodwill	<u> </u>			
	2,904	11,453	<u> </u>	

Particulars of the associates are as follows:

			Percentage of	
	Particulars of issued capital	Place of incorporation/ registration and	ownership interest attributable to	
Name	held	business	the Group	Principal activities
Shenzhen EDA <sup>(1)</sup>	Registered capital	PRC/Chinese Mainland	20.83	Provision of logistics services and warehousing
Hangzhou Yuehui Venture Capital Partnership# ("Hangzhou Yuehui") <sup>(2)</sup>	Partnership shares	PRC/Chinese Mainland	16.13	Capital investment

Notes:

- (1) On 28 February 2020, EDAHK acquired 20.83% equity interests in Shenzhen EDA from independent third party and capital injection at a total consideration of RMB25,000,000. In January 2021, the Company entered into investment agreements with the former controlling shareholders of Shenzhen EDA to acquire the remaining equity interest in Shenzhen EDA. In the opinion of directors, on 24 December 2021, all steps set out in the agreements had been completed and the Company then has obtained the control of Shenzhen EDA, therefore it is determined as the acquisition date. The Group remeasured the investment in the associate to fair value at the acquisition date and was deemed to had been disposed of in exchange for the step-acquisition of Shenzhen EDA. The resulting loss on deemed disposal of an associate of RMB5,656,000 was recognised in profit or loss for the year ended 31 December 2021.
- (2) Hangzhou Yuehui was incorporated on 15 September 2021. The Group considers it has significant influence over Hangzhou Yuehui even though it owns less than 20% of the equity interests because the Group is the limited partner and has the voting power in Hangzhou Yuehui. On 21 June 2023, Hangzhou Yuehui was disposed by the Group to a related party at a consideration of RMB12,000,000.
- The English name of this entity represents the best efforts made by the directors of the Company to translate the Chinese name as the entity does not have an official English name.

The following table illustrates the summarised financial information in respect of Hangzhou Yuehui, adjusted for any differences in accounting policies and reconciled to the carrying amount in the consolidated statements of financial position:

## Hangzhou Yuehui

_	As at 31 December			
_	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Current assets	9,489	18,953	_

Exchange realignment	863	8		871
At 31 December 2023	35,590		3,108	38,698

For presentation purposes, certain deferred tax assets and liabilities have been offset in the consolidated statement of financial position. The following is an analysis of the deferred tax balances of the Group for financial reporting purposes:

	As at 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Net deferred tax assets recognised in the				
consolidated statement of financial				
position	6,373	8,446	8,013	
Net deferred tax liabilities recognised in				
the consolidated statement of financial				
position	11,028	9,896	8,796	

The Group has tax losses arising in Hong Kong of RMB286,000, RMB593,000 and RMB715,000 at the end of each of the Relevant Periods, respectively, that are available indefinitely for offsetting against future taxable profits of the companies from which the losses arose. Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the tax losses can be utilised.

The Group is liable for withholding taxes on dividends distributed by those subsidiaries established in Chinese Mainland in respect of earnings generated from 1 January 2008. The applicable rate is 10% for the Group. As at 31 December 2021, 2022 and 2023, the Group has not recognised deferred tax liabilities of RMB1,339,000, RMB4,815,000 and RMB12,201,500 in respect of temporary differences relating to the undistributed profits of subsidiaries, amounting to RMB13,390,000, RMB48,154,000 and RMB122,015,000, that would be payable on the distribution of these retained profits as the Company controls the dividend policy of these subsidiaries and plans to retain such undistributed profits in Chinese Mainland for business development. Therefore, it is not probable that these profits will be distributed in the foreseeable future.

#### 19. TRADE RECEIVABLES

_	As at 31 December			
	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Related parties	2,524	458	_	
Third parties	67,035	87,850	151,459	
	69,559	88,308	151,459	
Impairment	(25,353)	(17,907)	(9,028)	
	44,206	70,401	142,431	

The Group's trading terms with its customers are mainly on credit, except for new customers, where payment in advance is normally required. The credit period is generally 10 days from the date of billing, extending up to two months for major customers. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by management. The Group's trade receivables from third parties relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are non-interest-bearing.

An ageing analysis of the trade receivable as at the end of each of the Relevant Periods, based on the invoice date and net of loss allowance, is as follows:

As at 31 December

2022

RMB'000

RMB'000

08

69.524

141.771

	RMB'000	RMB'000	RMB'000

Exchange realignment	<u> </u>	522		
At end of year	25,353	17,907	9,028	

An impairment analysis is performed at each reporting date. The Group uses a provision matrix to measure expected credit losses for trade receivables. The provision rates are based on groupings of various customer segments with similar loss patterns (i.e., by customer type and service type). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Besides, for balances in relation to individual customers which bear specific credit risk depending on the repayment history, financial position and other external or internal information, management estimates the amounts recoverable by taking into account any credit enhancement held by the Group and recognises provision against the difference between the net remaining balance and the amount recoverable.

Set out below is the information about the credit risk exposure on the trade receivables using a provision matrix:

# Group A

		Third parties		Related parties	Total

# 20. CONTRACT ASSETS

As at 31 December			
2021	2022	2023	
RMB'000	RMB'000	RMB'000	
_		275	
<u> </u>	<u></u> .	(7)	
<u> </u>	<u> </u>	268	
	2021	2021 2022	

Contract assets are initially recognised for revenue earned from the provision of cross-border direct delivery services as the receipt of consideration is conditional on successful completion of delivering to the overseas destination designated by the end consumers. Upon completion and acceptance by the end consumers, the amounts recognised as contract assets are reclassified to trade receivables. The increase in contract assets as at 31 December 2023 was the result of the business development with a new customer that has different billing arrangement during the year ended 31 December 2023.

During the year ended 31 December 2023, RMB7,000 was recognised as an allowance for expected credit losses on contract assets. The Group's trading terms and credit policy with customers are disclosed in note 19 to the Historical Financial Information.

The expected timing of recovery or settlement for contract assets is within one year.

The movements in the loss allowance for impairment of contract assets are as follows:

	As at 31 December			
	2021	2021 2022		
	RMB'000	RMB'000	RMB'000	
At beginning of year	_		_	
Impairment losses	<u></u>		7	
At end of year	_		7	

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates for the measurement of the expected credit losses of the contract assets are based on those of the trade receivables as the contract assets and the trade receivables are from the same customer bases. The provision rates of contract assets are based on days past due of trade receivables for groupings of various customer segments with similar loss patterns (i.e., by customer type and service type). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

Set out below is the information about the credit risk exposure on the Group's contract assets using a provision matrix:

Notes:

<sup>(</sup>i) The loans to directors and employees as at 31 December 2021 are unsecured, interest-free and had maturity of three months and two years, respectively.

# ACCOUNTANTS' REPORT OF THE GROUP

The loans to directors and employees as at 31 December 2022 are unsecured, had an interest rate ranging from 0% to 5% and maturity ranging from one month to two years.

(ii) The loan receivables as at 31 December 2021 are unsecured, interest-free and had maturity of six months.

The loan receivables as at 31 December 2022 are unsecured, had an interest rate ranging from 0% to 8% and maturity ranging from six months to one year.

- (iii) The financial assets included in the above balances relate to receivables for which there was no recent history of default and past due amounts. As at the end of each of the Relevant Periods, the loss allowance was assessed to be not material.
- (iv) As at 31 December 2021, 2022 and 2023, the outstanding balances with related parties included in the balances of prepayment and other receivables amounted of RMB270,000, RMB275,000 and RMB280,000, respectively, represented the rental deposit of warehouse leasing in the overseas, which were trade in nature. The remaining outstanding balances with related parties included in the balances of prepayment and other receivables as at the end of each of the Relevant Periods were non-trade in nature and further details of which are set out in note 31 to the Historical Financial Information.

#### 22. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

	As at 31 December		
	2021	2022	2023
	RMB'000	RMB'000	RMB'000
Wealth management products	30,165	3,061	

The Group's wealth management products at 31 December 2021, 2022 and 2023, were issued by banks in Chinese Mainland. They are classified as financial assets at fair value through profit or loss as their contractual cash flows do not qualify for solely payments of principal and interest.

AUD	95	142	346
CAD	463	2,129	1,624
_	54,640	112,745	221,427

Note: The RMB is not freely convertible into other currencies, however, under Chinese Mainland's Foreign Exchange Control Regulations and Administration of Settlement, and Sale and Payment of Foreign Exchange Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Time deposit is made for a period of three years and earn interest at the respective time deposit rate. However, the Group can withdraw the time deposit in a period less than the pre-determined period of three years and such time deposit then earns interest at floating rates based on daily bank deposit rates. Therefore, management considers that such time deposit is held for short term cash commitment. The bank balances and time deposit are deposited with creditworthy banks with no recent history of default.

#### 24. TRADE PAYABLES

## The Group

	As at 31 December			
	2021	2023		
	RMB'000	RMB'000	RMB'000	
Trade payables				
— Related parties (note 31)	539	154	166	
— Third parties	83,393	61,655	127,709	
	83,932	61,809	127,875	

An ageing analysis of the trade payables at the end of each of the Relevant Periods, based on the invoice date, is as follows:

_	As at 31 December			
_	2021	2022	2023	
	RMB'000	RMB'000	RMB'000	
Within 1 year	83,226	60,862	127,272	
1 to 2 years	307	375	84	
2 to 3 years	399	240	35	
Over 3 years	<u> </u>	332	484	
	83,932	61,809	127,875	

Trade payables are unsecured, interest-free and normally settled on terms of 30 to 60 days.

## 25. OTHER PAYABLES AND ACCRUALS

# The Company

As at 31 December 2021 2022 2023 RMB'000 RMB'000 RMB'000 Amount due to the immediate holding 70,144 153 company ...... Amount due to an intermediate holding company ...... 11 Amounts due to subsidiaries . . . . . . . . . . . . 17,757 1,324 22 180 Other payables ...... 70,166 344 19,081

## The Group

		As at 31 December		
		2021	2022	2023
	Note	RMB'000	RMB'000	RMB'000
Contract liabilities	<i>(i)</i>	10,393	13,801	10,698
Payroll and welfare payables		9,884	13,135	19,876
Other tax payables		245	355	775

Other payables		4,740	1,199	2,631
		120,809	57,233	35,614

<sup>(</sup>i) Contract liabilities include short-term advances received to render first-mile international freight services and last-mile fulfillment services. The increase in contract liabilities as at 31 December 2021 was mainly due to the business combination of Shenzhen EDA and the increase as at 31 December 2022 was mainly due to business development and the increase in customer base. The decrease as at 31 December 2023 was mainly due to the significant increase in service orders during the year ended 31 December 2023 and resulting in more consumption of the contract liabilities.

- (ii) Other payables and accruals are unsecured, interest-free and repayable on demand.
- (iii) As at 31 December 2021, 2022 and 2023, all the outstanding balances with related parties included in the balances of other payables and accruals were non-trade in nature and further details of which are set out in note 31 to the Historical Financial Information.

31 December 2023	228,210	15

<sup>(</sup>a) On 17 September 2020, the Company issued 100,000 ordinary shares at US\$0.01 each to Samanea China Holdings Limited.

(b) On 24 December 2021, 128,210 ordinary shares were issued and allotted by the Company to an individual and various holding platforms at the issue prices of US\$0.01 each, with a total nominal value of RMB8,000.

#### 28. RESERVES

The amounts of the Group's reserves and the movements therein for the Relevant Periods are presented in the consolidated statements of changes in equity.

## (a) Share premium

The share premium account represents the amount paid by shareholders for capital injection in excess of its nominal value.

# (b) Merger reserve

Deemed capital contribution arising from transferring one of the subsidiaries of the ultimate holding company to the Company without consideration.

## (c) Capital reserve

Capital reserve represents contribution of certain equity interests of Shenzhen EDA from former shareholders/shareholders of Shenzhen EDA for certain equity interests of the Company and the deemed contribution from shareholders of the Group by way of discharge of liability.

#### (d) Statutory surplus reserve

In accordance with the PRC Company Law and the articles of association of the group companies established in the PRC, these companies are required to appropriate 10% of their net profit after tax, as determined under the Chinese Accounting Standards, to the statutory surplus reserve until the reserve balance reaches 50% of their registered capital. Subject to certain restrictions set out in the relevant PRC regulations and in the articles of association of the group companies, the statutory surplus reserve may be used either to offset losses, or to be converted to increase the share capital of the group companies provided that the balance after such conversion is not less than 25% of the registered capital of them. The reserve cannot be used for purposes other than those for which it is created and is not distributable as cash dividends.

# (e) Exchange fluctuation reserve

The exchange fluctuation reserve comprises all foreign exchange differences arising from the translation of the financial statements of companies whose functional currency is not RMB. The reserve is dealt with in accordance with the accounting policy set out in note 2.4 to the Historical Financial Information.

# (f) A summary of statements of changes in equity of the Company is as follows:

## 29. BUSINESS COMBINATION

On 28 February 2020, the Group acquired 20.83% equity interest in Shenzhen EDA at a total consideration of RMB25,000,000 and the investment is accounted as interest in an associate.

In January 2021, the Company entered into investment agreements with the former controlling shareholders of Shenzhen EDA to acquire the remaining 79.17% equity interest, after which Shenzhen EDA became a wholly owned subsidiary of the Group. The acquisition of Shenzhen EDA was completed on 24 December 2021.

The fair values of the identifiable assets and liabilities of Shenzhen EDA at the date of acquisition were as follows:

Property, plant and equipment.         13         9,150           Right-of-use assets         14(a)         162,172           Other intangible assets         16         73,300           Investment in an associate.         2,904           Deferred tax assets         18         6,373           Other non-current assets         500           Financial assets at fair value through profit or loss         30,165           Trade receivables         44,206           Prepayments, deposits and other receivables         75,054           Cash and cash equivalents         54,549           Trade payables         (83,932)           Other payables and accruals         (23,253)           Borrowings — current         (18,049)           Tax payable         (2,962)           Borrowings — non-current         (291)           Lease liabilities         14(b)         (171,023)           Deferred tax liabilities         18         (11,028)           Total identifiable net assets at fair value         147,835           Goodwill on acquisition         15         76,443           Satisfied by:           Cash         69,970           Other payable         2,218           Capital reserve arising from acquisition		Notes	Fair value recognised on acquisition

Capital reserve arising from the business combination represented the fair value of the share warrants granted to the former controlling shareholders of Shenzhen EDA, which was in exchange of Shenzhen EDA's equity interests and considered as part of consideration for acquisition of Shenzhen EDA. The fair value of the capital reserve arising from acquisition of RMB122,130,000 was estimated by using Black-Scholes-Merton Model and was within Level 3 of the fair value hierarchy as the valuations were arrived at by reference to certain significant unobservable inputs. Set out below is a summary of significant unobservable inputs to the valuation together with a quantitative sensitivity analysis as at 31 December 2021:

	Significant			Sensitivity of fair value
	Valuation technique	unobservable input	Range	to the input
Capital reserve arising from	Black-Scholes-	Recent	1,001.34-1,223.87	A change in recent
acquisition	Merton Model	transaction	per share	transaction price by +/-
		price		10% will result in a
				change in fair value by
				+/-RMB12,213,000

The fair values of trade receivables and financial assets included in prepayments, deposits and other receivables as at the date of acquisition amounted to RMB44,206,000 and RMB20,082,000, respectively. The gross contractual amount of trade receivables and financial assets included in prepayments, deposits and other receivables as at the date of acquisition amounted to RMB69,559,000 and RMB20,082,000 respectively, of which trade receivables of RMB25,353,000 and no financial assets included in prepayments, deposits and other receivables are expected to be uncollectible.

The transaction costs incurred for this acquisition have been expensed and are included in administrative expenses in the consolidated statements of profit or loss and other comprehensive income.

The Group measured the acquired lease liabilities using the present value of the remaining lease payments at the date of acquisition. The right-of-use assets were measured at an amount equal to the lease liabilities.

## ACCOUNTANTS' REPORT OF THE GROUP

An analysis of the cash flows in respect of the above acquisition is as follows:

	RMB'000
Cash consideration	(69,970)
Cash and bank balances acquired	54,549
Bank overdrafts held by Shenzhen EDA	(5,899)
Net outflow of cash and cash equivalents included in cash flows from investing	
activities	(21,320)

No revenue and profit were contributed to the Group's consolidated revenue and consolidated profit since the acquisition for the year ended 31 December 2021.

Had the combination taken place at the beginning of the year of 2021, the revenue of the Group and the profit of the Group for the year ended 31 December 2021 would have been RMB631,882,000 and RMB46,411,000, respectively.

#### 30. NOTES TO THE CONSOLIDATED STATEMENTS OF CASH FLOWS

#### (a) Major non-cash transactions

During the year ended 31 December 2022, the immediate holding company of the Company, Samanea China Holdings Limited, waived the liability amounted to RMB70,000,000 due from the Company, accordingly, the Group accounted for the liability discharge by the immediate holding company as a deemed contribution from the immediate holding company, which increased the capital reserve of the Company.

During the year ended 31 December 2023, a shareholder of the Company, LS DiDi Network Technology Limited, waived the liability amounted to RMB25,000,000 due from the Company, accordingly, the Group accounted for the liability discharge by a shareholder as a deemed contribution from a shareholder, which increased the capital reserve of the Company.

During the year ended 31 December 2023, the Group had offset the loan receivables with trade payables of RMB4,728,000, in respect of the offsetting arrangements with this supplier.

<sup>(</sup>i) The services provided to fellow subsidiaries were made with reference to the prices and conditions offered by the Group to third-party consumers.

<sup>(</sup>ii) The Group entered into lease agreements to lease warehousing units in buildings in the United States and Australia.

<sup>(</sup>iii) The Group entered into three loan agreements with a carrying amount in aggregate of CAD100,000, US\$100,000 and US\$1,000,000 during the year ended 31 December 2022, and three loan agreements with a carrying amount of US\$1,000,000, US\$1,000,000 and US\$1,273,000 during the year ended 31 December 2023, respectively, with a fellow subsidiary to meet its short-term funding needs. The aforesaid loans were unsecured, interest-free and had maturity of one year. All of the loans have been repaid before the end of 2023.

# ACCOUNTANTS' REPORT OF THE GROUP

- (iv) The amounts due to a shareholder, immediate holding company and intermediate holding company are for the Group's daily operation and investment. The amounts were unsecured, interest-free and repayable on demand.
- (v) A fellow subsidiary borrowed two loans from the Group with a carrying amount of US\$1,450,000 and US\$1,000,000, respectively, during the year ended 31 December 2023. The aforesaid loans were unsecured, interest-free and had maturity of one year. Both of these loans was early repaid by the fellow subsidiary before the end of 2023.
- (vi) YESY International Limited, the company controlled by a director of the Group's subsidiary, borrowed US\$350,000 from the Group at an interest rate of 8% per annum and had maturity of six months. The loan was unsecured and fully settled in January 2023.
- (vii) The Group entered into a series of loan agreements with Mr. Liu Yong and Ms. Li Qin. The aforesaid loans were unsecured, interest-free and had maturity ranging from 1 to 2 years.

The details of loans to directors, including advances to a director, are as follows:

		Maximum amount		Maximum amount		Maximum amount

#### 33. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

	Carrying amounts			Fair values		
	31 December			31 December		
	2021 2022 2023		2021	2022	2023	
	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000
Financial assets						
Wealth management products	30,165	3,061		30,165	3,061	

Management has assessed that the fair values of cash and cash equivalents, trade receivables, trade payables, financial assets included in prepayments, deposits and other receivables, and financial liabilities included in other payables and accruals approximate to their carrying amounts largely due to the short term maturities of these instruments.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer. At the end of each of the Relevant Periods, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of interest-bearing borrowings and other borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group's own non-performance risk for interest-bearing borrowings and other borrowings as at 31 December 2021, 2022 and 2023 were assessed to be insignificant. The carrying amounts of interest-bearing borrowings and other borrowings approximate to their fair values.

The fair values of wealth management products issued by banks in Chinese Mainland have been estimated by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

# Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of the Group's financial instruments:

# Assets measured at fair value:

# As at 31 December 2021

	Quoted prices in active markets	Significant observable inputs	Significant unobservable inputs		
	(Level 1)	(Level 2)	(Level 3)	Total	
	RMB'000	RMB'000	RMB'000	RMB'000

	RMB'000	RMB'000	RMB'000	RMB'000
Wealth management products		3,061		3,061

## 34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise cash and cash equivalents, trade and other receivables, financial assets at fair value through profit or loss, trade and other payables, and borrowings, which arise directly from its operations. The main purpose of these financial instruments is to raise finance for the Group's operations.

The main risks arising from the Group's financial instruments are interest rate risk, foreign currency risk, credit risk and liquidity risk. Generally, the Group introduces conservative strategies on its risk management. To keep the Group's exposure to these risks at a minimum, the Group has not used any derivatives and other instruments for hedging purposes. The Group does not hold or issue derivative financial instruments for trading purposes. The board of directors reviews and agrees policies for managing each of these risks and they are summarised below:

## (a) Interest rate risk

In respect of the floating interest rate instruments, the Group is subject to the cash flow interest rate risk, while for the fixed interest rate instruments, the Group is subject to fair value interest rate risk. The Group currently does not have an interest rate hedging policy to mitigate interest rate risk; nevertheless, the management monitors interest rate exposure and will consider hedging significant interest rate risk should the need arise.

The following table demonstrates the sensitivity to a reasonably possible change in interest rate, with all other variables held constant, of the Group's profit before tax by assuming the floating rate borrowings outstanding at the end of each of the Relevant Periods were outstanding for the whole year.

		Increase/(decrease)
	Increase/(decrease)	in profit
	in basis points	before tax
		RMB'000
Year ended 31 December 2021	50	(29)
Year ended 31 December 2021	(50)	29
Year ended 31 December 2022	50	(152)
Year ended 31 December 2022	(50)	152
Year ended 31 December 2023	50	(176)
Year ended 31 December 2023	(50)	176

## (b) Foreign currency risk

The Group's main businesses are located in Chinese Mainland and most of the transactions are conducted in Renminbi. Most of the Group's assets and liabilities are denominated in Renminbi, except for certain cash and cash equivalents, trade and other receivables, right-of-use assets, lease liabilities and borrowings denominated in HK\$, US\$, GBP and CAD. The Group has not hedged its foreign exchange rate risk; nevertheless, the management monitors foreign exchange rate exposure and will consider hedging significant foreign currency risk should the need arise.

The following table demonstrates the sensitivity at the end of each of the Relevant Periods to a reasonably possible change in the Renminbi against the relevant currencies, with all other variables held constant, of the Group's profit before tax (due to changes in the translated value of monetary assets and loans).

		Increase/(decrease)
	Increase/(decrease)	in profit before
	in exchange rate	tax
	%	RMB'000
Year ended 31 December 2021		
If the RMB weakens against the US\$	5	766
If the RMB strengthens against the US\$	(5)	(766)
If the RMB weakens against the GBP	5	78
If the RMB strengthens against the GBP	(5)	(78)
If the RMB weakens against the CAD	5	(127)

If the RMB weakens against the GBP	5	218
If the RMB strengthens against the GBP	(5)	(218)
If the RMB weakens against the CAD	5	(106)
If the RMB strengthens against the CAD	(5)	106

		Increase/(decrease)
	Increase/(decrease)	in profit before
	in exchange rate	tax
	%	RMB'000
Year ended 31 December 2023		
If the RMB weakens against the US\$	5	3,436
If the RMB strengthens against the US\$	(5)	(3,436)
If the RMB weakens against the GBP	5	86
If the RMB strengthens against the GBP	(5)	(86)
If the RMB weakens against the CAD	5	(279)
If the RMB strengthens against the CAD	(5)	279

#### (c) Credit risk

The Group is exposed to credit risk in relation to its trade receivables, contract assets, financial assets included in prepayments, deposits and other receivables, and cash and cash equivalents.

The Group expects that there is no significant credit risk associated with cash and cash equivalents since they are substantially deposited at state-owned banks and other medium or large-sized listed banks in Chinese Mainland. Management does not expect that there will be any significant losses from non-performance by these banks.

The Group expects that the credit risk associated with trade receivables and other receivables from related parties is considered to be low, since related parties have strong financial capacity and commitment to meet contractual cash flow obligation in the near term.

The Group trades only with recognised and creditworthy third parties. Concentrations of credit risk are managed by analysis by customer/counterparty. There are no significant concentrations of credit risk for trade receivables and other receivables from third parties as the customer bases of the Group's trade receivables and other receivables from third parties are widely dispersed. In addition, receivable balances are monitored on an ongoing basis.

#### Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at 31 December 2021, 2022 and 2023. The amounts presented are gross carrying amounts for financial assets.

<sup>\*</sup> For trade receivables and contract assets to which the Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in note 19 and note 20 to the Historical Financial Information.

## (d) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulties in meeting financial obligations due to shortage of funds. The Group's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities. The Group's objective is to maintain a balance between continuity of funding to finance its working capital needs as well as capital expenditure.

The tables below analyse the maturity profile of the Group's financial liabilities as at the end of each of the Relevant Periods, which is based on contractual undiscounted payments.

<sup>\*\*</sup> The credit quality of the financial assets included in prepayments, deposits and other receivables is considered to be "normal" when they are not past due and there is no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, the credit quality of the financial assets is considered to be "doubtful".

## (e) Capital management

The Group's primary objectives for managing capital are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratio in order to support its business and maximise shareholders' value.

The Group regards equity attributable to owners of the parent as capital and manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders or return capital to shareholders. No change was made in the objectives, policies or processes for managing capital during the Relevant Periods.

The Group monitors capital using the gearing ratio, which is total debt divided by total equity attributable to owners. The gearing ratios at the end of each of the Relevant Periods are as follows:

		As	s at 31 December	er	
	Note	2021	2022	2023	
		RMB'000	RMB'000	RMB'000	
Borrowings	26	18,340	42,019	52,422	
Equity attributable to owners of the					
parent		126,819	232,393	324,044	
Gearing ratio		14.5%	18.1%	16.2%	

#### 35. EVENTS AFTER THE RELEVANT PERIODS

There were no significant events subsequent to the end of the Relevant Periods.

# 36. SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company, the Group or any of the companies now comprising the Group in respect of any period subsequent to 31 December 2023.

The following is the text of a report, prepared for the purpose of incorporation in this document, received from the independent reporting accountants, Ernst & Young, Certified Public Accountants, Hong Kong.

ACCOUNTANTS' REPORT ON SHENZHEN EDA HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF EDA GROUP HOLDINGS LIMITED AND CMB INTERNATIONAL CAPITAL LIMITED

#### Introduction

We report on the historical financial information of Shenzhen EDA Cloud Technology Co., Ltd. ("Shenzhen EDA") and its subsidiaries (together, the "Shenzhen EDA Group") set out on pages IB-4 to IB-80, which comprises the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows of Shenzhen EDA Group for the year ended 31 December 2021 (the "Predecessor Track Record Period") and the consolidated statement of financial position of Shenzhen EDA Group and the statement of financial position of Shenzhen EDA as at 31 December 2021 and material accounting policy information and other explanatory information (together, the "Shenzhen EDA Historical Financial Information"). The Shenzhen EDA Historical Financial Information set out on pages IB-4 to IB-80 forms an integral part of this report, which has been prepared for inclusion in the prospectus of EDA Group Holdings Limited (the "Company") dated 20 May 2024 (the "Prospectus") in connection with the initial listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the "Stock Exchange").

#### Directors' responsibility for the Shenzhen EDA Historical Financial Information

The directors of Shenzhen EDA are responsible for the preparation of the Shenzhen EDA Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Shenzhen EDA Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Shenzhen EDA Historical Financial Information that is free from material misstatement, whether due to fraud or error.

## Reporting accountants' responsibility

Our responsibility is to express an opinion on the Shenzhen EDA Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 Accountants' Reports on Historical Financial Information in Investment Circulars issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Shenzhen EDA Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Shenzhen EDA Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Shenzhen EDA Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Shenzhen EDA Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Shenzhen EDA Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Shenzhen EDA Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Opinion**

In our opinion, the Shenzhen EDA Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of Shenzhen EDA Group and Shenzhen EDA as at 31 December 2021 and of the financial performance and cash flows of Shenzhen EDA Group for the Predecessor Track Record Period in accordance with the basis of preparation set out in note 2.1 to the Shenzhen EDA Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

# Adjustments

In preparing the Shenzhen EDA Historical Financial Information, no adjustments to the Shenzhen EDA Underlying Financial Statements as defined on page IB-4 have been made.

## Dividends

No dividends have been paid by Shenzhen EDA in respect of the Predecessor Track Record Period.

## II NOTES TO THE SHENZHEN EDA HISTORICAL FINANCIAL INFORMATION

#### 1. CORPORATE INFORMATION

Shenzhen EDA is a limited liability company incorporated in Chinese Mainland and is principally engaged in the provision of first-mile international freight services and last-mile fulfillment services, including overseas warehousing, other value-added services and deliveries for the cross-border e-commerce participants based in Chinese Mainland.

Since 24 December 2021, EDA Cloud Technology Holdings Limited (the predecessor of EDA Group Holdings Limited) has become the holding company of Shenzhen EDA along with its subsidiaries. The Shenzhen EDA Historical Financial Information incorporates the consolidated financial statements of Shenzhen EDA and its subsidiaries for the year ended 31 December 2021 to present the results and financial position of Shenzhen EDA Group.

#### Information about subsidiaries

Particulars of subsidiaries of Shenzhen EDA are as follows:

	Place and date of incorporation		Percentage of equity interests attributable to Shenzhen EDA

The English names of all group companies registered in the PRC represent the best efforts made by the directors of Shenzhen EDA to translate the Chinese names of these companies as they do not have official English names.

#### 2. ACCOUNTING POLICIES

#### 2.1 BASIS OF PREPARATION

The Shenzhen EDA Historical Financial Information has been prepared in accordance with HKFRSs (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations) issued by the HKICPA. All HKFRSs effective for the accounting period commencing from 1 January 2023, together with the relevant transitional provisions, have been early adopted by Shenzhen EDA Group in the preparation of the Shenzhen EDA Historical Financial Information throughout the Predecessor Track Record Period.

The Shenzhen EDA Historical Financial Information has been prepared under the historical cost convention, except for certain financial assets which have been measured at fair value.

#### **Basis of consolidation**

The consolidated financial statements include the financial statements of Shenzhen EDA and its subsidiaries (collectively referred to as "Shenzhen EDA Group") for the year ended 31 December 2021. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by Shenzhen EDA. Control is achieved when Shenzhen EDA Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give Shenzhen EDA Group the current ability to direct the relevant activities of the investee).

Generally, there is a presumption that a majority of voting rights results in control. When Shenzhen EDA has less than a majority of the voting or similar rights of an investee, Shenzhen EDA Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) Shenzhen EDA Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as Shenzhen EDA, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which Shenzhen EDA Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of Shenzhen EDA Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of Shenzhen EDA Group are eliminated in full on consolidation.

Shenzhen EDA Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If Shenzhen EDA Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and the exchange fluctuation reserve; and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. Shenzhen EDA Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if Shenzhen EDA Group had directly disposed of the related assets or liabilities.

#### 2.2 ISSUED BUT NOT YET EFFECTIVE HKFRSS

Shenzhen EDA Group has not applied the following revised HKFRSs, that have been issued but are not yet effective, in the Shenzhen EDA Historical Financial Information.

Amendments to HKFRS 10 and	Sale or Contribution of Assets between an Investor and its
IIIZAC 20	Associate on Loist Wenters <sup>3</sup>

HKAS 28 Associate or Joint Venture<sup>3</sup>

Amendments to HKFRS 16 Lease Liability in a Sale and Leaseback<sup>1</sup>

Amendments to HKAS 1 Classification of Liabilities as Current or Non-current (the

"2020 Amendments")<sup>1,4</sup>

Amendments to HKAS 1 Non-current Liabilities with Covenants (the "2022

Amendments")1,4

Amendments to HKAS 7 and Supplier Finance Arrangements<sup>1</sup>

HKFRS 7

Amendments to HKAS 21 Lack of Exchangeability<sup>2</sup>

Shenzhen EDA Group is in the process of making an assessment of the impact of these revised HKFRSs upon initial application. So far, Shenzhen EDA Group considers that, these revised HKFRSs are unlikely to have a significant impact on Shenzhen EDA Group's results of operations and financial position.

#### 2.3 MATERIAL ACCOUNTING POLICIES

#### **Subsidiaries**

A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by Shenzhen EDA. Control is achieved when Shenzhen EDA is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give Shenzhen EDA the current ability to direct the relevant activities of the investee).

Effective for annual periods beginning on or after 1 January 2024

Effective for annual periods beginning on or after 1 January 2025

No mandatory effective date yet determined but available for adoption

As a consequence of the 2020 Amendments and 2022 Amendments, Hong Kong Interpretation 5 Presentation of Financial Statements — Classification by the Borrower of a Term Loan that Contains a Repayment on Demand Clause was revised to align the corresponding wording with no change in conclusion

When Shenzhen EDA has, directly or indirectly, less than a majority of the voting or similar rights of an investee, Shenzhen EDA considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) the contractual arrangement with the other vote holders of the investee;
- (ii) rights arising from other contractual arrangements; and
- (iii) Shenzhen EDA's voting rights and potential voting rights.

Shenzhen EDA's investment in subsidiaries presented in Shenzhen EDA's statement of financial position is stated at cost less any impairment losses.

#### Investments in associates

An associate is an entity in which Shenzhen EDA Group has a long term interest of generally not less than 20% of the equity voting rights and over which it has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Shenzhen EDA/Shenzhen EDA Group's investments in associates are stated in the statement of financial position/consolidated statement of financial position at Shenzhen EDA/Shenzhen EDA Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

Shenzhen EDA Group's share of the post-acquisition results and other comprehensive income of associates is included in the consolidated statement of profit or loss and other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associates, Shenzhen EDA Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between Shenzhen EDA Group and its associate are eliminated to the extent of Shenzhen EDA Group's investments in associates, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates is included as part of Shenzhen EDA Group's investments in associates.

#### Fair value measurement

Shenzhen EDA Group measures its financial assets at fair value through profit or loss at fair value at the end of the Predecessor Track Record Period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by Shenzhen EDA Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Shenzhen EDA Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, Shenzhen EDA Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of the Predecessor Track Record Period.

#### Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for non-financial asset is required (other than deferred tax assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs. In testing a cash-generating unit for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual cash-generating unit if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to the statement of profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of the Predecessor Track Record Period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to the statement of profit or loss in the period in which it arises.

## Related parties

A party is considered to be related to Shenzhen EDA Group if:

- (a) the party is a person or a close member of that person's family and that person
  - (i) has control or joint control over Shenzhen EDA Group;
  - (ii) has significant influence over Shenzhen EDA Group; or

(iii) is a member of the key management personnel of Shenzhen EDA Group or of a parent of Shenzhen EDA Group;

or

- (b) the party is an entity where any of the following conditions applies:
  - (i) the entity and Shenzhen EDA Group are members of the same group;
  - (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
  - (iii) the entity and Shenzhen EDA Group are joint ventures of the same third party;
  - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - (v) the entity is a post-employment benefit plan for the benefit of employees of either Shenzhen EDA Group or an entity related to Shenzhen EDA Group;
  - (vi) the entity is controlled or jointly controlled by a person identified in (a);
  - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
  - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to Shenzhen EDA Group or to the parent of Shenzhen EDA Group.

#### Property, plant and equipment and depreciation

Property, plant and equipment are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, Shenzhen EDA Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Leasehold improvements	Over the remaining lease terms of the leased buildings
Plant and machinery	32%
Motor vehicles	19% to 32%
Furniture and office equipment	19% to 32%

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

#### Research and development expenses

All research expenses are charged to the statement of profit or loss as incurred.

Expenditure incurred on projects to develop new technologies is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Development expenditure which does not meet these criteria is expensed when incurred.

#### Leases

Shenzhen EDA Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Group as a lessee

Shenzhen EDA Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. Shenzhen EDA Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

#### (a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Warehouses and offices

19 months to 10 years

If ownership of the leased asset transfers to Shenzhen EDA Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### (b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by Shenzhen EDA Group and payments of penalties for termination of a lease, if the lease term reflects Shenzhen EDA Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, Shenzhen EDA Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

## (c) Short-term leases

Shenzhen EDA Group applies the short-term lease recognition exemption to its short-term leases of some warehousing units in a building (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option).

Lease payments on short-term leases are recognised as an expense on a straight-line basis over the lease term.

## Investments and other financial assets

#### Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income ("FVOCI"), and fair value through profit or loss ("FVPL").

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and Shenzhen EDA Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which Shenzhen EDA Group has applied the practical expedient of not adjusting the effect of a significant financing component, Shenzhen EDA Group initially measures a financial asset at its fair value plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which Shenzhen EDA Group has applied the practical expedient are measured at the transaction price determined under HKFRS 15 Revenue from Contracts with Customers in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

Shenzhen EDA Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

#### Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition as at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model.

## Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from Shenzhen EDA Group's consolidated statement of financial position)/Shenzhen EDA's statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- Shenzhen EDA Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) Shenzhen EDA Group has transferred substantially all the risks and rewards of the asset, or (b) Shenzhen EDA Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When Shenzhen EDA Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, Shenzhen EDA Group continues to recognise the transferred asset to the extent of Shenzhen EDA Group's continuing involvement. In that case, Shenzhen EDA Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that Shenzhen EDA Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that Shenzhen EDA Group could be required to repay.

#### Impairment of financial assets

Shenzhen EDA Group recognises an allowance for expected credit losses ("ECLs") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that Shenzhen EDA Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

#### General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, Shenzhen EDA Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, Shenzhen EDA Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. Shenzhen EDA Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

Shenzhen EDA Group considers a financial asset in default when contractual payments are 60 days past due based on the industry practice and the historical information, including Shenzhen EDA Group's credit risk control practices and the historical recovery rate of financial assets. However, Shenzhen EDA Group may also consider a financial asset to be in default when internal or external information indicates that Shenzhen EDA Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by Shenzhen EDA Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables which apply the simplified approach as detailed below.

- Stage 1 Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
- Stage 2 Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

#### Simplified approach

For trade receivables that do not contain a significant financing component or when Shenzhen EDA Group applies the practical expedient of not adjusting the effect of a significant financing component, Shenzhen EDA Group applies the simplified approach in calculating ECLs. Under the simplified approach, Shenzhen EDA Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. Shenzhen EDA Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

#### Financial liabilities

#### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as loans and borrowings, and payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings, and payables, net of directly attributable transaction costs.

#### Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (trade and other payables, and borrowings)

After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in the statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

#### Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

## Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

#### Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

#### **Income tax**

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the Predecessor Track Record Period, taking into consideration interpretations and practices prevailing in the countries in which Shenzhen EDA Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the Predecessor Track Record Period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of the Predecessor Track Record Period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of the Predecessor Track Record Period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the Predecessor Track Record Period.

Deferred tax assets and deferred tax liabilities are offset if and only if Shenzhen EDA Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

#### **Government grants**

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

#### Revenue recognition

#### Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of services is transferred to the customers at an amount that reflects the consideration to which Shenzhen EDA Group expects to be entitled in exchange for those services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which Shenzhen EDA Group will be entitled in exchange for transferring the services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between Shenzhen EDA Group and the customer at contract inception. When the contract contains a financing component which provides Shenzhen EDA Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in HKFRS 15.

#### (i) First-mile services

Services included in the first-mile international freight services are mainly for transporting the customers' goods from designated domestic locations to overseas designated locations, which includes other value-added services, such as customs clearance and etc.. Revenue from the provision of first-mile international freight services is recognised over time, using an output method to measure progress towards complete satisfaction of the service, which is to recognise revenue on the basis of direct measurements of the value of the services transferred to the customer to date relative to the remaining services promised under the contract, that best depicts Shenzhen EDA Group's performance in transferring control of services.

#### (ii) Last-mile fulfillment services

Last-mile fulfillment services include providing one-stop logistic service from the overseas port to the overseas destination designated by the end consumers, which includes different steps such as overseas warehousing, other value-added services and deliveries. These services are requested by customers as needed and they are not dependent on other services that are provided by Shenzhen EDA Group. These services do not significantly affect each other and, therefore, are not highly interdependent or highly interrelated. Revenue generated from all these services would be measured and recognised with reference to the purchase order completion measurement, which are on the same basis as days consumed and over time.

For both types of services, the customers simultaneously receive and consume the benefits provided by Shenzhen EDA Group's performance as Shenzhen EDA Group performs.

#### Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

### **Contract liabilities**

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before Shenzhen EDA Group transfers the related services. Contract liabilities are recognised as revenue when Shenzhen EDA Group performs under the contract (i.e., transfers control of the related services to the customer).

#### **Employee benefits**

#### Pension schemes

In accordance with the relevant laws and regulations, Shenzhen EDA Group's employees participate in various defined contribution plans and state-managed retirement benefit plans in the countries in which Shenzhen EDA Group operates. Payments to these plans, where Shenzhen EDA Group's obligations under such plans are equivalent to a defined contribution plan, are recognised as an expense based on certain percentages of the salaries of these employees on a monthly basis when employees have rendered services entitling them to the contributions.

#### Housing benefits, medical insurances and other social insurances

PRC employees of Shenzhen EDA Group are entitled to participate in various government-supervised housing funds, medical insurances and other social insurance plans. Shenzhen EDA Group contributes to these funds based on certain percentages of the salaries of these employees on a monthly basis. Shenzhen EDA Group's liability in respect of these funds is limited to the contribution payable in each period. Contributions to the housing funds, medical insurances and other social insurances are expensed as incurred.

#### Mandatory Provident Fund retirement benefit scheme (the "MPF Scheme")

Shenzhen EDA Group's employer contributions vest fully with the employees when contributed into the MPF Scheme. Contributions are made based on a percentage of the employees' basic salaries in accordance with the rules of the MPF Scheme.

#### **Borrowing costs**

Borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

#### **Dividends**

Dividends are recognised as a liability when they are approved by the shareholders in a general meeting.

#### Foreign currencies

These financial statements are presented in Renminbi, which is the functional currency of Shenzhen EDA. Each entity in Shenzhen EDA Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in Shenzhen EDA Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the Predecessor Track Record Period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which Shenzhen EDA Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, Shenzhen EDA Group determines the transaction date for each payment or receipt of the advance consideration.

The functional currencies of certain overseas subsidiaries are currencies other than the Renminbi. As at the end of the Predecessor Track Record Period, the assets and liabilities of these entities are translated into Renminbi at the exchange rates prevailing at the end of the Predecessor Track Record Period and their statements of profit or loss are translated into Renminbi at the exchange rates that approximate to those prevailing at the dates of the transactions.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange fluctuation reserve, except to the extent that the differences are attributable to non-controlling interests. On disposal of a foreign operation, the cumulative amount in the reserve relating to that particular foreign operation is recognised in profit or loss.

For the purpose of the consolidated statement of cash flows, the cash flows of overseas subsidiaries are translated into RMB at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of overseas subsidiaries which arise throughout the year are translated into RMB at the weighted average exchange rates for the year.

#### 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Shenzhen EDA Historical Financial Information requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

#### **Judgments**

In the process of applying Shenzhen EDA Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the Shenzhen EDA Historical Financial Information:

#### Identifying performance obligations in provision of last-mile fulfillment services

Shenzhen EDA Group provides last-mile fulfillment services from the overseas port to the overseas destination designated by the end customers, which includes different steps such as overseas warehousing, other value-added services and deliveries. The orders are placed separately by the customers, which means such promises by Shenzhen EDA Group are separately identifiable. These services are requested by consumers as needed and they are not dependent on other services that are provided by Shenzhen EDA Group. These services do not significantly affect each other and, therefore, are not highly interdependent or highly interrelated, because Shenzhen EDA Group would need to fulfil its promise to these independent services separately. Consequently, these services which are included in last-mile fulfillment services are identified as separate performance obligations.

#### Deferred tax assets

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised. This requires significant judgement on the tax treatments of certain transactions and also assessment on the probability that adequate future taxable profits will be available for the deferred tax assets to be recovered.

#### **Estimation uncertainty**

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the Predecessor Track Record Period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

#### Provision for expected credit losses on trade receivables

Shenzhen EDA Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on groupings of various customers/debtors segments that have similar loss patterns (i.e. by service type and customer type).

The provision matrix is initially based on Shenzhen EDA Group's historical observed default rates. Shenzhen EDA Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions are expected to deteriorate over the next year which can lead to an increased number of defaults in the cross-border e-commerce sector, the historical default rates are adjusted. At the end of the Predecessor Track Record Period, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. Shenzhen EDA Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on Shenzhen EDA Group's trade receivables is disclosed in note 17 to the Shenzhen EDA Historical Financial Information.

#### Leases — estimating the incremental borrowing rate

Shenzhen EDA Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that Shenzhen EDA Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what Shenzhen EDA Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). Shenzhen EDA Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

#### 4. OPERATING SEGMENT INFORMATION

Shenzhen EDA Group is principally engaged in the provision of first-mile international freight services and last-mile fulfillment services, including overseas warehousing, other value-added services and deliveries for the cross-border e-commerce participants based in Chinese Mainland.

HKFRS 8 Operating Segments requires operating segments to be identified on the basis of internal reporting about components of Shenzhen EDA Group that are regularly reviewed by the chief operating decision-maker in order to allocate resources to segments and to assess their performance. The information reported to the directors of Shenzhen EDA, who are the chief operating decision-makers, for the purpose of resource allocation and assessment of performance does not contain discrete operating segment financial information and the directors reviewed the financial results of Shenzhen EDA Group as a whole. Therefore, no further information about the operating segment is presented.

## Geographical information

## (a) Revenue from external customers

	Year ended
	31 December
	2021
	RMB'000
China	170,109
The United States	355,993
The United Kingdom	49,620
Canada	49,438
Germany	5,099
Australia	1,623
	631,882

The above revenue information is based on the location of the services rendered.

## (b) Non-current assets

	Year ended 31 December	
	2021	
	RMB'000	
China	16,389	
The United States	125,554	
The United Kingdom	19,457	
Canada	13,326	
	174,726	

The above non-current assets information is based on the locations of the assets and excludes deferred tax assets.

## Information about major customers

For the year ended 31 December 2021, revenue from a single customer, including sales to a group of entities which are known to be under common control with that customer, contributed 12.1% to Shenzhen EDA Group's revenue.

## 5. REVENUE, OTHER INCOME AND GAINS

## Revenue

An analysis of revenue is as follows:

	Year ended 31 December 2021
	RMB'000
Revenue from contracts with customers	631,882
(a) Disaggregated revenue information	
	Year ended
	31 December
	2021
	RMB'000
Type of services	
First-mile international freight services	170,109
Last-mile fulfillment services	461,773
	631,882
Timing of revenue recognition	
Services transferred over time	631,882

The following table shows the amounts of revenue recognised in the Predecessor Track Record Period that were included in the contract liabilities at the beginning of the respective periods:

	Year ended 31 December 2021	
	RMB'000	
Revenue recognised that was included in contract liabilities at the beginning of		
the year:		
First-mile international freight services	1,825	
Last-mile fulfillment services	3,746	
	5,571	

#### (b) Performance obligations

Information about Shenzhen EDA Group's performance obligations is summarised below:

For first-mile international freight services including provision of transportation from the designated locations in Chinese Mainland to the designated overseas locations, the performance obligation is satisfied over time and the completion progress of these services is therefore measured by the number of days from the date Shenzhen EDA Group receiving the goods from the customers to the report date over the estimated service period. Payment is generally due within 10 days from the date of billing, extending up to two months, or is settled on an advance receipt basis depending on the relationships with the customers.

For last-mile fulfillment services including the provision of one-stop logistic services from the overseas port to the overseas destination designated by the end customers, which includes different steps such as overseas warehousing, other value-added services and local deliveries, the performance obligation is satisfied over time as progress towards the days consumed over the estimated service period. Payment is generally due within 10 days from the date of billing, extending up to two months, or is settled on an advance receipt basis depending on the relationships with the customers.

Shenzhen EDA Group has elected the practical expedient for not to disclose the remaining performance obligations for these types of contracts because the performance obligation is part of a contract that has an original expected duration of one year or less.

#### Other income and gains

	Year ended 31 December 2021
	RMB'000
Interest income	693
Government grants	4,027
Fair value changes of financial assets at fair value through profit or loss	165
Gain on early termination of lease	859
Surcharges from customers for overdue balances	676
Compensation	1,479
Others	184
	8,083

Government grants mainly represent funding received from government authorities to support the cross border e-commence industry. There are no unfulfilled conditions or contingencies related to these grants.

#### 6. FINANCE COSTS

An analysis of finance costs is as follows:

	Year ended 31 December 2021
	RMB'000
Interest expenses on borrowings	785
Interest expenses on lease liabilities	9,866
	10,651

#### 7. PROFIT BEFORE TAX

		Year ended 31 December 2021
	Notes	RMB'000
Cost of provision of first-mile international freight services		163,829
Cost of provision of last-mile fulfillment services		361,198
Depreciation of property, plant and equipment	13	2,503
Depreciation of right-of-use assets	<i>14(c)</i>	31,811
Total depreciation and amortisation		34,314
Lease payments not included in the measurement of lease liabilities.	<i>14(c)</i>	349
Auditors' remuneration		141
Employee benefit expenses*		
(excluding directors' and chief executive's remuneration (note 8)):		
Wages and salaries		77,645
Pension scheme contributions**		1,668
		79,313
Research and development expenses		17,956
Impairment losses on financial assets, net		5,480
Fair value changes of financial instruments at fair value through		
profit or loss		(165)
Foreign exchange differences, net***		1,326

<sup>\*</sup> Amounts of RMB53,113,000 of employee benefit expenses were included in cost of provision of first-mile international freight services and last-mile fulfillment services during the year ended 31 December 2021.

<sup>\*\*</sup> During the Predecessor Track Record Period, Shenzhen EDA Group had no forfeited contributions available to reduce its contributions to the pension schemes in future years.

<sup>\*\*\*</sup> Included in "Other expenses" in the consolidated statement of profit or loss and other comprehensive income.

#### 8. DIRECTORS' AND CHIEF EXECUTIVE'S REMUNERATION

The directors of Shenzhen EDA during the Predecessor Track Record Period are as follows:

Mr. Liu Yong was appointed as an executive director of Shenzhen EDA on 16 January 2019.

Ms. Li Qin, Mr. Zhang Yingfa, Ms. Tang Jiajia and Mr. Liu Chao were appointed as executive directors of Shenzhen EDA on 28 February 2020.

Mr. Liu Chao resigned as an executive director of Shenzhen EDA on 1 September 2020.

Mr. Liu Mingsong was appointed as an executive director of Shenzhen EDA on 1 September 2020.

Directors' remuneration for the Predecessor Track Record Period is as follows:

	Year ended 31 December 2021
	RMB'000
Fees	
Other emoluments:	
Salaries, allowances and benefits in kind	1,491
Pension scheme contributions	150
Performance related bonuses	1,100
	2,741

#### (a) Executive directors and the chief executive

## Year ended 31 December 2021

Salaries, allowances and benefits in kind	Pension scheme contributions	Performance related bonuses	Total remuneration
RMB'000	RMB'000	RMB'000	RMB'000
780	75	550	1,405

1,491	150	1,100	2,741
	allowances and benefits in kind  RMB'000  780 711 ——————————————————————————————————	allowances and benefits in kind contributions  RMB'000 RMB'000  780 75 711 75 ————————————————————————————————————	allowances and benefits in kind         Pension scheme contributions         Performance related bonuses           RMB'000         RMB'000         RMB'000           780         75         550           711         75         550           —         —         —           —         —         —           —         —         —

There was no arrangement under which a director or the chief executive waived or agreed to waive any remuneration during the Predecessor Track Record Period.

#### 9. FIVE HIGHEST PAID EMPLOYEES

The five highest paid employees for the year ended 31 December 2021 included 2 directors, details of whose remuneration are set out in note 8 above. Details of the remuneration for the year ended 31 December 2021 of the remaining 3 highest paid employees who are neither a director nor chief executive of Shenzhen EDA, are as follows:

	Year ended 31 December	
	2021	
	RMB'000	
Salaries, allowances and benefits in kind	2,122	
Pension scheme contributions	98	
Performance related bonuses	895	
	3,115	

The number of non-director and non-chief executive highest paid employees whose remuneration fell within the following bands is as follows:

	Number of employees
	2021
Nil to HK\$1,000,000	1
HK\$1,000,001 to HK\$1,500,000	2
	3

#### 10. INCOME TAX

Shenzhen EDA Group is subject to income tax on an entity basis on profits arising in or derived from the tax jurisdictions in which members of Shenzhen EDA Group are domiciled and operate.

#### Hong Kong profits tax

Hong Kong profits tax has been provided at a rate of 16.5% on the estimated assessable profits arising in Hong Kong for the Predecessor Track Record Period. In 2021, one Hong Kong subsidiary of Shenzhen EDA Group is a qualifying entity under the two-tiered profits tax rates regime. The first HK\$2,000,000 of assessable profits of this subsidiary are taxed at 8.25% and the remaining assessable profits are taxed at 16.5%.

#### PRC corporate income tax

Shenzhen EDA Group's income tax provision in respect of its operations in Chinese Mainland has been calculated at the statutory tax rate of 25% on the taxable profits for the Predecessor Track Record Period, based on the existing legislation, interpretations and practices in respect thereof.

Shenzhen EDA is qualified as High and New Technology Enterprises and is entitled to a preferential corporate income tax rate of 15% for the year ended 31 December 2021.

## Income tax for other jurisdictions

During the Predecessor Track Record Period, income tax of other jurisdictions mainly arose from the United States, the United Kingdom, Canada and Australia.

Shenzhen EDA's subsidiaries incorporated in the United States were subject to the federal tax at a rate of 21% and the state tax at the rate ranging from 8.8% to 11.5% for the year ended 31 December 2021. In addition, the United Kingdom profits tax has been provided at a rate of 19%, Canada profits tax has been provided at a rate of 26.5% and Australia profits tax has been provided at a rate of 30% on the estimated assessable profits arising in the respective jurisdictions during the year ended 31 December 2021.

	Year ended 31 December 2021
	RMB'000
Current:	
Chinese Mainland	5,236
Hong Kong	181
The United States	328
The United Kingdom	162
Canada	220
	6,127
Deferred (note 16)	(929)
Total tax charge for the year	5,198

A reconciliation of the tax expense applicable to profit/(loss) before tax at the statutory rate for the jurisdictions in which Shenzhen EDA and the majority of its subsidiaries are domiciled to the income tax expense at the effective income tax rate of the Predecessor Track Record Period and a reconciliation of the applicable rates (i.e., the statutory tax rates) to the effective rates of the Predecessor Track Record Period, are as follows:

#### 14. LEASES

## Shenzhen EDA and Shenzhen EDA Group as a lessee

Shenzhen EDA has lease contracts for offices with lease terms of 2 years to 5 years. Shenzhen EDA Group has lease contracts for some warehouses and offices used in its operations. Leases of warehouses and offices generally have lease terms of 19 months to 10 years. Generally, Shenzhen EDA Group is restricted from assigning and subleasing the leased assets outside Shenzhen EDA Group.

# (a) Right-of-use assets

The carrying amounts of right-of-use assets and the movement during the year ended 31 December 2021 are as follows:

## **Shenzhen EDA**

_	2021
	RMB'000
At beginning of year	1,117
Additions	11,246
Depreciation charge	(2,925)
Termination	(634)
At end of year	8,804

# Shenzhen EDA Group

	2021
	RMB'000
At beginning of year	98,729
Additions	109,958
Depreciation charge	(31,811)
Termination	(10,437)
Exchange realignment	(4,267)
At end of year	162,172

## (b) Lease liabilities

The carrying amount of lease liabilities and the movements during the year ended 31 December 2021 are as follows:

## **Shenzhen EDA**

	2021
	RMB'000
At beginning of year	1,230
New leases	11,246
Accretion of interest recognised during the year	514
Payment	(2,794)
Termination	(706)
At end of year	9,490
Analysed into:	
Within one year	2,214
In the second year	2,101
In the third to fifth years, inclusive	5,175
	9,490

## **Shenzhen EDA Group**

	2021
	RMB'000
At beginning of year	101,323
New leases	109,958
Accretion of interest recognised	
during the year (note 6)	9,866
Payment	(34,420)
Termination	(11,296)
Exchange realignment	(4,408)
At end of year	171,023
Analysed into:	
Within one year	27,586
In the second year	29,685
In the third to fifth years, inclusive	76,516
Beyond five years	37,236
	171,023

The maturity analysis of lease liabilities is disclosed in note 30 to the Shenzhen EDA Historical Financial Information.

(c) The amounts recognised in Shenzhen EDA Group's profit or loss in relation to leases are as follows:

		Year ended	
		31 December	
		2021	
	Notes	RMB'000	
Interest on lease liabilities	6	9,866	
Depreciation charge of right-of-use assets	7	31,811	
Expense relating to short-term leases	7	349	
Gain on early termination of lease	5	(859)	
Total amount recognised in Shenzhen EDA Group's profit or loss		41,167	

(d) The total cash outflow for leases of Shenzhen EDA Group is disclosed in note 26 to the Shenzhen EDA Historical Financial Information.

#### 15. INVESTMENT IN AN ASSOCIATE

## Shenzhen EDA and Shenzhen EDA Group

				As at 31 December 2021
Share of net assets				RMB'000 2,904
Particulars of the associate	are as follows:			
		Place of incorporation/	Percentage of ownership interest attributable to Shenzhen EDA/	
Name	Particulars of issued shares held	registration and business	Shenzhen EDA Group	Principal activity
Hangzhou Yuehui Venture Capital Partnership*  ("Hangzhou Yuehui") <sup>(1)</sup>	Partnership shares	PRC/ Chinese Mainland	16.13	Capital investment

#### Notes:

<sup>(1)</sup> Hangzhou Yuehui was incorporated on 15 September 2021. Shenzhen EDA/Shenzhen EDA Group consider it has significant influence over Hangzhou Yuehui even though it owns less than 20% of the equity interests because Shenzhen EDA/Shenzhen EDA Group is the limited partner and has the voting power in Hangzhou Yuehui.

The English name of this entity represents the best efforts made by the directors of Shenzhen EDA to translate the Chinese name as the entity does not have an official English name.

The following table illustrates the summarised financial information in respect of Hangzhou Yuehui, adjusted for any differences in accounting policies and reconciled to the carrying amount in the consolidated statement of financial position of Shenzhen EDA Group and the statement of financial position of Shenzhen EDA:

## Hangzhou Yuehui

	As at 31 December 2021
	RMB'000
Current assets	9,489
Non-current assets	9,000
Net assets	18,489
Reconciliation to Shenzhen EDA/Shenzhen EDA Group's interest in the associate:	
Proportion of Shenzhen EDA/Shenzhen EDA Group's ownership (note)	15.71%
Shenzhen EDA/Shenzhen EDA Group's share of net assets of the associate	2,904
	Year ended 31 December 2021
Loss and total comprehensive expense for the year	RMB'000 (611)

Note:

According to the articles of association, the percentage of profit sharing is based on the proportion of capital contribution actually made to Hangzhou Yuehui.

## 16. DEFERRED TAX

The movements in deferred tax liabilities and assets during the Predecessor Track Record Period are as follows:

## Deferred tax liabilities

## Shenzhen EDA

	Right-of-use
	assets
	RMB'000
At 1 January 2021	168
Deferred tax charged to profit or loss during the year	1,153

Impairment	(25,353)
	44,206

Shenzhen EDA and Shenzhen EDA Group's trading terms with its customers are mainly on credit, except for new customers, where payment in advance is normally required. The credit period is generally 10 days from the day of billing, extending up to two months for major customers. Each customer has a maximum credit limit. Shenzhen EDA and Shenzhen EDA Group seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by management. Shenzhen EDA and Shenzhen EDA Group's trade receivables from third parties relate to a large number of diversified customers, there is no significant concentration of credit risk. Shenzhen EDA and Shenzhen EDA Group does not hold any collateral or other credit enhancements over its trade receivable balances. Trade receivables are non-interest-bearing.

An ageing analysis of the trade receivable as at the end of the Predecessor Track Record Period, based on the invoice date and net of loss allowance, is as follows:

	As at
	31 December
	2021
	RMB'000
Within 3 months	43,079
3 to 6 months	398
Over 6 months	173
	43,650

## **Shenzhen EDA Group**

	As at
	31 December
	2021
	RMB'000
Within 3 months	43,108
3 to 6 months	398
Over 6 months	700
	44,206

The movements in the loss allowance for impairment of trade receivables are as follows:

#### Shenzhen EDA

	As at	
	31 December	
	2021	
	RMB'000	
At beginning of year	18,046	
Impairment losses	5,545	
At end of year	23,591	

## **Shenzhen EDA Group**

	As at	
	31 December	
	2021	
	RMB'000	
At beginning of year	20,235	
Impairment losses	5,480	
Exchange realignment	(362)	
At end of year	25,353	

An impairment analysis is performed at each reporting date. Shenzhen EDA and Shenzhen EDA Group use a provision matrix to measure expected credit losses for trade receivables. The provision rates are based on groupings of various customer segments with similar loss patterns (i.e., by customer type and service type). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at

the reporting date about past events, current conditions and forecasts of future economic conditions. Besides, for balances in relation to individual customers which bear specific credit risk depending on the repayment history, financial position and other external or internal information, management estimates the amounts recoverable by taking into account any credit enhancement held by Shenzhen EDA and Shenzhen EDA Group and recognises provision against the difference between the net remaining balance and the amount recoverable.

Set out below is the information about the credit risk exposure on the trade receivables using a provision matrix:

#### Shenzhen EDA

## Group A

#### Notes:

- (ii) Amounts due from subsidiaries are unsecured, interest-free and repayable on demand.
- (iii) The loan receivables are unsecured, interest-free and had maturity of six months.
- (iv) As at 31 December 2021, the outstanding balances of Shenzhen EDA Group with related parties included in the balances of prepayment and other receivables amounted of RMB270,000, represented the rental deposit of warehouse leasing in the overseas, which were trade in nature. The remaining outstanding balances with related parties included in the balances of prepayment and other receivables as at the end of 31 December 2021 were non-trade in nature and further details of which are set out in note 27 to Shenzhen EDA Historical Financial Information.

<sup>(</sup>i) The loans to directors and employees are unsecured, interest-free and had maturity of three months and two years, respectively.

# 19. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

## Shenzhen EDA and Shenzhen EDA Group

	As at
	31 December
	2021
	RMB'000
Wealth management products	30,165

Shenzhen EDA Group's wealth management products at 31 December 2021 were issued by banks in Chinese Mainland. They are classified as financial assets at fair value through profit or loss as their contractual cash flows do not qualify for solely payments of principal and interest.

## 20. CASH AND CASH EQUIVALENTS

	As at
	31 December
	2021

US\$	7,405
HK\$	409
EURO	1
GBP	538
AUD	95
CAD	463
	54,549

Note: The RMB is not freely convertible into other currencies, however, under Chinese Mainland's Foreign Exchange Control Regulations and Administration of Settlement and Sale and Payment of Foreign Exchange Regulations, Shenzhen EDA and Shenzhen EDA Group are permitted to exchange RMB for other currencies through banks authorized to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Time deposit is made for a period of three years and earn interest at the respective time deposit rates. However, Shenzhen EDA can withdraw the time deposit in a period less than the pre-determined period of three years and such time deposit then earns interest at floating rates based on daily bank deposit rates. Therefore, management considers that such time deposit is held for short term cash commitment. The bank balances and time deposit are deposited with creditworthy banks with no recent history of default.

## 21. TRADE PAYABLES

## Shenzhen EDA

	As at 31 December 2021

- (b) Certain of Shenzhen EDA and Shenzhen EDA Group's bank loans are guaranteed by:
  - (i) a personal guarantee provided by a shareholder of Shenzhen EDA and his spouse;
  - (ii) a personal guarantee provided by the legal representative of a subsidiary of Shenzhen EDA; and
  - (iii) a guarantee provided by third-party financing guarantee corporations.
- (c) Shenzhen EDA's borrowings are denominated in:

	As at 31 December
	2021
	RMB'000
RMB	11,850

Shenzhen EDA Group's borrowings are denominated in:

	As at 31 December 2021
	RMB'000
RMB	11,850
HK\$	5,758
CAD	732
	18,340

(d) Shenzhen EDA Group's other borrowings are shareholder's loans and loans from the legal representative of a Shenzhen EDA's subsidiary and third parties. The shareholder's loans are unsecured, had an interest rate of 10% per annum and are repayable on demand. The loans from the legal representative of a Shenzhen EDA's subsidiary are unsecured, had an interest rate ranging from 8% to 9% per annum, and are repayable on demand. The loans from third parties are unsecured, had an interest rate of 10% per annum and maturity of ten months.

#### 24. SHARE CAPITAL

A summary of movements in Shenzhen EDA's share capital and share premium is as follows:

	Share capital	Share premium	
	RMB'000	RMB'000	
At 1 January 2021	6,316	26,184	
Capital injection (note (a))	49,995		
At 31 December 2021	56,311	26,184	

Notes:

(a) On 28 February 2021, Global Logistics Services Limited injected capital of RMB49,995,000 to Shenzhen EDA and obtained 88.78% equity interest of Shenzhen EDA. The registered capital of Shenzhen EDA was increased to RMB56,311,000.

#### 25. RESERVES

The amounts of Shenzhen EDA Group's reserves and the movements therein for the Predecessor Track Record Period are presented in the consolidated statement of changes in equity.

#### (a) Share premium

The share premium account represents the amount paid by shareholders for capital injection in excess of its nominal value.

#### (b) Capital reserve

The capital reserve of Shenzhen EDA Group represents the capital contributions from the then equity holders of Shenzhen EDA Group's subsidiaries, after elimination of investments in subsidiaries.

#### (c) Statutory surplus reserve

In accordance with the PRC Company Law and the articles of association of Shenzhen EDA Group companies established in the PRC, these companies are required to appropriate 10% of their net profit after tax, as determined under the Chinese Accounting Standards, to the statutory surplus reserve until the reserve balance reaches 50% of their registered capital. Subject to certain restrictions set out in the relevant PRC regulations and in the articles of association of Shenzhen EDA Group companies, the statutory surplus reserve may be used either to offset losses, or to be converted to increase the share capital of Shenzhen EDA Group companies provided that the balance after such conversion is not less than 25% of the registered capital of them. The reserve cannot be used for purposes other than those for which it is created and is not distributable as cash dividends.

#### (d) Exchange fluctuation reserve

The exchange fluctuation reserve comprises all foreign exchange differences arising from the translation of the financial statements of companies whose functional currency is not RMB. The reserve is dealt with in accordance with the accounting policy set out in note 2.4 to the Shenzhen EDA Historical Financial Information.

## (e) A summary of statement of changes in equity of Shenzhen EDA is as follows:

	Share capital RMB'000	Share premium RMB'000	Statutory reserve  RMB'000	Capital reserve	Accumulated losses  RMB'000	Total  RMB'000

		76,670

#### Shenzhen EDA Group

		As at
		31 December
	Notes	2021
		RMB'000
Financial liabilities at amortised cost		
Trade payables	21	83,932
Financial liabilities included in other payables and accruals	22	2,731
Lease liabilities	14	171,023
Borrowings	23	18,340
		276,026

#### 29. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of Shenzhen EDA and Shenzhen EDA Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

#### Shenzhen EDA and Shenzhen EDA Group

	Carrying amounts	Fair values	
	31 December	31 December	
	2021 2021		
	RMB'000	RMB'000	
Financial assets			
Wealth management products	30,165	30,165	

Management has assessed that the fair values of cash and cash equivalents, trade receivables, trade payables, financial assets included in prepayments, deposits and other receivables, and financial liabilities included in other payables and accruals approximate to their carrying amounts largely due to the short term maturities of these instruments.

Shenzhen EDA Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The finance manager reports directly to the chief financial officer. At the end of the Predecessor Track Record Period, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the chief financial officer.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of interest-bearing borrowings have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of Shenzhen EDA Group's own non-performance risk for interest-bearing borrowings as at 31 December 2021 were assessed to be insignificant. The carrying amounts of interest-bearing borrowings approximate to their fair values.

The fair values of wealth management products issued by banks in Chinese Mainland have been estimated by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

#### Fair value hierarchy

The following tables illustrate the fair value measurement hierarchy of Shenzhen EDA and Shenzhen EDA Group's financial instruments:

Assets measured at fair value:

#### Shenzhen EDA and Shenzhen EDA Group

#### As at 31 December 2021

	Quoted prices	Significant	Significant	
	in active	observable	unobservable	
	markets	inputs	inputs	
	(Level 1)	(Level 2)	(Level 3)	Total
	RMB'000	RMB'000	RMB'000	RMB'000
Wealth management products		30,165		30,165

### 30. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Shenzhen EDA Group's principal financial instruments comprise cash and cash equivalents, trade and other receivables, financial assets at fair value through profit or loss, trade and other payables, and borrowings, which arise directly from its operations. The main purpose of these financial instruments is to raise finance for Shenzhen EDA Group's operations.

The main risks arising from Shenzhen EDA Group's financial instruments are interest rate risk, foreign currency risk, credit risk and liquidity risk. Generally, Shenzhen EDA Group introduces conservative strategies on its risk management. To keep Shenzhen EDA Group's exposure to these risks at a minimum, Shenzhen EDA Group has not used any derivatives and other instruments for hedging purposes. Shenzhen EDA Group does not hold or issue derivative financial instruments for trading purposes. The board of directors reviews and agrees policies for managing each of these risks and they are summarised below:

#### (a) Interest rate risk

In respect of the floating interest rate instruments, Shenzhen EDA Group is subject to the cash flow interest rate risk, while for the fixed interest rate instruments, Shenzhen EDA Group is subject to interest rate risk. Shenzhen EDA Group currently does not have an interest rate hedging policy to mitigate interest rate risk; nevertheless, the management monitors interest rate exposure and will consider hedging significant interest rate risk should the need arise.

The following table demonstrates the sensitivity to a reasonably possible change in interest rate, with all other variables held constant, of Shenzhen EDA Group's profit before tax by assuming the floating rate borrowings outstanding at the end of the Predecessor Track Record Period were outstanding for the whole year.

	Increase/	Increase/	
	(decrease) in basis	(decrease) in	
	points	profit before tax	
		RMB'000	
Year ended 31 December 2021	50	(29)	
Year ended 31 December 2021	(50)	29	

### (b) Foreign currency risk

Shenzhen EDA Group's main businesses are located in Chinese Mainland and most of the transactions are conducted in RMB. Most of Shenzhen EDA Group's assets and liabilities are denominated in RMB, except for certain cash and cash equivalents, trade and other receivables, right-of-use assets, lease liabilities and borrowings denominated in US\$, GBP and CAD. Shenzhen EDA Group has not hedged its foreign exchange rate risk; nevertheless, the management monitors foreign exchange rate exposure and will consider hedging significant foreign currency risk should the need arise.

The following table demonstrates the sensitivity at the end of the Predecessor Track Record Period to a reasonably possible change in the RMB against the relevant currencies, with all other variables held constant, of Shenzhen EDA Group's profit before tax (due to changes in the translated value of monetary assets and loans).

	Increase/ (decrease) in exchange rate	Increase/ (decrease) in profit before tax	
		RMB'000	
2021			
If the RMB weakens against the US\$	5	(6,190)	
If the RMB strengthens against the US\$	(5)	6,190	
If the RMB weakens against the GBP	5	(873)	
If the RMB strengthens against the GBP	(5)	873	
If the RMB weakens against the CAD	5	(731)	
If the RMB strengthens against the CAD	(5)	731	

#### (c) Credit risk

Shenzhen EDA Group is exposed to credit risk in relation to its trade receivables, financial assets included in prepayments, deposits and other receivables and cash and cash equivalents.

Shenzhen EDA Group expects that there is no significant credit risk associated with cash and cash equivalents since they are substantially deposited at state-owned banks and other medium or large-sized listed banks in Chinese Mainland. Management does not expect that there will be any significant losses from non-performance by these banks.

Shenzhen EDA Group expects that the credit risk associated with other receivables from related parties is considered to be low, since related parties have strong financial capacity and commitment to meet contractual cash flow obligation in the near term.

Concentrations of credit risk are managed by analysis by customer/counterparty. There are no significant concentrations of credit risk for trade receivables and other receivables from third parties as the customer bases of Shenzhen EDA Group's trade receivables and other receivables from third parties are widely dispersed. In addition, receivable balances are monitored on an ongoing basis.

## Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on Shenzhen EDA Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at 31 December 2021. The amounts presented are gross carrying amounts for financial assets.

## **Shenzhen EDA**

— Not yet past due	54,549				54,549
	74,631			69,559	144,190

## (d) Liquidity risk

Liquidity risk is the risk that Shenzhen EDA Group will encounter difficulties in meeting financial obligations due to shortage of funds. Shenzhen EDA Group's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities. Shenzhen EDA Group's objective is to maintain a balance between continuity of funding to finance its working capital needs as well as capital expenditure.

The tables below analyse the maturity profile of Shenzhen EDA and Shenzhen EDA Group's financial liabilities as at the end of the Predecessor Track Record Period, which is based on contractual undiscounted payments.

#### Shenzhen EDA

	On demand	Less than 1 year	1 to 5 years	Over 5 year	Total
	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000
Trade payables	_	40,684	_	_	40,684
Financial liabilities included					
in other payables and					
accruals	14,646	_	_	_	14,646
Lease liabilities	_	2,613	7,655	_	10,268
Borrowings	<u> </u>	12,172			12,172
	14,646	55,469	7,655		77,770
:	- 1,0 10		.,,,,,		,

<sup>\*</sup> For trade receivables to which Shenzhen EDA Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in note 17 to the Shenzhen EDA Historical Financial Information.

<sup>\*\*</sup> The credit quality of the financial assets included in prepayments, deposits and other receivables is considered to be "normal" when they are not past due and there is no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, the credit quality of the financial assets is considered to be "doubtful".

	8,630	133,767	127,907	42,382	312,686

#### (e) Capital management

Shenzhen EDA's primary objectives for managing capital are to safeguard Shenzhen EDA Group's ability to continue as a going concern and to maintain healthy capital ratio in order to support its business and maximise shareholders' value.

Shenzhen EDA regards equity attributable to owners of the parent as capital and manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, Shenzhen EDA may adjust the dividend payment to shareholders or return capital to shareholders. No change was made in the objectives, policies or processes for managing capital during the Predecessor Track Record Period.

Shenzhen EDA monitors capital using the gearing ratio of Shenzhen EDA Group, which is total debt divided by total equity attributable to owners. The gearing ratios at the end of the Predecessor Track Record Period are as follows:

## **Shenzhen EDA Group**
