II. General information and research progress of the New Drug

The New Drug is a chemical drug independently developed by the Group, intended to be used for a rise of blood pressure in adult patients with severe and acute hypotension.

As of April 2024, the Group has invested approximately RMB3.82 million (unaudited) in total in the research and development of the New Drug at current stage.

As of the date of this announcement, Norepinephrine Bitartrate Injections that have been approved to be launched in China (excluding Hong Kong, Macau and Taiwan region for the purpose of this announcement, the same applies below) mainly include Norepinephrine Bitartrate Injections of Grand Pharm (China) Limited, Xi’an Lijun

III. Risk Warning

The New Drug is subject to, among others, the passing of the GMP compliance inspection and the drug registration approval before commercial production. This acceptance of the drug registration application will not have a material impact on the results of the Group at this stage.

Due to the industry characteristics of pharmaceutical products, the specific sales performance after the market launch of pharmaceutical products may be affected by factors including, but not limited to, the demand for medication, market competition and sales channels, etc., and is subject to considerable uncertainty. Investors should take note of the investment risks.
