COMMUNICATION WITH STAKEHOLDERS (CONTINUED)

Stakeholders and engagement methods (Continued)

The business of the Group affects different stakeholders, who in turn have different expectations on the Group. The Group will continuously maintain effective communication with stakeholders, collect opinions of stakeholders through different forms more extensively, and make substantive analysis more comprehensively. At the same time, the Group will enhance the reporting principles of materiality, quantification, balance and consistency, in order to define the content of the ESG Report and presentation of the information that is more in line with the expectations of stakeholders.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE PERFORMANCE

A Environmental

A1 Emission

The financial services and property leasing business segments of the Group did not involve significant discharge of solid waste or sewage, and the type of wastes generated by the Group was mainly non-hazardous domestic garbage. However, the business operations would incur indirect greenhouse gas emission from consumption of electricity while the occasional use of transportation would discharge exhaust gas from fuel combustion. The Group has formulated relevant policies to mitigate the adverse impact to the environment, including the use of lead-free petrol by vehicles for reducing air pollution.

Mitigation against air pollution

For the business segment regarding rental and sales of construction machinery, although the Group does not directly use the construction machinery, it is still striving to align with government policies and to adopt a series of measures to support end users attain better emission performance. The Group procured machinery in compliance with the Environmental Protection Department's regulations pertinent to the emission of non-road mobile machinery, in particular the Air Pollution Control (Non-road Mobile Machinery) (Emission) Regulation (Chapter 311Z of the Laws of Hong Kong), and also continued to phase out older machines. Most of the machines have met the requirements of the EU Stage IIIA or the Japan's Ministry of the Environment. When technically feasible and accepted by the market, the Group prioritized the introduction of construction machinery with better emission performance. At the same time, the Group also regularly maintained those rented construction machineries to ensure their excellent operational and emission performance. Furthermore, for those non-road vehicles newly approved for use in Hong Kong, the Group has accessed the updates from the Environmental Protection Department, and has closely followed up on this latest statutory requirement. The Group has also been adhering with the policies of the Environmental Protection Department to phase out pre-Euro IV diesel vehicles for continued improvement of emission performance.

環境、社會及管治表現

A 環境

A1 排放物

本集團金融服務及物業租賃業務不涉及大量固體廢物或污水的排放，而本集團產生的廢物類型主要是無害的生活垃圾。然而，業務運作會因電力消耗而間接地導致溫室氣體的排放，及偶爾使用運輸工具會排放燃料燃燒時產生的廢氣，因此本集團已制訂相關政策，以減輕對環境造成的不利影響，包括車輛使用無鉛汽油來減少空氣污染。

減少空氣污染

對於建築機械租賃和銷售業務，儘管本集團沒有直接使用建築機械，但仍在努力與政府政策保持一致，並採取一系列措施支援最終使用者獲得更好的排放性能。本集團採購的機械符合環境保護署有關非道路移動機械的排放規例《空氣污染管制(非道路移動機械)(排放)規例》(香港法例第311Z章)，並持續淘汰陳舊機械。大多數機械都符合歐盟IIIA級或日本環境省的要求。在技術可行且為市場所接受的情況下，本集團優先引進具有更好排放性能的建築機械。同時，本集團還定期保養這些租用的建築機械，以確保其優良的營運和排放性能。此外，對於新獲准在香港使用的非道路車輛，本集團已取得環境保護署的最新消息，並密切跟進最新的法定要求。本集團亦一直遵守環境保護署的政策，逐步淘汰歐盟IV前的柴油車輛，以持續改善排放表現。

Mitigation against air pollution (Continued)

During the year, the main direct air emission by the Group was air pollutants generated from fuel consumption by transportation tools. The approximate emission volumes are listed as follows:

Air Pollutant	空氣污染物	Annual Emission Volume (kilogram) 年度排放量(公斤)	
		2023/24	2022/23
Nitrogen Oxides (NOx)	氮氧化物(NOx)	654.9	689.4
Sulphur Oxides (SOx)	硫氧化物(SOx)	1.8	2.0
Particulate Matters (PM)	顆粒物(PM)	59.4	61.5

Control of greenhouse gases (GHG) emission

Apart from the abovementioned air pollutants directly released to the environment, the Group was aware of the sources of GHG incurred from electricity consumption by facilities and emission from fuel consumption.

The table below identifies the total GHG emission from the Group during the year and the associated emission intensity was calculated by dividing the total number of employees in the Group:

年內，本集團主要的直接空氣排放是運輸工具耗用燃料時產生的空氣污染物，其排放量大致如下：

溫室氣體排放控制

除了上述直接排放到環境的空氣污染物外，本集團了解設施用電和燃料耗用也會產生溫室氣體。

下表顯示年內本集團所排放的溫室氣體總量，相關排放密度的計算方法是將排放總量除以本集團僱員總人數：

Note 2: The greenhouse gas emissions intensity was calculated by dividing the Group's total greenhouse gas emission by the Group's average number of employees during the year.

Control of solid wastes

Under normal operation, no hazardous waste was generated in the Group's Hong Kong and China office. The waste generated from these areas were mainly domestic garbage which were non-hazardous in nature.

For managing waste oil generated from maintenance of machinery, the Group has registered with the Environmental Protection Department as a chemical waste producer, and has complied with relevant requirements and guidelines, and entrusted licensed chemical waste collectors to handle waste oils in an environmentally friendly manner for mitigation of environmental impact.

Also, the Group has set up collection facilities for classification of various wastes for subsequent recycling arrangement. This approach in turn supported reduction of waste discharge to the environment.

固體廢物控制

在正常運作下，本集團香港及中國辦事處並無產生有害廢棄物。這些地區所產生的廢物主要是生活垃圾，在性質上是無害的。

為了管理機械維修時產生的廢油，本集團已於環境保護署登記為化學廢物產生者，並遵從有關要求及指引，委託持牌化學廢物收集者以環保的方式處理廢油，減輕對環境的影響。

此外，本集團亦設有收集設施，對各種廢物進行分類，以便日後進行循環再造。另一方面，這種做法可支援減少向環境排放廢物。

Material conservation measures

Amongst office operation of various business segments, the Group encouraged employees to reuse single-sided printed paper for printing on the other side, thereby enhancing paper utilization. In addition, for certain processes, the Group adopted electronic systems to avoid unnecessary printout with the aim to minimize use of papers.

Hong Kong offices of the Group have set up recycling containers to collect waste papers, aluminium cans and plastic wastes which were then conveyed to appropriate parties for recycling arrangements. Furthermore, disposed electronic devices such as computers were also collected by relevant building management offices and conveyed to qualified agencies for subsequent recycling. This approach enhanced effectiveness in use of resources in the long term.

In the business segments of financial services, rental and sales of construction machinery and property leasing, no packaging materials were required in the product and service delivery.

節約能源措施

本集團目標在3年內減少2%能源消耗，並已採取若干措施及做法以實現這一目標。在本集團香港及中國辦事處內，辦公室及店舖區域都採用LED節能燈；空調也設置在適當的溫度，以減少不必要的能源消耗。此外，本集團的採購政策是透過選擇能源標籤，購買高能效的辦公室電器。除了設施控制外，在辦公室內的顯眼位置宣傳綠色資訊或標語，提醒僱員節約能源。

節約用水措施

本集團目標在3年內減少2%水消耗。並已採取各種節約用水措施。在本集團的營運中，辦公室是用水的主要區域。為了避免不必要的耗水，本集團經常建議僱員及時報告任何不正常運作的用水裝置。此外，在辦公室內顯眼位置張貼綠色資訊或標語，提醒僱員節約用水。

A3 Environment and Natural Resources

Amongst the Group's operations, there is no substantial discharge of waste water. The key environmental impacts were mainly related to consumption of fuel, electricity and water as well as emission of gases. For mitigation of the associated adverse impacts, the Group was striving to enhance the utilization in the use of resources, through strengthening electronic operation and file management, and raising environmental awareness of employees.

In addition, the Group implemented various measures to reduce greenhouse gas emission. Within the finance services segment, the Group was aware of the international capital market trend on promoting transition to green economy. This enhanced the market awareness of green finance and the associated green financial products. In addition to actions taken by governments worldwide to encourage the development of green finance, China has set investment funds in a 14th Five-Year Plan and the Hong Kong Government would strengthen the promotion of its advantages in the capital market as well as highlight the conditions for developing green financial products. This background provided an excellent platform for the Company to explore further business opportunities.

For the business segment for construction machinery, the Group closely adhered to the latest requirements from the regulatory authorities. It regularly arranged for employees to attend public sessions held by the Environmental Protection Department and to closely follow changes in the relevant regulations and policies through timely updates of the Group's environmental management policies. Examples include the adherence to the requirements for controlling exhaust emissions from non-road mobile machinery and non-road vehicles, as well as the elimination of pre-Euro IV stage diesel vehicles. These measurements guaranteed that all customers achieved optimal emission levels, thereby minimizing adverse environmental impact on air quality.

For the other office operations within the Group, we endeavoured to prioritize products and services from local suppliers to reduce GHG emissions associated with overseas procurement. Similarly, to minimize GHG emissions from transportation, video or phone conference or other electronic communication tools would be utilized, whenever appropriate, to avoid in-person meeting by traveling.

A3 環境及天然資源

在本集團的營運中，並無排放大量廢水。重要的環境影響主要與燃料、電力和水的耗用以及氣體的排放有關。為減輕相關不利影響，本集團正致力提高資源利用率，加強電子運作及檔案管理，以及提高僱員的環保意識。

此外，本集團更採取了各種措施減少溫室氣體排放。在金融服務領域，本集團意識到國際資本市場向綠色經濟轉型的趨勢。這增強了綠色金融及相關綠色金融產品的市場意識。除了全球各國政府已經採取行動鼓勵發展綠色金融外，中國還確定了「十四五規劃」中的投資基金，香港政府將加強推廣其在資本市場的優勢，並強調其開發綠色金融產品的條件。這種背景為本公司探索進一步的商業機遇提供了一個極好的平台。

關於建築機械業務領域，本集團密切監控，以遵守監管機構的最新要求。定期安排僱員出席環境保護署舉辦的公開會議，透過及時更新本集團的環境管理政策，密切跟進有關法規和政策的變化。這方面的例子包括遵守控制非道路移動機械和非道路車輛廢氣排放的要求，以及淘汰歐盟IV期前的柴油車輛。這些確保所有客戶都能達到良好的排放水平，並盡量減少對空氣質素的不利環境影響。

對於本集團內的其他辦公室運作，我們致力優先考慮當地供應商的產品和服務，以減少海外採購所導致的溫室氣體。同樣地，為了減少因使用運輸所導致的溫室氣體，在適當的情況下，將會採用視頻、電話會議、或其他電子通信工具，避免需要出差的面對面會議。
